FRUIT TREE STOCKS—AMERICAN GROWN

The importation of all Fruit Tree Seedlings into this country has been prohibited with the exception of Mahaleb and Myrobolan, which cannot be imported after the Spring of 1931.

American Nurserymen will have to depend entirely on American grown seedlings for their planting after this coming season.

We are in a position to offer seedlings grown in Kansas, Colorado, Washington, and Oregon; each place excelling in the growing of certain varieties of stock.

As the production of American grown seedlings is limited, we advise customers to place their orders early.
