ADVERTISEMENT.

THE Proprietors of this establishment in offering to their friends and patrons this Catalogue, would say that it embraces nearly all of the choicest and really proved plants for ornamenting the Garden and Green-house.

Persons who favor us with their orders should be particular to write their order in full by itself, stating particularly what they desire.

Those who may not be sufficiently conversant with the different varieties of Plants, Shrubs, Bulbous Roots, &c., would do well to leave the selection to us. Under such circumstances we should make the *best possible selection*, according to our judgment. When the varieties are specified, it should be stated whether or not liberty is given to substitute.

A remittance is expected to accompany orders from unknown correspondents, by a Draft or Check on some Bank, made payable to our order, or satisfactory references given; and may be made, where banks are not convenient, by Express, and in either case at our risk.

WM. KING & SON,
