Description of Livingston's New Globe Tomato

Livingston's Globe Tomato. Electro No. 2.

For the past seven or eight years we have been working on this variety, our aim being to get something decidedly good along certain lines, notably in its distinctly different shape from all other varieties. We started with an elongated (from stem to blossom end) fruit—one as far removed from the flat shape as possible. We did not, however, lose sight, for a moment, of any of the other good points which have entered into the make-up of all of our other varieties. Now we have in the "Livingston's Globe" an extra good all round sort, of distinct globe shape, with quite a large percentage of elongated fruits. It is a very beautiful variety, and, on account of its shape, one that permits of a greater average number of slices to be taken from each fruit.

In time of ripening we class it among the first earlies, being among the first to ripen fruit both in our greenhouses as well as our field trials, along with many other varieties. The fruits are of large size, and a good marketable size is retained throughout the season; always smooth, of firm flesh and has few seeds; ripens evenly; color, a fine glossy rose, tinged with purple, and without the slightest hint of yellow at any stage of ripening. An exceedingly productive variety, having plants with many short joints at which large clusters containing three to seven fruits are almost invariably formed, so that it can be truthfully stated the plants are literally loaded with fruit. It is a remarkably good keeper, none of the many varieties we grow surpassing it in this respect—not even the

everlasting-keeping Peach varieties. In quality there is nothing more to be desired, being mild, pleasant and of delicate flavor; unsurpassed for slicing or to eat from the hand.

For greenhouse growing, or for early growing on stakes or trellises, which is now so much in vogue, it is second to none of the purple sorts with which we are acquainted; and we aim to try all promising varieties as they are offered.

First-class as a general field cropper. It is so firmly fixed in its characteristic features that it was difficult to discover any variation in our 1904 crops. Every grower who invests in a packet will find it a new variety, not one that has simply been given a new name, and will not be disappointed in it; the

Livingston's Globe Tomato. Electro No. 3.

market gardener who buys several packets will be pleased and well repaid, as the beautiful and attractive globe shaped fruits will find ready sale.

We bespeak for the Livingston's Globe a great future, for, in our judgment, it will at once become a popular variety with tomato growers of every class.

New Tomato, Livingston's Globe.

This is another new variety originating with the Livingstons, of Tomato fame. This fact of itself should warrant any one in giving it a trial.

In shape it is notably distinct from all others, being a beautiful globe, with quite a goodly percentage of elongated (stem to blossom) fruits. See illustration which gives a fairly good idea of its shape. This peculiarity permits of a greater number of slices to be taken than is possible with flat varieties. It is among the first to ripen; fruit of large size, and a good marketable size is maintained throughout the season; always smooth, firm fleshed, and has very few seeds, especially in the early fruits; ripens evenly, through and through; a fine glossy rose in color, tinged with purple; very productive, the plant is always loaded with fruit, as it has joints at frequent intervals and each joint produces large clusters of from 3 to 7 fruits. A remarkably good keeper; especially adapted to slicing or eating from the hand as the flavor is very delicate and agreeable. A good general cropper and will be found well fitted to greenhouse growing or for real early crop on stakes or trellis. The type is well established, any important variation being difficult to detect. Every grower of Livingston's New Globe will find in it strictly a new variety and one of great practical value. Those who grow tomatoes to sell will be pleased, as the beautiful and attractive globe-shaped glossy red fruits will sell readily at the top price. Seed offered in packets (40 seeds) only this season. Each, per packet, 20c.; 3 packets, 50c.; 7 packets, \$1.00.

Tomato, Livingston's New Globe.

The fact that this is another new tomato, originating with the Livingstons, of world-wide tomato fame, will be sufficient to warrant most growers of fine tomatoes to give it a liberal trial. It is of beautiful globe shape, with quite a percentage of elongated (stem to blossom) fruits, which permits of a greater number of slices being taken than with flat fruited sorts. Among the very first to ripen, although of large size, very smooth, firm fleshed, few seeds, ripens evenly; color a beautiful glossy rose, tinged purple. Flavor very delicate and agreeable; splendid slicing variety. The fruit is borne on short jointed, branching plants in great abundance—literally loaded with fruit. A good general cropper, and one of the very best for greenhouse growing or first early crop on stakes or trellis. An entirely distinct and fixed new sort. Every grower of Livingston's New Globe, whether he grows for private or market purposes, will be pleased with the beautiful and attractive globe shaped fruit. Offered this season in packets of 40 seeds each. Per packet, 20c.; 3 packets, 50c.; 7 packets, \$1.00.

EXPRESSIONS OF OTHERS.

MR. FRED WINDMILLER, Ohio, a market gardener of large experience, says:

"Your New Globe Tomato should find its way into every garden in the country on account of its excellent table qualities—being, without exception, the best to eat from the hand or sliced of any that have come to my notice. It combines meatiness, scarcity of seed, convenient size, attractive shape and pleasing taste to such an extent that it ranks with fruit, rather than vegetables. An excellent forcer, where its excellent quality will bring fancy prices."

MR. L. C. SMITH, an extensive grower of tomatoes for 20 years past,

After careful examination of a crop growing on our True Blue Seed Farm the past season, says: "You have a good thing, sure, in this variety. It is new, distinct, and will become popular with all classes of tomato growers. I will grow some of it the coming season."
