CULTIVATED AND FOR SALE

— BY —

PILKINGTON & Co.,

PEARMOUNT NURSERY,

PORTLAND,

OREGON.

From "the deep woods where rolls the mighty Oregon."

Probably there is no country on the globe in which a more magnificent and varied flora is found than in Oregon and Washington. The forests bordering the Columbia River, and generally on the western slopes of the Cascade range of mountains, have excited the wonder and admiration of the scientist, the pleasure-seeker and the lumberman.

In their wondrous luxuriance of tree, shrub and herbal product, they rival the richest profusion of the tropics. In the massively-columned labyrinths of her deep, mighty woods lurk dozens of curious and beautiful plants which have called forth the admiration of the botanist and the beauty-worshiper everywhere. Many new species remain for the discoverer, and next season we hope to announce them, one being a wondrous calla never hitherto described.

In making up this catalogue we have aimed to include those species that appear especially worthy of cultivation for their beautiful ornamental effect in garden, park, lawn-bordering, street-planting, etc.

Many others can be furnished, and botanists, professional or amateur, desiring flora not found in this catalogue, can send a list of the trees, shrubs or plants desired, and we will use our best endeavors to procure them.

Gardeners or collectors wanting larger quantities, will be furnished prices for 100 or 1,000 by writing us. The prices quoted

here are for single plants or per dozen, sent by mail. *Larger plants* will be sent by express at expense of person ordering, but this will be light, as we have promises of special rates from the Express Company.

All plants will be securely packed and true to name.

All orders, to insure prompt attention, must be accompanied by cash, unless by previous special agreement. No order solicited for less than \$1.00 worth.

Many plants can be shipped more safely in the fall, and all orders for such received too late to be sent safely in the spring, will be booked and filled in the autumn, unless otherwise directed.

Having secured the services of Mr. Thomas Howell, the botanical collector, who has traveled all over the Northwest, special attention can be assured and will be given to making collections of plants, bulbs, seeds, etc., for botanical gardens.

Send all orders to PILKINGTON & CO.,

PEARMOUNT NURSERY,

Portland, Oregon.

DESCRIPTIVE LIST

OF

RARE AND CHOICE

ORNAMENTAL TREES AND PLANTS

INDIGENOUS TO THE NORTHWEST.

	EACH.	DOZ.	Hand.
Achlys triphylla. —Very handsome; large, three-parted leaves that become deliciously fragrant in dying .	15	1 50	2.50
Anemone deltoidea. The Western Wind-flower.—A pretty little plant about 10 inches high, from long running rootstock stems, terminated by a large, white flower.	15	1 50	2.50
A. Oregana. Oregon Blue Wind-flower.—Like the last, but with blue flowers.	25	2 00	5.00
A. Occidentalis. —Finely cut leaves and solitary white flower in early spring, succeeded by an ornamental bead of long, feathery tails.	25	2 00	5.00
Aquilegia Formosa. Western Columbine.—Showing red flowers in early summer. 2 to 4 ft. high.	25	2 00	2.50
Aster Douglasii. —Produces in late autumn a profusion of violet-purple flowers an inch to an inch and half in diameter. 2 to 4 ft.	25	2 00	2.50
A. Hallii. Hall's Aster.—A small species with slender, graceful stems, covered in late summer with a profusion of white flowers. 1 to 2 ft.	20	2 00	2.50
A. radulinus. —A dwarf species producing corymbs of strong white or purple flowers in summer. 4 to 8 inches.	15	1 50	2.50
Campanula rotundifolia. Harebell.—Slender stems, 1 to 2 ft. high, ornamented with long racemes of bright blue bells—fine for rock-work	20	2 00	2.50
C. Scouleri. Scouler's Bellflower.—A dwarf species, 4 to 8 in. high, with small light blue flowers . . .	10	1 00	2.00

	EACH.	DOZ.	<u>100</u>
Cardamine angulata. —Slender stems, 1 to 2 ft., terminated with fine white flowers in spring	15	1 50	2.50
C. Gemmata. —A dwarf species with showy purple flowers	25	2 50	5.00
Chelone nemorosa. Western Turtle Head.—The stout, simple stem bears at its apex a spike of purple flowers in summer.	25	2 50	2.50
Claytonia lanceolata. Western Spring Beauty.—A tuberous-rooted plant, 4 to 6 in., bearing showy white flowers in early spring	15	1 50	2.50
Clintonia uniflora. —A liliaceous plant with a pair of large leaves and a scape, 6 to 8 in. high, terminated by one or two showy white flowers in spring	25	2 50	3.50
Corydalis Scouleri. Scouler's Corydalis.—2 to 4 ft.; large, graceful leaves, and showing purple flowers in early spring—strong plants.	50	5 00	5.00
Delphinium Menziesii. Menzies' Larkspur.—A dwarf species, 6 to 12 in., with showy blue flowers in early spring	15	1 50	2.50
D. Nuttallii. Nuttall's Larkspur.—Simple stems with long spikes of very showy blue flowers. 1 to 2 ft.	25	2 00	5.00
D. Pauciflorum. Few-flowered Larkspur.—Slender, branching stems, 1 to 3 ft. high, with showy blue flowers in early summer.	15	1 50	2.50
D. Trolliifolium. Trollis-leaved Larkspur.—Tall branching stems, 2 to 4 ft. high, with a great profusion of showy blue flowers in spring—of the easiest culture and very showy	25	2 50	2.50
Dentaria tenella. Little Dentaria.—Slender stems, 4 to 6 in., bearing a corymb of showy purple flowers in very early spring	10	1 00	2.00
Dicentra formosa. Western Bleeding Heart.—Rather large, graceful, fern-like leaves and showy pink flowers, of the easiest culture, if given plenty of moisture; will bloom from spring until early frosts	25	2 00	3.00
Dodecatheon Hendersoni. Henderson's Am. Cowslip.—A fine species with a rosette of small leaves at the ground and a slender stem, 10 to 16 in. high, having an umbel of showy, drooping pink flowers in early spring	25	2 00	3.00
D. dentatum. —A fine white flowered species, 4 to 6 in. high	25	2 00	4.00
D. Jeffreyi. Jeffrey's Am. Cowslip.—A fine large species with large leaves and stout stems a foot or two in height, with pink flowers in spring.	15	1 50	2.50
Erigeron Howellii. —A new and beautiful plant, 12 in., very showy, with large white flowers in spring . .	30	3 00	5.00

	EACH.	DOZ.	<u>100</u>
E. speciosus. —A tall showy species with a great abundance of purple flowers in summer.....	25	2 00	3 00
Gaillardia aristata. Bearded Gaillardia.—A fine species with rather large orange flowers all summer	25	2 00	3 00
Geranium incisum. Cut-leaved Geranium.—Stems 1 to 2 ft, with large pink flowers in summer.....	25	2 00	3 00

IRIS—Fleur-de-lis—Flower-de-luce.

Iris bracteata. —This is the finest species of American Iris; has firm dark evergreen leaves and large flowers of a beautiful yellow	30	2 75	5 80
I. macrosiphon. —A dwarf species, 6 to 8 in. high, with narrow, grass-like leaves and very showy white or cream-colored flowers	25	2 50	5 00
I. longipetala. —A showy species with light-blue or purple flowers	25	2 50	5 00
I. tenax. —A dwarf species with narrow leaves and large purple flowers.....	25	2 50	3 50
Lewisia rediviva. —2 to 3 in. high. The large, fleshy root bears a cluster of narrow, fleshy leaves and very beautiful large, rose-colored flowers in early summer	25	2 50	4 00
Monardella villosa. —A small plant 8 to 12 in. high, with small leaves and heads of small pink flowers all summer	25	2 50	3 00
Oxalis trilliifolia. —Large, graceful leaves and umbels of white striped with pink; flowers all summer.....	25	2 50	4 00
Pæonia Brownii. —Handsome cut leaves and small brownish flowers in summer	25	2 50	5 00
Pentstemon glandulosus. —Stout stems, 2 to 3 ft. high, with long spikes of dark-purple flowers in early summer	25	2 50	5 00
P. diffusus. —A handsome species with purple flowers..	25	2 50	5 00
P. ovatus. —Stems 2 to 3 ft. high, with long spikes of bright-blue flowers in early summer.....	25	2 50	3 50
P. Richardsonii. —A late flowering species, with notched leaves and scarlet flowers in summer.....	25	2 50	3 50
Phlox Douglasii. —A dwarf species with fine evergreen leaves and a great profusion of pink flowers in spring	25	2 50	4 00
P. Douglasii var diffusa. —Larger, growing in diffuse mats with many pink flowers in spring	25	2 50	4 00
P. speciosa. —Taller, 6 to 12 in. high, with large leaves and corymbs of fine pink flowers in spring	25	2 50	4 00

	EACH.	DOZ.	<u>100</u>
P. adsurgens. —A trailing species with evergreen leaves and handsome rose-colored flowers in spring	25	2 50	500
Polemonium carneum. —A fine species 12 to 20 inches in height bearing light rose-colored flowers an inch in diameter in summer.	30	3 00	5
P. humile. —A dwarf species, 8 in., producing dense clusters of blue flowers in summer.	25	2 50	5
Saxifraga Mertensiana. —Merten's Saxifrage.—Stems 10 to 12 in. high, bearing open panicles of small white flowers in early spring—fine for rock-work.	25	2 50	3 50
S. occidentalis. —Western Early Saxifrage.—A dwarf species 3 to 6 inches high, with fine clusters of white flowers in early spring—fine for rock-work.	15	1 50	2 50
Sedum. Stone Crop. "Live for Ever."—Great tenacity of life; very hardy.			
S. Douglasii. —4 to 8 inches in height, with narrow, fleshy, green leaves and a great profusion of yellow flowers in early summer—of the easiest cultivation	10	1 00	2 00
S. Oreganum. —A broad-leaved species of creeping habit; flowers yellow in July.	15	1 25	2 00
S. Spathulifolium. —Like the last, save that the leaves are covered with a white powder, giving it a variegated appearance; flowers early.	15	1 25	2 00
Sidalcea campestris. —Stout stems 2 to 4 ft. high, with long, loose spikes of purple, mallow-like flowers all summer.	30	3 00	5 00
S. spicata. —Smaller than above, with dense spikes of rose-colored small flowers in June.	30	3 00	5 00
Spraguea caudicifera. —A beautiful little plant growing in tufts 6 to 12 in. in diameter, with small leaves and numerous heads of white flowers borne on stems 3 to 4 in. long in early summer	30	3 00	5
Sisyrinchium grandiflorum. —A fine species 6 to 10 in. high, with grass-like leaves and large purple flowers in early spring—one of the most striking plants of the Northwest; strong plants	20	2 00	3 50
Synthyris reniformis. —A fine species with rather large evergreen leaves and numerous dense spikes of beautiful blue flowers in very early spring—of easiest cultivation and perfectly hardy; strong plants.	25	2 50	3 50
Tellima grandiflora. —A vigorous plant with rather large, round leaves and stout stems 2 to 3 ft. high, with long spikes of bell-shaped flowers in spring	20	2 00	3 00
T. odorata. —Like the last but smaller, and the pink flowers are very fragrant.	25	2 50	3 50

	EACH.	DOZ.	<u>100</u>
Vanconveria hexandra. —A graceful plant 10 to 16 in. high, with rather large panicles of white flowers...	15	1 00	2.50
V. var. aurea. —Like the last but the leaves are evergreen and the flowers are golden-yellow	30	3 00	5.
Veratrum Californicum. —A fine showy plant for moist places 2 to 6 ft. high, with large leaves and a long panicle of white, bell-shaped, drooping flowers in summer, succeeded by ornamental pods	50	5 00	10.
Viola Hallii. Hall's Violet.—A beautiful species growing 6 in. high, with finely cut leaves and fine blue and white flowers in spring	25	2 50	5
V. trinervata. —4 to 6 in. high, with divided leaves and blue and purple flowers.....	25	2 50	5
V. adunca. —A fine species with entire leaves and a great abundance of blue flowers in spring.....	20	2 00	3.50
Xerophyllum tenax. —Fine tufts of grass-like leaves from which arises a stout stem of 2 to 4 ft. high, bearing a long spike of small, white flowers in early summer—very showy.....	25	2 50	5.

BOG PLANTS.

Darlingtonia Californica. California Pitcher Plant.—Curious leaves 1 to 2 ft. high, with stout stems 3 to 4 ft. high, terminated with a single large brown and yellow flower in spring.....	50	4 00	5.
Caltha biflora. —A neat little plant 8 to 12 in. high, with rather large, round leaves and white flowers an inch or more in diameter in early spring.....	25	2 50	3.50
Nuphar polysepala. Western Pond Lily.—Very large, floating, dark-green leaves and large, yellow flowers that last a long time, blooming most of the summer. Strong roots	50	5 00	6.
Narthecium Californicum. —A nice little plant 8 or 10 in. high, with grass-like leaves and spikes of yellow flowers in summer.....	25	2 50	5
Lysichiton Kamtschatcensis. —In spite of the botanical name this is one of the finest of ornamental plants. The numerous leaves are large, often 3 or 4 ft. long, of a peculiar yellowish-green, giving it a more decided tropical appearance than any other North American plant. Strong plants.....	60	5 00	6.
Parnassia fimbriata. —Stems 8 to 12 in. high, with a single white flower an inch or more in diameter; late summer.....	20	2 00	2.00
P. Californica. —Like the last, but larger	25	2 50	5.

ORCHIDS.

	EACH.	DOZ.	100
Calypso borealis. —A pretty little orchid with a single green leaf and large flower in early spring—very easy to grow.....	15	1 00	2.50
Cypripedium Californicum. —Stout stems 2 to 3 ft. high, with long spikes of showy yellow and white flowers in summer—very fine.....	30	3 00	8.00
C. montanum. —Stems 2 ft. high, with several large brown and white flowers in early summer.....	30	3 00	6
Epipactis gigantea. —A fine orchid 1 to 2 ft. high, with numerous spikes of curious brown flowers in summer.....	30	3 00	6
Goodyeara Menziesii. Rattlesnake Plantain.—Pretty little plants with finely mottled green and white leaves and spikes of white flowers in late summer; requires a shady situation.....	15	1 50	2.50
Habenaria elegans. —Slender stems 12 to 18 inches high, with spikes of small, white flowers in summer....	15	1 50	2.50
H. gracilis. —Stout stems 1 to 2 ft. high, with spikes of small green flowers in summer.....	25	2 50	3.50
H. leucostachys. —Stout stems 1 to 3 ft. high, with long spikes of showy white flowers all summer; requires a moist situation.....	30	3 00	6.
H. Unalaschensis. —Slender stems with spikes of small, greenish, highly fragrant flowers.....	25	2 50	3.50

BULBS.

Allium acuminatum. —A fine little allium 6 to 8 in. high, with an umbel of beautiful pink flowers that lasts a long time.....	25	2 50	3.50
A. Bolanderi. —Like the last, but more slender and the flowers are smaller.....	30	3 00	5
A. falcifolium. —Stems 3 to 5 in. high, with heads of fine rose-colored flowers.....	10	1 00	2
A. madidum. —Slender stems 6 to 8 in. high, with close heads of pink flowers in early summer.....	5	50	1.50
A. attenuifolium. —Slender stems a foot or more high, with close heads of light rose-colored or white flowers in early summer.....	5	50	1.50
Brodiaea congesta. Tall Brodiaea.—Slender stems 2 to 3 ft. high, with a head of purple flowers in early summer.....	10	1 00	2
B. capitata. —Like the last, but not so tall and the flowers are larger.....	15	1 50	4.

	EACH.	DOZ.	100
B. grandiflora. Large-flowered Brodiae.—Stems 6 to 12 in. high, bearing an umbel of purple flowers.	10	1 00	2.50
B. Hendersonii. —Like the last, but the flowers are a beautiful yellow, striped with blue—very fine.	10	1 00	5,
B. Howellii. —Stems 12 to 20 in. high, with an umbel of fine hyacinth-like white or light-blue flowers in spring—very fine.	25	2 50	5.
B. lactea. White Brodiae.—Stems 12 to 20 inches high with an umbel of white flowers in spring.	10	1 00	2
Camassia esculenta. Blue Camas.—Stems 12 to 20 in. high, with a long spike of showy blue flowers in June	15	1 50	3
C. Leichtlinii. —Laichtlin's Camas, 2 or 3 ft. high, with larger flowers.	25	2 50	5
C. L. var. alba. —A white-flowered Camas.	25	2 50	5
C. Howellii. —A very curious plant. The bright-blue flowers open only for a few hours in the afternoon	50	4 00	12.00
Calochortus Howellii. —Stems 2 ft. high or more, with large, white flowers in summer—very fine.	25	2 50	5
C. longebarbatus. —Stems 8 to 10 in. high, with several purple flowers an inch or more in diameter in June	15	1 50	2.50
C. macrocarpus. —Stems 18 to 20 in. high, with several large purple or blue flowers in late summer—very fine.	15	1 50	2.50
C. Tolmiei. —A fine little species 8 to 10 inches high, with several white or light-purple flowers in spring—a long time in bloom.	15	1 50	5.00
Erythronium citrinum. —A fine species, with large, lemon-colored flowers on stems 10 or 12 in. high.	15	1 50	5.00
E. giganteum. —Stems 12 to 16 in. high, with 1 to 4 large, lily-like, white flowers and white mottled leaves.	15	1 50	5.00
E. grandiflorum. —Like the last but smaller, with yellow flowers and green leaves.	15	1 50	5.00
E. Hendersonii. —A purple-flowered species with fine mottled leaves.	15	1 50	5.00
E. Howellii. —Like <i>E. grandiflora</i> , but the flowers are pure white, changing to pink.	15	1 50	5.00
Fritillaria lanceolata. —Stout stems 10 to 12 in. high, with several large, drooping brown and yellow flowers in early spring.	15	1 50	3.
F. pudica. —A dwarf species about 6 in. high, with a single yellow, lily-like flower in early spring.	15	1 50	3.
F. recurva. —A beautiful species 18 to 20 in. high, with red and orange lily-like flowers 1½ to 2 in. long. ...	25	2 50	5.
Hastingsia alba. —Stems 18 to 20 in. high, with spikes of small, white flowers.	15	1 50	5.
H. bracteosa. —Like the last but stouter.	25	2 50	5.

LILIUMS—LILY.

	EACH.	DOZ.	
L. Bolanderi. —A fine dwarf species 1 to 2 ft. high, with small, dark-red flowers	1 00		<u>100</u> 25.00
L. Columbianum. —2 to 4 ft. high, with yellow flowers in June.....	25	2 50	6
L. pardalinum var. angustifolia. —A variety 3 to 4 ft. high, with large, reddish-yellow flowers.....	25	2 50	6
L. Washingtonianum. —This is the finest of the North American lilies. The flowers are large white, changing to red, very fragrant and borne in great profusion on well established plants. We have seen as many as 40 flowers on a single stem. Large bulbs, \$1.00 each; smaller, 30 to	50		10.
Stenanthium occidentale. —A nice little plant 12 to 18 in. high, with a long spike of brownish-red flowers in early summer.....	15	1 00	350
Trillium ovatum. —A very fine species with large leaves and a single large, white flower in very early spring	25	2 50	5
Zygadenus venenosus. —Stout stems a foot or two high, with a spike of white flowers in summer.....	25	2 50	5

SHRUBS.

Arctostaphylos viscida. —A fine evergreen shrub 10 to 15 ft. high, branching from the base, of very symmetrical growth. The leaves are whitish-green, contrasting strongly with the bright-red bark of the limbs. It bears a great profusion of pink flowers in early spring; small plants	25	2 50	5
A. tomentose. —Like the last but smaller (4 to 6 ft. high). Small plants.....	25	3 50	350
Berberis aquifolium. —A fine shrub 4 to 8 ft. high, with dark, glossy, evergreen leaves and fine yellow flowers in early spring—nice plants.....	25	50	2 50
B. nervosa. —Like the last but smaller—only a foot or two high	25	2 50	350
Ceanothus integerrimus. —A neat shrub 4 to 6 ft. high, with fine panicles of light-blue flowers in spring. Strong plants.....	25	50	5
C. prostratus. —A trailing shrub that makes mats several feet in diameter and only a few inches high, with bright, evergreen leaves, and in spring covered with a great profusion of beautiful blue flowers. Strong plants	25	50	5

	EACH.	DOZ.	100
C. velutinus. —A fine evergreen shrub with large, glossy, fragrant leaves and white flowers in spring. Strong plants	25	to 50	3.50
Lonicera Douglasii	25	2 50	3.50
L. ciliosa. —A fine honeysuckle with beautiful yellow and orange blossoms in early summer. Strong plants	25	to 50	3.50
Pachystima Myrsinites. —A fine little evergreen shrub with box-like leaves. This is fine for borders. It is a brighter green than box, and altogether a nicer plant. In large quantities it can be furnished at very low rates. Strong plants	25	2 00	3.50
Philadelphus Lewisii. Western Mock Orange or Syringa.—A shrub 6 to 8 ft. high, with a great profusion of large, white, fragrant flowers in early summer—very fine	25	2 50	3.50
Rosa Nutkana. —A fine wild rose, with a great profusion of bloom in late spring	25		4
R. gymnocarpa. —A neat little rose 3 to 4 ft. high, with flowers about an inch in diameter	25		4
R. pisocarpa. —Blooms late	25		4
Ribes Lobbii. —A fine shrub 3 to 4 feet high, covered in late spring with fine red and white flowers. 25 to 50	25	to 50	4
R. sanguineum. Flowering Current.—This fine shrub grows 5 to 6 ft. high. One of the first to bloom in the spring, and when it is covered with its brilliant solferino flowers, it is a beauty, indeed.	25	to 50	4
Rhododendron Californicum. —A fine evergreen species with bright, glossy leaves and immense trusses of variegated pink flowers, making a wondrous wave of splendid bloom. Strong plants	50	to 1 00	8
R. occidentale. Azalia Occidentale.—A fine species of the azalia type, with large trusses of white and yellow fragrant flowers in summer. Strong plants. 50 to 1 00	50	to 1 00	10
R. albiflorum. —A white-flowered species	50		3.50
Spiræa ariæfolia. Ocean Foam.—A shrub growing from 6 to 10 ft. high, with immense panicles of small, cream-white flowers in summer. These wondrous clusters excite the intense admiration of all visitors to Oregon	25	to 50	3.50
S. betulæfolia. —A dwarf species 2 to 3 ft. high, bearing close panicles of light-red flowers.	25	to 50	3.50
S. Douglasii. —4 to 6 ft. high, with close panicles of bright-flame flowers	25	to 50	3.50
Vaccinium ovatum. "Menzies' Huckleberry."—An evergreen species with showy flowers and fine green leaves	25	2 50	8.00

	EACH.	DOZ.	
V. parvifolium. —A shrub 6 to 8 ft. high, light-green leaves and bright-red berries.....	25	2 50	<u>1.00</u> 3.50
Whipplea modesta. —A delicate trailing shrub with small, white flowers—fine for rock-work	25	2 00	3.00

DECIDUOUS AND BROAD-LEAF EVERGREEN TREES.

(MAILING SIZES.)

Acer macrophyllum. Broad Leaved Maple.—A fine, large round-leaved tree. It is this tree which has given the streets of Portland their avenue-like beauty remarked by all visitors; \$1.00 per 100	15		2.50
A. circinatum. Vine Maple.—A small, viney tree, bearing light-green leaves during the summer, but in early fall changing to a dozen tints—from gold to the most splendid scarlets and crimson. No brilliancy of foliage in the tropics can surpass these wondrous thickets of flame.....	25 to 50	3 00	3.
Arbutus Menziesii. Madrona.—A beautiful tree 20 to 50 ft. in height. Its large, glossy leaves and smooth, reddish-brown bark make it a "thing of beauty" at all times. Add to these its profusion of light-pink flowers in spring and its fine scarlet berries in late summer and autumn, renders it an unsurpassable ornament to any collection.....	25 to 50		5-
Castanopsis chrysophylla. —A large shrub or small evergreen tree; grows 25 to 50 ft. high	25 to 50		5-
Cornus Nuttallii. Nuttall's Dogwood.—A small, round-headed, deciduous tree 20 to 50 ft. high, covered for some time in spring with its large, white flowers, changing in autumn to a russet-colored fruit and scarlet berries	25 to 50		3.50
Fraxinus Oregona. Oregon Ash.—A round-headed tree growing to 75 or 100 ft. in height; small plants....	25		3.50
Quercus densifolia. —Or large, round-headed evergreen oak of great beauty	50		5.
Rhamnus Purshiana. Purshes' Buckthorn.—A small tree 30 to 50 ft. in height.....	25		3.50
Umbellularia Californica. —A small evergreen tree 30 to 50 ft. high	25		5.

CONIFEROUS TREES.

[The prices here mentioned are the lowest and highest prices for mailing sizes.]

Abies grandis. —A large, symmetrical tree.....	25 to 50	3.50
Cupressus Lawsoniana. Lawson's Cypress.—A very beautiful tree	25 to 1 00	10.

	EACH.	DOZ.	
C. Nutkana. Sitka Cedar.—A small, handsome tree.	25	1 00	1.00
Juniperus occidentalis. Western Juniper.—A fine tree			
50 to 75 ft. high	50	1 00	
Libocedrus decurrens. Post Cedar	50	1 00	10.00
Larix Occidentalis. Western Larch.—Grows to be a			
large tree	25	50	
Picea Menziesii. Menzies' Spruce.—One of the most			
beautiful spruces for park, lawn or avenue	25	50	
Pinus Contorta. Twisted Pine.—A beautiful little conifer			
growing 20 to 30 ft. high, with dark-green leaves	25		
P. Monticola. —The most beautiful of western pines.	25	50	
P. Lambertiana. Sugar Pine	25	50	
P. ponderosa. Western Yellow Pine	25		5.00
Pseudotsuga Douglasii. Douglas Spruce.—One of the			
most beautiful of evergreen trees	25	50
