E. W. HERENDEEN.

C. L. VAN DUSEN.

WHOLESALE PRICE LIST
OF
NURSERY STOCK.

FOR THE SPRING OF 1872.

HERENDEEN & VAN DUSEN,

(Successors of Herendeen & Jones,)

Geneva, N. Y.

*A FINE STOCK TREE ROSES JUST RECEIVED FROM FRANCE,
\$1 Each, \$80 per 100.*

TO NURSERYMEN AND DEALERS.

WE solicit your attention to the following list of prices for the ensuing season. Our stock is large and of excellent quality in all departments, and we are prepared to furnish any amount promptly. To our old customers it is unnecessary to speak of the lands here, or of our facilities for business, but to others we would say that our aim is to pursue in our business a uniform system of liberal dealing and fairness, with strict attention to the wishes of our customers.

Our Nurseries embrace the best of fresh lands at this place; and the testimony is abundant and indisputable that the soil of Geneva is unequalled for the successful production of long-lived, healthy, vigorous trees, which experience has amply proved are thoroughly adapted to endure extreme cold, or for transplanting to the various soils and climate of the West and South. It consists of a heavy, strong, deep clay-loam, which before being planted with trees is always thoroughly tile-drained, and as a proof which is constantly before us, showing the hardiness of our trees, we would state that with over 3000 acres of nurseries in Geneva, we have rarely known a tree to "winter kill" in the rows, though our winters are very severe. Our trees, therefore, may be relied upon as being perfectly hardy in any part of the country. We also warrant them to be healthy well-formed, stocky trees, with sufficient well matured wood to insure future vigor of growth and productiveness.

Our Senior partner was for many years a partner with Mr. J. J. Thomas under the firm name of Thomas & Herendeen. Our C. L. Van Dusen has been the proprietor until recently of the well-known Macedon Nurseries. Our patrons, therefore, may be assured that the stock offered by us will be well grown, true to name, and carefully handled and packed.

SHIPPING usually commences in the Autumn, from October 1st to 10th, and in the Spring, from March 15th to 30th.

ORDERS should be sent EARLY, written on a separate sheet, and not mixed up with the letter.

DIRECTIONS should be given on the order as to the route by which packages are to be shipped. If not stated, we act to the best of our judgment.

VARIETIES.—The selection of varieties must be left to us, and will be of leading popular sorts; but in all cases the preference of the buyer is consulted as far as possible.

PACKING.—These prices do not include packages, for which a moderate charge will be made, covering cost.

RESPONSIBILITY.—Packages will be delivered in good order at the Railroad or Steamboat without charge for cartage, after which our responsibility ceases. If losses occur by detention, claim should at once be made on the forwarders.

TERMS.—Cash, or satisfactory note, payable at bank.

HERENDEEN & VAN DUSEN,

Growers, Importers and Dealers,

GENEVA, N. Y.

MARENGO WINTER SIBERIAN APPLE.

Our first acquaintance with these new fruits was through our friend and former partner in the Nursery Business, Mr. J. J. THOMAS, author of the "American Fruit Culturist."

Specimens of MARENGO Nos. 1 and 2, sent by Dr. C. ANDREWS, of Marengo, Ill., were transferred by Mr. Thomas to us. After watching and testing the fruit for several years, we visited the original trees and found them models of health, vigor and productiveness, though standing on a bleak prairie where many trees of the common apple, had died or decayed from the effects of the climate. We at once purchased an interest in the entire stock and have jointly removed their propagation to this point.

From our thorough test of these fruits we are prepared to recommend them without reserve as excellent and worthy of introduction. For eating they are fully equal in texture and flavor to the best common apples, and for fancy dessert they are decidedly superior to any variety now used for that purpose, especially in beauty of form and color, delicacy of skin and refreshing quality of the juices.

The uncommon productiveness of this species is a peculiar characteristic, amounting almost to a fault, as the trees fruit early and bear annually profuse crops.

Under neglect the trees set an enormous number of fruit-buds, make but little wood growth, every blossom sets a fruit and every fruit sticks. With generous cultivation, however, the trees grow vigorously, producing fine, glossy foliage with a less tendency to overbearing. The careful grower, who will cultivate well and *thin* the crop will find these fruits more remunerative than any other orchard product, especially in the vicinity of large cities where a demand for a fine ornamental table fruit always exists. Trees of this species are eminently ornamental—in form, foliage and inflorescence,—and especially so while in fruit.

TESTIMONIALS:

The following points we think are fully established by the unsolicited views of practical men and leading Horticulturists which we present below:

First—That these Siberian apples are an entire novelty in fruit culture.

Second—They possess qualities of excellence not belonging to the common species, and are valuable for a great variety of uses.

Third—They are specially demanded in the best fruit districts, to fill a want now but imperfectly supplied, viz: a small, rich, handsome and reliable apple for the table and fancy market.

Fourth—For northern sections they are indispensable on account of the superior hardness of the species.

We have room to insert only a few extracts from the numerous letters we are in receipt of:

From Messrs. Ellwagner & Barry, Rochester, N. Y.

ROCHESTER, N. Y., Sept. 20th, 1871.

Gents: The box of Marengo Siberian apples were duly received and we are much obliged. It is a beautiful and delicious little fruit for the dessert, with a sub-acid, agreeable flavor, and will doubtless be useful for canning and cooking. Proving hardy in high latitudes where the apple usually fails, will also greatly enhance their value. Resp'y,

ELLWAGNER & BARRY.

MESSRS. HERENDEEN & JONES, Geneva, N. Y.

From Wm. Saunders, Supt. U. S. Botanical Gardens, Washington, D. C.

WASHINGTON, D. C., Oct. 3d, 1871.

Gentlemen: The Marengo Siberian apples are very fine, indeed. I look upon them as being of *very great importance*. It seems plain to me that they are to inaugurate a new class of apples of much value. Please send me all the information you have about these apples.

Very Respectfully,

WILLIAM SAUNDERS.

From J. J. Thomas, in Country Gentleman. Sept. 28, 1871.

"We have received from Messrs. Herendeen & Jones of Geneva, N. Y., a generous supply of the new Merengo Crab, introduced by C. Andrews, of Marengo, Ill. We were struck at once by their surpassing beauty, and every one to whom they were shown, uttered an exclamation of delight. The delicacy and smoothness of the surface, and the exquisite crimson shading on the wax-like whiteness of the skin, is not often equaled by any fruit of any kind. The flesh, which is juicy, crisp, and very fine grained, has none of the sharp, austere flavor of the common Siberian, and a just perceptible grain of astringency to give it an agreeable character. *On the whole, there are few apples in the whole catalogue, that can excel it.*"

From H. E. Hooker & Bro., Rochester, N. Y.

ROCHESTER, N. Y., Sept. 26, 1871.

Gentlemen: The second box of Marengo Crabs (No. 4,) came safely to hand in good order. I am pleased with them and hope they may be generally tested, as they seem to promise well.

They *must* be valuable if they are as hardy as the Transcendent Crab. I have some specimens yet of the first box, but have distributed most of them, and always found the "tasters" approved of them.

Yours Resp.,

H. E. HOOKER.

From Simon Hunt, Seedman and Florist, Hudson, Minn.

I am more than pleased with the Marengo fruit you send me. We are jubilant. The first dozen trees ordered from this State when Dr. Andrews first announced the Marengo No. 1, were ordered by me. The small yearlings he then sent are now in their fifth year with six feet heads, fine, symmetrically formed trees, and have stood the climate here, within eighteen miles of St. Paul, equally well with the Red Siberian and Transcendent. The quality of the fruit is far better than I anticipated, being equal to any variety of standard apples raised in this State and far superior to most. I shall set largely of the

Marengos in the Spring, as I do not deem it safe to rely upon the standard sorts in our unreliable climate, and the quality of the Siberians, especially the Transcendant and Marengos, is such that I should not wish it if it were.

Truly Yours,

SIMON HUNT.

FLUSHING, N. Y., Sept. 30, 1871.

Gentlemen: We are much obliged for the specimens of Marengo Siberian apples. They are fine flavored, delicate and tender. Their beauty is incomparable, and their value unmistakeable.

Very Truly,

PARSONS & CO.

From Chas. Downing, Newburg, N. Y.

NEWBURG, Sept. 26, 1871.

The Siberian apples No. 4, came in good condition, for which please accept my cordial thanks. This is the best of the Siberian family I have seen for eating, having very little of the astringency of the crab, and is really a very good eating apple—not quite equal I think to the Lady apple, although it has a more tender skin. I must not forget to say also that the apple cooks well and makes a fine eating sauce.

Very Respectfully,

CHAS. DOWNING.

From M. B. Bateham, Secretary of the Ohio State Horticultural Society.

PAINSVILLE, O., Oct. 1, 1871.

Gentlemen—The Siberian apple sent me is truly a "little beauty," and as good as it is beautiful. I took the Specimens to our State Fair last week, and our President, Dr. Warder, also had samples received from you. They were regarded with interest by our Society, especially by the nurserymen present.

Respectfully, &c.,

M. B. BATEHAM.

From H. T. Williams, Editor Horticulturist, N. Y.

NEW YORK, Sept. 20, 1871.

Your favor of box of Siberians this day received. I have to congratulate you upon their good quality, which is as pleasant to me as anything I ever tasted in our common cultivated varieties.

DANSVILLE, N. Y., Sept. 19, 1871.

Having been indulging in fine pears of late, my taste was not as I supposed in very good training for testing "crabs." I was very pleasantly disappointed, however, when I came to eat. I found them really good eating apples. I have passed them around among our fruit fanciers here, and all allow that they are "not bad to take." Their great beauty, fine aroma, tenderness, size and good quality, must command for them the place they deserve. I regard them as most worthy varieties, highly valuable for the North, and not out of place anywhere.

Yours Truly,

T. T. SOUTHWICK.

PLATTSBURGH, N. Y., Sept. 26, 1871.

Gentlemen: I find the quality of this little fruit very good indeed, and as an ornamental dessert fruit I think it just the thing needed, belonging as it does, to a class hardy and productive in all sections.

As to its cooking qualities I cannot say until I get another supply, for the jury testing them decided that cooking would spoil them—they were good enough without—and so they left none for that purpose. I should think these were so tender as to cook to pieces.

Very Truly, &c.,

WM. H. BAILEY, Nurserymen.

CINNAMINSON, N. J., Sept. 30, 1871.

RESPECTED FRIENDS:—The Marengo Siberian apples were much admired by all who saw them. I showed them to some ladies who said they had often paid 75 cents per one-fourth peck for Lady apples, but preferred the Marengo as a fancy dessert fruit. I think them a valuable acquisition to the fruits of our section.

We are, Truly, &c.,

WILLIAM PARRY.

LEE'S SUMMIT, Mo., Sept. 30, 1871.

Gentlemen: Your Marengo Siberian apples reached us in good condition—thanks. They were new to us, but we regard them as excellent, and a very great addition to the apple family. Wishing you much success, and assuring you that we shall aim to run them into our trade.

We are, Truly, &c.,

BLAIR BROS.

POUGHKEEPSIE, Sept. 20th, 1871.

Gentlemen: Your package of "Marengo Siberian Apples No. 4," arrived in good order. I was astonished to find a crab apple, in size, flavor, and beauty, so nearly resembling the Lady Apple, that it would substantially answer all the purposes for which that favorite variety is used. We found it an excellent dessert fruit, discovering none of the peculiar flavor of the crab family. We stewed and baked them, and they were decided to equal, if not surpass other good apples. We also thought they would be superior for canning and preserving.

I would like to be informed of the quality of its cider, and its bearing habit.

Yours, very respectfully,

A. J. CAYWOOD.

These extracts are all of a recent date, and mostly refer to the fruit of Marengo No. 4, which we have decided to name the "Lady Elgin," partly to replace the "Lady Apple," or "Pomme d'Api," which has declined in quality, till it is almost banished from the fancy market,—and partly because it originated near Elgin, Ill.

We have now commenced the propagation of these trees on a very extensive scale, and at a point visited by the best portion of the trade, and accessible to every section. The leading firms of this State and the West, have already become our customers, and in such honorable company, we anticipate and are prepared to conduct, a large and satisfactory business with the dealers and planters of every section. We will fill orders by Mail, Express or Freight, by the dozen, 100 or 1,000, on the usual terms, and in the best manner. We have already filled orders for these trees to twenty-one States and Territories, and three Canadian Provinces, and expect a largely increased and liberal patronage from an appreciative public.

Marengo Winter Siberian Apples.

(Syn. Marengo Winter Crab)

The Marengo group of Siberian Apples consists of four varieties, viz;

No. 1. MARENGO, season Jan. to May.	No. 3. WINTER GEM, season Nov to Feb.
No. 2. CHICAGO " Dec. to March.	No. 4. LADY ELGIN, " Sept. to Jan.

We offer this season to the trade :

100,000 one year trees, 12 to 20 inches high, by mail, \$6 per dozen, \$40 per 100, \$300 per 1000. 10,000 two year trees, 3 to 4 feet high, \$10 per dozen, \$60 per 100, \$500 per 1000.

Colored Plates 25 cents, and samples of fruit (in season) furnished to dealers.

RETAIL PRICES AT NURSERY.—1 year trees, \$12 per dozen, \$75 per 100, 2 year trees, \$18 per dozen, \$100 per 100.

☞ **ORDERS RESPECTFULLY SOLICITED.**

HERENDIEN & VAN DUSEN.
