OBSERVATIONS.

The Proprietor, having devoted upwards of forty years to Horticulture (twenty-nine years in California) in its several departments, feels confidence in his ability to select from the general catalogue of seeds, plants and trees such species and varieties only as are really worthy of cultivation, to the exclusion of all the various sorts that are not adapted to our climate, but which are too frequently recommended and sold by seedsmen and vendors, to the serious loss and disappointment of their customers.

As the seed business has always been pursued with a view to a permanent establishment, great care has been taken to preserve an unsullied reputation, by having supplies of various seeds raised annually by careful growers, and in no case will he run the risk of offering seeds of an uncertain and varied quality by purchasing of transient persons

As most of the plants in pots are large, the low prices named will compare favorably with Eastern prices.

I have no other calling to draw my attention otherwise than that of the nursery and seed trade, to which exclusively I devote the whole of my time. I am, therefore, enabled to give the utmost personal attention in the execution of orders, and when my customers prefer leaving the selection to me, I shall send what I consider most suitable for their requirements and the locality they are intended for.

I have no *traveling agents*; beware of such.

All plants will be packed in the best manner, and distinctly marked as directed by the purchaser. After delivery at railroad station, express or steamer, they will be at the risk of the purchaser.

Good gardeners recommended to lay off grounds.

Cut flowers a specialty.

Choice BOUQUETS, WREATHS, CROSSES, and other forms of floral decoration furnished to order, on short notice.
