ACQUAINT YOURSELF WITH THE ADVANTAGES OF HYBRID CORN

Farmers, if you want open-pollinated corn, we have it as good as you can buy, we think—(certified and uncertified), and will appreciate your orders. **BUT, the best hybrids yield an average of 15 bu. more per acre in Ala. than open-pollinated.** Ala. plants about 2,500,000 acres corn a year. In 1955, 37% was open-pollinated. This cost Ala. farmers 13,875,000 bu. Can they afford this huge loss? Let's encourage the use of more hybrid! The extra cost is \$1.00 or less an acre.

Get Auburn's 1955 Corn Report from your County Agent—to see the approved varieties for your area, etc. We have most approved hybrids in stock. May we serve you?

THE PASTURE BOOK and THE LIVESTOCK BOOK

These valuable books were written by W. R. Thompson, Extension Pasture Specialist, State College, Miss. He is a real authority on building good pastures and on livestock. Mr. Thompson is in much demand as a speaker before agricultural groups. His books give much useful information and pictures. The Pasture Book has been so popular that there have been 10 editions since 1949. The Livestock Book came out recently. Every farmer should have these books. Order from us today. Each book costs \$3.50.

COASTAL BERMUDA GRASS

Coastal proved its superiority for grazing and hay during the severe 1954 drouth. Ask for sheet giving general information and planting and fertilizing recommendations. Propagated by stolons and sprigs and not seed. Use 4,000 to 6,000 per acre. Can be set out any time when moisture is plentiful or irrigation is available except freezing weather. Our present grower has gotten better results from plantings from July-Oct. than March-April account less weed competition. Sold only in bulk by the cubic foot, loaded on your truck (iced down to avoid heating and provide moisture) at the farm near Montgomery, Ala. Make arrangements with us before sending trucks. Prices on your truck are:

Up to 250 cu. ft., per cu. ft. \$.45

Over 250 cu. ft., per cu. ft. .40
