Special list,

GARDENSIDE NURSERIES INC

SHELBURNE

VERMONT

** ORDER THESE NOW **

These following kinds of plants are those which are dormant in midsummer and for which orders should be placed at this time. Delivery will be made at the proper season or at any specified time so far as possible. But we must have your orders NOW to be sure of our supply.

Iris and Peonies both of which are fully listed in our annual, should be purchased now. Iris will be shipped during July. Peonies after September 1; but if you order now while plants are in bloom, you are more sure to get the desired varieties.

Also to be found in the Annual Catalog--another will gladly be sent you if you have mislaid yours--are the native Dicentras (Squirrel Corn & Dutchman's Breeches), Trilliums, Blood Root, Virginia Saxifrage, and the Cypripediums and other Orchids. Many of these are now past blooming and will be ripening off soon. Some should be planted at once, and others are better not put out until later or even next Spring. But as they are usually collected to order only, if you tell us now of your needs, we can be sure to have them later when you want them.

Cyclamen neapolitanum is now dormant. It flowers in the fall and if planted now will be ready to start with the fall rains. Give it a high and dry location, in stony gravelly soil, a little lime and leaf mould. We have wintered it outside, in Vermont.

Corydalis bulbosa is also ready now. This is fine with the Native Dicentras. Mertensias are almost ready. So are Poppies of which we have plenty of the new double Olympia and the popular pink sort, Mrs. Perry.

The new Day Lilies (Betscher Hemerocallis) are beginning to flower and we like them better and better. With these new sorts, flowers are available from June to September. They are still scarce and you should reserve plants now for September delivery.

Violas Jersey Gem, White Gem, and Apricot--in September we shall again have plenty of field and pot plants of these. Put them out at that season for early bloom next spring. Prices are as in the Spring List, and it is a fine time to plant them. Edge all your beds with them this year.

Delivery is included in all prices and if quantities larger than we offer are needed, we will gladly quote special rates. If we can advise as to your needs we will be glad to do so.

CALOCHORTUS

These are the Mariposa tulips of California. The separate colors and types that we catalogue are all of the Globe Tulip, or the Star Tulip sections. They flower here in late May and until July, and are very fine. The true Mariposa or Butterfly Tulips are offered only in mixture but they have wintered and are flowering.

Plant them in soils that are well drained and quite gritty, if necessary adding sharp sand. Leaf mold helps, and slight shade during the heat of the day is also beneficial. Place 2 to 3" deep and, for best effects, 2" apart, though in the rockery they may be used as scattered specimens. Plant as soon as received.

Albus: Fairy Lantern. White

Amabilis: Rich yellow.

Benthami: Bright yellow.

Lilacinus: Lilac.

Any of the above, 60¢ for 10 of one kind,
\$5 per 100.

Mixed Star and Globe Types, 50¢ for 10, \$4 per 100

Mixed Mariposa or Butterfly Tulips, 60¢ for 10, \$5 per 100.

COLCHICUM

The Meadow Saffron of old stories, and commonly called Autumn Crocus, from their resemblance to that flower. The foliage appears in early spring and dies away. In autumn the large flowers appear, lasting for several weeks. Very fine. They are ready in July, and until September.

Autumnale: Lavender flowers in September. \$3.50 for 10

Autumnale Album: White form of the preceding. \$4.50 for 10

Bornmulleri: Rosy Lilac. Very large and early. One of the best.
75¢ each, \$6 for 10

CROCUS

The true fall-flowering types of Crocus are often confused with the Colchicums, but they are totally distinct. They are again plentiful and should be used for late color in the rockery or garden. Suitable for the border or the edges of woodland or shrubbery, they are at their best among tufty growing Sedums, Arenaries, Veronicas, or pushing through carpets of Thyme. Plant them in quantity, as you would spring sorts, and get a color effect to recall all winter.

Sativus: Purplish flowers with a rich orange stigma. Plant 1" deep.
\$1.50 for 10, \$10 per 100

Speciosus: Foremost in size and splendor of all the family. Flowers lilac feathered darker. Plant 3" deep. \$1 for 10, \$9 per 100

Zonatus: A lovely and hardy form with lavender flowers having a yellow eye banded with orange. Fine for early forcing. \$1 per 10
\$9 per 100

ERYTHRONIUM

A family of American bulbs that has never been appreciated. The western forms grow easily and flower regularly. We have had no trouble with them here, and those we have are rarely beautiful. A woodland plant, they are best set in large beds in partial shade; but will grow in the open border. We give only a slight covering of litter on light soils.

All Erythroniums, 15¢ each, \$1 for 10
\$7.50 per 100, except where noted.

Albidum: A white form from Michigan and Wisconsin.

Americanum: Adder's tongue. Large, yellow flowers and beautiful spotted leaves appearing in the very early spring.

Californicum: This and the following are from the West Coast. Cream colored flowers, often four or five to the stem.

Citrinum: Cream and lemon flowers.

Grandiflorum robustum: Buttercup-yellow.

Hendersoni: Lavender.

Johnsoni: Rose-pink. The finest form of all.

Revolutum: White and lavender.

Mixed: All the above sorts and others, \$5 per 100

LYCORIS squamigera

Ameryllis halli: This interesting plant makes a strong, leafy growth in spring, then dies down. In late midsummer a stem grows with great rapidity and bears a cluster of showy pink flowers which are very fine. Strong bulbs, \$1.25 each, \$10 for 10

NARCISSUS SPECIES

The following species are finely fitted for rockery planting, and are best used only for that purpose. They are not at all plentiful, and we are fortunate to have a reliable source of supply. Orders should be placed as early as possible as stocks are apt to be exhausted

Bulbocodium conspicuus: Hoop Petticoat Daffodil. 50¢ each, \$4 for 10

Jonquilla simplex: Single Jonquil. 15¢ each, \$1.25 for 10

J. Plena: Double Jonquil. 15¢ each, \$1.25 for 10

Salpinctes: A dwarf Leedsii with white, perianth and salmon-tinted cup; fragrant. Very fine and quite scarce. 50¢ each, \$4 for 10

The Pearl: Small and very double white perianth and yellow center. A little gem. 50¢ each, \$4 for 10

William Goldring: Swan's-neck Daffodil. A very early, pale yellow, drooping flower. Easily established and makes good clumps. 50¢ each, \$4 for 10

W. P. Milner: Miniature white perianth and trumpet. Similar to Bulbocodium but much more permanent and free blooming. 50¢ each, \$4 for 10

TULIP SPECIES

A number of the small Tulip species are so admirably fitted for the rockery that we urge everyone to try a few. The following list is plentifully available. All are early, charming, and colorful.

- Clusiana: Lady or Candy-stick Tulip. Violet-pink with white margin, inner petals pure white. A small, graceful, pointed flower. Extra good and forces easily. 80¢ for 10, \$7 per 100
- Eichleri: Crimson-scarlet, black center, \$2.50 for 10, \$20 per 100
- Florentina odorata (sylvestris). A native of England. Pale yellow sometimes with red edgings; extremely fragrant. \$1.25 for 10 \$10 per 100
- Greigi: Brilliant orange-scarlet--a dazzling color. \$3.50 for 10
- Kaufmanniana: Very large, creamy white flowers with carmine reverse, on 8" stems. \$4 for 10
- Marjoletti: Pale yellow, shaded carmine-red at the base. A small flower of very attractive color. Blooms in May. \$1.25 for 10, \$10 per 100

LILIES

It is not yet time to dig Lilies. In October we lift them and make deliveries or we will gladly hold them over for Spring '32 shipment. But now they are flowering here and we can know what we have to offer in flowering size bulbs. A later folder will describe them more fully. But your advanced orders placed now for delivery whenever you wish will enable us to be sure to supply you.

All of the following will be available this fall in strong flowering size bulbs, grown here at Shelburne.

L. Auratum	50¢ each	\$4.50 for ten
L. Canadense	25¢ each	\$2.25 for ten
L. Candidum	35¢ each	\$3.00 for ten
Small home-grown bulbs	15¢ each	\$1.25 for ten (in July)
Order this Lily <u>now</u> as it must be planted in September.		
L. Carolinianum	50¢ each	4.00 for ten
L. Cernuum	80¢ each	\$7.00 for ten
L. Columbianum	50¢ each	\$4.00 for ten
L. Croceum	40¢ each	\$3.50 for ten
L. Grayi:	75¢ each	\$7.00 for ten
L. Longiflorum formosum	35¢ each	\$3.00 for ten
L. Pardalinum	40¢ each	\$3.50 for ten
L. Philadelphicum	35¢ each	\$2.25 for ten
L. Princeps	\$5.00 each	
L. Regale	35¢ each	3.00 for ten
L. Sargentiae	50¢ each	5.00 for ten
L. Superbum	40¢ each	\$3.50 for ten
L. speciosum rubrum	50¢ each	\$4.50 for ten
L. speciosum magnificum	50¢ each	\$4.50 for ten
L. Tenuifolium	30¢ each	\$2.50 for ten
L. Tenuifolium Golden Gleam	60¢ each	\$5.00 for ten
L. Tigrinum	25¢ each	\$2.00 for ten
L. Tigrinum flore-pleno	25¢ each	\$2.00 for ten
L. Umbellatum	25¢ each	\$2.00 for ten

LIST

Our interest in Adonis, in Anemones of the Spring Flowering type, in Heucheras and in Trollius, has caused us to go to unusual lengths to get new sorts and to grow them in quantity. Of the Adonis as yet we have but one variety, of Anemone only five.

Of Heucheras we offer seven named sorts, all carefully rogued while in bloom and true to name. They may be used in the garden for borders and being all alike they serve splendidly for that purpose. All are showier in flower than the old seedling sorts and as rock garden specimens they are very fine.

Named Trollius vary greatly in height, in flowering season, in color, and size of bloom and for garden massing they make unrivalled color shows in early spring. As specimens they are so much better than seedlings as to be well worth the extra cost.

All of these plants are limited in quantity and few can be obtained elsewhere. Order them now for September delivery. Orders will be filled in strict rotation, but shipment can be made at any desired date this fall. Spring orders not accepted. All prices are postpaid and remittance should accompany order.

ADONIS

Adonis amurensis flore plena: This adonis grows about 1' high and flowers in early May. The foliage is finely divided, the flowers resemble dandelions and are often greenish, especially, in partial shade. Fine for deep soil in rockery, but disappears in mid-summer. 50¢ each, \$4.50 for 10

ANEMONE

- Anemone magellanica: An upright species similar to the Snowdrop Anemone, but the flowers are a pale sulfur yellow. 30¢ each \$2, ten
- A. pulsatilla: Pasque flower. A beautiful spring flowering plant with large hairy bells of soft blue. Likes a deep soil, well drained not too hot in summer. 30¢ each, \$2 for 10
- A. pulsatilla rubra: A red form of the preceding. The color is striking and the habit erect and strong. The flowers are not as large as in the type. 30¢ each, \$2 for 10
- A. sylvestris: Snowdrop Anemone. This erect white flowered sort is one of the best and it thrives anywhere. A clump is fine planted before evergreens or shrubs. Grows 2' high and soon makes a large plant. 30¢ each, \$2 for 10
- A. vernalis: An early flowering sort, dwarf and very hairy with pale purple flowers. Scarce and rare. 50¢ each, \$4.50 for 10

HEUCHERA

- Heuchera-Cascade: A very strong growing sort with light pink flowers on 2' stems. 50¢ each, \$4.50 for 10
- H.-Edge Hall: One of the best pink Heucheras with very large flesh pink bells and prominent yellow stamens. 12-18" tall \$1 each
- H.-Flambeau: A striking variety with brilliant red flowers. 18-24" tall. 50¢ each, \$4.50 for 10

- H.-La Perle: A very dark red sort, good strong growth and healthy foliage. 18 to 24". 50¢ each, \$4.50 for 10, \$35 per hundred.
- H.-Pluie d'feu: A literal translation of this name would be "Fire-rain" and it fully describes the multitude of bright fiery red flowers on the loose graceful spikes. An extremely fine sort. 18 to 24" tall. 50¢ each, \$4.50 for 10
- H.-Robinsoni: This variety we found in a Vermont garden and purchased the one plant. It is a charming eight pink and white flowered sort, the stem only 8 to 12" high and the foliage miniature. A gem for the rockery and offered for the first time. 75¢ each.
- H.-Rosmondi: Pleasing coral pink flowers on stems about 12 to 18" high. A very good pink sort. 50¢ each, \$4.50 for 10

A COLLECTION OF ONE EACH OF THE ABOVE 7 HEUCHERAS
WILL BE SENT POSTPAID FOR \$3.25.

We also have the following species:

- H. Americana: Valuable for its foliage, and as a plant in the wild garden. Tall stems of greenish white flowers. 30¢ each, \$2, ten
- H. Brizoides: A supposed hybrid, with bronze leaves and pretty red shaded flowers. 50¢ each, \$4.50 for 10
- H. sanguinea: The common sort, raised from seed. Varied shades of red and pink. 30¢ each, \$2 for 10
- H. sanguinea alba: White form of the preceding. 30¢ each, \$2 for 10

TROLLIUS

- Trollius Canary Bird: A pale yellow sort, strong growing and soon making a large plant. It is one of the finest sorts for cutting. 50¢ each, \$4.50 for 10
- T. Earliest of All: Light orange yellow and as the name implies very early flowering. It often flowers again later in the season, with us. 50¢ each, \$4.50 for 10
- T. Eleanor: A fine yellow variety, flowering profusely in midsummer. 50¢ each, \$4.50 for 10
- T. Empire Day: New very early variety, extremely large and fine. Light orange yellow flowers with orange stamens. \$1 each
- T. Excelsior: A strong growing form much inclined to give a good second bloom if cut down after flowering. Orange red flowers. 50¢ each, \$4.50 for 10
- T. Fire Globe: Bright orange, semi-double flowers. 50¢ each, \$4.50, ten
- T. Golden Gleam: A fine golden yellow sort. \$1 each.
- T. Her Majesty: One of the best with very large, round, orange yellow flowers. 50¢ each.
- T. Lichtball: Extra large globe shaped flowers of orange yellow on strong stiff stems. Fine for cutting. 50¢ each, \$4.50 for 10
- T. Loddigesi: Goldenball Trollius. This is an extremely fine golden form of europaeus which maintains a close round shape until the flower fades. 50¢ each, \$4.50 for 10
- T. Orange Globe: A profuse bloomer of robust growth. Very fine large orange flowers. This is the true variety. 2' high. 50¢ each.

A COLLECTION OF ONE EACH OF THE ABOVE TROLLIUS WILL
BE SENT FOR \$6 POSTPAID.

We also have good stocks of the following species, mostly
raised from seed and in some cases, quite variable in color.

- Trollius asiaticus: Usually bright orange single blooms with prominent
stamens. 35¢ each. \$3 for 10
- T. europeus: True strain of the light lemon yellow Globe Flower
selected from seedlings and propagated. 50¢ each, \$4.50 for 10
- T. europeus Seedlings: Which may vary in color but will be mostly
lemon yellow. 35¢ each, \$3 for 10, \$25 for 100
- T. sinensis: This variety is quite distinct. It flowers in mid-June
or later. Strong plants 2' high. The blooms are light yellow
flat, and two inches or more across. Its lateness alone recom-
mends it, and its good habits and color are bound to make it
popular when better known. Our stock is true to name but compar-
atively limited. \$1 each, \$9 for 10
- T. Yunnanensis: The true prostrate Trollius with glistening leaves
and large yellow flowers. It is not as easily grown as the others.
We think of it as a rockery plant. \$1 each.
