Bulbs for Fall Planting

HOW AND WHEN TO ORDER

The best time to order is just as soon as you receive this catalog. We can always give your orders more of our personal attention if they come in before the rush of the fall trade.

ERRORS.—We exercise the utmost care in filling orders, striving to do a little more than we offer; yet in the press of business errors sometimes occur. In such cases we wish to be promptly notified of the fact and will make such corrections as will be satisfactory. Please keep copies of all your orders for comparison.

Prices given in this catalog are for early orders and include postage on bulbs and small seeds in quantities up to one pound. If the order amounts to fifty cents or more later in the season, when our importations are exhausted, we may not be able to always supply at these low prices, but will always send full value for the money you may send us. Postage should be included to all orders for bulb bowls, bulb fibre, supplies, etc.

WYATT'S QUALITY BULBS

As the flowers are already formed in the bulbs, is it not reasonable to suppose that the larger and more perfect bulbs you plant, the larger and finer the flower will be?

When we placed our orders with the growers, our instructions were "Send us only the very largest and most perfect bulbs obtainable in Holland, France, and other countries."

You may be offered bulbs at a lower price, but they will be smaller. Our prices are as low as it is possible to furnish these TOP-SIZE BULBS.

Try them once—you will see the difference when they bloom.

Please Use Printed Form When Making Out Your Order

OUTDOOR FALL BULB CULTURE

FOR OPEN-GROUND PLANTING.—Most of the suitable sorts should be planted in the fall, and they will flower the following season, commencing in March or earlier with Snowdrops, Crocus, etc., which are followed with Hyacinths, Tulips, Daffodils, and a host of other bulbous beauties.

TIME TO PLANT.—Remember that the "fall" is the time to plant all spring flowering bulbs. They may be put in almost any time from October first until the ground freezes; in fact, we have succeeded with even later planting, but earlier planting brings best success.

HOW TO PLANT.—The soil should be well spaded, and the surface of the beds slightly raised at the center, so that no water will stand, but soak the bed good with water when first put in, then later if it dries out. The soil will be better if enriched with well-rotted manure or bone dust.

AFTER TREATMENT.—All bulbs like a sunny exposure, and if protected from the north will bloom earlier. The bulbs do well for a number of years, without lifting or replanting. When through flowering the beds may be planted with shallow-rooted annuals, as nasturtiums, petunias, verbenas, etc. If necessary the bulbs may be taken up when the leaves begin to ripen, to be replanted the coming fall.
**Wyatt’s Superb Darwin Tulips**

The late-flowering Darwin Tulip has outclassed all its predecessors in type and beauty, and is at the present the Queen of the Tulip family. It attains a height of 2 or 3 feet, with strong, heavy foliage, erect and robust stem, terminating in large and massive flowers. The colors of the Darwin embrace all the shades of white, pink, lilac, rose, scarlet, crimson and maroon, and most of the flowers show a particular satiny effect. Darwin Tulips are the finest among shrubbery and perennials; they grow tall, bloom for a long time, and, if planted 6 to 8 inches deep and left undisturbed, will bloom for many seasons. A great many of the varieties will force to good advantage and may be had in bloom during March. They also thrive in the Southern States better than the early Tulips.

Late or May Flowering Cottage Tulips

This beautiful class is becoming more popular as it becomes better known. These Tulips are distinct from the early flowering sorts, coming into bloom two or three weeks later and extending the Tulip season over a period of four weeks or more. On account of their extreme hardiness, they are especially adapted for the permanent hardy flower border, where they should be liberally planted in clumps or masses. They may also be naturalized in grass, wild gardens, etc. For bedding they are superb, while as cut flowers they are much to be preferred to the early type, having long stems with flowers of great substance that will remain in perfect condition for a long time. In planting, the bulbs should be set a little deeper than ordinary tulips, a covering of 4 inches being about right.

Superb Mixture of Cottage Tulips.
Dozen 50c, $3.50 per 100.

Old Dutch Breeder Tulips

Breeder Tulips are very similar in habit to the Darwins, and flower at the same time. Their chief characteristic is their immense blooms, borne on strong, stiff stems, many of them longer than the most gigantic Darwins. The revival of the taste for art colors has made these Tulips strong favorites with American enthusiasts, who find in their bronze, buff, and brown shades excellent material for contrasting with the light and bright colors of the Darwins. They require the same cultural treatment as the Darwins.

Apricot. Dull, bronze buff, shaded ruddy apricot base. Dozen $1.00, $7.00 per 100. 100c, $6.00 per 1,000.

Narcissi or Daffodils

In order to have a beautiful bulb-garden, Narcissi should be planted very freely. They thrive in practically any climate in the United States and it is small wonder that the demand is doubling every year. They are not only excellent for outdoors, but millions are used every year for forcing indoors. Their graceful forms, beautifully shaped trumpets and cups, and the long, straight stems have made them favorites for cut-flower purposes with every American gardener. We have compiled a list (as short as we could make it) of the best and most attractive varieties for indoor, outdoor, and exhibition purposes, and it is complete and easy to select from.

Culture. The same as Tulips, although they should be planted as close as possible in the open or pans. After active growth commences, give plenty of water.

Culture Outdoors. They should be planted so that the top of the bulb is at least 5 inches beneath the soil. A little protection should be given during severe winter weather, although they are perfectly hardy.

In our descriptions we use the following terms: Perianth—the outer petals of the flower. Trumpet—the long cup- or trumpet-shaped center. Crown or Cup—the short or flat center.

Giant Trumpet Varieties, Including New and Rare Sorts

EMPEROR. Midseason. A magnificent sort. The entire flower is a rich yellow; trumpet of immense size and petals so broad that they overlap. Three of these bulbs planted in a 5-inch pot will make a splendid show. Large bulbs, each 15c, dozen $1.75, $11.00 per 100.

**PAPER-WHITE GRANDIFLORA.** The popular, bunch-flowering pure white Narcissus, frequently having thirty individual blooms and splendid decorative foliage from a single bulb. We offer two sizes, each suitable for growing indoors in pebbles and water or in our Bulb Fiber.

- Jumbo Bulbs 1.00 7.00 60.00

Cultural Directions for Growing Polyanthus Narcissi in Pebbles and Water

- Fill a deep dish almost full of pebbles and press the Narcissus bulbs down in the pebbles until they are nearly covered; then add water to the top of pebbles. Put in a reasonably dark place for three weeks, or until the bulbs are well rooted, then bring to the light and watch them grow and bloom, which will be from seven to eight weeks from time of planting.
- They can also be grown in Holland fiber or any good soil well watered, but the pebbles make the most attractive appearance for table decorations.
- Do not keep the growing plants near steam-pipes or radiators, as excessive heat causes too rapid growth of foliage with no blossoms. Do not cover with too much water as it is liable to soften and rot the bulbs.

**CHINESE SACRED NARCISSI.** The Chinese Joss Lily. For growing in pebbles and water; can also be grown in soil or fibre. **Mammon Bulbs—Each** 20c, 2 for 35c, $2.00 per dozen, $15.00 per 100.

Hardy Garden Lilies

We especially recommend deep planting, say, from 6 to 8 inches; varieties like Speciosum require at least 8 inches, with an ample amount of sand beneath the bulb to insure proper drainage. Cover the beds with leaves or litter during winter. Lilies thrive well in borders, formal gardens or shrubbery, and usually flower at a time when the shrubbery has ceased blooming, adding increased interest.

For color, fragrance, beauty, and variety of form, nothing can equal these grand flowers; whether grown in pots or grouped in the hardy plant border, where their hardness makes them so desirable, they are always an object of beauty.

Lily bulbs, being of late maturity, are not ready before November and December (the best time to plant them).

Lilium Myriophyllum (Regal Lily)
Probably One of the Best of the Newer Hardy Lilies for Our Carolina Soil and Climate.

A new and very rare Lily from China. The flowers are white, shading to yellow in the center, with a pink tinge on the outer edges. A strong grower, we have grown them 4½ feet tall with 12 blossoms on a stalk. It is deliciously scented, and its extreme hardiness makes it a valuable Lily for outdoor planting. June-July flowering. Each 50c, dozen $5.00.

CANDIDUM. Annunciation or Madonna Lily. Has been for a long time one of the most popular of the hardy garden Lilies. Has a clear, white flower, with rich perfume. Plant outdoors where it will remain undisturbed for several years. 25c each, $2.75 per doz., postpaid.

LILIUM AURATUM (the Gold-Banded Lily of Japan). Flowers white, dotted crimson, with a clear golden band running through the center of each petal; very fragrant. A splendid Lily for pots, or for planting out in the shrub or plant borders. Blooms in July. Mammoth bulbs. Each 50c, dozen $4.50.

SPECIOSUM. "Japan Lily." The varieties of this class are magnificent border plants, and also excellent for pot culture. All are perfectly hardy, and are among the most satisfactory Lilies to grow.

Wyatt’s Evergreen Mixed Lawn Grass

In the South we often have trouble in getting good lawns because it has been found that no one grass will give satisfactory results at all seasons and on all soils. By careful experiments we have succeeded in getting a combination of grasses that will produce an evergreen lawn, giving permanency and beauty of sward. By the use of this Evergreen Mixed Lawn grass Seed a rich, velvety lawn can be made and maintained. One pound will sow a space 10 by 25 feet or 250 square feet; 75 to 90 pounds to an acre. Lb. 50c, 5 lbs. at 45c per lb., 10 lbs. or over at 40c per lb., 25 to 50 lbs. at 38c per lb., 100 lbs. at 35c per lb. By mail, postpaid, lb. 50c.

Suggestions for the Making and Care of Lawns

A good foundation must be secured, or the rest of the work will be entirely wasted, and too great care cannot be exercised, since the roots must be able to penetrate quite 18 inches in order to keep the grasses growing through the scorching days of July, August and September. If the ground is not already very rich, give a liberal application of fertilizer, avoiding the use of stable manure, as it invariably contains seeds of weeds and noxious grasses. Bone meal never produces the “burned” appearance so often noticed after the use of ammoniated fertilizers. Harrow or rake the surface to the finest possible condition and roll until all elevations and depressions have been removed.

Rake the seeds in lightly, following with a roller of medium weight, a firmly rolled surface being absolutely necessary if the ground be dry; small areas may readily be packed firm by the back of a spade. Sowings made in the fall, from the first of October to the middle of December, are most successful, but if deferred until spring, sowings may be made in February, March and April.

When the grass is well set, about 4 inches high, it should be cut with a sickle or mow with the machine set to avoid cutting too closely, 2 inches at least being left above the root. After that a cutting every ten days and an occasional rolling will make the grass finer, strengthen the turf and keep all rank-growing weeds in check. If bare spots appear they must be patched up by breaking the ground about 10 inches deep, smoothing the surface and raking in double the usual allowance of seed. To maintain the vigor and color of the grass a light top dressing of bone meal two or three times a year is advisable. Liberal applications of sheep, poultry and cattle manure are very beneficial and will give your lawn that rich, velvety appearance that is so much admired by everyone.

Wyatt’s Selected Irises
A Perennial Suited to All Gardens

Flag Iris or Fleur de Lis IRIS GERMANICA

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it, it throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups, and if used for borders are particularly desirable in that the foliage remains fresh and up-right after the blossom stalks are removed.

Do not cover the rhizomes (roots) too deeply.

Wyatt's Hardy Everblooming Roses

The following list while not extensive will give you some of the best, however, if others are wanted let us know and we will be glad to fill your order:

Roses do so well in our climate that we often wonder why people do not plant more of them. The monthly roses with even the smallest amount of attention will produce blooms April to November.

A Few Out of the Ordinary Roses

FLOREX. A wonderful new rose. Coral - salmon suffused with orange carmine, mildew-proof. $1.50 each.
MISS CYNTHIA FORDE. HT. Sparkling pink, very double, perfectly formed flowers, with each petal sharply outlined and pointed; very fragrant. $1.25 each.
MRS. ARTHUR ROBERT WADDELL. HT. Remarkable for its vigorous, branching growth and its long reddish copper buds of finest shape. The open flowers are coppery gold, but change to soft pink as the flower ages. $1.00 each.

ROSE MARIE. Fragrant clear rose-pink flowers of large size. $1.25 each.
SOU. DE CLAUDIUS PERNET. Per. Color a most striking sunflower-yellow, deeper in the centre, without any color blending, which is retained without fading even in the warmest weather. A most vigorous grower of erect, branching habit, beautiful, brilliant green foliage, long pointed buds of exquisite shape, carried on long, stiff stems. Price: 2-year budded plants $1.25 each, $13.20 doz.

Pink Roses

ANNIE LAURIE. Deep pink, shaded to gold, strong.
CECELIA GRUNNEN. (H. Pol.) This is the popular Baby Pink or "Sweetheart" rose. Color blush, shaded light salmon-pink; distinct and desirable. Makes a handsome miniature rose.
COLUMBIA. Clear pink, beautiful long buds, strong grower.
JONKEER J. L. MOCK. Deep carmine pink shaded to silver white, strong.
KILARNY. An exquisite shade of carmine-pink; large in bud and flower and very fragrant. A great favorite wherever grown.
LADY URSULA. Light pink and yellow.
MADAME BUTTERFLY. Blending of pink, gold and apricot.
MRS. CHAS. BELL. HT. A sport of the well-known Radiance; similar to it in habit and foliage, but a light shell pink in color.
OPHELIA. HT. Flesh pink; blooms large and of perfect shape; flowers produced on long stems.
PINK MAMAN COCHET. Soft pink, general favorite.
PALL NEYRON. Clear pink shaded rose. Largest of blooms.
PINK RADIANCE. Silver pink outside, deep rose inside.
PREMIER. Dark rich pink, very handsome.
SOU. DE PRES. CARNOT. Rosy flesh shaded white, very graceful buds.
WELLESLEY. Pink, strong grower. New.

Red Roses

CLIMBING LADY ASHTOWN. CHT. Soft rose colored, large blooms; one of the most free-flowering of all climbing roses, producing a steady succession of blooms from June until frost.

CLIMBING KILLARNEY. ClHT. (Reinberg, 1938.) Sparkling buds of delightful form and large, attractive, widespread flowers of clear, light pink.

CLIMBING SUNBURST. CHT. A climbing sport of the yellow rose; strong grower and free bloomer; very large flowers, beautiful either in bud or bloom.

CHRISTINE WRIGHT. HW. (Hoopes, Bro. & Thomas Co., 1909.) Very large, cupped but informal flowers of exquisite, wildrose pink, borne in enormous, long-stemmed sprays on a moderately strong climbing plant which produces occasional flowers in summer and fall.
