AUTUMN PLANTING 1944

Flowerfield* *Presents*

In this, our 70th year, we again offer you the finest bulbs and plants grown in America. We guarantee these bulbs and plants—guarantee them to reach you in good condition, guarantee them to grow, and guarantee them to be the best value you can obtain anywhere.

With each order, we send complete cultural instructions. Necessary to new gardeners, these concise planting and cultivating hints will be a helpful memory refresher to those who have long enjoyed the pleasure of flower gardening.

Our prices are postpaid. There will be no extra charges on any of the bulbs or plants listed in this catalog. Remember this when comparing prices—and remember, too, that it takes just as much time and effort to take care of a poor plant as it does one of Flowerfield's sturdy, healthy ones.

Fall planting is smart co-operation with nature. She shows a marked preference for the fall planting of many things. Naturally, fall planting gives your garden a decided headstart next spring. Plants become well established and vigorous before the dormant winter season sets in. In short, fall planting is just good common garden sense—that's why we have included in these pages only those things which are best planted then.

ORDER NOW

Stock on many items is scarce this year,
and we recommend early ordering to be sure
of reserving the varieties you want.

Flowerfield Finest Mixed Daffodils

An unrivaled assortment of the very finest Daffodils, selected from our lists and from new named varieties of which we have too few to list. We guarantee the utmost satisfaction with this mixture, whether for garden show, table decoration, or general garden beauty.

Double-Nosed Bulbs Three 50c, Doz. \$1.50

Daffodils for Woodland Naturalizing

Assorted types for planting where color rather than individual bloom is desired. Not to be confused with our regular Daffodils, as these are smaller, less striking blooms that are noted, more for their background effect rather than for their individual excellence.

GARDEN COMPANIONS

for "Easy Gardening"

We offer this plan as a suggestion to the gardener for "Easy Gardening." Now more than ever, the need is felt for plants that can and will take care of themselves. Succession of bloom can be accomplished through careful choice of garden material. Certain plants that bloom at the same time are natural garden companions. What a pleasure to find them each year carrying on with little care. For your convenience and help, we suggest these fundamental plants for a solid framework upon which to build the garden castle.

*The Best are
the Cheapest*

Every one of our Double-Nosed No. 1 Daffodil bulbs will send up at least two flowers, often more, whereas the single-nosed "round" bulbs commonly offered can hardly ever make more than a single flower. You will save money with Flowerfield's strong double-nosed Daffodils because you will get twice as many flowers from the same number of bulbs.

FOUR MAIN CLASSES OF DAFFODILS

Daffodil classification has long been a bone of contention among horticulturists. The most workable system so far has been the classification of the Royal Horticultural Society of London, whose definitions and terms we use.

We have attempted to simplify these classes even further by grouping certain of the classes together, by generally descriptive terms. Thus we list certain of the new giant Leedsi Daffodils on this page with the Trumpets, for their use and their appearance are most similar.

KING ALFRED

IN SHADY NOOKS

Daffodils combine beautifully with Virginia Bluebells. See page 22.

AEROLITE

Aerolite Three 60c, Doz. \$2.15
The large flower is beautifully proportioned, giving the impression of gracefulness, despite its size. One of the longest lasting of all Daffodils in the garden or after being cut. Pictured at left below.

Alasnam Three 65c, Doz. \$2.25
Wide, short, densely frilled trumpet of pure deep yellow, a shade deeper than the perianth; finely placed with a good neck; very early.

Beersheba Each \$2.75, Doz. \$30.00
The perianth and trumpet are of magnificent proportions. Its color is almost pure white, expressive of purity in the highest sense. One of the very finest of Daffodils.

Diotima Each 60c, Doz. \$6.50
Of great size, yet gracefully proportioned, carrying tremendous flowers on tapering 2-foot stems. The broad overlapping petals form a huge star-shaped perianth of deep primrose.

King Alfred Three 70c, Doz. \$2.50
In truth a king among Daffodils. A huge trumpet and perianth; often measures four inches or more across. Pictured at left.

La Vestale Three \$1.00, Doz. \$3.50
A pure ivory-white perianth, of informal design, with trumpet of deep cream-yellow. Tall and fine for small groups or naturalizing.

Lord Wellington Three \$1.75, Doz. \$6.00
One of the largest and finest of the deep yellow Trumpets, with flowers of rich golden yellow, of fine even texture, and no trace of coarseness. The perianth is broad, and the trumpet is beautifully long and full, slightly frilled at the edges. One of the best introductions in years.

Mrs. E. H. Krelage Three \$1.25, Doz. \$4.50
Often called the "White King Alfred" and indeed a fitting companion. Pictured at right.

SILVER STAR

DAFFODILS (Including Giant Leedsi Daffodils)

Roxane Each \$1.50, Doz. \$17.50
A very large white trumpet of most perfect shape. The only rival to Beersheba in the pure white class.

Spring Glory Three \$1.00, Doz. \$3.50
A great favorite, both for the garden and for forcing. Pictured below at right.

Tresserve Three 60c, Doz. \$2.15
One of the leaders among the new giant Trumpets; deep canary-yellow with a pale perianth, the segments of which reach forward about the trumpet, producing a flower of distinct individuality; the trumpet mouth, 2 inches across, is deeply lacinated.

Named varieties in a glorious profusion of bloom.

GIANT LEEDSI DAFFODILS

SNOW KING

Double Daffodils

Albus Plenus Odoratus Three 40c, Doz. \$1.45
Famous as the Gardenio-Flowered Narcissus, and indeed a striking variety. Pure white flowers of almost exactly gardenio form and shape, with a fragrance unequalled in any other Narcissus, rivaling the true gardenia in intensity. Plant in moderate shade and water well to prevent flower buds from drying up in late spring heat.

Cheerfulness Three 55c, Doz. \$2.00
Deliciously fragrant flowers borne in clusters of three or four on strong, stiff stems. Even as few as four or five of these lovely Daffodils will fill a small flower vase. Pictured on opposite page.

Twink Three \$1.00, Doz. \$3.50
A double of the semi-full type, the petals alternating a soft primrose and clear orange, and so arranged as to give the flower a most attractive appearance. It is a most adaptable flower for large scale decorative work, very free flowering and hardy.

MOONSHINE

DAINTY SHORT-CUP DAFFODILS

BARRI TYPE

Bath's Flame Three 40c, Doz. \$1.45
Yellow perianth and a deep yellow cup with broad edge of orange-red. The petals are very long, giving the flower a distinct and outstanding character. A perfection in scarlet and gold, on long stems.

Diana Kasner Three 50c, Doz. \$1.75
A beautiful Daffodil, pictured below. It forces indoors quite easily, and is most desirable because of its sharp colors.

Firetail Three \$1.00, Doz. \$3.50
Popular the world over; broad petaled creamy white perianth and large orange cup with scarlet-orange frill, similar to Diana Kasner.

Mrs. Walter Brewster Three 50c, Doz. \$1.85
A fine reflexed perianth of pure white, setting off the flat cup, lemon-yellow edged with oxblood-red; a fine lasting flower in the garden or as a cut flower indoors. One of the very best.

POETICUS TYPE

Just as the Daffodil season is about to close, the Poet's Narcissus, loveliest and sweetest of all, comes into bloom and gives us another two weeks of Daffodil time. Their flowers of immaculate white have a pure, simple beauty that appeals to all. The petals are sharply defined, forming a perfect corona for a center "eye" of gleaming scarlet.

Glory of Lisse Three 40c, Doz. \$1.45
Extremely broad overlapping petals, recurving from typical pheasant's eye cup; a larger Ornatus, unsurpassed for naturalizing.

Ornatus Three 40c, Doz. \$1.45
Quite flat saffron cups margined with deep orange-red. Perianth petals purest white. Blooms are freely produced, making it an excellent garden and naturalizing variety.

Recurvus, Pheasant's Eye Three 40c, Doz. \$1.45
The old, original Poet's Narcissus, and still the favorite of many. Perianth pure white with reflexing eye margined deep orange-red. It flowers after all the other Daffodils have faded.

Snow King Three 50c, Doz. \$1.75
The finest of the Poeticus. Pictured above.

DIANA KASNER

Many - flowered Daffodils

JONQUILLA TYPE

Narrow, rush-leaved Narcissus with golden flowers of distinct formation and intense fragrance. There are many flowers to a single stem, and always more than two stems to a bulb.

Campernelle, Single Three 40c, Doz. \$1.45
Elegant rushlike foliage and clusters of bright yellow, fragrant flowers with a deep, lobed cup. Height 18 inches. Valuable for border decoration and wild plantings.

Golden Sceptre Three 45c, Doz. \$1.60
A hybrid of the Campernelle and a Giant Trumpet. Has all the free flowering habit of the Jonquil, carrying as many as four or five flowers of Giant Trumpet shape, with all the grace, and some of the fragrance of the Jonquil.

Odorus, Orange Queen Three 50c, Doz. \$1.85
A very striking variety, two to three flowers on a stem, color intense golden orange, with the cup very prettily fluted. Flowers produced in greatest profusion.

TRIANDRUS HYBRID TYPE

Moonshine (Pictured at left) Three \$1.00, Doz. \$3.50
One of the most delightful surprises in your garden full of Daffodils. Despite their extreme grace, these beauties are not small, usually being 18 to 20 inches tall, on round, dark green stems. Imagine their use in an artistic arrangement!

DAFFODILS for the HOME

POLYANTHUS NARCISSUS

Unexcelled for forcing indoors, growing easily in pebbles and water or potted in a sandy loam. Even a single bowl of half a dozen bulbs will brighten an entire room, giving off a sweet, intense fragrance unequalled by any other winter bulb. These bulbs are not winter hardy outdoors.

Paper-White Grandiflora

Three 50c, Doz. \$1.75

FLOWERFIELD CHOICEST TULIPS

Since the over-running of Holland, first-rate Tulips have been exceedingly hard to obtain. There have been some American-grown bulbs, and these, bulb for bulb, have proven every bit as good as the Dutch bulbs. But our complaint has been in the varieties offered, which have been mostly florists' varieties.

Flowerfield is more than proud to present a list of varieties of Darwin Tulips that rivals anything offered before the war. We have garnered these at great effort and high cost, both in time and money, but believe our endeavor has been truly a worth-while one.

Below, we list what we consider to be the outstanding novelty Tulips offered in America today.

Allard Pierson

A rich deep crimson-maroon of fine stature and proud carriage. An excellent variety for early forcing, keeping its brilliant color even when grown under glass. 30 inches. Illustrated.

Three \$1.00, Doz. \$3.50

Black Eagle

Cup-shaped flowers of great size and of rich, brilliant, intense deep purple that is particularly striking when in the full rays of the sun. The anthers are pitch-black, the base is deepest blue. An outstanding Tulip. 29 inches.

Three 90c, Doz. \$3.25

Campfire

One of the last imports from Holland before the war; a fine new blood-red Tulip of excellent habit. 26 inches.

Each 50c, Doz. \$5.50

City of Haarlem

The finest brilliant scarlet Tulip, with perfectly huge, cup-shaped flowers of intense dark scarlet. Base steel-blue with white halo. The petals of this superb variety incurve slightly. 31 inches.

Three \$1.00, Doz. \$3.50

Fantasy

Striking Parrot Tulips, blooming in May, with flowers commonly measuring 6 inches across, often larger when well grown in rich soil. The dominant color is the same delightful pure salmon found in Darwin Tulip, Clara Butt, of which it is a sport. This is heightened and enlivened with a glorious suffusion of rich rose, in some seasons almost assuming a true reddish tone. Waxlike petals are heavy and thick, deeply crinkled, fringed and laciniated at the edges and crusted in the centers. Backs of the petals are marbled with delightful pale green. Truly a most distinctive Tulip. 22 inches.

Three \$1.00, Doz. \$3.50

Giant

Deep plum-purple, with the dusky reddish overtone of a rich, ripe plum. Dark, handsome flowers of enormous size on long stems, occasionally throwing more than one flower to the stalk. One of the best. 31 inches. Illustrated.

Three 80c, Doz. \$2.95

Gloria Swanson

A lovely clear red beautifully set off by a pure white interior base. The very large flowers are carried splendidly on tall, strong stems. 30 inches.

Three \$1.00, Doz. \$3.50

Exceptionally large and exceptionally bright in the garden, this brilliant orange Tulip is truly outstanding. It contains Cottage blood and is graceful as are all of Cottage lineage. 24 inches.

Three 80c, Doz. \$2.95

Helen Eakin

Sometimes known as White Perfection and indeed justifying the title. A beautiful Tulip. 26 inches.

Three \$1.25, Doz. \$4.50

Jeanne Desor

A strikingly beautiful hybrid whose graceful shape proclaims its Cottage parentage, yet which bears the strong, stiff stem and bold flower show of the Darwins. An unusual color combination, each orangy yellow petal bearing a broad scarlet border. 28 inches.

Three \$1.00, Doz. \$3.50

John Ruskin

Glittering salmon-rose edged soft lemon-yellow and with a yellow base. The flower is large, carried well on a graceful stem. A Cottage type, extremely useful in the foreground. 20 inches.

Three 80c, Doz. \$2.95

Lilac Wonder

A most unusual and beautiful hue, pure porcelain-lilac with a clear white base. A fine addition to any Tulip garden; unexcelled among the light blue shades. 26 inches.

Three 80c, Doz. \$2.95

Louis XIV

Immense goblet-shaped flowers that, when first open, are dark bluish violet, with dusty over-bloom, and edged with golden brown. As the season advances, the bluish tone becomes brighter and more intense, in marked contrast to the golden edge, which also brightens to a more vivid hue. 32 inches.

Three 80c, Doz. \$2.95

Mrs. F. E. Dixon

Of immense size, yet artistic in form, the softly colored, sulphury yellow blooms are carried upright on strong, stiff stems. The petals have a waxlike texture, giving them better substance than almost any other Tulip. 28 inches.

ZIMMERMAN

Giant Darwin and Hybrid Tulips

Of recent years constant inter-breeding of Darwin and Cottage Tulips has produced the newer hybrid Tulips, of which Carrara and Dido are such excellent examples. These Hybrids are identical to the Darwins in size and shape of flowers, as well as habit of growth, so that it is best to consider them as one class, with a color range including almost every known shade and tint. The true Breeder and Cottage Tulips have their own special use in the garden, and are offered separately.

Darwin and Hybrid Tulips have large cup-shaped flowers, growing on stems from 24 to 32 inches tall. All flower in mid-May, and give a glorious display for two weeks or more. Plant them 6 inches deep and 6 inches apart.

ZWANENBURG

The flower is most handsome and is held straight and high on splendid stems. For your evening garden, for contrast, or just because you love white Tulips, here is the finest you can buy.

HARDY LILIES

Lilies in the garden strike a note of majestic and graceful dignity. Originally collected from the mountains and prairies of our country and from far-off corners of the world, they vary greatly in flower, time of bloom and cultural requirements. Flowerfield offers an exceptional group of the finest Lily varieties, outstanding in the unusual colorings and exotic charm they bring to the garden. Their steady progression of bloom from June to late September is a delight to all.

REGALE LILY

Regale Lilies

Well known as the Regal or Royal Lily, there is no Lily that bears a more beautiful or more penetrating perfume. A single stalk of this lovely flower will pervade the entire room if allowed to stay there but a few hours. The tall stalks, 4 to 5 feet high, are topped by beautiful trumpet-like flowers that are pure white inside and tinged with rose outside, increasing the splendor of their garden effect. Of all the Lilies, the Regale is perhaps the most satisfactory for garden use here in America. It grows sturdily, prolifically, and beautifully. The Regale Lily is very floriferous, a single established bulb bearing as many as 20 flowers during the season. Like all the other stem-rooting Lilies, Regale should be planted deep, allowing at least $3\frac{1}{2}$ times the diameter to cover the bulb. Also in common with other Lilies, it demands drainage, yet must have moisture, too. A handful of sharp sand or gravel underneath the bulb will satisfy this small requirement. And the results will indeed reward you for the trouble taken.

Each 35c, Doz. \$3.50

MADONNA LILIES

Madonna Lilies (Candidum)

This is the universally known and loved Madonna Lily, one of the most beautiful of all white Lilies that grace the garden. As shown in the picture, the Madonna Lily has a heavy cluster of pure, pristine white, trumpet-like blooms, borne $3\frac{1}{2}$ to 4 feet high on sturdy, attractively foliaged stalks. Candidums bloom in late June and early July and have traditionally been combined with the darker blue forms of Delphinium—an effect that has never failed to excite gazes of admiration. Here at Flowerfield we have combined them with Blue Giant Iris Koempferi, a deep blue Iris of extreme beauty. The effect is truly lovely.

Lilium Candidum is best planted in August and September, for unlike other Lilies, it starts its leaf growth early in the fall, producing a rosette of leaves that protect the plant through the winter. Plant them in a sunny, well drained spot in ordinary garden soil. They require shallow planting only, with the top of the bulb only an inch or two beneath the surface.

Each 75c, Doz. \$7.50

We also have available a limited supply of mammoth double-nosed bulbs, giving two or more flower spikes each.

Auratum Lilies

The Golden Rayed Lily. The largest and to many people the most popular of the entire Lily family. The Auratum Lily often grows to five feet tall with individual blooms measuring as much as ten inches across. These August-blooming flowers are intensely and beautifully fragrant, and grow in tremendous clusters atop their sturdy stalks. Plant Auratums deep—3½ times their diameter, for they are stem-rooting and need this protection. They insist on a well drained location, preferably acid.

Speciosum Lilies

Of all the choice garden Lilies the Speciosum are the best known and best liked of the recurved type. Tall, sturdy plants carry their well branched sprays of magnificent, delicately scented flowers. Even the foliage is decorative, for the stems are most gracefully curved and the leaves are long and handsome. The reflexing flower petals are of thick, heavy substance and stand up beautifully as a cut flower and likewise last a long time in the garden. Speciosum Lilies are easily grown and are one of the most satisfactory Lilies from a decorative point of view that can be put in any garden. It thrives in full sun, flowers in August and September and demands little in the way of attention other than an occasional watering during dry spells.

Stem-rooting, the Speciosum Lilies must be planted deep in the soil, 9 inches or more. Good drainage should be provided, and also ground-shading plants near the bulbs, for this Lily dearly loves to have its roots shaded. The Speciosum types love good rich earth, and have but two dislikes: lime and fresh manure, neither of which should be used with these beauties.

MAGNIFICUM

Each \$1.25, Doz. \$12.50

A cream-pink with a light edge and vivid crimson speckles. As shown in the picture, the petals recurve characteristically and are somewhat fluted on the edge. The form and color are exquisite. It has few rivals in beauty.

Sunset Lilies

(Pardalinum)

Known also as the Leopard Lily, this is a truly American variety, developed on the Pacific Coast. Vigorous, hardy and of quite easy culture. Grows up to 6 feet tall with strong canes bearing clusters of flowers. The orange-red, recurved, "Turk's Cap" flowers are dotted with brown spots. They bloom in July and are happy in either sun or partial shade.

SCILLA CAMPANULATA

Trout Lilies

(Erythroniums)

These charming hardy American bulbs will produce lovely shades of white, cream, yellow, pink, rose, and purple in your woodland or shady place plantings. They thrive in woodland, under shrubs, in shady nooks, or in crevices of the rockery. The lily-like flowers nod gently in April, on stems 6 to 7 inches high, above distinct, attractively mottled foliage. Plant them 4 inches deep and 2 to 3 inches apart.

Californicum Bicolor (Helenae)

Doz. \$1.25

As its name signifies, has two vividly contrasting colors. The outer half of the petals is pure white, the inner bright chrome-yellow, while the stamens are a rich gold. All Erythroniums have a faint fragrance, but "Bicolor" has a pronounced and delicious fragrance, enough so that from a few sprays the fragrance is noted across a room and from a bed in the open instantly catches one's attention. It is an exceptionally good grower. Altogether one of the very best of all.

Citrinum

Doz. \$1.25

Is rather more erect in habit, with flowers almost pure white with strongly contrasting deep citron on lower third. One of the loveliest of all.

Hendersoni

Doz. \$1.35

Like Californicum, but the flowers are a lovely light purple, with centers of deep maroon, almost black. Most striking.

Revolutum

Three 70c, Doz. \$4.50

The stems are long, the flowers large and tinted exquisite soft pink. The leaves are attractively mottled in white and green. The plants thrive in garden loam and do well in heavy, wet soils, even in the coldest places here in the East.

Finest Mixture

Doz. 95c

Lily-of-the-Valley

Ideal for shaded locations, growing in spots unsuited for almost anything else, bearing each May sprays of pure white bells, measuring 6 to 8 inches in height. Best to plant clumps, setting them 1 foot apart. When the beds fill in solidly they may be dug and reset. The most desirable soil is a rich sandy loam, enriched by a fall top dressing of well-rotted manure and leaf mold.

SHADY PLACES

LYCORIS - The Mystery Lily

Sometimes referred to as the Hardy Amaryllis, the Lycoris (Squami-gero) is one of the most unusual and most beautiful of flowers. The attractive green foliage appears early in the spring and flourishes until July, when it matures and disappears. Suddenly in early August the flower stems appear, growing rapidly to a height of 2 to 3 feet and burst into a lovely cluster of opalescent pink blossoms. Excellent for full sun, the Hardy Amaryllis grows even taller in partial shade. They are perfectly hardy and soon multiply to a large clump. Plant them in the fall for best results, 5 inches deep.

Each \$1.50, Doz. \$16.50

LYCORIS

MUSCARI, HEAVENLY BLUE AND DAFFODIL, EMPEROR

Muscari (Grape Hyacinth)

Heavenly Blue

Doz. 75c

The well known and most deservedly popular Grape Hyacinth. Few flowers combine with others as these lovely little harbingers of spring. With Daffodils, they are nothing less than glorious, as you may well see from the picture. They are excellent also for edging spring borders, for rock gardens, around shrubbery and trees, and around old tree stumps where they nestle enchantingly. They may be planted as close as two inches apart for a massed effect. They soon form clumps and, being perfectly hardy, reappear each spring to surprise you again with their beauty.

Plumosum

Doz. \$1.25

Considerably taller than the usual Grape Hyacinth, growing 7 to 8 inches high. Instead of the tight bunched grape effect of Heavenly Blue, it carries quite long, feathered stems of rich violet. It requires the same culture; both can be grown indoors if desired.

MUSCARI PLUMOSUM

ALL NARCISSUS

HARDY PRIMROSES - - Sturdy Beauties for Your Spring Garden

Flower in May, about 8 inches tall and combine beautifully with the spring flowering bulbs such as Tulips and Narcissus of the Poeticus type. Siberian Iris

An outstanding Iris type that overcomes many of the disadvantages of the Bearded types. Siberian Iris have lovely medium sized flowers, usually 4 to 5 inches across, borne on long, slim stems 3 feet tall. The foliage is extremely graceful, and is quite attractive in itself, after the flowers have gone. But the best thing about this type is its compact habit. Siberian Iris "stays put" where you plant it, forming a very dense clump that will send up 25 to 50 lovely flower stalks.

The longkeeping qualities of the blooms make them ideal for cutting, especially when combined with Iris Pseudacorus, a lovely yellow variety, quite similar in habit and flower. Used in masses among the Peonies, few combinations of flowers can equal the resulting profusion of lovely color. They are at home anywhere tall Bearded Iris are planted, requiring the same general culture, although the Siberian Iris has a much higher degree of water tolerance and can stand "wet feet" even in winter.

Bob White Three \$1.15, Doz. \$4.00
A fine pure white with dainty flowers on long stems, excellent for cutting.

Butterfly Three \$1.15, Doz. \$4.00
Delicate soft blue flowers on extremely graceful plants. Truly lovely with light pink Peonies.

flowerfield PEONIES

Of all the garden's large perennials, the Peony is the most satisfactory for the busy gardener. Peony clumps may be left for twenty years in the same place without dividing, in marked contrast to other perennials. Few are the bugs that attack the lovely flowers, in bloom before the vicious Japanese beetles emerge, and finally, there is little or no winter care involved in the case of Peonies. Weed elimination is the only cultural necessity for the enjoyment of this beauty's advantage.

THE BEST IS THE CHEAPEST

As in all horticultural material, the best is the cheapest. Flowerfield Peony divisions have long been rated as the highest standard in the trade. The results from our large, thrifty plants will surprise and delight you. Remember that we grow our own Peonies—they are dug fresh to your order and shipped **postpaid**. Like the large "economy size" packages, they represent the most economical "buy" in Peonies.

TREE PEONY, SOUVENIR DE MAXIME CORNU

TREE PEONIES

Few plants equal the magnificent display of a well-established Tree Peony. The flowers are unusually beautiful and rare, possessing all the colors found in regular herbaceous Peonies, as well as pure yellow, yellow and orange, lavender, violet and purple. The plant does not die down like the herbaceous Peonies, but forms a shrub so that in time a single plant will attain a height of four to five feet, and carry as many as 200 flowers. These are always at least as large as other Peonies, sometimes measuring up to 10 inches across. They thrive in any well-drained soil, in partial shade as well as full sun. They like well-decayed manure and bonemeal, as well as some protection from heavy winds. It is also wise to protect the flower buds against late spring frosts.

We furnish heavy field-grown plants, shipped in a ball of peat and earth. They are three years old, or older, and are much superior to young pot plants.

Light Pink Shades	Each \$4.75
Dark Pink Shades	Each \$4.75
Red and Carmine Shades	Each \$4.75
Lilac and Purplish Shades	Each \$4.75

Souvenir de Maxime Cornu Each \$17.50
 Bushy plants with every stem carrying 2 or 3 full flowers, 8 inches or more across, with ruffled petals, of deep yellow, heavily shaded orange. The best known Tree Peony and justly famous.

Graceful SINGLE PEONIES

A distinct type of Peony, not as yet widely known, but rapidly increasing in popularity. They are just as easy to grow as the double Peony, requiring exactly the same culture. For garden effects they are more colorful and striking, with their most attractive colors set off by high crowns of golden anthers. The contrast between the bright centre and the outer petals is remarkable.

The garden habit of this most useful Peony is above reproach. In spite of wind or rain the stems stand straight, without support, holding forth their blooms in all their glory. One single, well-developed plant will mark an accent point for beauty in your garden.

Cornelie Each \$1.00
 Large blooms of glistening pure white made up of clearly cut petals in an almost star-shaped flower. This background of immaculate white sets off a huge crested center of pure golden anthers. One of our finest and most popular white varieties.

Henry Potin Each \$1.00
 Splendid informally placed petals of clear deep pink, slightly notched at the ends, and with a shimmering sheen of just discernible light gold at the edges. The crown is made up of many slender stamens of rich bright yellow, fully equal to half the diameter of the entire flower.

Etoile Blanche Each \$2.00
 The largest and finest pure white crested Peony with individual blooms often measuring as much as ten inches across. Pictured at left.

Swashbuckler Each \$1.00
 An exceedingly brilliant rich red or deep crimson with long, rounded petals particularly brood at the edges where they overlap each other. Stamens are of dark rose-red with gleaming golden edges, making a perfectly huge dome at the center of the blooms.

Flowerfield's Bulb Food

Bulbs and plants are alike in demanding three conditions: water, food and cultivation. Water is the most important factor in plant life; but don't water lightly and frequently, give your garden a thorough soaking at longer intervals. Then conserve the subsoil moisture by cultivation around the plants. This cultivation should also keep down weeds which spoil the effect and rob the plant of some of its available water and food.

Feed your plants. Unless your garden is unusually rich, you will get far more satisfactory results by supplying extra nutrient. Flowerfield offers for this purpose, a special bulb and plant food which we manufacture ourselves. Mixed with your garden or potting soil, it will produce the finest results possible. We recommend the peck size at \$1.00, F. O. B. Flowerfield; also supply it by the quart at 25c, postpaid.

HEMEROCALLIS - Magnificent Hybrid Daylilies

The modern Daylily offers a delightful addition to the garden. The older forms are well-known and wide-spread, both in gardens, and in the wild, where some types have escaped and formed great beds. All of them have beautiful large, lily-like, trumpet flowers. The new hybrids have been developed to the extent that they produce more flowers to the stem than any other common plant, in colors ranging from the palest yellow to pinkish apricot through to deep orange-red.

Because the Daylily thrives in full sun or part shade, they are suited to either border use or when planted as a low hedge close to the house, along the driveway, or spotted in with the low growing foundation planting. Once planted, they require practically no further care, growing in any kind of soil in any section of the country.

Amaryllis Three \$1.50, Doz. \$5.00
Enormous blooms of glistening yellow. The form of the flower is that of a wide-mouthed bell and the texture is excellent. Amaryllis blooms in July and grows over 3 feet tall.

Cinnabar Three \$1.50, Doz. \$5.00
Gorgeous blooms with a reddish cast. The tawny flowers are overlaid with coppery red markings and have a dark red throat. It is truly lovely in contrast with the pale yellow varieties. Blooms in mid-June and grows 3½ feet tall.

Dr. Regel Three \$1.35, Doz. \$4.50
One of the earliest of the Daylilies, and extremely fragrant. Its apricot-yellow flowers add great beauty to the foreground planting. Height about 18 inches. Blooms in late May and early June.

George Yeld Three \$1.50, Doz. \$5.00
A lovely bicolor, soft warm yellow with light red markings. Very striking planted as a specimen in light shade where the foundation plantings taper off. Blooms in late July. Height 3½ feet.

Gold Dust Three 95c, Doz. \$3.25
The harbingers of the Daylily family, Gold Dust blooms in early May with clusters of golden yellow trumpets. Most desirable in the foreground. Height 1½ feet.

Hyperion Each 75c, Doz. \$7.50
Acknowledged to be the finest Hemerocallis that is now obtainable at a moderate price. The flowers are fine citron-yellow, of large size, and long trumpet form, produced in great numbers on strong stems about 40 inches tall. Vigorous in growth, a single plant will soon make a strong clump. Hyperion is persistent in bloom through July and August, with a few flowers often appearing as late as Labor Day.

J. A. Crawford Three \$1.25, Doz. \$4.00
A lovely clear warm yellow with slightly fluted petals. The strong stems carry many buds in widely branched flower heads. A wonderful variety for the border. It looks especially well in light shade. Blooms in late May and early June. Height 2½ to 3 feet.

Kwanso Flore-Pleno Three \$1.25, Doz. \$4.00
This really different variety is unique among Daylilies. Its double petalage makes up full-centered blooms of rich golden bronze, in marked contrast with the usual open trumpet flowers one expects in Daylilies. Blooms in July and August, 3 feet high.

Mrs. W. H. Wyman Three \$1.50, Doz. \$5.00
A late variety, Mrs. W. H. Wyman comes into flower after most of the Daylilies have stopped blooming, prolonging the season with lovely clusters of pale yellow lilies. In full bloom August 1st. 3 feet tall.

Ophir Three \$1.50, Doz. \$5.00
Large clusters of deep yellow trumpet-shaped flowers, 25 or more to a stem. An American introduction which has had the distinction of receiving an Award of Merit from the Royal Horticultural Society of England. Only because we have a large stock of this variety are we able to offer it at such an inexpensive price.

Thunbergi (Lemon Lily) Three 95c, Doz. \$3.25
One of the older types of Hemerocallis still widely used in spite of the fact that the flowers are smaller in size than the newer hybrids. Grows 4 to 5 feet tall, blooming in July, with clouds of pure pale yellow flowers. Excellent for massing.
