CALIFORNIA
NURSERY
COMPANY

H. P. Lake

NILES, CALIFORNIA

To Correspondents

1st. This catalog cancels all previous prices, either in special lists, offers or catalogs. This rule will be strictly observed.

ORDERS

2d. Order early so that you may get the varieties and grades you prefer. All orders should be legibly written on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble and tending to prevent mistakes. Never write on both sides of paper.

QUANTITIES AND PRICES.

3d. The articles in the following list will be furnished at the annexed prices ONLY when the quantity specified shall be taken. Five hundred, however, will be furnished at the thousand rate, fifty at the hundred rate, and five at the ten rate. The absence of a thousand, hundred or ten rate means in each case that the next best rate is the lowest we can make. In no case does this mean so many trees of assorted classes, but refers only to ONE CLASS of assorted varieties; for instance, 5 apples, or 5 pears, or 5 plums, of different varieties, but not 2 apples, 2 pears and 1 plum.

SUBSTITUTIONS

4th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether and to what extent substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of the varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

PACKING

5th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages to the railroad or express offices at Niles.

EXPRESS OR FREIGHT

6th. Always state which way you want your order shipped and give explicit directions for marking packages.

When it is left for us to choose the mode of conveyance, we will exercise our best judgment, but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

GUARANTEE

7th. The California Nursery Company will exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name, the California Nursery Company shall be liable only for the sum paid for the stock which may prove untrue, and shall not be liable for any greater amount.

REPLACING

8th. For the reason that we have no control over the planting, pruning and care of the trees after they leave our hands, we will not under any circumstances replace any trees that may die.

ERRORS AND SHORTAGES

9th. Customers are requested to notify us immediately should any error or shortage occur in filling their orders so we may rectify it at once. Any such claim must be made within one week after receipt of shipment; otherwise it will be assumed that the goods are satisfactory and in accordance with invoice.

C. O. D. AND STRANGERS

10th. Orders from unknown correspondents must be accompanied by the cash or satisfactory reference. Orders to be sent C. O. D. must be accompanied by at least one-half the amount in cash; otherwise they will not receive attention.

REMITTANCES

11th. Remittances may be made by check or draft on San Francisco banks, Express or Postoffice money order on Niles, by registered letter or cash by express prepaid.

WRITE PLAINLY

12th. Always be sure to write your name, Postoffice address and Express or Freight office plainly so no mistake can be made by us.

All communications should be addressed to

CALIFORNIA NURSERY COMPANY,
NILES, CALIFORNIA.

PRICE LIST

Season 1917-1918

ALL PRICES QUOTED ARE NET AT NURSERY, WITH PACKING
ADDED AT ACTUAL COST

INDEX AT END OF PRICE LIST

Fruit and Ornamental Trees

Evergreens, Palms, Shrubs, Roses, Etc.

We present herewith our price list for the coming season. Our nurseries are the most complete on the Pacific Coast. Our shipping facilities are unexcelled both for domestic and foreign business. For many years we have led in introducing and testing, under California conditions, the most promising foreign and other new varieties of fruit. We have in actual bearing here at Niles our own trees of every variety we offer for sale. Probably no other nursery can cut their buds from their own fruiting trees. Our buds and cions are taken from these bearing trees, cut and distributed by one man, making the mixture of variety well-nigh an impossibility. The unequalled reputation which our trees have, not only on the Pacific Coast, but in almost every country in the world, is an indication of the great care we exercise in every detail of our chosen line of work.

All interested parties, whether intending to purchase or not, are invited to visit the nursery, and if we are notified of time of arrival at Niles, by Southern Pacific Railway, and number of persons coming, will have conveyance at station to meet them.

CALIFORNIA NURSERY COMPANY

Fruit Department

Our Nursery Stock is the best that can be grown or money can buy, as evidenced by the First Prize given our exhibit of trees and plants in competition with all at the California State Fair, both in 1912 and 1913. Our exhibit of Fruits, Nuts, etc., also took nine first prizes and two gold medals in 1912, thirteen first prizes and two gold medals in 1913, forty first prizes and gold medal in 1914, and the grand prize for Fruits and Nuts at the Panama-California International Exposition in 1916.

All our Fruit Trees are grown on whole Seedling roots. The advantage of this in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. All two-year-old trees are branched low and are stocky, having been cut down or headed back when yearlings, two feet above ground, except where noted.

All of our Apple Trees and Grape Vines are fumigated with hydrocyanic gas when dug; so are the buds, cions, and cuttings, prior to budding, grafting, or planting out in Nursery. This positively kills any insects that may be thereon, without injury to trees or vines. We have a Fumigating House, with three compartments, so that we can disinfect, at any time, either 50 trees or 10,000.

Although we quote fruit trees by height, it is to be understood that we will include in each grade any trees which are as stocky as the average of that grade, even if they do not fully attain the specified height.

Apple—General Assortment.

Grafted Walnuts

All our grafted walnuts are worked on stocks (seedlings) that have been transplanted and root pruned when one year old. This treatment gives our trees very heavy branched roots. Such trees should not be compared with grafted trees on seedlings that have not been transplanted.

This excellent fruit tree should be in every family orchard. The fruit is acid and very different from all other Mulberries. It makes a better pie than blackberries, as there are no seeds and no core. Mulberries are invaluable for protecting cherries and other fruits, as birds will eat the mulberries in preference. This variety is also valuable to plant in chicken yards for shade and feed. It is practically everbearing.

Ornamental Department

All ornamental trees and plants are named and arranged in conformity with our new Descriptive Catalog (Semi-Centennial Edition). It is profusely illustrated, carefully written and may be depended upon as accurate. For each ornamental tree or plant it gives the botanical name, common name, native country, height attained and concise but sufficiently comprehensive description. Fruit trees are also included.

As it is practically a condensed Cyclopaedia of Horticulture for the Pacific Coast, it is well worth the price charged for it, 25 cents, but we will gladly send a complimentary copy to any customer on request.

PLEASE NOTE

Where size of box is specified, the plants have been dug and established in the box. **Boned** means that the plants are still in the ground, but on account of size will be dug into a box instead of being balled. **Balled** plants have the ball of earth wrapped in burlap and should **always** be planted without removing it. Plant burlap, rope and all, just as it is.

Coniferous Evergreens

This section includes only evergreen conifers. Other evergreen trees and shrubs, usually called "Broad-leaved Evergreens," are listed separately in the next division, commencing at page 15.

Deciduous Ornamental Trees

Please note that all trees in this class over 12 to 14 feet tall are graded and quoted according to their diameter measured at 4 feet above the ground. As a rule, such trees have been headed back to 9 feet and have good heads. With proper handling and after-care there should be little or no loss in using these large trees.

	Diameter in inches	Height in feet	Each	Per 10	Per 100

Roses

It is generally conceded that we grow the best rose plants on the Pacific Coast, which is equivalent to saying that they are not equaled elsewhere.

All plants offered are two years old and practically all are budded. In all cases they have been grown from the start in the open ground, so are strong and vigorous. With any reasonable care they should bloom freely the first season.

Descriptions are greatly condensed. For more complete details, see our Descriptive Catalog.

Late Introductions

75 cents each; \$6.00 per 10

- BRITISH QUEEN** (H. T.). Pure white, unexpanded buds sometimes flushed peach. Open flowers without any trace of yellow. Beautifully formed, with pointed center and reflexed outer petals.
- CHRISSIE MacKELLAR** (H. T.). Orange pink, veined carmine. Coloring entirely unique and difficult to describe. Very free flowering and richly scented. Semi-double.
- C. W. COWAN** (A. Dickson, 1912.). Carmine cerise about like Reine Marie-Henriette. Buds short pointed, opening rather flat. Flowers double, quite fragrant. Not of strong growth, but very free bloomer. Stems long and slender, carrying flowers erect.
- DUCHESS OF SUTHERLAND** (H. T.). Bright rose pink. Buds very long pointed, on strong stems. Very double. Petals veined. Strong grower.
- EDITH PART** (H. T.). Carmine with chamois, flushed pink. Petals two-toned. Very beautiful.
- FARBENKONIGIN.** (Hinner, 1902.). Bright earmine overlaid with silvery gloss. Color deep at base, light toward tips. Petals two-toned. Large and full. Free blooming. Very handsome.
- GENERAL-SUPERIOR ARNOLD JANSSEN** (H. T.). Deep carmine; large, double and well formed.
- HILDA RICHARDSON.** (A. Dickson, 1913.). Milk white, flushed rosy lilac at tips. Entirely different from the ordinary run of roses. Flowers are small or medium, semi-double, opening to saucer shape, with golden yellow stamens very conspicuous. Not at all adapted for cutting, but possessed of a refined, dainty elegance that with its freedom of bloom, unique coloring and delightfully rich fragrance may make it very popular as a garden rose.
- IRISH FIREFLAME.** (A. Dickson, 1913.). Old gold, flushed with pure crimson when fully developed. Buds are very long and slender, beautifully spiral and richly colored a deep orange red, with golden base. The open flowers are quite large, often five inches broad. A further color effect is obtained from the extremely long, wiry, violet-colored stems. Foliage is rich glossy green. Delightfully tea-scented. Remembering the prompt recognition secured by Irish Elegance, it is easy to prophesy a great future for this variety, which surpasses it in every respect.
- LADY DUNLEATH.** (A. Dickson, 1913.). Pale yellow with deep golden center. Not among the big, bold, striking roses, but nevertheless one of the very finest in our collection. It is surpassingly graceful and dainty at every stage. The buds are remarkably long pointed and slender, with noticeably elongated, narrow sepals. Open flowers are cupped and, as the bloom expands, the color greatly deepens. Stems are very long and slender, but strong enough to carry the flowers. Free blooming and delightfully fragrant.
- LADY MARY WARD.** (McGredy, 1913.). "Rich orange, shaded deeper apricot orange, with a decided metallic veining." (McGredy.) His description was borne out in our tests and in addition we found the petals strongly veined carmine. Another perfectly unique color combination. Buds are long pointed; flowers of medium size, with pointed center and reflex outer petals, fairly double and apple-scented. Bears freely. Except for a weak stem, it is splendid in every way.
- MARCELLA.** (Paul, 1913.). Salmon flesh. Buds buff. Large, well formed and handsome. Growth strong and erect. Free and continuous bloomer. Good for cutting.
- MRS. HERBERT HAWKSWORTH** (T.). Creamy white, straw colored in bud. Open flowers globular cup-shaped with tips of petals slightly recurved. Very fragrant.
- MRS. CHARLES HUNTER** (H. T.). Cerise, nearly red. Stems strong. Very free bloomer.
- MRS. MUIR MACKEAN** (H. T.). Ruddy cerise. Buds large and very long pointed. Stems long and strong.
- MRS. CHARLES E. PEARSON.** (McGredy, 1913.). "Orange, flushed red, apricot, fawn and yellow." (McGredy.) Coloring may be said to be intermediate between Lyon and Mad. Edouard Herriot. Buds are pointed; open flowers reflexed-globular to nearly flat, double and faintly fragrant. Growth moderate or rather short. Stems short, but strong, carrying flowers finely. Blooms freely and has a very high coloring.
- MRS. SAM ROSS.** (H. Dickson, 1912.). Flesh, suffused salmon and underlaid with buff. Color hard to describe, but delicate, unique and very pleasing. Flowers cupped, with outer petals slightly reflexed. Best in fall.
- MRS. WALLACE H. ROWE** (H. T.). Bright "sweet pea mauve." Flowers of good size and very well formed. Growth vigorous.
- MRS. CHARLES RUSSELL** (H. T.). Rosy carmine with scarlet center. Color brilliant and pleasing. Flowers beautifully formed and last splendidly when cut. Stems extremely strong, with flowers always borne singly.
- MRS. FREDERICK W. VANDERBILT.** (McGredy, 1913.). "Deep orange red, shaded bronze apricot red" (McGredy). Here it runs more toward a salmon ground, with carmine, yellow and flesh mixed in. Buds are moderately pointed and open flowers very double, of medium size and slightly fragrant. Growth moderate and spreading. Stems short but strong.
- NERISSA.** (Paul, 1912.). Pink, flushed carmine; buds cream, flushed salmon. Coloring resembles Antoine Rivoire. Buds sharply short pointed; open flowers have high center with reflexed outer petals.
- OLD GOLD** (H. T.). Coppery orange. Semi-double. Buds long, slender and pointed. Very fragrant.
- OPHELIA** (H. T.). Salmon flesh, shaded rose, with chamois center. Buds and flowers beautifully formed and color enhanced by rich veining on the petals. Stems long, carrying flowers erect. Could hardly be praised too highly.
- QUEEN MARY.** (A. Dickson, 1913.). Creamy ground, brilliantly penciled and flushed cerise, with an underlying shade of yellow. Combination of colors is wonderful and almost impossible to describe. Buds are long and pointed, with an unusual spiral form and recurved tips. Open flowers are semi-double, loose and spreading, medium sized, fragrant and freely borne.
- RAYON d'OR** (Pernet-Ducher, 1910.). Clear, bright, intense yellow. Buds are coppery orange, slightly flushed carmine, but open flowers have a shade of yellow that is certainly quite distinct from anything else. It is shown off to perfection in contrast with the remarkable foliage, which is a deep, rich bronze green, as glossy as if varnished. Flowers are fairly large, very double, fragrant and borne almost continuously.
- VERNA MACKAY** (H. T.). Fawn, suffused sulphur. Buds very beautifully formed. Fragrance unusually rich.
- WILLOWMERE** (Pern.). Shrimp pink, shaded yellow and carmine. Somewhat like Lyon.

Scarce Varieties

50 cents each; \$4.00 per 10

BIANCA. (Paul, 1913.) Creamy white, tinted peach or sometimes carmine. Moderate size, buds short pointed, double. Fragrance faint. Growth and production very good. Stems long and flowers mainly come singly.

EARL OF GOSFORD. (McGredy, 1912.) Dark crimson, heavily shaded. Growth vigorous. Very fragrant. One of the deepest colored in this section.

GEORGE ARENDS. (Hinner, 1910.) Delicate pink. A large, handsome rose of solid color and good form. Widely heralded as "Pink Frau Karl Druschki," but does not look like a sport from that variety. Growth is so rampant that it could easily be trained up as a climber and maybe should be classed as such.

GEO. DICKSON (H. T.). Deep scarlet, shaded velvety crimson. Color wonderfully rich, especially

in spring. Flowers large and very full. Very fragrant. Growth extremely vigorous, almost like a climber. Moderate bloomer.

JULIET (Pern.). Outside of petals old gold, inside rich rosy red. Remarkably beautiful and striking in bud stage.

MAD. EDOUARD HERRIOT or **DAILY MAIL** (Pern.). Superb coral red, shaded yellow at base, passing to shrimp red. Flowers semi-double and variable in size, sometimes very large. Coloring absolutely unique; different from any other rose ever introduced. The freest blooming rose we grow. Won the Gold Cup offered by "Daily Mail" for best new rose and the Gold Medal of the National Rose Society of England. The greatest rose novelty ever introduced.

General Collection

35 cents each; \$3.00 per 10; \$25.00 per 100.

HYBRID TEA ROSES.

Antoine Rivoire. Silvery flesh with salmon center. Outer petals reflexed.

Augustine Guinoisseau (White La France.) White, faintly suffused flesh pink.

Avoca. Crimson scarlet.

Baldwin (Helen Gould.) Rosy crimson.

Bardou Job. Velvety scarlet, shaded black.

Belle Siebrecht (Mrs. W. J. Grant.) Bright rosy pink.

Betty. Coppery rose, overlaid with ruddy gold.

Captain Christy. Delicate flesh pink.

Chas. J. Grahame. Orange crimson.

Clara Watson. Silvery flesh with deep pink center.

Chateau de Clos Vougeot. Crimson center with fiery scarlet tips. Coloring magnificent. Foliage very dark green. Free bloomer.

***Climbing Belle Siebrecht.** Bright rosy pink.

***Climbing Captain Christy.** Delicate flesh pink.

***Climbing Kaiserin** (Mrs. Robert Peary.) White, faintly suffused lemon yellow.

***Climbing Souv. de Wooton.** Bright crimson.

Dean Hole. Silvery carmine, shaded salmon.

Dorothy Page Roberts. Coppery pink, suffused apricot yellow.

Duchess of Albany (Red La France.) Deep rose, nearly red.

Edward Mawley. Brilliant fiery red. Buds particularly fine and shaded velvety crimson. Free flowering.

Etoile de France. Crimson, cerise center.

Florence Pemberton. Creamy white, suffused pink. Large, full and beautifully formed.

Franz Deegen. Pale yellow.

***Gainsborough.** Creamy pink with salmon center.

General MacArthur. Fiery red.

George C. Waud. Orange vermillion.

Gloire Lyonnaise. White, tinted lemon.

Grace Darling. Creamy white, tinted peach.

Grace Molyneux. Creamy apricot with flesh center.

Gruss an Tepitz (Crimson Hermosa.) Rich scarlet overlaid with crimson.

His Majesty. Vermilion. Buds large and long. Fragrance like the H. P. class.

Hon. Ina Bingham. Pure pink.

Jonkheer J. L. Mock. (Leenders, 1910.) Carmine and flesh pink. Has the wonderful two-toned petal effect shared by but two or three others. The inside of each petal is a soft, pearly blush, while the outside is bright carmine rose. As the flower opens, the outer portion shows the former shade and the high center the latter. Each petal just as it starts to curve away from the center will show both tones in a way that is truly charming. Flowers are large, beautifully formed, very fragrant and borne on splendid, strong, stiff stems. Will rank among the best.

J. B. Clark. Scarlet, shaded crimson.

John Cuff. Carmine pink.

Joseph Hill. Pink, shaded salmon.

Kaiserin Augusta Victoria. White, faintly suffused lemon yellow.

Killarney. Flesh, suffused pink.

La Detroit. Shell pink, tinted soft rose.

Lady Battersea. Cherry crimson.

Lady Ursula. Flesh pink.

La France. Pink, tinted silvery blush.

Liberty. Crimson scarlet.

Mad. Abel Chatenay. Rosy carmine, tinted salmon.

Mad. Caroline Testout. Bright pink.

***Mad. Driout** (Striped Reine Marie Henriette.) Deep rose, striped cherry red.

Mad. Jenny Gillemot. Canary yellow. Saffron in bud.

Madame Leon Pain. Silvery pink, sometimes shaded salmon. Buds pointed; flowers large and cupped. Blooms freely.

Mad. Ravary. Orange yellow, tinted flesh and creamy buff.

***Mad. Wagram.** Pink. Called Climbing Paul Neyron. Lighter in color and smaller.

Marquise de Sinety. (Pernet-Ducher, 1906.) Yellow flushed orange. Buds are very deep golden yellow; pointed. Open flower cupped, with high center. Petals large and crisp. Fragrance rich. Stems very strong, but often curiously curved. Foliage very dark and handsome. Ranks very high.

Melody. Saffron yellow with primrose edges. Flowers medium to large; very double and delightfully fragrant. Foliage dark violet green. Stems splendid. Very free bloomer. Unusually fine in every way.

Milady. (H.T.) Crimson scarlet. Flowers large, full, well formed on strong stems.

Mildred Grant. Silvery white, flushed delicate pink.

Miss Kate Moulton. Pink, tinted silvery flesh.

Mrs. Aaron Ward. Yellow, tinted salmon rose. Very pale in spring, but highly colored in fall. Flowers handsomely formed and carried on strong stems.

Mrs. Arthur Robert Waddell. Orange pink or reddish salmon. Outer petals flesh. Of medium size and semidouble. Very free bloomer.

Mrs. David Jardine. Bright rosy pink, faintly suffused salmon.

Mrs. Geo. Shawyer. Brilliant rose pink, almost solid color. Large, full and well formed. Especially good for forcing.

Mrs. Theodore Roosevelt. Flesh pink; outer petals creamy white.

*Varieties starred are climbers.

Mrs. Wakefield Christie-Miller. Rosy carmine; outer petals soft pearly blush. Buds and flowers extremely large, borne perfectly erect on grand stems. Petals two-toned. Fine in every way.

My Maryland. Bright pink.

Perle von Godesburg. White, tinted creamy yellow.

Pharisæer. Silvery pink, faintly suffused salmon. Petals unusually large and reflexed. Heavy fall bloomer.

Prince de Bulgarie. Silvery flesh, shaded rosy salmon.

Radiance. Soft carmine pink. Flowers large, elongated cup-shaped; very double and sweetly scented.

***Reine Marie Henriette.** Cherry red.

***Reine Olga de Wurtemberg.** Red.

Rhea Reid. Crimson scarlet.

Richmond. Scarlet, lightly shaded crimson.

Rose Queen. Intense pink, slightly yellow at base. Particularly good for cutting.

Souvenir de Wooton. Bright crimson.

Souvenir du President Carnot. Rosy flesh.

Sunburst. Yellow, shaded coppery orange. Large, magnificently formed and richly tea scented. Color light in spring, but very deep in fall.

Viscountess Folkstone. Creamy pink, salmon center.

White Killarney. White.

Winnie Davis. Flesh pink, outer petals silvery blush.

TEA ROSES.

Beaute Inconstante. Coppery red, shaded carmine and yellow.

Bon Silene. Salmon rose.

Bridesmaid. Clear, bright pink.

Catherine Mermet. Pink, shading to amber in center.

***Climbing Bridesmaid.** Pink.

***Climbing Devoniensis.** Creamy white, with blush center.

***Climbing Papa Gontier.** Rosy crimson with carmine center.

***Climbing Perle des Jardins.** Deep golden yellow.

***Climbing Pink Cochet.** An extremely vigorous climbing form of the well-known Maman Cochet. Flowers are identical in every respect.

***Climbing White Cochet.** A strong climbing sport from the popular White Maman Cochet. Flowers identical and borne very freely.

Dr. Grill. Coppery yellow, tinged rose.

***Duchesse d'Auerstaedt.** Light yellow, shading to nankeen at center.

Duchesse de Brabant. Soft rose.

Franciska Kruger. Deep chamois, shaded peach pink.

***Gloire de Dijon.** Fawn, tinted salmon and rose.

Golden Gate. Creamy white, tinted yellow and rose.

Harry Kirk. Creamy yellow with bright amber center. Large and fairly double. Fragrance exceptionally fine. Exceedingly heavy bloomer.

Helen Good. Delicate yellow, suffused pink.

Improved Rainbow. Carmine, rose and flesh.

Ivory. Pure white.

Lady Hillingdon. Deep apricot yellow without shading. Color does not fade and it will deepen even after cutting. New wood and foliage deep violet. The finest yellow rose to date.

Mad. Chedane Guinoisseau. Clear canary or lemon yellow.

Mad. de Watteville. Salmon white, flushed and bordered rose.

Mad. Hoste. Canary yellow with deeper center.

Mad. Lambert. Bronzy rose, tinted salmon and shaded carmine.

Mad. Vermorel. Coppery yellow, shaded rose.

Mad. Welche. Pale yellow with deep orange center.

Maman Cochet. Deep rose pink outside, but very light within.

***Marchal Niel.** Deep golden yellow.

Marie Van Houtte. Creamy yellow, tinted rose.

Marquis de Querhoent. Carmine on flesh or yellow ground.

Miss Alice de Rothschild. Deep yellow center with lighter edges. Flowers of medium size, very full, pointed in bud and cupped when open; with a rich tea fragrance.

Molly Sharman Crawford. Pure white or with a faint greenish tinge.

Mrs. Myles Kennedy. Delicate silvery white, shaded buff, with pink center.

Niles Cochet. Cherry red on outer petals, lighter within.

Niphetos. Nearly pure white; faintly lemon tinged in center.

Papa Gontier. Rosy crimson with carmine center.

Perle des Jardins. Deep golden yellow.

Rainbow. Pink, striped carmine and buff.

Safrano. Saffron in bud, changing to pale yellow.

Sunset. Golden amber with faint ruddy tinge.

The Bride. White, tinged pink on outer petals.

White Maman Cochet. White, with outer petals blushed.

Yellow Maman Cochet. Light yellow, edged rose.

HYBRID PERPETUAL ROSES.

American Beauty. Deep rose.

Anna de Diesbach. Bright pink.

Baroness Rothschild. Pale rose, tinted white.

Black Prince. Dark crimson, nearly black.

Earl of Dufferin. Velvety crimson.

Empereur du Maroc. Very dark velvety maroon.

Fisher Holmes. Scarlet, shaded crimson.

Frau Karl Druschki. Snow white. Sometimes called White American Beauty.

Gen. Jacqueminot. Brilliant red.

Gloire de Chedane Guinoisseau. Bright vermilion red, shaded velvety crimson. Considered by many good judges superior to Ulrich Brunner.

***Gloire de Margottin.** Dazzling red.

Hugh Dickson. Brilliant crimson, tinted scarlet

Jubilee. Deep crimson, shaded maroon.

Mabel Morrison. White; outer petals pink.

Magna Charta. Rosy red.

Margaret Dickson. White with flesh center.

Mrs. John Laing. Shell pink.

Mrs. R. G. Sharman Crawford. Deep rosy pink, tinted pale flesh.

Paul Neyron. Dark rose.

Prince Camille de Rohan. Deep velvety crimson.

Queen of Edgely (Pink American Beauty.) Sport from American Beauty.

Ulrich Brunner. Cherry red. Borne on long stems.

PERNETIANA ROSES.

(Also see Late Introductions and Scarce Varieties.)

Arthur B. Goodwin. Apricot, flushed salmon. Petals numerous and narrow. Very free bloomer.

Beaute de Lyon. Superb coral red, lightly shaded yellow. Buds globular; saucer-shaped when opened. Entirely unique.

Lyon. Shrimp pink with salmon center, shaded chrome yellow. Flowers often very large.

Soleil d'Or. Golden yellow, shaded nasturtium red.

*Varieties starred are climbers.

POLYANTHA ROSES.

- Baby Rambler** (Mad. N. Levavasseur). Practically an extremely dwarf and continuous-blooming Crimson Rambler.
- ***Climbing Cecile Brunner**. Salmon pink.
- Climbing White Pet.** White.
- ***Crimson Rambler**.
- Etoile d'Or.** Light canary yellow.
- Mile. Cecile Brunner**. Salmon pink.
- Perle d'Or.** Golden yellow with orange center.

NOISETTE ROSES.

- ***Cloth of Gold.** Deep yellow center, tinted sulphur toward edges.
- ***Gold of Ophir** or **Ophirie**. Reddish copper, tinted fawn and salmon.

MOSS ROSES.

- Elizabeth Rowe**. Bright pink.
- Etna**. Crimson, shaded purple.

CHEROKEE ROSES.

- ***Cherokee Double White**. See Fortune's White in Miscellaneous Roses.
- ***Cherokee Single White**. White with conspicuous yellow stamens.

IRISH SINGLE ROSES.

- Irish Beauty**. Pure white with prominent golden anthers.

MISCELLANEOUS ROSES.

- Agrippina** (Bengal). Rich crimson. Good hedge rose.
- Austrian Copper** (Austrian Briar). Rich coppery red on upper or inside of petals; yellow on lower or outside.
- ***Banksia Double White**.
- ***Banksia Double Yellow**.
- ***Banksia Single White**.
- ***Climbing American Beauty**. Cerise red. Flowers medium size, double and very fragrant. Vigorous climber. Has little resemblance to American Beauty except in color.
- ***Dorothy Perkins** (Wichuraiana). Shell pink.
- Empress of China** (Bengal). Light pink.
- ***Fortune's Yellow** (Beauty of Glazenwood; San Rafael, etc.). Creamy yellow, shaded orange and rose.

- ***Philadelphia Rambler**. Light crimson.
- ***Tausendschoen**. Delicate pink, shaded rosy carmine. Produces a great mass of bloom in spring. Branches thornless.
- ***Veilchenblau**. Reddish lilac, quickly changing to amethyst and steel blue. The celebrated "Blue Rose" and the only near approach to that color yet attained.
- ***Yellow Rambler**. Flowers are yellow in bud, but nearly white when opened.
- ***Lamarque**. White.
- ***Mad. Alfred Carriere**. Creamy white.
- ***Reve d'Or**. Light yellow, shaded buff.
- ***William Allen Richardson**. Orange yellow.

- Mousseline**. White, shaded rose.
- Pink Moss**. Bright pink.

- ***Pink Cherokee**. Ruddy pink.

- ***Ramona** (Red Cherokee). Cherry carmine.

- Irish Elegance**. Apricot, shaded orange and pink.

- ***Fortune's White**. (Brought from China by Fortune, 1850.) Pure white. Flower of medium size very double and borne profusely in spring only. Considered a hybrid between Banksia and Cherokee, hence often called "Cherokee Double White."
- Gloire des Rosomanes** (Bourbon). Bright red. Better known in California as "Ragged Robin."
- Harrisoni**. Yellow, double.
- ***Moschata Nivea**. Single, in large clusters; white with black stamens; musky scented.
- Persian Yellow** (Austrian Briar). Bright yellow; small but quite double.
- Sweet Briar**. Pink, single flowers and richly scented foliage.
- ***Wichuraiana**. Small, single white with showy yellow stamens. Sometimes called Memorial Rose.

Tree or Standard Roses

Scarce Varieties. \$1.75 each; \$15.00 per 10.

- Lady Hillingdon**. Yellow.
- Lyon**. Shrimp pink.

- Rose Queen**. Pink.
- Sunburst**. Yellow.

General Collection. \$1.50 each; \$12.50 per 10.

- Anna de Diesbach**. Bright pink.
- Baby Rambler**. Crimson.
- Betty**. Coppery rose.
- Bridesmaid**. Pink.
- Catherine Mermet**. Pink, shading to amber.
- Climbing Kaiserin** (Mrs. Robert Peary). White, faintly suffused lemon yellow.
- Climbing Mile. Cecile Brunner**. Salmon pink.
- Climbing Papa Gontier**. Rosy crimson with carmine center.
- Duchesse de Brabant**. Soft rose.
- Empereur du Maroc**. Velvety maroon.
- Franz Deegen**. Creamy yellow.
- Frau Karl Druschki**. White.
- Gainsborough**. Pale flesh.
- General MacArthur**. Fiery red.
- Gloire de Margottin**. Dazzling red.
- Gold of Ophir**. Coppery red.
- Gruss an Teplitz**. Searlet.
- Hugh Dickson**. Brilliant crimson.
- Improved Rainbow**. Mottled carmine, rose and flesh.
- Kaiserin Augusta Victoria**. White.
- Lady Battersea**. Cherry crimson.
- La France**. Pink, tinted silvery blush.

- Liberty**. Crimson searlet.
- L'Ideal**. Coppery rose.
- Madame Abel Chatenay**. Rosy carmine.
- Mad. Caroline Testout**. Pink.
- Mad. Chedane Guinoisseau**. Yellow.
- Magna Charta**. Rosy red.
- Maman Cochet**. Pink.
- Marechal Niel**. Golden yellow.
- Marie Van Houtte**. Yellow and rose.
- Mrs. John Laing**. Shell pink.
- Niles Cochet**. Cherry red.
- Papa Gontier**. Rosy crimson.
- Paul Neyron**. Dark rose.
- Perle des Jardins**. Golden yellow.
- Prince de Bulgarie**. Silvery flesh, shaded rosy salmon.
- Reve d'Or**. Yellow, shaded buff.
- Rhea Reid**. Crimson searlet.
- Sunset**. Golden amber.
- The Bride**. White.
- Ulrich Brunner**. Cherry red.
- White Maman Cochet**. White, outer petals blushed.
- William Allen Richardson**. Orange yellow.
- Yellow Maman Cochet**. Light yellow, edged rose.

Hedge Plants

The following list includes plants suitable for this purpose. Sizes and prices are shown on pages noted below:

Cupressus macrocarpa. MONTEREY CY-PRESS.....	12	Pittosporum eugenioides.	25
Taxus baccata. ENGLISH YEW.....	14	Pittosporum tenuifolium (P. nigricans).	25
Thuja orientalis. CHINESE ARBOR VITAE.....	15	Pittosporum undulatum	25
Buxus. BOXWOOD (various kinds).....	17	Prunus ilicifolia. CALIFORNIA EVER-GREEN CHERRY.....	25
Cotoneaster angustifolia.	19	Pyracantha coccinea. EVERGREEN HAWTHORN.....	26
Laurus nobilis. BAY TREE.....	23	Pyracantha crenulata. CHINESE EVER-GREEN HAWTHORN.....	26
Ligustrum japonicum. JAPANESE PRIVET.....	23	Viburnum tinus. LAURUSTINUS.....	27
Ligustrum ovalifolium. CALIFORNIA PRIVET.....	23	Cydonia japonica. JAPANESE SCARLET QUINCE.....	33
Ligustrum vulgare. ENGLISH PRIVET.....	23	Punica granatum. FLOWERING POMEGRANATE.....	35
Myrtus communis. COMMON MYRTLE.....	24		
Myrtus luma. LUMA.....	24		
Pittosporum crassifolium.	24		

Catalogs

Ornamental and Fruit Trees. Semi-centennial edition of our Descriptive Catalog, combining Fruit and Ornamental Departments. Is entirely rewritten, profusely illustrated and accurate. Being practically a condensed Cyclopaedia of Horticulture for the Pacific Coast, it is of the greatest value to any one interested in trees or plants. Price, 25 cents.

Descriptive Catalog of Fruit Trees. Describes everything in the Fruit Department. Not illustrated. Price, 5 cents.

Price List. This book issued annually and mailed to all customers. Free.

Books

For the convenience of our customers we have arranged to furnish these valuable books at publishers' prices, as quoted below:

California Fruits and How to Grow Them. By Prof. E. J. Wickson.....	\$3 00
American Grape Growing and Wine Making. By George Hussman.....	2 50
Roses and How to Grow Them. By many experts.....	2 00
How to Lay Out Suburban Home Grounds. By Herbert J. Kelloway, Landscape Architect.....	3 00
Soils: How to Handle and Improve Them. By S. W. Fletcher.....	3 00

Decorative Material

Bamboo Shoots

	Per 10	Per 100
10 to 12 ft. long.....	\$2 00	\$18 00
8 to 10 ft. long.....	1 75	15 00
6 to 8 ft. long.....	1 25	10 00
4 to 5 ft. long.....	1 00	8 00

Palm Leaves

California Fan Palm Leaves—		
5 to 6 ft. long.....	\$1 50	\$12 50
4 to 5 ft. long.....	1 25	10 00
3 to 4 ft. long.....	1 00	8 00
Japanese Fan Palm Leaves—		
3 to 4 ft. long.....	\$1 00	\$8 00
Dwarf Fan Palm Leaves—		
1½ to 2 ft. long.....	\$1 00	\$8 00
Date Palm Leaves—		
10 to 12 ft. long.....	\$3 00	\$25 00
8 to 10 ft. long.....	2 50	20 00
6 to 8 ft. long.....	2 00	18 00

In addition to the above, we can usually supply during the autumn months branches of berry-bearing plants such as Cotoneaster, Pyracantha, Hawthorn, etc., also autumn-tinted foliage; in spring, branches of deciduous flowering trees and shrubs in bloom. Data as to available material, prices, etc., will be furnished on application at proper season.

Groups

The following lists include trees and plants grouped according to various characters and for certain special purposes.

Trees and Plants Native to California

CONIFERS

Abies concolor (White Fir)
Abies grandis (Grand Fir)
Chamaecyparis lawsoniana (Lawson Cypress)
Cupressus macrocarpa (Monterey Cypress)
Libocedrus decurrens (Incense Cedar)
Picea sitchensis (Menzies Spruce)
Pinus coulteri (Coulter Pine)
Pinus jeffreyi (Jeffrey Pine)
Pinus parryana (Parry Pine)
Pinus ponderosa (Yellow Pine)
Pinus radiata (Monterey Pine)
Pseudotsuga douglasii (Douglas Spruce)
Sequoia gigantea (Big Tree)
Sequoia sempervirens (Redwood)
Sequoia sempervirens glauca (Blue Redwood)
Thuja gigantea (Giant Arbor Vitae)

BROAD-LEAVED EVERGREENS

Arbutus menziesii (Madrone)
Carpenteria californica
Ceanothus thyrsiflorus (Wild Lilac)
Mahonia aquifolium (Oregon Grape)
Photinia arbutifolia (Christmas Berry)
Prunus ilicifolia (Evergreen Cherry)
Prunus ilicifolia integrifolia (Catalina Cherry)
Quercus agrifolia (Live Oak)
Rhamnus purshiana californica (Wild Coffee)
Rhamnus purshiana tomentella
Umbellularia californica (Wild Laurel)

DECIDUOUS TREES

Juglans californica (Walnut)
Platanus racemosa (Sycamore)

DECIDUOUS SHRUBS

Ribes sanguineum (Currant)
Spiraea californica
Symphoricarpos occidentalis (Snowberry)

MISCELLANEOUS

Washingtonia filifera robusta (Fan Palm)
Yucca whipplei
Pentstemon cordifolius
Romneya coulteri (Matilija Poppy)

Street Trees

BROAD-LEAVED EVERGREENS

Acacia dealbata (Silver Wattle)
Acacia decurrens (Black Wattle)
Acacia melanoxylon (Black Acacia)
Acacia nerifolia (A. florihunda)
Alectryon excelsum (New Zealand Oak)
Angophora intermedia
Camphora officinalis (Camphor Tree)
Casuarina cunninghamii (She Oak; Beefwood)
Eucalyptus (for roadsides)
Grevillea robusta (Australian Silk Oak)
Schinus molle (Pepper)
Sterculia diversifolia (Bottle Tree)

DECIDUOUS TREES

Acer (Maple)—all kinds.
Aesculus hippocastanum (White Horse Chestnut)
Aesculus carnea (Red Horse Chestnut)
Betula alba (European Birch)

Betula alba pendula laciniata
 (Cut-Leaved Weeping Birch)
Catalpa speciosa
Ginkgo biloba (Maiden Hair Tree)
Liquidambar styraciflua
Liriodendron tulipifera (Tulip Tree)
Melia azedarach umbraculiformis
 (Texas Umbrella)
Platanus orientalis (European Sycamore)
Populus deltoides carolinensis (Carolina Poplar)
Pistacia chinensis (Chinese Pistachio)
Robinia pseudacacia (Black Locust)
Robinia pseudacacia decaisneana
 (Pink Flowering Locust)
Tilia platyphyllos (European Linden)
Ulmus (Elm)—all kinds

Trees and Shrubs Bearing Ornamental Red or Orange Berries

CONIFERS

Taxus baccata (English Yew)
Taxus baccata fastigiata (Irish Yew)

BROAD-LEAVED EVERGREENS

Arbutus menziesii (Madrone)
Arbutus unedo (Strawberry Tree)
Aucuba japonica
Cneorum tricoccum
Cornus capitata (Evergreen Dogwood)
Cotoneaster—all species
Eugenia uniflora
Evonymus japonicus and its varieties
Ilex aquifolium (English Holly)
Myrtus ugni
Nandina domestica
Photinia arbutifolia (Christmas Berry)
Pistacia lentiscus
Fyracantha coccinea (Evergreen Hawthorn)
Fyracantha coccinea lalandi
Fyracantha crenulata
Ruscus aculeatus
Schinus molle (Pepper Tree)
Viburnum odoratissimum

DECIDUOUS TREES

Celtis occidentalis
Crataegus cordata (Washington Thorn)
Crataegus crus-galli (Cockspur)
Crataegus monogyna pauli
 (Paul's Double Scarlet Thorn)
Crataegus oxyacantha (English Hawthorn)
Crataegus rubra splendens
Crataegus tomentosa
Sorbus aucuparia (European Mountain Ash)
Sorbus aucuparia pendula

DECIDUOUS SHRUBS

Berberis thunbergii
Berberis vulgaris (Common Barberry)
Berberis vulgaris atropurpurea
Elaeagnus longipes
Prunus tomentosa
Symphoricarpos vulgaris
Viburnum opulus

MISCELLANEOUS

Asparagus cooperi
Asparagus plumosus
Asparagus sprengeri

Trees and Shrubs With Variegated Foliage

CONIFERS

Cupressus macrocarpa variegata
(Variegated Monterey Cypress)
Juniperus chinensis argenteo-variegata
Juniperus chinensis procumbens aureo-variegata
Taxus baccata dovastoni pendula variegata
Taxus baccata elegantissima
Taxus baccata fastigiata variegata
(Variegated Irish Yew)
Taxus baccata washingtoni
Thuja orientalis argentea
Thuja orientalis aureo-variegata
Thujopsis dolabrata variegata

BROAD-LEAVED EVERGREENS

Aucuba japonica variegata
Aucuba japonica maculata mascula
Buxus sempervirens aureo-marginata
Buxus sempervirens elegans variegata
Buxus sempervirens variegata
Coprosma baueri variegata
Coronilla glauca variegata
Daphne odora marginata
Deeringea celosioides variegata
Elaeagnus pungens argentea
Elaeagnus pungens aurea
Evonymus—nearly all
Fatsia japonica variegata
Ilex—all but two
Ligustrum gracile variegatum
Ligustrum lucidum tricolor
Ligustrum lucidum variegatum
Myrtus communis variegata
Nerium oleander "Variegated"
Pittosporum tobira variegatum
Veronica decussata variegata
Veronica speciosa variegata
Viburnum tinus variegatum

DECIDUOUS TREES

Castanea sativa variegata
Sterculia platanifolia variegata
Ulmus campestris variegata

DECIDUOUS SHRUBS

Hydrangea hortensis variegata
Sambucus canadensis variegata

CLIMBING PLANTS

Bougainvillea glabra variegata
Hedera helix variegata

MISCELLANEOUS

Abutilon "Eclipse"
Abutilon "Savitzii"
Abutilon "Thompson's Double"
Aspidistra lurida variegata
Carex morrowi
Coleus
Cortaderia "Variegated"
Fuchsia "Pillar of Gold"
Miscanthus—all
Phormium cookianum variegatum
Phormium tenax variegatum
Senecio kaempferi aureo-maculatus
Zebrina pendula

Hedge Plants

CONIFERS

Cupressus macrocarpa (Monterey Cypress)
Taxus baccata (English Yew)

BROAD-LEAVED EVERGREENS

Buxus japonica
Buxus japonica angustifolia
Buxus sempervirens (Box; Boxwood)
Buxus sempervirens suffruticosa (Dwarf Box)
Cotoneaster angustifolia
Eugenia myrtifolia

Platanus Orientalis
EUROPEAN SYCAMORE; ORIENTAL PLANE

Ligustrum japonicum (Japanese Privet)
Ligustrum ovalifolium (California Privet)
Ligustrum vulgare (Evergreen or English Privet)
Myrtus communis (Common Myrtle)
Myrtus luma
Pittosporum eugenioides
Pittosporum tenuifolium (*P. nigricans*)
Pittosporum undulatum
Prunus ilicifolia (California Evergreen Cherry)
Pyracantha coccinea (Evergreen Hawthorn)
Pyracantha crenulata
(Chinese Evergreen Hawthorn)
Quercus ilex (*Ilex*; Holly Oak)
Viburnum tinus (*Laurustinus* common)

DECIDUOUS TREES

Crataegus oxyacantha (English Hawthorn)
Gleditsia triacanthos (Honey Locust)

DECIDUOUS SHRUBS

Cydonia japonica (Japan Quince)
Punica (Pomegranate)—all

Deciduous Trees and Shrubs Assuming Ruddy Autumnal Tints

TREES

Acer rubrum (Scarlet Maple)
Acer saccharum (Sugar Maple)
Crataegus cordata (Washington Thorn)
Liquidambar styraciflua
Pistacia chinensis
Quercus rubra (Red Oak)

DECIDUOUS TREES AND SHRUBS ASSUMING RUDDY AUTUMNAL TINTS—

Continued

SHRUBS

Berberis thunbergii
Cornus florida (Flowering Dogwood)
Rhus cotinus atropurpurea (Purple Fringe)
Rhus glabra laciniata (Cut-Leaved Sumach)
Viburnum opulus
Viburnum opulus sterile (Common Snowball)

CLIMBERS

Ampelopsis quinquefolia (Virginia Creeper)
Ampelopsis tricuspidata (Boston Ivy)
Ampelopsis tricuspidata atropurpurea

Plants of Low or Medium Growth Suitable for Shaded Locations

BROAD-LEAVED EVERGREENS

Aucuba—all
Azalea indica
Buxus—all
Camellia japonica
Camellia sasanqua
Cotoneaster microphylla
Daphne odora
Daphne odora marginata
Erica mediterranea (Mediterranean Heath)
Fatsia japonica
Fatsia japonica variegata
Hypericum moserianum
Mahonia—all
Michelia fuscata
Pyracantha crenulata
Rhamnus purshiana californica
Rhododendron
Veronica—all

DECIDUOUS SHRUBS

Acer palmatum (Japanese Maple)
Azalea sinensis
Hydrangea—all

MISCELLANEOUS

Aspidistra lurida
Aspidistra lurida variegata
Dicentra spectabilis (Bleeding Heart)
Fuchsia—all
Hibiscus rosa-sinensis
Viola odorata (Violet)
Viola tricolor (Pansy)

Trees and Shrubs Particularly Resistant to Drought

BROAD-LEAVED EVERGREENS

Acacia—all
Agonis flexuosa
Alectryon excelsum (New Zealand Oak)
Angophora intermedia
Angophora lanceolata
Azara microphylla
Buddleia variabilis
Callistemon—all
Cassia—all
Cistus albidus
Eucalyptus—nearly all
Hakea—all
Leptospermum laevigatum
Melaleuca armillaris
Melaleuca decussata
Nerium oleander
Parkinsonia aculeata
Pittosporum phylliraeoides
Spartium junceum (Spanish Broom)

AGAVES, ETC.

Agave—all
Cordylone australis
Dasyllirion—all
Yucca—all

MISCELLANEOUS

Gerbera jamesoni hybrida (Transvaal Daisy)
Malva viscus arboreus (Turk's Cap)
Pelargonium hortorum (Geranium)
Romneya coulteri (Matilija Poppy)

AN AVENUE OF TRUE CEDARS

Suggestions for Planting and Pruning

Ornamentals

In our climate the best time for planting both evergreen and deciduous trees is after the heavy frosts have subsided and sufficient rain has fallen to wet the ground thoroughly. The proper conditions generally obtain during January, February and March. Palms move best in late spring and early summer. The foregoing applies particularly to plants that have to be dug from the open ground; those grown in pots, and also plants established in boxes, can be planted at any time if they receive proper care and attention.

The holes should always be made much larger than merely enough to contain the ball or roots, and then filled in again, putting the best soil nearest the roots. The burlap must **never** be removed from balled plants; it soon rots and cannot possibly do any harm. To remove it is to risk breaking the ball, which usually means the loss of the plant. When plant comes boxed, remove only the bottom at first. After it is in the hole and standing just as it is going to remain, the sides can be taken off and the dirt filled in. If the weather is hot, it is a good plan to let the top of evergreens stay tied up for a few days, which greatly reduces evaporation and helps the tree to get established. Keep the tops well sprayed. In planting deciduous trees and shrubs which are shipped with bare roots, be certain that the dirt is packed and rammed just as tightly as possible around the roots; only on the very surface should the soil be loose. Never put manure in among the roots when planting. It can be spread on top of the ground around the plant, where it will act as a mulch. Used in this way, it is an advantage; putting it in around the roots generally kills the plant.

Deciduous trees should be pruned in proportion to the amount of roots lost in transplanting. The natural shape should be preserved as much as possible. Where a clean trunk is wanted, the lower limbs should be shortened in, but not cut off close. Leave part of these branches so that the new growth may shade the trunk. They can be removed gradually as the tree attains growth. In very hot districts the bare part of the trunk should be shaded on the south-west side by placing a board in the proper position or wrapping it with burlap. Whitewashing the trunk accomplishes the same results. The idea of this is to prevent injury by sunburn, which is usually an invitation to borers to enter the tree.

Most trees should be firmly staked when planted, as this will prevent heavy winds from loosening them and insures a straight growth. This is a very important precaution with both deciduous and evergreen trees and is too often neglected. In fastening the tree to the stake, take pains to do it so the tree will not be chafed or choked by the rope.

Proper planting, while of the very greatest importance, is really only a good start in the right direction. Trees may live if neglected, but they will come very far from attaining perfection. Never let them get dry the first summer. When you water the ground around them, see that it is thoroughly soaked. This is vastly better than giving them a little water continually. The tops will appreciate almost daily spraying during the driest weather. Keep the ground around your plants and trees thoroughly loose and preferably mulched as well. Good stock properly planted and cared for will more than repay all expenditure of time and money.

Fruit Trees

We ship to sections of such diversified climatic conditions that specific directions for general use are not advisable. There are, however, practices to be followed in any and all sections which we will outline briefly.

PREPARATION OF THE SOIL

The ground should be plowed at least twice, and the second plowing should be as deep as can be done, using a subsoil plow. The ground should be well drained so that no stagnant water remains about the roots.

HEELING IN

On receipt of the trees, open a ditch in loose soil, unpack the trees, being careful to shake out all packing material, put in the trench side by side and cover the roots with fine earth, being careful that it is well filtered among the roots to keep them moist. Never heel in in bundles.

PLANTING

The holes should be dug at least eight inches to one foot larger in every direction than required by the roots when spread out in their natural position. The top soil should be broken down from the edge, and raised to a cone in the center of the hole to set the tree on, and the roots then brought to their natural position. While one man is holding the tree, let the other shovel in the top soil, which should be made quite fine, carefully between the roots until covered, then tramp firmly as the filling up progresses; when nearly all filled in, place two inches of fine, loose soil on the top.

The tree when planted may in light soil stand from two to three inches deeper than it stood in the Nursery, but in heavy clay, or wet ground, it is advisable to have it stand at the same height as it was before transplanting.

PRUNING

The tops should be shortened in more or less, depending on size, variety and condition of the trees. In commercial orchards one-year-old trees are cut down from 18 inches to 2 feet above ground, and all side limbs are cut to one or two buds; two-year-old trees with formed tops should be shortened in from 6 inches to 1 foot of main stem.

No summer pruning should be done the first year, strong-growing side limbs on lower part of the tree can be shortened in from 6 inches to 1 foot from stem, so that the leaves left will shade the tree.

SHADING

On account of our long, hot, dry summers, it is well to shade the sunny side of the tree to prevent sun-scald. This will keep the borers out, as they never attack a tree except at a point of injury. The shading can be done with a board or shook, or else with a piece of burlap wound loosely about the trunk. Whitewash is also a good protection, as it reflects the heat.

AFTER CULTURE

The success of the newly planted trees depends on the care received the first three months after planting. The ground should be kept clean, loose and cultivated after each rain. Should the ground be dry and the trees not start well, scoop out a basin around each tree, pour in two or three buckets of water, and as soon as dry fill in the soil again, breaking it up fine to hold moisture.
