The Greatest Red Rose in America

Spring 1954

GERMAIN'S

All America Winner for 1953

*Chrysler
Imperial*

PLANT PATENT 1167

AMERICA'S FIRST TRULY RED ROSE

The CHRYSLER IMPERIAL ROSE is unmatched by any other red rose. Its vivid, rich tones of crimson are enhanced by darker overtones of glowing oxblood red, and the gem-like lustre of garnet in the folds *retains* its sparkling beauty.

Long, tapering buds unfold even in adverse weather, opening to large, high centered flowers measuring 4 1/2 to 5 inches with 40 and 50 wide petals. These are borne on sturdy, medium long stems. The opening of each rose is a thrilling spectacle of changing, iridescent shades of red.

The flowers are very sweetly scented with true rose fragrance.

In growth, Chrysler Imperial Rose is compact, and symmetrical. Its abundant, dark green, semi-glossy, disease-resistant foliage gives the bush the appearance of a handsome garden shrub.

CHRYSLER IMPERIAL—Strong, two year old, field grown bushes.

Sun Valley

PLANT PATENT 1135

Symbolizing the breath taking Beauty of Famed Sun Valley

At last—in "SUN VALLEY"—Germain's presents the warmest, richest most vibrant yellow ever captured in a rose.

Its true guinea golden yellow holds their magnificent brilliant tone in open blooms for days—even in bright hot sunshine—without a trace of fading!

The full, beautifully shaped buds open to large, strong and lasting blooms on long straight stems. The foliage is disease resistant and its vigorous, shining dark green tone forms a perfect foil for the golden flowers borne in season-long profusion.

Rose growers, from coast to coast, in conclusive trials, have found "Sun Valley" the purest, non-fading yellow rose—and one that holds its pure color better—than any yellow rose they have seen.

For masses of dazzling sunshine in your garden all season—and long lasting brilliant yellow bouquets—"Sun Valley" should be a "must" on your rose list.

All America Winner for 1953

A lovely new floribunda, with a very sweet pungent fragrance. This rose is a deep glowing coral-pink with a suffusion of yellow. The buds are a translucent coral, fortified by shades of red in the outer petals and a touch of yellow at the base. As the flowers slowly open to their full 3½ in. width, the coral gradually softens to a glowing coral-shell-pink. Very resistant to diseases and pests, and will thrive in difficult positions.

HELEN TRAUBEL

(Pat. 1028)

All-America Winner for 1952

Named for Helen Traubel, the great American singer. The color varies somewhat with the weather but characteristically it is a blend of warm pink and luminous apricot with a bright undertone which makes it sparkle. The magnificent huds are unusually long, slender, and graceful, and the half-open flowers maintain a delightful form. Even fully blown, the hipped flowers display their lovely color in a lavish way. Often 6 inches across, the open flowers maintain the rich color, and have a fine spicy fragrance. The plant is tall, bushy and attractive looking, and so vigorous that it is seldom without huds or blooms.

FRED HOWARD

(Pat. 1006)

The long, rich yellow buds are tipped with a delicate penciling of light pink, and when the buds open you see full double, high centered, beautifully formed flowers often lightly flushed with pink at the edges of the petals. Especially beautiful in the half open and fully opened blooms which are nearly always perfect. Light, pleasing fragrance. The plant is strong, hardy and clothed in dark, shiny foliage. While vigorous and naturally tall in growth it is well branched and bushy, always making a handsome specimen. This is one of the most prolific varieties, in bloom practically all season and producing a wealth of beautiful flowers, excellent for cutting. *All-America Award for 1952.*

FORTY-NINER

(Pat. 792)

All-America Winner for 1949

Undoubtedly this is the most brilliant of all bicolors. It is so startling in its contrasting colors and the colors are so bright, that it is hard to believe that they could both be present in the same flower. Inside, the petals are a vivid Orient red, changing to cherry red with age. Outside, they are chrome to straw yellow. The colors are paler in some weathers. The buds are delightfully formed, opening into a large, well-shaped, pleasantly fragrant flower of 25 to 40 petals. The vigorous plant is tall and upright, and the stems are long, straight and sturdy, with few thorns.

NR028.....\$2.50 ea.; 3 for \$6.60

SUTTER'S GOLD

(Pat. 885)

All-America Award Winner for 1950

Lovely deep burnt orange long pointed buds that are borne on long stems. As flowers open the color changes to a golden yellow with lines of deep orange and tawny gold. The great charm of this rose is in the sheer perfection of its long, pointed, yellow buds which are richly shaded with orange and red. They open to a high-centered golden yellow flower (about 24 petals) with a tea fragrance richer than in any other yellow rose. Few roses can boast a plant so strong and vigorous. Growing rather tall and upright, it is always covered with an abundance of large glossy leaves which are highly disease resistant.

NR122.....\$2.25 ea.; 3 for \$6.00

SLEIGH BELLS

(Pat. 1004)

For a long time rose growers have been looking for a good white rose that would have free flowering qualities, and plenty of vigor. Sleigh Bells gives us the answer. The plant is a strong grower; with excellent foliage and fine long stems. Its color is pure glistening white and keeps very well when cut. Fragrant.

NR118.....\$2.00 ea.; 3 for \$5.25

TALLYHO

(Pat. 828)

1949 AARS winner. Here is a new color in roses, which is sure to attract attention. Inside, the petals are a delightful shade of pink (technically Tyrian Rose), while the reverse side is a brilliant crimson. The tall robust plant has proved to be very hardy in all parts of the country. Buds open to a magnificent, large, high-centered, fully double flower of exquisite shape. The fragrance is spicy and full-bodied.

GERMAIN'S of California

Leading Seedsmen, Rose Growers and Horticulturists
Since 1871

IN 1871, The Germain Seed and Plant Company was founded in the City of Los Angeles—one of the few pioneer firms in this city that can boast of three quarters of a century of continued progress and expansion.

From its humble beginning as a small retail store, Germain's has steadily grown until it is now a horticultural firm of National and International prominence, shipping its products throughout the United States and to many foreign countries.

Germain's ultra-modern Retail establishment in Los Angeles' downtown business district is among the finest in America. We cordially invite you to visit it when in Los Angeles.

At our nurseries, many acres of lath and greenhouses are devoted to the culture of orchids, flowering and foliage plants, roses and perennials. Thousands of acres in the West are devoted to the production of Germain's seeds, plants and bulbs—and are supervised by men thoroughly trained in the Horticultural profession.

This, perhaps, explains why more gardens all over America are planting Germain's seeds and horticultural products each year.

For early varieties, such as Winningstadt, plant in rows 2½ feet apart, plants 1 foot apart in the row. The larger headed varieties, 1½ feet apart in the row. Cabbage may be planted throughout the year in the southwest. Four ounces of seed will plant one acre. Number of days shown below are from date of setting out plants to maturity.

GERMAIN'S CELERY

Sow from February to May in drills 1 foot apart. Later usually in June, transplant to rows 3 feet apart and 6 inches apart in row. Rows should be furrowed out so plants may be set 6 inches deep. Later, soil may be banked against rows for blanching, even so-called self-blanching varieties needing the cool, moist soil to render the stalks crisp and tender, but this should not be done until a few weeks before harvesting. One ounce of seed will produce 5000 plants.

CAULIFLOWER MEDIUM PEARL

CAULIFLOWER

Culture

Prepare the seed-bed carefully, using only rich and thoroughly pulverized soil. Good results are obtained by keeping the plant in a healthy and rapidly growing condition. Broadcast the seed in the seed-bed prepared, sowing the early varieties from May 15th to June 1st; medium early varieties May 20th to July 5th; and late varieties any time from June 25th to Aug. 25th, inclusive. When 40 days old transplant to the field, 24 in. apart in rows 30 to 36 inches apart. Do not leave plants in the hot-bed over 45 days, as the stems become hard and poor results follow.

182 Medium Pearl (January-February maturity) Plant seed-bed between June 15th and July 25th. We have developed an exclusive strain of this type of cauliflower seed that has met with great favor among California growers on account of its dependability and exceptional quality. Pkt. 15c; ¼ Oz. 80c; Oz. \$1.75; ¼ lb. \$5.00; 1 lb. \$15.00

GERMAIN'S "12 BRAND" LAWN SEED

*Amazing Scientific Formula of Newest Grasses
Produces a Continuous Peak of Greenness . .*

"12" BRAND contains twelve varieties of perennial lawn seeds. The new improved strains recommended by leading turf experts are included: Merion Bluegrass, Delta Bluegrass, Goar's Fescue, Rainier Creeping Red Fescue. . . . Also included are Kentucky Bluegrass, Meadow Fescue, Red Top, Seaside Bent, Astoria Bentgrass, Chewings Fescue, White Clover and Poa Trivialis.

The purpose has been to develop a mixture that includes grasses that are resistant to disease, weeds and crabgrass, quick and slower growing grasses, upright and creeping growers that will produce a high quality deep green dense turf in the sun or shade, level or slope. No one variety of grass is at its best at all seasons of the year and under all conditions. "12" Brand has been designed to combine the most desirable varieties in a blend that will produce "A green lawn—12 months of the year."

Plant at the rate of 1 lb. to 200 square feet

"Aristocrat" brand will establish a lawn faster than most lawn blends. The Meadow Fescue, Red Top, and White Clover in this mixture are fast growing varieties. The Kentucky bluegrass, though growing more slowly, gives a proper balance to the lawn.

All the grasses included in "Aristocrat" lawn seed are perennial. This means that they will produce a permanent, hardy lawn that under proper care should not have to be replanted. Plant at the rate of 1 lb. to 200 square feet.

1 lb. carton \$1.00; 5 lb. carton \$4.90; 25 lbs. \$22.85

Merion Bluegrass

The Wonder Lawn

- ★ Deep, Rich Green All Year
- ★ Chokes Back Bermuda
- ★ Forms Dense Turf
- ★ Requires No Mowing
- ★ Resists Rough Usage
- ★ Thrives in Sun and Shade

Dichondra is a low-growing American plant, native to the southeastern part of the United States, from Virginia south. It is known botanically as *Dichondra Repens* or *D. Repens* var. *Carolinensis*. It makes a dense sod by means of runner-like stems, growing very close to the ground, but never forms a thick mat like Bermuda grass. The kidney-shaped leaves, about one-fourth inch wide, and seldom over 1½ inches in height, have a rich, dark velvety-green color. Dichondra is tough in texture and hard usage will not injure the strong turf nor mar its beautiful appearance.

In California and all mild climates dichondra lawns can be started at any time of the year. But as the summer is the best growing season for dichondra, spring or early summer planting gives quickest results. When planting during the colder months, a nurse crop is especially advisable.

In the East or Middle West we recommend spring or early summer planting. This allows sufficient time to develop a strong root system and for the plants to make seed. When the foliage and top growth is hurt by rigorous weather the lawn will then renew itself from the roots and self-sown seeds.

FARM SEEDS

Germain's are headquarters for Alfalfa Seed, Clover seeds, pasture and hay grass seeds, cover crop seeds, Sudan, Sorghum, field corn, and other field seeds planted on farms.

Prices on farm seed vary greatly throughout the season; and this fact, coupled with a lack of space, makes a complete listing difficult in a catalogue of this kind. We invite those who are interested in farm seeds to write us for prices on their requirements.

We particularly invite those who are interested in pastures to write us for "Germain's Pasture Grass Book". It will be sent with our compliments, and contains much useful information for those interested in the planting and management of pastures.

Before being offered to the gardening public, Germain's Filcoat Coated Seeds were thoroughly tested by commercial growers. The results were amazing. Germain's FILCOAT Coated Seeds produced healthier, sturdier plants and larger yield—Outstripping even plants transplanted at the same time. Test after test showed that no other seed gave results so outstanding as the modern up-to-the-minute scientifically protected — Germain's FILCOAT Coated Seeds.

"FAR SUPERIOR TO ANY ZINNIA EVER GROWN",

Say Leading Park Superintendents from Coast to Coast. Just read a few of the written comments:
Far superior to other Zinnias we have grown. Unusually large flowering. The range of colors was outstanding.

George A. Mallett,
Supt. of Parks, Bridgeport, Conn.
I believe them to be much superior. The colors are better than any strain I have seen.

Russell Kelley,
Supt. of Parks, Jacksonville, Illinois.
Best we have had for color. Outstanding color variations.

O. A. Ziegler,
Board of Park Commissioners.
Tulsa, Oklahoma.

Lucky Strike Zinnias were larger than any we have had previously. The thing that impressed me most in these Zinnias was the extremely clear colors.

E. W. Tabaka,
Supt. of Parks, Saginaw, Mich.
Much larger and showier. Very much impressed by the new pastel colors and bicolor flowers. So was the public.

George Douglas,
Supt. Audubon Park, New Orleans, La.
Far superior. Excellent range of colors and color combinations.

L. C. Palmer,
Supt. of Parks, Grandville, Mich.

They are the finest I have ever grown or seen.

Glenn W. Garwood,
Supt. of Parks, South Pasadena, Cal.

Superior to any I have grown. More brilliant flowers. I think you have a strain that you and the public will be proud to grow and display.

E. B. Saunders,
Supt. of Parks, Williamsburg, Va.

I consider them superior to anything else. This is the best combination of pastels that I have ever grown. The brilliant orange and a mauve pink especially impressed me. I have not seen anything like them before.

C. L. McIlwaine,
Supt. of Parks, El Segundo, Calif.

Superior to any we have seen or planted. Deeper color and larger foliage, more so than any other.

Frank D. Perry,
Supt. of Parks, Richmond, California.

Bloomed two to three weeks earlier than the usual run of Zinnias. Most wonderful plants I have ever seen and the flowers were magnificent.

Charles E. Nelson,

Lucky Strike Zinnias are superior to any giant Zinnias I have had. It has been outstanding in vigor, structure and color.

General Index

• MONSANTO TRADE-MARK

Special Merloam* Formulation

In only one application, you can condition soil to a depth of 3 inches to 6 inches. There is no need to go back and repeat the treatment in small doses.

One Krillium soil conditioner treatment lasts for years — Monsanto tests over 3½ years show no diminishing effects during this period. Krillium is a synthetic chemical which quickly turns hard clay and similar "problem" soils into loose, crumbly particles ranging in size from a pinhead to a pea. The result of this action is entirely mechanical — Krillium is not a fertilizer.

Krilium soil conditioner is easy to apply. Merely spread on soil surface, spade in, mix thoroughly, smooth over. Soil is quite porous — therefore admits air readily, gives roots a chance to breathe and spread out.

Krilium soil conditioner is especially useful in building new lawns and in repairing "spotty" lawn areas. In general, it is effective when worked in to a depth of only 3 inches. Procedure is the same as for other applications—work in thoroughly.
