NEW, CHOICE AND RARE
Chrysanthemums

OFFERED FOR SALE BY

T. H. SPAULDING,

Castlewood,

Orange, New Jersey.

It is fitting and proper that in presenting my compliments for the new year I gratefully acknowledge the favors received at the hands of patrons. Without their cordial support it would have been impossible to have attained and held the position I occupy of the largest chrysanthemum specialist in the world.

The wonderful march of improvement in the past few years has necessitated a rigid weeding out of inferior as well as many heretofore considered good varieties ; and in order to become a successful prize-taker at the shows of the present day one has to keep up with the times by providing himself liberally with novelties and recent introductions.

Customers can make selections from this list, whether at high or low prices, with confidence that they will obtain only varieties which, if well grown, will produce the finest exhibition plants and blooms, such as will prove a credit and reward them for their labor.

To my old friends and customers in all countries I extend thanks for past favors, with assurance that for the season of 1894 their orders will receive the same careful attention as has been bestowed in the past. From all those who receive this catalogue and have never tested my stock I solicit a trial order, confident of my ability to please and to retain their custom.

Respectfully yours,

THOS. H. SPAULDING.

Spaulding's 1894 Novelties.

I commend to your notice this collection, which I believe to contain many of the best novelties of the season offered at prices in keeping with the times.

Yours truly,

DEAR SIR:—The Tuberous Begonias are a *great success*, and I am very much indebted to you for sending such fine plants; the flowers are very large and the colors exquisite. They have been a mass of bloom throughout the summer, and at this late date I cannot see any decrease in amount or size.

Yours truly,

MRS. J. F. HAGEMAN.

OGDENSBURG, N. Y.

DEAR SIR:—The Chrysanthemums arrived in good condition and are excellent in quality. Please accept thanks for the handsome manner in which you filled the order. I had previously ordered elsewhere but would have done better to have bought all from you. Respectfully yours, THOS. LAWRENCE.

NEWPORT, R. I.

DEAR SIR—I wish to mention the fact that all the varieties of Chrysanthemums I had from you last spring, when flowered, proved to be true to name, which means a great deal to us when we show for competition.

CANNAS.

The Sensational Flower for 1894.

Few flowering plants combine so many qualities as the modern Canna; a race of sub tropical bulbous plants, of most easy culture, rapid reproduction, and good keeping qualities. Since the distribution by M. Crozy of his results from hybridization the floral world has been astonished by their luxuriance of foliage and gracefulness of bloom, which is of immense size, borne in large masses and trusses, combining in color the brightest and richest shades of yellow, red, orange and scarlet, the finest ornamental plant in commerce. Useful for the garden or greenhouse.

Rare and Choice Novelties.

The newest introductions of M. Crozy's distribution last year, all have been tested and found to be of superior merit.

Paul Bruant. Very large flowers; exceedingly brilliant intense orange-scarlet; plants entirely covered with large heads of bloom; one of the most distinct and valuable introductions up to the present time. Awarded Columbian medal at Chicago.

Sen. Montefiore. Center of petal deepest orange with a pinkish tinge, a beautiful shade; flowers heavily bordered bright lemon, the yellow and orange blended together, producing an exquisite effect; the most striking introduction of the season; flowers of large size, habit very dwarf.

Sec. Stewart. One of the very strongest growers; flowers and heads of the very largest size; in color, between Chas. Henderson and Alphonse Bouvier; a distinct variety; a tall, vigorous grower.

Prof. Gerard. Entirely distinct from other varieties and very marked in habit of growth and flower; leaves stiff and erect; resembles "Musa Ensete;" the flowers are stiff and erect, of intense brilliant scarlet; a very valuable introduction.

Explorateur Crâmbel. Cardinal red with bright crimson splashings marked and blended through the cardinal; large spikes of bloom; considered one of the most valuable of all; habit of growth medium.

Egandale. Fine purple foliage; compact flower spikes with bright cherry colored flowers. Columbian medal at Chicago.
