Peach Trees

by

**HOWARD-HICKORY CO.
HICKORY, N. C.**

PEACH TREES are scarce again this year; but, we are glad to be able to offer you a nice assortment of really first-class Peach trees for delivery during the fall of 1946 and the spring of 1947.

We now have all varieties listed and/or described on these pages. However, the quantity is limited, so we suggest that you get your order in early.

THE FOUR LEADERS

Golden Jubilee
Slaphey
Belle of Georgia
Red Elberta

Ripen a week apart. Be sure to have them all.

Recognized as the
Standard of Quality
Wherever Good PEACHES
are Grown

A Few Trees Will
Convince You

We offer you only first quality trees—free from disease, grown right and guaranteed to be true to name. You are sure to be pleased.

J. H. Hale

Mayflower

Listed in Order of Ripening

MAYFLOWER. Earliest to ripen. Latest bloomer; seldom killed by the frost. Red, juicy, white flesh, semi-cling.

EARLY ROSE. Bright red skin, medium large, sweet, delicious, white flesh. Hardy, good commercial variety. Cling.

CARMAN. Early bearer of large red fruit. Creamy white flesh of good quality. Semi-cling.

GOLDEN JUBILEE. A smooth, uniformly large Peach with freestone, yellow flesh of highest quality and flavor, golden yellow skin, one-half shaded a beautiful red. Most attractive; large size. Very productive. Great commercial value.

HALE-HAVEN. One of the most promising new varieties, ripening after Golden Jubilee. Always a freestone, has highly colored skin. Fruit large, globular, resembling the J. H. Hale.

HILEY. The early Belle. Resembles the Belle in appearance and quality but is smaller and redder. Heavy bearer, valuable for shipping.

SLAPPEY. A yellow freestone Peach of highest quality, ripening a week after Jubilee and a week before Belle. It is especially suitable for nearby markets where quality and appearance count, and also good for home use.

CHAMPION. Large, round, creamy white with red cheek. Flesh white, firm, sweet. Freestone.

BELLE OF GEORGIA. Medium to large; white with red cheek. Flesh white, tender, juicy. A heavy bearer. Freestone. The standard white Peach.

KILLIAN CLING. Red skin, flesh yellow tinged with red; fruit as large as Elberta. Excellent flavor. One of the best new Clings for all purposes.

RED ELBERTA. A highly colored strain of the regular Elberta, the standard yellow freestone Peach. The Old Reliable for home and market.

HOWARD-HICKORY

Peach Trees

Howard-Hickory Peach trees are grown by men who have been growing good ones here in Catawba County, N. C., one of the pioneer nursery centers of the South, since they were boys, 35 years ago, and they know how to produce the best and do so.

Do not confuse year-old trees on 2-year roots with the "June bud" whose root is only a year old and whose top only a few months. Gain time and save expense of a year's cultivation by using our "dormant budded", large size trees. We dig with a machine that gets plenty of roots, and after proper handling practically no loss results from transplanting. They are true-to-name. We cannot recall when we have had a complaint of untruthfulness.

All trees are certified by State Inspection to be free of dangerous insect pests and diseases.

Howard-Hickory grows the best of the old and the best of the new improved varieties.

Golden Jubilee

Georgia

CHINESE CLING. Large, globular, creamy. Flesh tender, white, juicy. Delicious flavor.

GREENVILLE CLING. Deep, golden yellow skin, red cheek; flesh yellow, firm. Very fine.

AUGBERT. The "August Elberta" resembles Elberta in most characteristics but ripens a little later.

J. H. HALE. Large, heavy bearing freestone Peach. Attractive color and form. Good shipper.

INDIAN CLING. Red Indian. Dark with streaked red flesh. A good old variety, especially good for pickling.

LATE CRAWFORD. A beautiful, large, yellow, freestone Peach with red cheek. Flesh yellow, juicy and rich. Tree hardy and a good bearer and shipper.

SEPTEMBER BELLE. A late Peach closely resembling Belle of Georgia, providing this superb sort late in the season.

KRUMMEL'S LATE OCTOBER. Fine flavored yellow freestone. Good shipper. An excellent late Peach.

If you always want more Peaches after Elbertas are gone, don't fail to order some of the late bearing varieties.

DOES IT PAY TO HAVE A HOME ORCHARD?

In answer to this question, we refer you to Mr. M. C. Vincent of Roanoke Rapids, N. C. Twelve Peach trees only, 4 years old, produced in 1944 all the Peaches his family wanted to eat, all they wanted to can, and after giving away a good many to friends, he sold \$100 worth of them!

The varieties are: 1 Carman, 5 Golden Jubilee, 3 Slappey, 3 Belle of Georgia. The Jubilees produced over half of the crop and brought the highest price.

This information is furnished by Mr. J. A. Rhem, Garysburg, N. C., our representative who handled Mr. Vincent's order and provides service to a great many customers in that section of North Carolina and Virginia.
