PRICE LIST

California
Nursery
Company.

1891-'92.

Niles,
Alameda Co.,
California.

THE NEW AMERICAN GRAPE,
THE PIERCE.

For Description, see page 15.

SEVENTH EDITION.

INCORPORATED, 1884.

500 ACRES.

PRICE LIST

Fruit and Ornamental Trees,
SMALL FRUITS,

EVERGREENS, ROSES, ETC.

California Nursery Co.

NILES, ALAMEDA CO., CALIFORNIA.

Season of 1891-'92. Nov. 15th, 1891.

LOCATION,

One-half mile north of Niles Station,
Central Pacific Railroad.

TELEPHONE CONNECTION FROM STATION TO OFFICE.

SAN FRANCISCO, CAL.

BACON & COMPANY, BOOK AND JOB PRINTERS,
508 Clay and 509 Sansome Streets.

TO CORRESPONDENTS

1st. The articles on the following list will be furnished at the annexed prices *only* when the quantity specified shall be taken. FIVE HUNDRED will be furnished at the THOUSAND rate, FIFTY at the HUNDRED rate, and FIVE at the TEN rate.

2d. Orders should be sent in as early as possible, as it will be our rule to execute them in the order in which they are received.

3d. All orders should be legibly written out on a separate sheet, and not mixed up in the body of the letter, thereby saving us a great deal of trouble, and tending to prevent mistakes.

4th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent, substitution will be allowed, in case the order cannot be filled to the letter, as happens occasionally in all establishments. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

5th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages at the railroad or express offices at Niles.

6th. It is requested that explicit directions for marking and shipping packages accompany each order. When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the forwarders.

7th. As we guarantee the freight on all shipments leaving our establishment, it will be necessary for unknown parties to remit the money with their orders. Orders to be sent by express, C. O. D., must be accompanied by at least one-half the amount in cash; otherwise, they will receive no attention.

8th. Our customers are requested to notify us immediately of any errors that may be committed in filling their orders, so that we may at once rectify the same, as we desire to conduct our business in all respects satisfactorily to those who favor us with their confidence.

9th. Orders from unknown correspondents must be accompanied by the cash, or satisfactory reference.

10th. Remittances may be made by draft on San Francisco, Wells, Fargo & Company's, and post office money orders on Niles, or cash by express, prepaid.

11th. Orders priced at single rates, and not exceeding four pounds in weight, can be forwarded by mail, postage paid, but where possible we recommend having them sent by express, as we are then able to send much stronger and better plants.

All communications to be addressed to

CALIFORNIA NURSERY COMPANY,

Niles, Alameda County, Cal.

SPECIAL NOTICE.

We are not responsible for any one representing himself to be our agent. Those only who can show a certificate of recent date, with our signature and the seal of the Company attached, are authorized to solicit orders for us. We make these remarks, as we know it has heretofore been the practice of unprincipled persons to surreptitiously procure the catalogues and certificates of agency of prominent nurseries, and take orders in their names, which they fill with poor stock bought elsewhere. If our patrons will notify us of any person whom they have reason to believe is not a regularly appointed agent, we shall consider it a favor, and shall deal with the offending party as he deserves.

GUARANTEE OF GENUINENESS.

While we exercise the greatest care and diligence to have all our trees, etc., true to the label, and hold ourselves in readiness, on proper proof, to replace all such trees, etc., that may prove untrue to label, free of charge, or to refund the amount paid, it is mutually understood and agreed to between purchasers and ourselves, that our guarantee of genuineness shall in no case make us *liable* for any sum greater than that originally paid us for said trees, etc., that prove untrue.

REMARKS.

WE TAKE PLEASURE in again submitting to the consideration of our friends and the public generally our **Price List** for the coming season, feeling certain of our ability to please all kindly favoring us with their orders.

OUR STOCK has made a good growth, and is absolutely free from all injurious insects, diseases and defects.

OUR ASSORTMENT of varieties is complete in every class, and embraces everything both in the **Fruit and Ornamental** departments most worthy of cultivation.

A CORDIAL INVITATION to visit our grounds is extended to all.

OUR NURSERY can be reached from **San Francisco** by boats leaving **Market Street Wharf**, and connecting with trains for **Niles** at 7:30, 8:30 and 12:00 A.M., and 3:00 and 4:30 P.M. From **Sacramento** and all points north and south, by train leaving **Sacramento** at 11:20 A.M. From **San Jose** and its southern connections by train leaving there at 7:45, 9:25, 11:10 A.M., and at 1:15 and 5:45 P.M.,

Very truly,

CALIFORNIA NURSERY CO.

Nov. 15th, 1891.

HINTS ON TRANSPLANTING.

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line ; yet we are so frequently asked for advice in this way, that we have concluded to offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots, when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fibre, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery ; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, we have found it beneficial to shade the sunny side of the tree with a board or shake stuck in the ground a few inches away from it, for the first two or three years. The tops should be shortened in more or less, in proportion to size and variety of tree, and condition of roots.

A work, " California Fruits and How to grow Them," by Prof. E. J. Wickson ; the " Raisin Industry," by Prof. Gustav Eisen ; and " Grape Culture and Wine-making," by Geo. Husmann, will be found very useful to all horticulturists, written as they are for this Coast, and by authors of wide local experience.

DISTANCES FOR PLANTING.

Standard apples.....	25 to 30 feet apart each way
Standard pears.....	20 to 25 " " " "
Strong-growing cherries.....	20 to 25 " " " "
Duke and Morello cherries.....	18 to 20 " " " "
Standard plums and prunes.....	18 to 20 " " " "
Apricots, peaches and nectarines.....	18 to 20 " " " "
Grapes.....	7 to 10 " " " "
Currants and gooseberries.....	4 by 6
Raspberries and blackberries.....	3 to 4 by 5 to 7
Strawberries for field culture.....	1 to 1½ by 4 to 4
Strawberries for garden culture.....	1 to 2 feet apart

Number of Trees or Plants on an Acre at Given Distances Apart.

RULE—SQUARE METHOD.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

RULE—EQUILATERAL TRIANGLE METHOD.—Divide the number required to the acre " square method " by the decimal .866. The result will be the number of plants required to the acre by this method.

PRICE LIST

— OF —

CALIFORNIA NURSERY CO.

SEASON 1891-92.

Prices quoted herein are for quantities and sizes specified; for extra sizes, varieties or quantities other than mentioned, special prices will be charged.

For Index, see last page of Catalogue.

Grapes—American, “The Pierce” (New)	1 00			
A sport from Isabella, originating some twelve years ago with Mr. J. P. Pierce, of Santa Clara. The foliage is remarkably large,				

	Each.	Per 10.	Per 100.	Per 1000.
and the vine an exceedingly strong grower and prolific bearer. The berries, like the leaves, are of extraordinary size, twice as large as those of its parents, black with light bloom, and when ripe are exceedingly sweet, delicious and slightly aromatic, the pulp readily dissolving. Mr. Pierce has had it in cultivation under every condition, and it has remained constant, showing no indication of running back to the parent. The entire crop of two acres has been shipped to San Francisco by Mr. Pierce for the past six years under the name of <i>Isabella Regia</i> . and always realizes the highest market price. We have arranged with Mr. Pierce for the exclusive right to propagate and distribute this valuable new grape, and now offer it for the first time.

Evergreen Trees and Shrubs.

Nearly all the trees mentioned under this heading have been once or more transplanted, thereby greatly adding to the certainty of their growing. In order also to reduce the amount of soil and consequent freight charges, we have grown those varieties most in demand in pots. In shipping to distant points this is especially desirable. Unless otherwise specified, all will be taken up with balls.

ROSES.

The plants offered below are extra strong, have been grown entirely in the open ground, average in height from eighteen inches to three feet, and can be shipped in a dormant state from November to March. They require no nursing, like the small plants grown under glass in three months' time, and sold at low rates. Varieties marked with a star (*) can be had budded in tree form (*Standards*) on a single stem, three to four feet high.

Special lists of such varieties as we cultivate in pots for summer planting will be issued April 1st of each year, and will be furnished on application. In all cases we would advise parties ordering Roses to have them forwarded by freight or express, when possible, as we can then send much better plants than if sent by mail.

New Rose for 1891.

Waban (Tea-Scented).—A sport from Catherine Mermet; the most popular of all winter-flowering Roses. Flowers borne on long, strong stems, in form somewhat larger than Mermet; color carmine pink (and when we say carmine we mean all that the word implies); color increasing in intensity towards the ends of petals. Reflex petals more delicate in color, but shaded stronger towards the edges. This is a gem in every way, and one that is sure to become one of our most popular varieties. \$1.00 each.

New Roses of 1890.

In this class we offer ten of the choicest recent productions. They were selected with the greatest care, and are undoubtedly the best from all sources. We take pleasure in calling special attention to our own California production, the "Rainbow," as something entirely distinct. Price, 75 cts. each; any three varieties, one of each, \$2.00; any five, \$2.75; or the entire set, one of each, for \$5.00.

Augustine Guinoisseau (White La France).—A sport of La France. In growth it is the same as La France or Duchess of Albany, even stronger and more free blooming than those varieties. In color it is white, shaded with a very light but bright pink.

Clotilde Soupert (*Polyantha*).—One of the most prolific bloomers in our entire list, and admirably adapted to pot culture; beginning to flower when not over 4 inches high, and continues without intermission the entire season, if kept in a healthy, growing condition. The flowers are borne in sprays, very double, and handsomely formed; the outer petals are pearl white, shading to a center of rosy pink, but varying sometimes on the same plant from pure white to deep silvery rose. A grand bedding variety.

Duchess of Albany.—This magnificent New Hybrid Perpetual Rose is undoubtedly one of the finest of recent introductions. The color is a lovely

rich shade of amber pink, similar to but much deeper than La France. The flowers are much larger and more expanded, very double, and full and exceedingly sweet.

Lady Stanley.—This new French Tea Rose is a fine robust grower and very free bloomer; buds are long and pointed; flowers extra large, very full, double and sweet, and of good substance, lasting a long time after cutting; color, a beautiful shade of chamois red or rich crimson, lightened with terra cotta.

Madam Hoste.—This is an exceedingly beautiful New Everblooming Tea Rose, extra large flowers, and superb buds, very full and delightfully perfumed; color, soft canary yellow, deepening at center to pure golden yellow, beautifully flushed with pale amber; edges and reverse of petals rich creamy white.

Meteor.—New Everblooming Tea Rose. Color, rich velvety crimson, very bright and striking; the flowers are large and regular, fully double and well borne up. It is a constant and profuse bloomer, and very fragrant. We recommend it with full confidence that it will give great satisfaction.

Mrs. John Laing.—An elegant New Constant Blooming Hybrid Perpetual Rose. One of the very finest of its class; color, clear, bright pink, exquisitely shaded. The buds are long and pointed, the flowers extra large and full, and borne on long stems, and exceedingly sweet.

Rainbow.—The color of this lovely rose is a deep Mermet pink, striped and splashed in the most fanciful way with rich Gontier color; just sufficient of this color to add greatly to its beauty. The base of the petals is of a rich amber. The flowers are well carried on long, stiff stems of the same general character as those of the Papa Gontier, but are most decidedly larger, sweeter, of greater substance, and of greater productiveness.

Sappho (New Tea Rose).—Buds fawn color, suffused with rose, the opening flowers shaded yellow and tawny buff, centers deep, bright yellow; large, full and globular. It produces blooms with extraordinary profusion, even for a Tea Rose. The petals are large and of much substance. A splendid Rose to keep after being cut. This we commend as being one of the prettiest and sweetest Roses ever brought before the public. Certainly grand. It has our highest praise.

The Queen.—The Queen is a vigorous, healthy grower, and one of the heaviest and most continuous bloomers we know. The flowers are large, full and well filled; color, pure snow white and very sweet. A remarkably early forcer; makes fine buds; opens well, has plenty of substance, and is a good keeper. It is considered by all who have tried it one of the most valuable pure white everblooming Tea Roses for all purposes.

Roses of 1889.

The varieties mentioned under this heading were selected as the best of the various lists recently sent out by the most celebrated Rosarians of Europe and elsewhere, who claim for them great improvement in form, and new effects in shade and coloring. Price, 60 cts. each; any three

varieties, one of each, \$1.50 ; any five, \$2.25 ; any ten, \$4.00 ; or the entire collection, one of each variety, \$12.00. Standards, \$1.50 each.

Choice or Scarce Roses.

We include in this list the scarce and valuable sorts, the most choice of the introductions of recent years, together with some of the older and finest Roses, which, owing to the difficulty in their propagation, are still scarce. All have proven themselves of the greatest excellence, and have already reached the highest point in the estimation of the most fastidious lovers of this noble flower. No collection can be considered complete without each and every variety in this class. Price, 50 cts. each ; any three varieties, one of each, \$1.40 ; any five, \$2.25 ; or the entire set, one of each for \$4.00 ; Standards, \$1.25 each.

Our Select List.

This set of twenty sorts, ten Tea or Everblooming varieties and ten Hybrid Perpetuals, contains only the very best of the old standard kinds, such as have been thoroughly and extensively tested, and which by their unsurpassed beauty, and general good qualities under all circumstances, have become popular favorites. Planters unacquainted with the different varieties and the necessities of each cannot make a mistake in ordering from this list, as they can always feel certain of the ultimate results being to their entire satisfaction.

Price, 35 cents each ; any three varieties, one of each, \$1 ; any five, \$1.50 ; any ten, \$2.75 ; or the entire set of twenty sorts, one of each, for \$5. Standards, \$1 each.

TEA OR EVERBLOOMING.

*Bon Silene,	*La France,	*Sou. de la Malmaison,

*Empereur du Maroc,	*John Hopper,	*Paul Neyron,
*Fisher Holmes,	*Magna Charta,	*Ulrich Brunner.
*General Jacqueminot,		

General Collection of Roses.

The varieties embraced in this class are all good, well known, reliable sorts for general planting. Among them will be found many kinds which some very good judges of Roses consider equal to, if not better than many of the higher priced varieties. It is certain, however, that no disappointment can result from planting any of them, as all, in one way or another, will amply repay the expense and attention bestowed upon them. All have stood the test of time, and are yet considered worthy, and even necessary, to make the choicest collection of the Queen of Flowers complete.

Price, 30 cents each; any three varieties, one of each, 85 cents; any five, \$1.25; any ten, \$2.25; any fifty, \$10.00; or the entire collection, one of each, for \$35.00. Standards, \$1.00 each.

TEA ROSES.

Aline Sisley,	*Homere,	Madame Remond,

Champney,	ters,	Superba.
	Lillian Hill Beauty,	

BANKSIA.

White,

Yellow.

Miscellaneous Roses.

In this group we have placed together those Roses of which we do not grow enough varieties to warrant a special heading for each class. The classes to which they belong, however, we have marked in brackets after each variety, for the information of our customers. All are noted for some distinct and prominent peculiarity not to be found in any other rose, and as forming a fitting addition to a complete collection they cannot be overlooked.

Price, 50 cents each ; or entire set, \$3.00.

Belle des Jardin (Provence), Perle des Panaches (Provence), Jaune Bicolor (Austrian), Rose Villosa (Apple Rose), Oeillet Flamand (Provence), Sweet Briar or Eglantine, Single Cherokee, Rugosa Alba, Rugosa Alba Plena, Rugosa Rubra.
