THE ELLISON.

Is a beautiful yellow-fleshed, free-stone Peach, large as the Late Crawford, ripening a little earlier; yellow, with rich blush. Reproduces itself from seed. The fruit on three generations of trees has been almost indistinguishable in size, flavor and appearance; the trees, even the oldest, are very strong, healthy and exempt from disease. It should be remembered that budded trees cannot be depended on to reproduce themselves from seed, or fully retain their healthy character, as they are apt to partake strongly of the nature of the stock on which budded, and so break the peculiarity. What we offer are seedlings, none of the trees from which the seeds were saved ever have been budded. The ELLISON bears nearly every year; in fact, the older trees bore nine successive crops, during which time we had but three full crops of peaches; and four out of the nine years no other varieties in the country bore a peach, while the ELLISON was loaded, owing it is presumed to its late blossoming and the unusual hardness of the tree.

Our Stock of one year seedling trees is much larger than ever before and we quote them for this Spring at the following reduced rates, which are only about one-half the wholesale rates heretofore quoted.

PRICE PER TREE, cut back to 6 inches, prepaid by mail, \$.30 Per 10, purchaser paying express, \$2.00
purchaser paying express charges. .25 " 100. 15 00

NEMAH

Raspberry, the largest and best stock in the U. S., twice proved, and propagated from plants that bore fruit larger than the Gregg.

Many request the Sugar Maples, &c., cut back near the ground on removal; so they will throw up new and vigorous wood from near the root. This saves expence in handling, so we sell them thus cut back at these reduced prices.

THE WHINNERY LATE WINTER APPLE

Is a rich red medium sized apple, yellow fleshed, a most abundant and early bearer ; season from January to July. Has been frequently kept two years, does not become flat and insipid like many long keepers but goes into the market fresh, crisp and high flavored.

THE LONG KEEPER BENTLEY

Is another beautiful red apple, indistinctly striped, rich, glossy surface, very large size, flavor subacid to sweet, sprightly, keeps sound until apples come again.

HYDE'S KING OF THE WEST OR GOLDEN BALL

Already a very popular apple, a popularity gained by its own merits ; size large to very large, of highest flavor and quality, is ranked among the longest keepers ; color, rich golden yellow, hence its name Golden Ball.

All three of the above apples have been kept sound in an ordinary cellar for two years. One year trees will be prepaid by mail or express at 15 cents each, or \$10.00 per 100 ; or we will supply root Grafts of the above varieties already to plant in nursery rows, at \$3.00 per 100 ; also Meech's Prolific and Missouri Mammoth Quince Grafts at same price postpaid.

THE ART OF PROPAGATION

New Edition, additional Engravings and Extended matter, with reduced price, sent free when requested, with Cash orders of \$10 and upwards. A book for Nurserymen, Florists, Seedsmen, Gardeners and Farmers, is a concise, practical treatise on the rapid multiplication of Vines, Plants, Trees, &c., detailing the management in propagation of Seeds, Bulbs, Cuttings, etc., and the manner of operating in Grafting, Budding, Inarching, &c. *Amplly Illustrated.* Price prepaid, by mail, 30 cents, or send stamp for sample pages, table of contents, etc.
