PRICE LIST

OF THE

RIVER VIEW

NURSERY,

For Spring of 1871.

CHARLES WHITNEY, Proprietor,

Kansas City, Mo.

OFFICE IN VAUGHAN'S DIAMOND.

1871.

Payne's Excelsior Print, 16, West Sixth Street,
Kansas City, Mo.

To Our Patrons and Correspondents.

In issuing our Catalogue of prices for the spring of 1871, we would take this opportunity of returning our thanks for past favors and the many flattering notices and letters received from our customers and those acquainted with the quality of our stock : from which a few extracts will be found on page 7th.

We do not wish to build up a trade with LOW PRICED STOCK—preferring rather to sell a less quantity for the present, and enjoy the satisfaction of KNOWING that our stock is doing a GOOD WORK—not only for the purchaser, but at the same time in building up our reputation and trade.

We desire to hear from all receiving stock from us, stating the condition when received, and whether any errors have been made, that we may be able to rectify the same at once.

Special Notices.

Please write all orders plainly, giving in full, name, post office, county and State, so that no mistake be made in shipping.

Plants by Mail.

Those desiring small quantities of grape vines, small fruits &c., can have the same sent by mail, postpaid, on receipt of price.

Special rates given to large planters.

Terms, Strictly Cash.

On all orders for stock to be sent by Express, C. O. D., 25 per cent. of the amount must be sent with the order.

Only FIRST COST charged for boxing.

Six of any one variety at the rate per dozen : Fifty at the rate per hundred.

For Descriptions of a few SPECIALTIES, that should be in the hands of all lovers of good fruit, see page 6.

Charles Whitney,

River-View Nursery,

KANSAS CITY, MO.

Moss Roses.....	75	
" Perpetuals.....	1 00	

We shall have a large stock of SWEET POTATO PLANTS in their season, in large or small quantities, at the market price.

Description of Specialties.

GRIMES' GOLDEN.

Free, vigorous, hardy, upright, spreading, and very productive. Fruit medium, roundish, oblate, slightly conical; color rich golden yellow, flesh yellow, crisp, tender, juicy, rich, spicy, sub-acid, peculiar aroma, good keepers.

The HORTICULTURIST says: "The Grimes' Golden may be considered to take the same rank among apples that the Concord does among grapes."

Editor POMOLOGIST, Des Moines, says: "The Grimes' Golden, to our mind, is the most desirable of all apples."

Thomas Grimes, West Va., present owner of the original tree, (now over 80 years old,) writes as follows: "The apple crop in this region will be a failure this season, with the exception of the Grimes' Golden, which gives promise of a better crop than last year. I have nine trees of this variety in bearing and would not give them for one hundred of any variety I ever saw."

SALEM GRAPES.

We give Mr. Rogers' original description: "Like other well known kinds, Nos. 4 and 15, this is a Hybrid, between the native and the Black Hambourg, of a bright chestnut or catawba color, thin skinned, perfectly free from hard pulp, very sweet and sprightly, with a most exquisite aromatic flavor. Taking all its qualities into consideration, it is pronounced by the best of judges, who have tried it, to have no equal; and I can, with confidence, recommend it as the best of all my collection. No collector is complete without a few of the Salem.

THE EUMELAN GRAPE.

The Eumelan is very vigorous, hardy and productive, and ripens earlier than Hartford Prolific. The berries adhere firmly to the bunch, and do not drop from the vines or shrivel when suffered to hang a long time after being fully ripe. The flavor is strictly pure and refined, rich, sugary, spirituous and vinous, the berry ripening all through.

In short, the Eumelan possesses all of the high European qualities of excellence that are now indispensable to a valuable American Grape, without any of the native defects.

KENTUCKY STRAWBERRY.

A new seedling from Mr. Downing of Kentucky, very productive and vigorous grower, large bright red berries, sweet and delicious, ripens about ten days later than any other large berries.

Paschall Morris, in the PRACTICAL FARMER, says: "We were shown some very fine strawberries on the 19th of last month, (June) introduced by Wm. Parry, of N. J., called the Kentucky, which from large size and attractive appearance, were ahead of any other strawberry ripening at the same time; being fully one week later than any other we know of. It is entirely a new variety. The plants are strong and vigorous, blossoms perfect, fruit very large, bright scarlet red, beautiful and firm, bearing carriage well, excellent quality, and very productive."

A. D. Webb, Vice President of the Kentuck Horticultural Society, says in the WESTERN RURALIST: "I certainly regard the Kentucky as the handsomest and most attractive berry that I ever saw of the bright color varieties; good flavor and very large size. There is certainly a debt of gratitude due Mr. J. S. Downing, for originating and introducing the Charles Downing and Kentucky, both of which possess superior qualities, and are decided acquisitions.

Testimonials and Extracts From Correspondents.

MANHATTAN, KAS., December 13, 1870

EDITOR MANHATTAN STANDARD.—Permit me through your paper to acknowledge the receipt of some very superior Dwarf and Standard Pear Trees; also apple, cherry and ornamental trees, all of which were presented to the Kansas State Agricultural College, by Mr. Charles Whitney, of Kansas City, Mo. From the appearance of these trees, one could hardly desire a more healthy and thrifty stock than they are. Mr. Geo. W. Tyler is the Agent of Mr. Whitney, of this vicinity.

JOHN S. HOUGHAN,
Prof. Agriculture.

From Western Gardener, Leavenworth, Kansas.

RIVER-VIEW NURSERY, at Kansas City, conducted by Charles Whitney, is now in full operation, as shown by his Catalogue. We received a lot of Pear Trees from this establishment, and can with pleasure say they are as fine as we have ever seen. We have heretofore been in the Nursery business, and think we know good stock when we see it.

INDEPENDENCE, MO., November 10, 1870.

Your shipment of Pear Trees, eleven hundred in number, came duly at the time specified. I have them all planted, and they are certainly the finest lot ever sent to this country. I am more than pleased with them. It was my purpose of planting only five hundred at first, but your specimen trees were so superior, I concluded to order eleven hundred instead: and since planting them, I am so well pleased I will take four hundred more in the spring; fearing I may not get as good a lot very soon again.

I am Very Truly Yours,
H. M. VAIL.

KANSAS CITY, January 30, 1871

I consider your stock of Pear Trees as fine as I have ever seen, both from their strong, healthy growth, and the careful manner in which they have been handled. I can confidently recommend them to all in want of a No. 1 Pear Tree.

Yours Truly,

DANIEL L. HALL,
Editor Western Rural.

INDEPENDENCE, MO., January 27, 1871.

I take pleasure in saying that your stock of trees and small fruits are very fine, especially the Pear Trees are of extra size, and comprehending more desirable kinds than I have seen offered in our western market.

Respectfully,
Z. S. RAGAN, President,
Missouri Valley Grape Growers' Association.

INDEPENDENCE, MO., February 4, 1871.

The Pear Trees I purchased of you last fall were certainly the finest lot I have ever been able to obtain, and they cannot fail of giving satisfaction.

Very Truly Yours,
W. E. McBRIDE,
Nurseryman.
