SUPPLEMENT TO CATALOGUE AND PRICE LIST.

FALL 1890.

GLEN ST. MARY NURSERIES.

G. L. TABER, - - - PROPRIETOR.

GLEN ST. MARY, FLA.

PEACHES.

In addition to the fifty varieties of Peaches described in Catalogue, I have grown this season, the Alexander and Chinese Cling, both of which are well known and valuable for a latitude slightly north of this, but not recommended for South Florida; Queen of the South, one of the valuable new Peen-to seedlings; DePass' Early, a native variety, highly recommended by introducer; Franklin's August and Franklin's September, both fine native varieties; Florida Gem and Townsend, both improved seedlings of the Honey; and Reeves' Mammoth, a fine native freestone Peach, highly recommended by South Florida parties.

PLUMS.

While no new varieties of Plums are listed this year, I wish to again call attention to the Burbank, which has been fruited in this State the past season, and is one of the most promising of the Japanese Plums.

Samples of this fruit, twelve days in the mails from California, arrived in good condition.

The tree is a remarkably vigorous grower, an early and abundant bearer; fruit very large, highly colored, extremely handsome, and in point of quality, stands second to none; ripens earlier than the Kelsey.

Prof. VanDeman, United States Pomologist, recommends it highly, and considers it a remarkably valuable acquisition.

JAPAN PERSIMMONS.

My stock of these this year is very fine, and includes many varieties. Great care has been exercised to obtain the correct names for such varieties as are in dispute, and for this purpose many samples have been sent to Prof. VanDeman, United States Pomologist, and names definitely settled. The names attached to varieties by Japanese importers have proven utterly unreliable.

ORNAMENTAL.

While these are made a secondary feature (fruit trees being the first), yet I can supply any of the varieties of Ornamentals named on last page of Price List.

PRICE LIST, SEASON 1890-91.

SPECIES AND VARIETIES.	Each.	Per 10	Per 100	Per 1000
