DESCRIPTIVE PRICE LIST

C. M. HOBBS & SONS

Bridgeport Nurseries

Established 1875

BRIDGEPORT, INDIANA

OWING to the unusual demand for catalogs, our supply has been exhausted and we have had to prepare quickly this brief descriptive price list to care for the demand until we can have our complete catalog reprinted. This condensed form appears with a complete list and prices, but is abbreviated as to description as well as illustration.

Looking Toward the Office Buildings from U. S. 40 (Old National Road).

The Policies Which Guide Our Business

DURING these years among the trees and fruits we have gathered much valuable information that is especially valuable to the beginner; this information is for the asking to our patrons. We are glad to assist you in any way we can.

We keep our methods of propagation and cultivation up to date, using only those methods that produce the best results; and with our thoroughly drained and fertilized soils we are able to produce as vigorous, well matured and healthy stock as can be found anywhere.

Our stock is not only well grown, but carefully dug, handled and packed. We take every possible care to have varieties true to name, as we fully realize the importance of this to the planter. We do not claim infallibility, but take every precaution to reduce mistakes to the minimum. No tree or plant ever goes out of our hands knowingly mislabeled.

It has been our purpose to deal honestly and fairly with our customers. This is not only right, but our experience has proven it to be good policy, as our business has steadily grown until our trade now extends over the entire country. We are doing business with many people that we did business with a quarter of a century ago.

It is not our object to grow or offer cheap stock, such as is often palmed off on the public. Within the last few years the cost of production has increased rapidly and in many cases it has fully doubled. The market price of stock in many instances is equalled by the cost of production, owing to the rapid advance in the price of labor and materials; therefore, when quality of products is considered, our prices will be found as low as those of any first-class nursery.

Guaranties

In growing and furnishing all nursery stock, we use the greatest care to have it true to name, and will replace any that may prove untrue, free of charge, or refund purchase price. We shall not be liable for more than the purchase price. Every purchase from us is made on these terms.

GUARANTEE AND CLAIMS. All goods are guaranteed true to name, up to grade, full count, and in good condition when delivered. Claims must be made within five days after delivery to customer's delivery point to receive consideration.

We do not guarantee stock to grow, or results in any way. There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered in good order. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and all are beyond our control.

Visit Our Nurseries at Bridgeport

The location of our state puts us in the center of a splendid market. Within a run of 12 hours we can put our products into the hands of millions of customers. Our many railroad and interurban lines give us unequalled facilities for distribution.

Location

Six miles from the west corporation line of Indianapolis, on Washington Street, or the Old National Road, which is now a concrete road, U. S. 40, Pennsylvania Railroad, Terre Haute, Indianapolis & Eastern Traction Line—Stop 10, or Bridgeport Nursery. Hourly bus service from Indianapolis.

We have both Bell and Independent phones in our office. Free service over Bell phone from Indianapolis or any point in Marion County. Belmont 2218.

Visitors

You are always welcome and we will be pleased to meet you and show you through our plant, comprising more than 400 acres.

Shipping Facilities

Pennsylvania Railroad making connection with all lines out of Indianapolis.

We are very fortunate to be located on the Terre Haute, Indianapolis & Eastern Traction system, which insures us twenty-four hour delivery to most points in Indiana.

Shipping Instructions

ORDERS. All orders are accepted subject to the following terms and conditions. Write plainly and give explicit directions as to address and mode of shipment.

FORWARDING. Shipments will be forwarded exactly as directed; but where without instructions, we will use our best judgment and forward by shortest and safest route. We recommend that all herbaceous and strawberry plants be shipped by express.

CLAIMS for damage while in transit or otherwise must be made within five days after the arrival of the consignment.

SHIPPING SEASON. Opens about March 1st in the Spring and September 15th in the Fall.

INSPECTION AND FUMIGATION. Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when the state laws require it.

PACKING. All goods are carefully packed, thus avoiding risk, if delayed in transit. We do not charge for packing.

Terms

CASH WITH ORDER. Except to persons who satisfy us as to their financial responsibility, accounts are due when bills are rendered, and prompt payments are expected.

PRICES given in this catalog are for the goods f. o. b. Bridgeport, Indiana. No charge for packing.

STOCK SELECTED by customers at the nurseries will be charged for according to the value of the trees or plants chosen.

QUANTITY. Lots of 5, 50, and 500 trees or plants of the same grade and variety will be furnished at the 10, 100, and 1000 rates respectively.

Ornamental Shrubs

Most of our shrubs are three and four years old; much more stocky and better than one- and two-year-old plants usually offered.

Acer Platanoides—Norway Maple.

Deciduous Trees

Less than five at each price. Five of a kind at ten rate. Fifty of a kind or fifty of not less than five of a kind at hundred rate.

We have many large trees 15 to 30 feet high that measure at base of tree 3 to 12 inches in diameter. Special prices on these will be made when trees are selected at nursery.

Acer -The Maples

The Maples are probably the most popular and most widely used of all the deciduous trees. There is a type of Maple suited for most any demand, whether for shade or landscaping effect. Some of them are quite rapid growers and are fine for quick results, while others, though slower in growth, attain their greatest value in symmetry of form and appearance.

- ACER dasycarpum** (White or Silver Maple). A rapid growing native tree of large size, valuable for producing quick shade. Adapts itself to a variety of soils but does not do so well in dry soil. Each 10 100

Coniferous Evergreens

We trim our evergreens each year. It takes more time to get a tree by using this method, since we cut off more or less growth each season, but in the end we have a much more desirable tree.

All dug with ball and burlaped—the only safe way to handle them.

Abies - The Firs

ABIES balsamea (Balsam Fir). A very erect, regular, pyramidal tree assuming a conical shape even when young. Dark green foliage. A rapid grower and very hardy.

	Each
1½ to 2 ft.	\$3.00
2 to 2½ ft.	4.00

A. concolor (White Fir). A very fine species from Colorado, with yellow bark on the young branches. The leaves vary from a light green to a deep soft blue and are arranged in double rows. Equal in beauty to the Colorado Blue Spruce.

	Each

J. Sabina (Savin Juniper). Especially suitable for hillside planting or among rocks; like a prostrate shrub in habit, and useful for all low plantings. The foliage is deep green and unchanging in its color.

1½	to 2 ft.		Each	\$3.50
2	to 3 ft.			4.50

J. Suesica (Swedish Juniper). Quick growing, narrow, upright form. Very similar to Irish Juniper but foliage of more bluish color.

3	to 4 ft.		Each	\$4.00
---	----------	-------	------	--------

J. virginiana (Red Cedar). A well known native tree; varies much in habit and color of foliage; very attractive in Winter when the golden bronze of the young growth contrasts with the dark green of the older.

2	to 3 ft.		Each	\$3.00
3	to 4 ft.			4.50

J. virginiana glauca (Silver Red Cedar). Similar to the Red Cedar in form, foliage of a soft gray blue green color. Closely columnar in growth.

1½	to 2	ft.		Each	\$3.00
2	to 2½	ft.			4.00
2½	to 3	ft.			5.00

J. virginiana Schottii (Schott's Red Cedar). Pyramidal variety differing from the Red Cedar chiefly in its light yellowish green color, which it retains throughout the year. Compact, symmetrical, and stands trimming well. Grows rapidly, needs plenty of sunlight.

1	to 1½ ft.		Each	\$2.00
1½	to 2	ft.		3.50
2	to 2½	ft.		4.00

Pinus Mughus—Mugho Pine.

Picea - Spruce

PICEA alba (White Spruce). A tree of medium size and pyramidal form; bark light colored and foliage silvery gray; hardy.

1½ to 2 ft.	Each
2 to 2½ ft.	\$2.50
	3.50

P. Engelmanni (Engelmann Spruce). One of the gems of Colorado. Of conical form, with dull blue foliage. Stands extreme cold but does not do so well in the dry regions of the plains states. A valuable tree for individual planting.

2 to 2½ ft.	Each
	\$3.00

P. excelsa (Norway Spruce). This tree is a rapid grower, with graceful habit and dark green foliage. It is one of the best conifers for wind-breaks.

1½ to 2 ft.	Each
2 to 3 ft.	\$2.00
3 to 3½ ft.	3.00
3½ to 4 ft.	5.00
	6.00

P. pungens (Colorado Spruce). Very handsome and very hardy, symmetrical, with light, sometimes almost silvery white foliage; stout horizontal branches forming a broad, regular pyramid

2 to 3 ft.	Each
	\$4.50

P. pungens glauca (Colorado Blue Spruce). One of the most beautiful and hardy of all the Spruces. Similar to the above except that the foliage is a beautiful shade of bluish green. Very popular.

1 to 1½ ft.	Each
1½ to 2 ft.	\$4.50
2 to 2½ ft.	6.00
	7.50

Pinus - The Pines

PINUS austriaca (Austrian Pine). Its growth, even when young, is characteristically stout and sturdy; foliage very dark and massive in effect and when planted in an appropriate location is distinct and unique.

3 to 4 ft.	Each
	\$5.00

P. mughus (Mugho Pine). A unique Alpine species, broader than its height and sometimes almost prostrate, forming a dark, dome-shaped bush. Used for planting on rocky banks, terrace slopes, small lawns and rockeries.

1 to 1¼ ft.	Each
1¼ to 1½ ft.	\$2.50
1½ to 2 ft.	3.00
	4.00

Colorado Blue Spruce.

PINUS—Continued.

PINUS strobus (White Pine). Tall, stately and most beautiful of all our native Pines; this is also among the quickest growing, longest lived and most generally useful. The needles are long, silvery blue, and plummy in effect; the tree grows naturally into symmetrical specimens and makes a most imposing feature on lawn when grown singly.

	Each
1½ to 2 ft.	\$2.00

P. sylvestris (Scotch Pine). Of quick strong growth and very hardy. Usually grows taller than the Austrian with softer needles and shows a hint of reddish brown in its bark. Particularly suited for screens, wind-breaks or for mass planting.

	Each
2 to 3 ft.	\$3.00
3 to 4 ft.	5.00

Retinospora

This group contains many interesting plants. In foliage, grace, beauty and adaptability they are truly attractive. They develop into small trees, never growing as large as Pines or Spruces. The foliage is most attractive, especially when sheared, as then it develops its true color with its lacy and graceful habit, which makes it, whether in specimen or group planting, a much sought for plant.

RETINOSPORA filifera (Thread-Branched Retinospora). Of unique and showy habit, always noticeable. The leading shoot grows upright, the branches are nearly horizontal, with long, drooping, tasseled ends; pyramidal in outline, bright green.

	Each
1½ to 2 ft.	\$2.50

RETINOSPORA—Continued.

RETINOSPORA plumosa (Green Retinospora). Densely conical, with fern-like leaves of bright green, carried on erect, plummy branches.

	Each
1½ to 2 ft.	\$2.50
2 to 3 ft.	3.50
3 to 4 ft.	4.50

R. plumosa aurea (Golden Retinospora). One of the few really golden evergreens. The color of the young growth contrasts strongly with the darker shade of the older foliage. Striking and useful in many ways.

	Each
1 to 1½ ft.	\$2.00
1½ to 2 ft.	2.75
2 to 3 ft.	3.50

R. squarrosa Veitchi (Silver-Tipped Retinospora). Of dense growth, with soft, feathery foliage of a silvery blue shade, arranged in spirals. Shows to best advantage against dark green background.

	Each
1¼ to 1½ ft.	\$2.25
1½ to 2 ft.	2.75
2 to 2½ ft.	3.50

Taxus - The Yews

TAXUS brevifolia. A dwarf variety with beautiful foliage. Very useful where a low spreading evergreen is wanted.

	Each
1 to 1½ ft.	\$3.50

T. cuspidata (Japanese Yew). Distinctly Japanese in effect; of free growing, open habit, green needles; a tree of highest merit, and of great hardiness, standing our climate in almost any soil or situation.

	Each
1 to 1½ ft.	\$3.00

Thuya - Arbor-Vitae

THUYA occidentalis compacta (Parsons Arbor-Vitae). A neat, attractive variety of upright oval shape; rather dwarf. A popular tree for low hedges and in front of evergreen plantings.

	Each
1 to 1¼ ft.	\$1.50
1¼ to 1½ ft.	2.25
1½ to 2 ft.	3.00

T. Douglas Golden. A conical evergreen of broad and bushy growth; long, slender branches and bright yellow foliage. One of the hardiest of all golden evergreens.

	Each
1½ to 2 ft.	\$2.50

T. occidentalis globosa (Globe Arbor-Vitae). Dwarf. Forms a dense, low globe, with a handsome shade of light green foliage.

	Each
1 to 1½ ft.	\$1.50
1½ to 2 ft.	2.50
2 to 2½ ft.	3.00

T. occidentalis Hoveyi (Hovey's Arbor-Vitae). Hardy and distinct; dense and conical and very compact. Foliage light green with a golden tinge, a very bright and pleasing shade.

	Each
1¼ to 1½ ft.	\$2.00
1½ to 2 ft.	2.50
2 to 2½ ft.	3.00

T. occidentalis (American Arbor-Vitae). This variety is especially useful for high hedges and screens as well as for general planting. The habit of growth is pyramidal but not so distinct as the "Pyramidal Arbor-Vitae."

	Each
1½ to 2 ft.	\$2.00
2 to 3 ft.	2.50
3 to 4 ft.	4.00
4 to 5 ft.	5.50

Hemlock Hedge on Our Grounds.

THUYA—Continued.

THUYA occidentalis pumila. A dense, dwarf variety with dark green foliage. Suitable for window boxes, foundation plantings, or in front of taller growing sorts. Each

1 to 1½ ft.	\$1.75
1½ to 2 ft.	2.75

T. occidentalis pyramidalis (Pyramidal Arbor-Vitae). A densely branched variety forming a perfect column; holds its shape without trimming or pruning; hardy; a very ornamental type for many kinds of planting. Each

1½ to 2 ft.	\$3.00
2 to 3 ft.	4.00
3 to 4 ft.	5.00
4 to 5 ft.	6.50

T. occidentalis Vervaeana (Vervaeae Arbor-Vitae). A very attractive variety. Green foliage tinted with gold, turning to bronze in Winter. A rapid grower and very hardy. Each

2 to 3 ft.	\$2.50
-----------------	--------

T. occidentalis Wareana (Siberian Arbor-Vitae). Of dwarf habit and conical outline. Rich, dark green foliage. One of the choicest Arbor-vitae. Will stand colder exposures than other sorts. Each

1½ to 1½ ft.	\$2.00
1½ to 2 ft.	2.50
2 to 2½ ft.	3.00

Tsuga - Hemlock Spruce

One of our best rapid growing native trees which is very hardy and is valuable for hedges, screens and windbreaks, because of its ability to withstand shearing, which causes it to form a thick, heavy growth. As a specimen it forms a graceful, attractive symmetrical tree. Of pyramidal habit and usually with dark green foliage; probably no coniferous evergreen is more beautiful. May be grown in partial shade. Each

1¼ to 1½ ft.	\$2.50
1½ to 2 ft.	3.00
2 to 2½ ft.	4.00
