Geranium. (*Mrs. Pollock.*)

No plant that we can offer our customers, in districts where this beautiful variety has not yet found its way, will be received with more admiration. The engraving given of it, although true to outline, of course conveys no idea of the beautiful marking of the leaves, which is the great attraction of this class of plants. The ground color or disc of the leaf is deep green; next comes a zone of bronzy crimson, the margin of which is tinted with scarlet; then again a belt of lighter green, the margin of the leaf being bright yellow. As an ornament for the parlor or conservatory, nothing yet excels this lovely plant. The flowers are dark scarlet, in good sized trusses, borne on short foot stalks but a few inches above the leaves. It succeeds well in the open border in early summer and in fall, but in July and August, to some extent, loses the rich coloring of the leaves. The foliage is much used for bouquets and baskets of cut flowers.

Price, 50 cents each; \$5 00 per dozen.

Colocasia (Caladium) Esculentum.

SEED BUSINESS NOTICE.

Our SEED business, though in operation but a few years, has greatly exceeded our anticipations, and we feel confident in believing that but very few of those who have kindly favored us with their patronage, but have been fully satisfied with the manner their orders have been filled, and with the quality of Seeds sold. We aim to have none but fresh and genuine Seed, and any that we deem doubtful are immediately tested, as our hot-house facilities for testing Seeds give us great advantage in that particular.

We offer a few varieties of the new Seeds, now offered by us. For full descriptions and prices we refer to our

Illustrated Seed Catalogue,

which will be mailed to applicants enclosing a three-cent stamp.

Carter's First Crop Peas.
Caractacus Peas.
Laxton's Prolific Long Pod Peas.
McLean's Little Gem Peas.
Dwarf Waterloo Marrow Peas.

Dwarf Wax Bean.
True Valentine Bean.
Large Early Erfurt Cauliflower.
Le Normand Cauliflower.
Carter's Dwarf Celery.

And many others.

New Tomato. (*General Grant*.)

Size above medium, three to four inches in diameter; growing in clusters; form round slightly flattened, very regular, symmetrical and rarely ribbed or wrinkled; color, brilliant glossy crimson; flesh unusually firm, solid, and free from water.

Price, per packet, 25 cents.

Early Rose Potato.

This new and popular Potato has proved all that was claimed for it when offered for the first time last Spring. It is very productive, yielding from fifty to ninety fold with common culture; two weeks earlier than the Early Goodrich, and a very strong grower. Tubers quite smooth, nearly cylindrical, varying to flattish, largest at the center, tapering gradually toward each end; skin a dull rose color, flesh white, and one of the best flavored varieties in cultivation.

Price, one pound, \$1; three pounds, \$2; per peck, \$5.

Goodrich's Seedling Potatoes.

These highly valuable Seedling Potatoes were raised by the late Rev. Chauncey E. Goodrich, Chaplain of the New York State Lunatic Asylum, at Utica, N. Y. He spent fifteen years in experimenting upon the production of new varieties, and raised over *sixteen thousand seedlings*, of which he esteemed the Harrison and the Early Goodrich (which are twin brothers, and seedlings from the Cuzco), as the very best.

THE HARRISON is a white Winter variety, of high quality and beauty, unequalled in productiveness by any known kind. Mr. Goodrich stated that he had raised at the rate of six hundred bushels per acre, when only three years from the seed ball.

Price, \$3 per bushel; \$1 per peck.

THE EARLY GOODRICH is one of the best and most productive early Potatoes known. It keeps equally well with the Harrison, and has repeatedly yielded over three hundred and fifty bushels per acre.

Price, \$2 50 per bushel; 75 cents per peck.

The advantages of this School are :

FIRST. Its Location.—Within the city limits, it is only a half-hour's drive distant from any of the Depots, and within easy call of the Telegraph Offices, Post Office, and Stores. But being five hundred feet above the level of the river, it has none of the annoyances of the city. Surrounded by beautiful residences, it looks out in every direction upon a delightful prospect, and is as free from intrusion as though it were in a quiet country village.

SECOND. Its Home Influence.—The building used by the Boarding Department is entirely detached from the School House. It is almost new, and all its arrangements for light and heat are according to the most approved plans. Its rooms, each of which is designed to accommodate two young ladies, are large, and are furnished with a view to make them home-like. A Parlor, 50 by 40 feet, is devoted exclusively to the School. The discipline of the School is that of the family. It is the constant aim of those in charge to keep up the home feeling, to create an atmosphere of perfect *material* comfort, and then to administer a moral discipline inspired by love, and instructed by the law of Christ.

THIRD. Its Extended and Comprehensive Course of Study.—The Course of Study runs through three departments, of four years each. Parents can therefore give their daughters the benefit of a continuous and symmetrical mental discipline. The length of the course guarantees comprehensiveness. The classical schedule comprises a list of the higher branches of study, which bears comparison with that of colleges for young men. This also allows the best of opportunities for a select course, if students do not wish to follow the regular order.

FOURTH. The QUALITY of its Instruction.—No instructors are employed but those who have either, by long experience, proved themselves apt to teach, or who have been trained in the School. To secure such, no expense has been spared. Three of the four teachers in the Classical Department have been fitted for their work in the best colleges of the land.

In no previous year has there been such strong competition among all the leading Sewing Machine Manufacturers of this country and Europe as the present. At all the principal Exhibitions and Fairs they met and contested for the Premium on Family Sewing Machines, and the result was unanimously in favor of the Florence Reversible Feed Lock-Stitch Family Sewing Machine. It received the First and Highest Prize as the best Family Sewing Machine at the following Exhibitions, viz.: Exposition Universelle, Paris; American Institute Fair, New York; New England Agricultural Fair, at Providence, R. I.; the New York State Fair, at Buffalo; the Great Annual Fairs of New England, viz.: that of the Mechanics' Association, at Lowell, Massachusetts, and the Fair of the Maryland Institute, at Baltimore, which closed a four-weeks' Session on the 12th of November, the superiority of the FLORENCE was again confirmed by the Committee on Sewing Machines, who unanimously awarded it the "GOLD MEDAL," the highest Prize the Institute confers.

It would seem as if this succession of triumphs should be sufficient to convince every unprejudiced person of the great superiority of the FLORENCE over all other Family Sewing Machines.

A written warranty is given to the purchaser, that the Machine WILL DO ALL that is claimed for it, and should it fail, it will be taken back, and the MONEY REFUNDED.

Waltham Watches.

TO BUYERS OF WATCHES EVERYWHERE.

Since the manufacture of Watches was initiated at Waltham, the Company have made and sold about 400,000 Watches. In every town and village of the country some wearer of a Waltham Watch may be found. Let the party about to buy ask the owner of an American Watch this question:

"Has your Watch given you satisfaction?"

We are not afraid to advise those wishing to buy a Watch to guide themselves by the answer. Being satisfied as to the quality of the Watch, the buyer has now only to satisfy himself that the Waltham Watches are THE CHEAPEST, as well as the best. On this head we have a few words to say.

It is a well-known fact in manufacturing, that the greater the number of articles manufactured by one establishment the smaller will be the cost of each individual article. Keeping this in view, our policy has always been to sell our products at the lowest possible price, in order to secure large sales, and thus enable us to manufacture Watches at a minimum cost. We believe in small profits and a large business. This policy we have successfully carried out, and the result is, that to-day we manufacture twice as many Watches as all the other factories in the United States put together. We can, therefore, afford to sell Cheaper than they do, and actually do sell Twenty-Five Per Cent. Cheaper than they do, quality for quality.

We would further remark, that in increasing our product we have constantly improved its QUALITY AND ITS VARIETY. We have had the refusal of nearly all invention intended to improve time-pieces, and have adopted all those, and those only, which have proved to be really valuable. We have retained in our employment every head of a department we have ever had whose services were of any importance to the Company, and our present corps of designers and master mechanics cannot be equalled in this or any other country. In addition to this, we make Gold and Silver Cases, not only for our own movements, but for those of other factories, ours being the only establishment that turns out Watches complete in every respect.

As these Watches are for sale by the trade generally throughout the United States, and at a retail profit made most reasonable by competition, the Company invariably decline orders of a retail character.
