SPRING TRADE LIST

OF

SEEDS, STOCKS, SCIONS AND SUPPLIES

For Nurserymen, Seedsmen & Florists,

IMPORTED AND FOR SALE BY

WOOD & BELLOWS,

(Successors to WOOD & HALL,)

GENEVA, N. Y.

SPECIAL ANNOUNCEMENT.

GENEVA, N. Y., January 19th, 1875.

The partnership of WOOD & HALL is this day dissolved by mutual consent, Mr. WILLIAM S. HALL disposing of his undivided interest in stock, good will and fixtures to Mr. GEORGE P. BELLOWS of this place.

The Book Accounts and liabilities of the late firm are retained by WOOD & HALL, and either of the former partners is authorized to sign the firm name in settlements. A prompt adjustment of all claims is necessary.

EDWARD A. WOOD,
WILLIAM S. HALL.

The business will hereafter be continued by the undersigned under the firm name of

WOOD & BELLOWS.

We beg to assure all former patrons, and the trade generally, that with extended facilities we shall enlarge our business *in all its branches*, and be prepared to serve them more largely and efficiently than ever.

We take pleasure in presenting the usual January Trade List to our customers with the confidence that our Stock in all departments is unusually large and fine, and that we offer it at rates that cannot fail to be satisfactory. Having taken the greatest pains to secure the best stock in our line that could be found in this country, and added to it by careful and liberal importations, we are prepared to supply all better than ever before and on the most advantageous terms.

From those who have not traded with us we solicit a comparison of our

prices and a trial order. To our many customers we pledge the same careful attention to orders which has always been given.

Parties ordering will please give directions as to shipment, whether by mail, freight, fast freight, or express. Where no directions are given we use our best judgment, but in no case do we assume any responsibility after the delivery of stock in good order to the forwarders.

The cost of packing will be added to all bills.

Terms will in all cases be cash, except with express understanding to the contrary.

We have the largest facilities for meeting the wants of our patrons, and pledge our most earnest and faithful efforts to satisfy in every particular.

Hoping for a continued increase of the liberal patronage heretofore enjoyed by Messrs. WOOD & HALL, we are

Very respectfully,

WOOD & BELLOWS.

EDWARD A. WOOD, } Importers and Dealers in all kinds of Nursery Stock,
GEORGE P. BELLOWS. } Seeds, Bulbs and Horticultural Goods.

TREE AND SHRUB SEEDS.

We desire to call particular attention to this department. With enlarged facilities and an increased assortment, we offer special inducements to customers desiring either large or small quantities. The quality of our seeds is **unsurpassed**, as they are selected from the most reliable sources and with the greatest care. The rapid and extensive increase of this trade and unvarying satisfaction among our patrons convinces us that our efforts to please them have been most successful. In answer to many inquiries we give a few general suggestions as to the management of Tree Seeds, so that any one with a little care may plant with success.

Fruit Tree Seeds, if not planted in the fall, should be mixed with damp sand as soon as received; allowed to swell for a few days, turning them over frequently, if they tend to become warm. They should then be exposed to the frost in shallow pans or boxes, and when thoroughly frozen, should be covered from rains, &c., and be either sunk in the ground, or placed in some cold situation to prevent thawing till planting time. Apple Seed, however, and occasionally Pear Seed succeeds well in favorable seasons without previous freezing, though it is liable in this case like most of the hard seeded deciduous Trees, not to germinate till the second year after planting.

Peach Seed if obtained in the fall should be spread on the ground in thin layers, covered slightly with earth, and left thus all winter. It will be opened by the action of the frost, and the kernels should be planted as soon as possible after they show signs of sprouting in the spring; they sometimes do well if soaked for some hours in hot water and then planted at once in late fall, but they are apt then to grow unevenly, and the failures will make unsightly gaps. If procured in the winter, they should be

cracked with a hammer, and the kernels mixed with muck and sand, placed in a moderately warm cellar, being careful to keep them cool enough to prevent their growth till planting time.

Evergreens are the most difficult of propagation, and it is a good plan to mix the seed with damp sand when received, which will keep it fresh till planting. This, however, is not necessary. The seed should be sown early in well pulverized sandy loam, and covered lightly. Traps should be set for mice, and the beds should be covered with lattice, brushwood, corn-stalks or netting to shade the young germs which are exceedingly sensitive to the hot suns and to keep off birds which not only devour the seeds but pick off very young plants. The shading especially is very essential in the experiments of inexperienced cultivators. The ground should also be covered slightly during the first winter to prevent the frost from throwing out the plants. These generally should remain two years in the seed bed before being transplanted. Rare seeds may be sown in pots, pans or shallow boxes where they may be more easily cared for. **Deciduous Cypress, Larch, &c.**, should be treated as Evergreens.

Of **Deciduous Trees**, the American Elm, Silver Maple, and a few others ripen their seed in early summer which should be planted immediately and will make good plants the same season. **Nuts** of all kinds, and seeds with hard shells such as Honey Locust, Magnolia, &c., should either be planted in the fall, or mixed with sand or moss to keep them fresh, and exposed to the frost during the winter. With the Locust and Magnolia, however, it generally answers equally well to soak them for a few hours in hot or boiling water before planting. Seeds of other Deciduous Trees and Shrubs should be planted in April or May in drills, and covered from one-quarter to half an inch in depth, according to size.

NOTE.

Parties ordering Seeds by mail will add ten cents per pound or quart, to cover postage. Ounce packets mailed post-paid at prices named. No half ounce packets will be made except where the price exceeds 40 cents per ounce. For Seeds by Freight or Express, cost of bags and boxes will be added.

FRUIT SEEDS.

Our supply of **Apple and Pear Seed** is very large and of superior quality.

N. B.—A large number of Tree and Shrub Seeds not named in the preceding list can be furnished in small quantities.

STOCKS.

Our supply of stocks is exceedingly fine, and secured in our cellars in the best condition for ready shipment at any time. We have a splendid lot of one year **Apple Stocks** and a few fine two year. Our **Pear Stocks** are remarkably healthy, vigorous and free from blight. **Anger's Quince** are heavy, well rooted and fine. Of **Mahalebs** we have a large importation of superior quality to arrive from France in March. We also make a specialty of importing all foreign stocks to order at lowest rates, and are pleased to correspond with parties desiring to procure any in this manner.

Samples of any stocks sent by mail on receipt of twenty-five cents.

GRAFTS.

For those of our customers who desire it, we are prepared to put up Grafts to order, of the best varieties, and in the best manner. With special care in the selection of Stocks and Scions, and experienced men long accustomed to the business, we are assured of giving the most perfect satisfaction in every particular. We believe our prices are as low as can be afforded, where the work is done with proper skill and care. Will give to customers the choice of varieties as far as possible. Our experience leads us to prefer grafts round with string without paper, and our practice is to make them in this way. Orders for ten thousand and over will, however, be *paper-wound* if customers prefer it. As customary, one-quarter of the amount of bill must be advanced with the order.

	Per 1000.	Per 10,000.

IMPROVED TREE LABELS.

Printed and Blank, the Best and Cheapest ever made.

These Labels are now used by nearly all the leading Nurserymen in the country, and are pronounced superior to all others. They are smooth and strong, and for pencil marking have no equal.

We are making a specialty of this business, and are always ready to fill the largest orders at once, a promptness the want of which has long been felt by Nurserymen, who have heretofore been obliged to wait on uncertainties in obtaining a supply.

Our Blank Labels (tree size) are neatly put up in packages of 1000 labels, which enables the customer easily to count them.

Printed Wood Labels, of every name, furnished, not less than 100 of each variety. Please note our

PRICES.

Parties remitting for Labels should add 30 cents for every 10,000 Tree Labels ordered, to cover cost of packing.

Elegant Colored Plates of Fruits, Flowers, &c.

Our Colored Plates are accurately drawn, lithographed and colored from nature and executed by the best artists in the country. Having a large stock to depend upon, we are able to fill orders promptly for anything in this line. We put them up in bound books, to order, embracing the particular variety sold by any dealer (no charge for binding when 50 plates are taken), and forward them to any address, to responsible parties, with bill for collection on delivery of books or plates. In all such cases, when the bill is less than \$16.00, *the fee for collection will be charged in the bill, say \$1.* All persons sending orders for Plates, C. O. D., are requested to inclose \$5 in advance, with the order. But in all cases it is better to remit the whole amount with the order, as it saves the cost of collecting bills.

PRICES OF PLATES.

A New Edition Every Six Months of our

Illustrated Descriptive Catalogue

For Nurserymen and Dealers.

These Catalogues have become most extensively popular and are largely used in all parts of the country. Constant changes and improvements add materially to their value. We include all new leading sorts of fruit and ornamental trees, &c., that promise to be of general value. Our last edition contains sixty-four pages and numerous illustrations.

We also include a number of statistics gathered from successful cultivators, showing the profits realized in actual experience from the culture and sale of the several kinds of fruit. These are of great service as inducements to buyers, and render the book of special value.

The Catalogue is adapted to any locality and made up without covers, which can be added with the name and address of any Nurseryman or Dealer desiring it. No prices attached to any article in the body of the work. A general price list can be added on one of the cover pages if wanted. Fly

leaves with prices and specialties will be added at low rates. To any who wish a very superior Catalogue at a small cost, this offers a rare opportunity.

PRICE OF CATALOGUES.....\$15 per 100, less than 100, 20 cents each.

Covers added at the rate of \$2 per hundred. Samples sent on receipt of 20 cents.

We have also ready to accompany above a general catalogue of Green House and Bedding Plants, expressly for Dealers use, 32 pages, with a fine Colored Plate of Variegated Ivies. This Catalogue is now ready to add covers and name of firm as ordered. It has been prepared by a nurseryman of experience, and gives the botanical and common names, as well as the natural order to which each plant belongs, thus presenting a new and interesting feature. Prices same as for the preceding Catalogue, but no extra charge for the colored plate.

Catalogues, Price Lists, &c., printed to order when preferred.

SPADES, DIBBLES, PICKS, &c.

100 “	20 00

We solicit a trial of our Bark.

BOX CLAMP.

For Packing Boxes of Trees, &c.

The clumsy and laborous methods we have seen practiced in packing nursery boxes by a majority of nurserymen we have visited, lead us to believe that the implement figured above will be regarded as an invaluable aid. The box can be packed **anywhere** on a level spot, and however much the sides may be spread, a few turns of the crank will bring them together, and **hold them**, while the top ribs can be nailed. In this way one man can do with ease what we have often seen two or three work hard to accomplish. The use of the implement is so self-evident that we deem description unnecessary. It is made of iron in the strongest manner.

PRICE.....\$6 00 each.

GREEN HOUSE POTS, &c.

FOR NURSERYMEN AND FLORISTS.

These Pots are made for us of the best material, and invariably give complete satisfaction. Large orders will be filled at a liberal discount, and delivered free within 50 miles of Geneva. For distant shipment they will be carefully packed at a moderate cost, so as to ensure safe transportation.
