HOW TO USE THE MAP

For your convenience in determining hardiness of our plants we have placed Zone numbers in brackets () following the name of each variety. These Zone numbers correspond to the Zones indicated by Roman Numerals on the map.

We believe that our customers will find this map a helpful guide in selecting varieties of suitable hardiness. There is, however, no substitute for local knowledge in determining the hardiness of a plant in a given area.

For instance, customers residing in Zone (3) will certainly find it possible to grow the plants listed for Zone 3 as well as a large percentage of those listed for Zones 2, 4 and 5. Customers in other zones will also have a similar range in making their selections.

We are glad to be able to offer this additional service to our customers and hope that you will find it useful in making your selections.
