ROSE MARIE REID

GERMAIN'S EXCITING 1956 ROSE INTRODUCTION*Rose Marie Reid***NEW Dawn Pink Color—NEVER CAPTURED IN A ROSE BEFORE**

Rose Marie Reid is an exceptionally tall, vigorous growing Hybrid Tea Rose which bears large quantities of very double flowers.

The beautifully shaped buds—long and full—open to a breathtaking dawn-pink never captured in a rose before. These long lasting flowers measure five to six inches across, and have 45 to 50 petals softly rolled back at the edges to give a rich effect.

Its exquisite blooms are set off majestically by deep green, heavily textured, leathery foliage. The bush has exceptional vigor and remarkable disease resistance, insuring an earlier blooming and a healthier, more luxuriant growth all season long. The blooms make gorgeous cut flowers because of exceptionally long stems.

Rose Marie Reid is another triumph of the gifted Milton Whisler, head of Germain's Rose Research Department. Among former outstanding Whisler creations are Easter Parade, Sun Valley, Candleglow, Amigo, and the climbing San Fernando.

Rose Marie Reid can boast of two of the most illustrious parents in rose history—Charlotte Armstrong and Katherine T. Marshall—both being of All America Vintage.

Be the first in your neighborhood to have this NEW rose sensation.

GREATEST RED ROSE IN AMERICA!

A.A.R.S. Winner 1953

Chrysler Imperial

(Pat. 1167)

AMERICA'S FIRST TRULY RED ROSE

CHRYSLER IMPERIAL

The CHRYSLER IMPERIAL ROSE is unmatched by any other red rose. Its vivid, rich tones of crimson are enhanced by darker overtones of glowing oxblood red, and the gem-like lustre of garnet in the folds *retains* its sparkling beauty.

Long, tapering buds unfold even in adverse weather, opening to large, high centered flowers measuring 4½ to 5 inches with 40 and 50 wide petals. These are borne on sturdy, medium long stems. The opening of each rose is a thrilling spectacle of changing, iridescent shades of red.

The flowers are very sweetly scented with true rose fragrance.

In growth, Chrysler Imperial Rose is compact, and symmetrical. Its abundant, dark green, semi-glossy, disease resistant foliage gives the bush the appearance of a handsome garden shrub.

NS6125 \$2.00 Each 3 for \$5.25

BEST REGARDS (Pat. 652)

This magnificent rose presents a strikingly beautiful color combination. On the inside, a brilliant cardinal red suffuses the upper part of its lovely petals, which are marked at the base with a contrasting deep yellow tone. The outside of the flowers is vivid Tyrian rose, heavily tinged with a glittering coppery over-see.

The buds are extra large, the flowers very full and high centered. The plant is exceedingly vigorous in growth, forming strong well branched bushes, bearing quantities of bloom all season. When fully open the flowers often measure five to six inches across. Their long, erect stems and brilliant color makes exceptionally fine cut flowers.

NS6101 \$1.50 Each 3 for \$3.90

Katherine T. Marshall (Pat. 607)

A lovely bloom of warm, glowing, clear pink, heavy textured, forming a magnificent bud and half-open bloom, with a rich fruity fragrance. If you like your buds and flowers large you'll like this one.

Kolorcoat*
DICHONDRA

*Reg. U.S. Pat. Off.

- Deep, Rich Green All Year
- Requires No Mowing
- Chokes Back Bermuda
- Resists Rough Usage
- Forms Dense Turf
- Thrives in Sun and Shade

Dichondra is a low-growing American plant, native to the southeastern part of the United States, from Virginia south. It is known botanically as Dichondra Repens or D. Repens var. Carolinensis.

Germain's Kolorcoat Dichondra makes a dense sod by means of runner-like stems, growing very close to the ground, but never forms a thick mat like bermuda grass. The kidney-shaped leaves, about 1/4 in. wide, and seldom for 1 1/2 in. tall have a rich, dark velvety-green color. Dichondra is tough in texture and hard usage will not injure the strong turf or mar its beautiful appearance.

In mild climates dichondra can be started any time of the year. Since summer is the best growing season for dichondra spring or early summer planting gives quickest results. When planting during the colder months a nurse crop is suggested.

In the East or Middle West we recommend spring or early summer planting. This allows enough time to develop a strong root system for the plants to make seed. When the foliage and top growth is hurt by rigorous weather the lawn will then renew itself from the roots and self-sown seeds.
