TOMATO

Livingston's New Coreless FOR 1908

The most perfect shaped canning variety ever produced. Large globe shape, full at stem, bright red, a strong grower and a big cropper.

We have been growing this grand variety for a number of years, and by careful selection have so fixed the type, that in a plot containing about 1000 plants, grown on wire trellis in 1907, not a single plant showed "off color," and very few, any objectionable variation as to shape.

We have not had a variety in years which we believe has greater promise, especially with canner's trade, than this one. We can see no good reason why the growing of almost all red varieties could not be abandoned with profit in favor of the New Coreless.

The two distinctive features which stand out most prominently are, great depth from stem to blossom; and the depression at the stem has been almost entirely eliminated. We cannot conceive of a more perfect fruit—one which has so little waste. We have endeavored to show up these features in our illustrations.

WE ENCLOSE condensed descriptions, which will be found convenient in making up "copy" for catalogues.

We hope to be favored with an order from every catalogue man in the trade. Tomatoes are universally grown. The seeds are great sellers, hence profitable for catalogue purposes, and this new one cannot fail to satisfy the most exacting grower.

We expect to push the sale of the Livingston's "Coreless" Tomato in 1908, and believe this will help the sales of it, with all who list it.

Let us have your orders early, to prevent delay in getting the half-tones when wanted.

To The Catalogue Man

THE FOLLOWING DESCRIPTIONS WILL BE FOUND CONVENIENT TO USE IN GETTING "COPY" READY FOR CATALOGUE.

NEW TOMATO

Livingston's Coreless

The most perfect shaped Canning variety ever produced.
Large size, globe shaped, full at stem end, bright red, a strong grower and big cropper.

Here is another one of those magnificent globe shaped tomatoes—the new type that is fast superceding the old flat and wrinkled varieties.

To the Livingston's of "TOMATO FAME" belongs the credit of introducing this entirely new type. In 1905 they sent out the Livingston's Globe, an early globe shaped purple; in 1907 the Livingston's Hummer, an early globe shaped bright red, and this season the Livingston's New Coreless—a large, main-crop, globe shaped bright red variety, which will be a strong competitor with all old varieties for canner's and catsup maker's trade.

All markets requiring a bright red sort will be pleased with the Livingston's New Coreless. In shape it is almost round, being of about the same diameter each way as shown in our illustration. The depression at the stem end has been almost eliminated, making it the most profitable variety for canning, owing to a very small amount of loss in material and labor. It is immensely productive, clusters of four to seven fruits are produced at six to eight inches apart along the stem. All of the fruits are of marketable size, and many of them are quite large, twelve to fifteen ounces. Always free from green core. A grand, good slicing variety; the seed cells being surrounded by bright red, heavy, meaty and delicious flesh, which is slightly more acid than the Livingston's Globe. Its color, that bright rich red so important to all packers of high grade goods and doubly so now that the law forbids the use of coloring matter.

The strong outside and inner walls of flesh of the Livingston's Coreless render it a very firm fruit and one of the best for long distance hauling or shipping. Ripens all over and through and right up under the stem, all at the same time.

The Livingston's are very enthusiastic over this new variety, and feel sure it will take the place of many varieties now used for canning and catsup making, not even excepting their good old Stone, as soon as enough seed can be produced and the price fixed at sufficiently low figure to warrant general planting.

Every Canner, Market Gardener or lover of good tomatoes certainly cannot miss it in trying liberally, a variety so strongly endorsed by the Livingston's. Offered this season in packets only.

PACKET 20c; 3 PACKETS 50c; 7 PACKETS \$1.00.
