AUGUST 1911

2th LIST OF PLANTS

OFFERED BY THE
Hortus Nuceren-sis-Willy Müller

Nocera Inferiore (Italy)

Naples 1911
 Golden Medal
 New Plants

Florence 1911
 Large Medal
 New Plants

TIPOG. ANGO-RA-NUCERA INFERIORE.

NOTICES AND CONDITIONS:

Orders from unknown Correspondents must invariably be accompanied by remittance.
 Prices are quoted in Franc about 9 1/2 d. — or 5 Fre—4 Shilling.— or 25 Francs—1 L. Sterling.
 Net cash within 60 days from dato of invoice.
 Commissions promptly despatched
 I send out all plants at the risk of the purchaser
 My horticultural nomenclature and of the names of forms originating in my garden. I can guarantee the genuineness
 I decline responsabily for the unconditional correctness of the botanical names of new or rare species. In doubtful
 questions the first botanical authorities must decide.
 Visitors of Naples are invited to visit my Nursery.
 Nocera Inferiore lies on the Paestum Route, between Pompeji and Cava dei Terreni;

Vert fine new and rare plants		QUANTITY	FRANCS		QUANTITY	FRANCS
Asparagus Sprengeri fol. var.						
Have now a fine stock of young healthy plants with fine white variegated leaves.						
strong plants		each	5			
smaller		"	2			
for large quantities, price on application.						
Babiana Bainesii Bak.						
A very fine summerflowering plant from South Africa. Leaves are long plicate and the flowers are shyblue with a large white blotch. Quite different of all the old Babianas known before, fine for pot culture.						
Are ready for sending aut in the autumn.						
large bulbs.		10	5			
Calanthe tricarinata						
Another fine Calanthe from Iapan with rose petals and brown labellum, very easy and rich flowering species.						
Here they are quite rustic.						
Strong plants		each	10			
Crinum × Balfourianum hort Mull.						
(yemense rubricaula × Moorei album)						
Tall growing hybrid with long broad dark green leaves, with large pure white, tubular, sweetscented flowers. Is a luxuriant plant and fine for subtropical groups. Will be hardy in the most parts.						
Large flowering bulbs.		each	5			
Crinum × Prainianum hort Mull.						
(yemense × Moorei)						
One of the richest flowering of all Crinums. Broad fresh green leaves flower stalk tall, with very large fragrant finest rose coloured flowers. Very quick grower and forms in a shot time a large tuff. Is one of the best for grouping in the lawn Hardy.						
Large flowering bulbs		each	5			
Crinum × Tremaynianum hort Mull.						
(yemense var × Moorei)						
Tall growing plant with enormous pure white flowers, which resem bling giant Lilium longiflorum.						
The bulb is enormous, but the multiplication is very slow.						
Large flowering bulbs.		each	15			
Cypripedium insigne fol. arg. var.						
This wonderfull plant is a sport of the very hardy Naples variety. Also this variegated plant is growing during the winter only in a cold frame, from March till end of Novembr in the open. leaves of my plants are broadly striped with pure white and it is a quick grower. Will be a favorit in every Orchid collection. Every visitor of my garden was astonished seeing this very lovely variegated plant.						
My stocke is limited.						
Prices on application.						
Freesia hybrida italica.						
This race was raised by Prof. Ragionieri. They are hybrids between Armstrongii, Chapmanni & the best varieties of re-						

	QUANTITY	FRANCS		QUANTITY	FRANCS
fracta. The colour is varying from pink too carmin and lilac too deep purple. The flowers are smaller but richer flowering than those of the old Freesia. They have received many gold medals at the expositions in the last years. Strong bulbs	10	10	Iris reticulata Melusine. A very fine variety with large light porcellan blue flowers. Strong bulbs.	each	3
Hemerocallis × strassburgensis. These 6 following hybrids are the best of the whole series, raised by Mr. Müller, of the Bot. Garden Strassburg by crossing the true Hemerocallis fulva with other species. In flower they are nearly as my H. fulcitrina hybrids but they are earlier flowering. Prof. Kirschleger. Prof. Krause. Goldball. Orange. Prof. Jost. Prof. Stahl. The whole sortiment	each 6	2 10	Tillandsia dianthoidea Rossi This interesting Bromeliaceae is seldom cultivated and therefore it is one of the easiest plants. It grows here without any soil or spagnum, only in the air. Every year during May & June they are flowering with very pretty blue flowers. It is a plant for any garden, grows luxuriantly in the rooms. I offer strong flowering plants one head large clumps with 3 heads	each	3 8
Hemerocallis × nucerensis hort Mull. Hybrid between H. Sir Michael Foster (aurantiaca major × citrina) × citrina Evergreen, long fresh green leaves, flower stalk tall, 15-20 flowers, Very large clear yellow flowers. This and H. S. M. Foster are the best of all my hybrids.	each	3	Tillandsia procera Mart (gracilis) Another air Bromeliaceae, very rare, has not yet flowered with me, same culture as dianthoidea. strong plants	each	10
Gladiolus Ecklonii Bak. Very fine and interesting Gladiolus, which have received from Basutoland. The leaves are broad with a white hard margin, the flowers stem is dwarf, flowers medium size, ashgrey densely black spotted. Quite different of all species known before. Certainly it will be a usefull plant by any hybridiser, and the time is near that we have a class of black spotted Gladiolus in our gardens. Large Bulbs, ready in the autumn.			Tillandsia xiphioides Ker. This is the finest. Leaves are more longer and when cultivated in the sun, silvery white. The flower spike, is about 50 cm. long and every day during month are open the beautiful pure white large flowers. I have only a few plants in cultivation and it is a very rare plant. strong, flowering plants.	each	20
Iris × ibpal (iberica × pallida) This fine hybrid raised by the Prof. M. Foster, is one of the finest Iris. Flowers are very large. Standards pale blue, Falls ashgrey with black spot. This hybrid is very rustic and grows in every soil, also where Oncocyclus are not doing well.	each	7	Viola splendida Becker. Another very pretty rockery plant from the Mountains of South Italy, the flowers are large pale purple and during very long time. It is near the Viola gracilis and pseudogracilis offered last year. Fine pretty plants in pots are sending out in September.	each	5
Kniphofia hybrida praecox. hort Mull. A fine lot of Mayflowering Kniphofias. Are Hybrids between vomerensis (pauciflora × rufa) × Nelsoni, Tuckii, Uvaria, The flower spike is of medium size, mostly yellow, but also several have red bottoms. They are fine for the garden but also as pot plants. Mixed colours.	each 10	5 17	Viola splendida eburnea. A pure white variety of the type. Fine pretty plants in pots are sending out in September.	each	5
Lycoris radiata pumila. A dwarf variety from Shen-shi. It is earlier in flower than the Japan Lycoris radiata. Flowers stalk dwarf, purple and the flowers darker than the typical species.	each 10	2 18	Hybrid Crinum Adonis carminred : Alexandrae milkwhite Belladonna pink Fortunae white Luisae pure white Linnæum pure white. Pavotcellianum pink Polyanthum snow white Queen Mary pink Sprengerianum white Victoriae white Wilmottianum milkwhite Vomerensis milkwhite Very rich and fine flowering, hardy. the whole assortment 13 varieties .	each » » » » » » » » » » each » »	3 3 3 3 7 5 7 5 5 5 5 5 2 45
