FRUIT TREE STOCKS etc.

AMERICAN GROWN

We have great confidence in the future of apple trees and are expecting to increase our plant of good commercial varieties this Spring.

Our men have just finished grading the 1915 crop of American grown apple seedlings and they are now packed away in good condition ready for prompt shipment. Orders are coming in freely which indicate that others begin to feel that now is the time to plant apple.

We call your special attention to our No. 2 straight and "grafter" grades. Our No. 2 runs 50 per cent and better 3-16 inch caliper at the collar. They make very nice grafts. "Grafters" will average one graft to the seedling and every one will be a collar graft. Many nurserymen prefer this style.

No. 2 and "grafters" can be shipped either from Shenandoah, Iowa or Topeka, Kansas; but other grades will be shipped only from Shenandoah.

We are carrying on hand a smaller stock than usual at this time of the year.

Prices subject to change without notice.

ROOT GRAFTS

No part of our business receives more careful personal attention than the putting up of root grafts. Our grafting cellar is located close to our office and the workmanship is inspected personally by a member of our firm.

We have been putting up grafts for more than forty years. We use experienced men, good material and as a rule our grafts give excellent satisfaction.

We are now grafting and it is important that orders be placed at once so we can put them up while we are organized for this work and while our list of varieties is complete.

While we are prepared to do machine wrapping, yet for our own use we prefer the hand work.

For list of Varieties, write for our Winter Wholesale Trade List.

APPLE AND CRAB PIECE ROOT GRAFTS

Piece root grafts are made by using about six inches of scion and three and one-half inches of root. They are tongued together and securely wrapped at the union, making the entire graft about eight and one-half inches long. This style of graft we use mostly in our own plantings.

5,000 to 10,000.....	4 00
1,000 to 5,000.....	4 50

APPLE AND CRAB WHOLE ROOT GRAFTS

This style of graft is made by using about six inches of scion and the entire seedling, making union at the collar and wrapping with waxed thread which holds it firmly until calloused. Many nurserymen prefer to plant this kind of graft, claiming that they get a larger growth, owing to the well formed root system.

LINING OUT STOCK

We still have a very good assortment of this class of stock. But we are receiving many orders and it would be advisable to place your order soon because when a variety is sold out we will not be able to secure more. Send for our Winter Wholesale Trade List in which we price all this stock.

GENERAL NURSERY STOCK

We have an unusual fine assortment of General Nursery Stock to offer for Spring shipment. We are now working on our Grade Count Price List which we expect to send out about February 1st. In the meantime we would be glad to quote special prices by letter and also to send samples of stock on request.
