Southern California Acclimatizing Association.

U. S. Department of Agriculture

For the Introduction and Propagation of Plants.

EL MONTECITO, SANTA BARBARA, CAL., U. S. A.

SEPTEMBER, 1894.

PRICE LIST NO. 2.

PLEASE READ THIS.

Names printed in CAPITALS are of plants first offered by us in the United States.

* Denotes plants to be grown safely in open ground where the lemon can be grown. ** Plants adapted only to the most sheltered localities of our Coast Region.

PRICE of all plants 25 CENTS a piece except where marked otherwise

Prices by the 10, 50 and 100 quoted on application

PALMS AND CYCADS.

**Acrocomia Havanensis? Cuba	\$ 1 50
**Areca alba, Mauritius	50
* " Baueri, Norfolk Island	25 to 1 00
** " rubra, Mauritius	50
**Arenga saccharifera, Moluccas	1 00
The "Gomuti" yielding sugar and strong fiber.	
*Bacularia (Areca) monostachya, N. S. Wales	1 00
Dwarf slender growing.	
**Caryota sobolifera, India	50
*Chamaedorea elegans, Mexico	1 50
One of the best for house decoration.	
*Chamaedorea Nec Plus Ultra? Mexico	1 50
Similar in habit to Cocos Weddelliana, but hardier.	
Chamaerops excelsa, China	25 to 1 00
The "Chusan Palm," Most hardy of all Palms.	
Chamaerops humilis, Medit. Region	25 to 1 00
Cocos australis, Argentina and Uruguay	25 to 50
The most hardy among Cocos.	
*Cocos campestris, South Brazil	1 00
* " flexuosa, Brazil	50
Tail growing like the following, but considered hardier.	
*Cocos plumosa, Brazil	50 to 5 00
The more extensively planted in Santa Barbara.	
**Cocos Weddelliana, Brazil	1 00
Mostly suitable for table decoration.	
*Cycas revoluta, China	25 to 5 00
The wellknown and misnamed "sago Palm," not yielding sago and not being a true palm.	
Erythea armata, Lower California	25 to 5 00
The "Blue Palm," a very remarkable and hardy species.	

<i>Erythea edulis</i> , Guadalupe Island.....	25 to 5 00
Growing nearly as fast as <i>Washingtonia filifera</i> , and bearing large bunches of edible fruits when quite young.	
**Euterpe edulis , Tropical Brazil.....	1 50
<i>Jubaea spectabilis</i> , Chile.....	25 to 5 00
The "Coquito", yielding edible nuts and a large supply of sugar from the old trunks. One of the hardest palms.	
*Kentia (Howea) Belmoreana , Lord Howe's Island.....	25 to 2 00
* " (Hedyscepe) Canterburyana , ".....	1.00 to 2 00
* " (Howea) Forsteriana , ".....	25 to 2 00
All three most ornamental, suitable also for house decoration.	
*Kentia (Clinostigma) Moorei , Lord Howe's Island.....	1 00
A dwarf but hardier species.	
*Livistona (Corypha) australis , Australia.....	25 to 2 00
Tall fruiting specimens to be seen in Santa Barbara.	
*Livistona Chinensis , South Asia.....	25 to 2 00
Commonly known as 'Latania Borbonica.'	
**Oreodoxa Regia , West Indies.....	25 to 2 00
The "Royal," one of the most majestic of palms.	
Phoenix Canariensis , Garden Hybrid.....	25 to 5 00
The fastest growing and more commonly planted in Southern California.	
Phoenix dactylifera , South Asia and North Africa.....	25 to 3 00
PHOENIX JUBAE , Tenerife.....	1 00
The true species native of the Canary Islands.	
*Phoenix Leonensis , West Africa.....	50
* " pumila , South Asia.....	50
* " Natalensis , South Africa.....	50
* " reclinata , South Africa.....	25 to 50
* " rupicola , India.....	50
The most graceful of Phoenix.	
**Pinanga Kuhli , Java.....	1 50
**Pritchardia Pacifica , South Sea Islands.....	50
One of the most remarkable fan palms.	
*Ptychosperma Alexandrae , Queensland.....	25 to 2 00
Not unlike <i>Seaforthia</i> , but growing stouter and taller.	
*Sabal Palmetto , Georgia and Florida.....	
*Seaforthia elegans , Australia.....	25 to 2 50
One of the most elegant and more freely growing. Our plants are raised from seed ripened in Santa Barbara.	
*Serenoa serrulata , Florida.....	
**Thrinax argentea	
One of the most elegant fan palms, the underneath of the leaves shining like satin.	
**Wallichia disticha , India.....	1 00
<i>Washingtonia filifera</i> , California.....	25 to 1 00
*WASHINGTONIA SONORAE , Sonora.....	1 00
Recently discovered in Lower California and in Sonora, attaining larger proportions than the preceding.	
*ZAMIA ANGUSTIFOLIA , Bahamas.....	1 00
Native name "Bay Rush," a miniature <i>Cycas Revoluta</i> in appearance. Stem yielding excellent starch.	
*Zamia integrifolia , Florida.....	25 to 1 00
Native name "Coontie," dwarf growing like the preceding.	

DECORATIVE PLANTS.

*Agave CORDEROYI, Mexico.....	50
* " dealbata, "	50
* " DECIPIENS, Florida.....	
Tall growing deep green.	
*Agave geminiflora, Mexico.....	50
* " horrida, "	
* " MARMORATA, "	50
* " mitraeiformis "	50
* " Palmeri, New Mexico.....	
* " rigida, Yucatan.....	
* " " Var Sisalana, Yucatan.....	
Now extensively planted in Florida and the Bahamas, yielding a most superior fiber known as Sisal Hemp.	
*Agave schidigera, Mexico.....	50
* " Shawii, Lower California.....	25 to 1 00
* " stricta, Mexico.....	25 to 1 00
* " Victoriae Reginae, Mexico	1.00 to 2 00
One of the most remarkable of dwarf growing Agaves.	
*Aloe fruticosa, South Africa.....	25 to 1 00
One of our best plants for winter blooming. Huge panicles of scarlet flowers.	
*ALOE HANBURYANA, South Africa.....	
Not less decorative; broad spatulate whitish leaves; corymbs of large orange flowers all winter.	
*Aralia papyrifera, Formosa.....	25 to 1 00
The Ricepaper plant; decorative either for its immense leaves or its enormous inflorescences	
*BAMBUSA ARUNDINACEA, India.....	
One of thorny Bamboos; attaining fifty feet and more, and several inches in diameter; will prove exceedingly useful for hedges and windbreaks, as well as for industrial purposes.	
Bambusa aurea, North China	25 to 1 00
Attaining about 12 feet; canes bright yellow.	
Bambusa nigra, North China	25 to 1 00
15 to 20 feet high; canes ebony black when fully ripened.	
Bambusa viridi-glaucescens, North China	25 to 1 00
A most vigorous and spreading grower, attaining 40 feet and over in good conditions; will prove exceedingly useful for hedges and windbreaks, as well as for industrial purposes. This and the two preceding will stand several degrees of frost.	
*DASYLIRION (NOLINA) BELDINGI, Lower California.....	1 00
Lately discovered by Mr. T. S. Brandegee on mountains above Cape St. Lucas. Arborescent; similar in habit to D. longifolium, but with glaucescent leaves.	
*DASYLIRION BIGELOWI, Arizona.....	
Arborescent; tip of leaves curiously twisted, and most hygrometrical.	
Dasyllirion glaucum, Mexico	
Low growing; spiny glaucous leaves.	
Dasyllirion gracile	
Arborescent; leaves spiny, bright green, ending in sort of spreading brush of filaments, like the preceding	
Dasyllirion longifolium, Mexico.....	25 to 50
Eight to ten feet high and more; leaves loriform, drooping, several feet long, bright green, not spiny.	
*Dasyllirion quadrangulare (junceum), Mexico.....	
Sem shrubby; leaves six and more feet long; quadrangular, like those of a rush.	

Dasyliirion Wheeleri, Arizona

Dwarf; leaves glaucous, spiny, spirally contorted.

All Dasyliirions are highly ornamental plants, much used in South European gardens, fast growers, will stand any amount of drought and heat, as well as several degrees of frost.

***Doryanthes Palmeri, Queensland**

One of the Australian "Torch Lilies," leaves six feet long, broad, light green, spikes of flowers bright scarlet.

***Dracaena Draco, Canary Islands** 25 to 50

The Dragon Tree celebrated for the one at Orotava, estimated by Humboldt to be 6 thousand years old.

***FOURCROYA ALTISSIMA, Mexico** 50

" Bedinghausii, " 25 to 2 00

" ELEGANS, " 50

" gigantea, " 50

" LONGAEVA, Guatemala 50

" PUBESCENS, Mexico 50

Besides being used as decorative plants all Fourcroys are available for the fiber they yield.

GYMNOTHRIX LATIFOLIA, Uruguay

Broad leaved, tall growing grass, available also for fodder.

Musa Ensete, Abyssinia** 25 to 1 00PANDANUS FURCATUS, Assam** 2 00

Likely to prove the most hardy of all screw pine, growing up to 4,000 feet.

***Pandanus utilis, Madagascar** 2 00

Mostly adapted for house decoration.

PANICUM SPECTABILE GIGANTEUM, C. Africa

Tall, available for fodder, and ornamental also for its conspicuous inflorescences.

****Ravenala Madagascariensis, Madagascar** 2 50 to 5 00

The far-famed traveller's tree.

Yucca AUSTRALIS, N. Mexico 1 00

Tall, arborescent.

Yucca baccata, S. California

Bearing pulpy, edible fruits.

Yucca filamentosa, Carolina southwards**" FILIFERA, N. Mexico** 1 00

One of the tallest yuccas; immense, drooping panicles of white flowers.

YUCCA RUPICOLA, West Texas 1 00**" Whipplei, S. California** 25 to 1 00**" WHIPPLEI GRAMINIFOLIA**

One of the most recommendable either for its dense rosette of glaucous leaves, or for the panicle of fragrant white flowers, sometimes over 20 feet high. The variety has longer pendulous leaves and purplish flowers.

Tropical and Subtropical Fruit Bearing or Economic Plants.**Aberia Caffra, S. Africa** 50

The Kai-Apple, spiny, available for hedges.

***Achras Sapota, West Indies** 50 to 1 00

The Sapodilla, or naseberry.

****Adansonia digitata, C. Africa** 1 00

The well-known Baobab; fruit containing large percentage of Tartaric Acid.

***ALEURITES CORDATA, East Asia** 1 00

The Chinese varnish tree.

***Anomum Cardamomum, Ceylon**

The Cardamom.

***Anona Beriba? Trop. Brazil** 50

Said to bear fruit of most superior quality.

*Anona cherimolia , Central and S. America.....	25 to 1 00
The Cherimoya, of all Anonas the only one grown to a certain extent in California, where it is sure to become an important article of export.	
**Anona muricata , W. Indies.....	50
The sour sop; large green fruit.	
**Anona squamosa , Trop. America.....	50
The sweet sop, or sugar apple. Fruit conical, yellowish.	
*ANONA SUAVISSIMA , Brazil.....	1 00
Said to bear delicious fruit.	
*Artocarpus integrifolia , India.....	1 50
The Jack fruit; attaining 50 pounds weight.	
**Averrhoa Carambola , India.....	1 00
Yielding a pleasant acid refreshing fruit.	
BENTHAMIA FRAGIFERA , Himalaya.....	
Fruit in appearance and size like the largest strawberries.	
**Bromelia Ananas , All Tropical Countries.....	50 to 2 00
The Pine apple; detailed list of varieties on application.	
*Calodendron Capense , Natal.....	1 00
The Cape Chestnut, most prized also for its flowers.	
Capparis spinosa , Medit. Region.....	
Yielding the well-known capers.	
**CAPSICUM FRUTESCENS , Trop. America.....	
The Cayenne or tree pepper; from its fruits the celebrated Tabasco Sauce is manufactured.	
**CARICA ATROVIOLOACEA ELEGANTISSIMA , S. America,	1 00
Fruits of a violet color.	
**Carica Papaya , Central America.....	1 00
The Papaw, now grown in all warm countries.	
*CARICA QUERCIFOLIA , Argentina and Paraguay.....	1 00
Fruit small, but leaves possessing digestive power to higher degree than other kinds	
Carissa Arduina , S. Africa.....	
“ grandiflora, “.....	
Both spiny evergreen, with white fragrant flowers, berries size of a small plum.	
*CASIMIROA EDULIS , Mexico.....	50 to 1 00
The “Zapote Blanco,” much prized in its native country. A large tree over 70 years old is to be seen in Santa Barbara.	
*CASTANOSPERMUM AUSTRALE , Queensland.....	1 00
The “Moreton Bay Chestnut,” equally conspicuous for its rich foliage, saffron colored flowers and globular seeds larger than any fallen chestnut.	
*Cedrela odorata , W. Indies.....	25 to 50
The “cedro” of Cuba, yielding reddish fragrant wood.	
*Ceratonia Siliqua longissima , Medit. Region.....	
Longer podded variety of the well-known “St. John’s Bread.”	
*Cicca disticha , India.....	50
Most elegant tree; white round berries in bunches, tasting like gooseberries.	
Cinnamomum Camphora , China and Japan.....	25 to 1 00
The well known Camphor tree, growing to perfection in California.	
**Coccoloba uvifera , W. Indies.....	50
The “Seaside Grape;” broad foliage; dark blue berries	
*Coffea Arabica , Harrar.....	50 to 1 00
Common Coffee; exceedingly ornamental, too, for its shining leaves, white, fragrant flowers and red berries.	
*CUPANIA ANACARDIODES , East Australia.....	1 00
Beautiful evergreen; fruit edible.	
*Cythomandra betacea , S. America.....	
The tree tomato; drooping, orange colored, egg shaped berries.	
Eriobothrya Japonica , China and Japan.....	25 to 50
The well-known “Loquat.”	

* <i>Eugenia Brasiliensis</i> , Brazil.....	50
The "Grumichama" of Rio Janeiro:	
* <i>Eugenia Jambos</i> , India.....	50
The "Rose-apple" fruits large, rose scented.	
* <i>EUGENIA PITÁNGA</i> , Brazil.....	1 00
Scarlet berries size of a cherry.	
* <i>Ficus elastica</i> , Assam.....	50 to 1 00
The true "Rubber Tree," so much used for house decoration.	
* <i>Ficus glomerata</i> , India.....	50 to 1 00
Fruits in clusters, edible.	
* <i>Ficus Indica</i> , India.....	50 to 1 00
The true "Banyan Tree."	
* <i>GOURLIAEA CHILENSIS</i> , Chile.....	1 50
The "Chañar," good, edible fruits.	
* <i>HYMENAEA COURBARIL</i> , Indies.....	1 00
A lofty tree, yielding the "Gum Animi."	
* <i>Inga Dulcis</i> , Central America.....	25 to 50
Pods containing very pleasant pulp,	
* <i>LITHRAEA MOLLE</i> , Chile.....	1 00
Fermented fruits supply much prized "Chicha," or brandy.	
* <i>Macadamia ternifolia</i> , Queensland.....	1 00
Beautiful evergreen; nuts of delicate taste:	
** <i>Mangifera Indica</i> , India.....	50 to 1 00
The "Mango," one of the choicest tropical fruits	
* <i>Maranta arundinacea</i> , Trop. America.....	
Supplying the arrowroot of commerce.	
* <i>Mimusops Elengi</i> , India.....	50
Flowers used in perfume; fruits edible.	
** <i>MYRISTICA VERRUCOSA</i> , Trop. Asia.....	1 50
Closely allied to the "nutmeg."	
* <i>Musa Sinensis</i> and others, All over the tropics.....	25 to 2 00
The "banana;" detailed list of varieties mailed on application.	
<i>Opuntia Ficus Indica</i> , and others, Mexico.....	
The "prickly pear;" detailed list of varieties mailed on application,	
<i>Passiflora edulis</i> , Central and S. America.....	
The most freely growing of "Grenadillas" with edible fruit.	
** <i>QUASSIA AMARA</i> , Surinam.....	1 50
The "Bitter cup;" flowers also very showy.	
* <i>Persea gratissima</i> , Mexico.....	25 to 1 00
The well-known "Ahuacate," or "Alligator pear."	
<i>Pinus Pinea</i> , Italy.....	
The Italian umbrella or stone Pine.	
<i>Pistacia vera</i> , Asia Minor.....	
The most delicious "Pistachio nut"	
* <i>Psidium cattleianum</i> , Brazil.....	
The "strawberry guava," extensively planted in California.	
* <i>Psidium guava</i> , Central and Southern America.....	
A choice variety of the so-called "lemon guava."	
** <i>Santalum album</i> , India.....	1 50
Yielding the fragrant "sandal wood" of commerce.	
* <i>Sapindus saponaria</i> , Central America.....	1 00
Fruits and roots used in place of soap.	
* <i>Syzygium (Eugenia) Jambolanum</i> , S. Asia.....	50
The "Jambolan plum," a very free grower with us.	
** <i>Tamarindus Indica</i> , India.....	50
The "Tamarind" a splendid shade tree; pods full of pleasant subacid pulp.	
* <i>Zingiber officinale</i> , India.....	
Root yielding the true ginger of commerce.	

WINTER AND EARLY SPRING FLOWERING PLANTS.

N. B.—We are devoting special attention to enlarge the altogether limited number of woody plants which, while blooming freely in the open in our climate, are likely to become popular for growing under glass in less favored locations.

- * *Acacia armata*, Temp. Australia
- * " *dealbata* "
- * " *cultriformis* "
- * " *Farnesiana*, All extra trop. countries
- * " *pycnantha*, temp. Australia
- * **ACACIA RICEANA**, " 50
- All six acknowledged to be the very best for winter blooming and for cut flowers.
- ANTHYLLIS BARBA JOVIS**, Medit. region
- Grown in gardens since the time of Pliny, for its silvery persistent foliage and straw-colored flowers.
- * **CAESALPINIA SEPIARIA**, India
- Bright green glossy leaves, flowers yellow.
- CALYCOTOME SPINOSA**, S. Europe
- A formidably armed shrub, bearing a profusion of sulphur colored fragrant flowers.
- * **CASSIA CORYMBOSA**, River Plate
- Cassia tomentosa*, Mexico
- The first with glossy, the second with woolly leaves, both covered nearly all the year round with bright yellow flowers.
- * *Chilopsis saligna*, Arizona and neighboring regions
- Called the "desert or flowering willow," and "nimbres" in Mexico; a small tree similar in foliage to a willow, in its purplish flowers to a catalpa.
- CYTISUS ADAMI**, Europe 50
- Garden hybrid between *C. purpureus* and the common "laburnum," bearing huge bunches of flowers like the last, but sometimes yellow, sometimes purple.
- CYTISUS AEOLICUS**, Eolian Islands 50
- Distinct foliage, flowers bright yellow.
- CYTISUS CAPITATUS**, S. Europe
- Yellow flowers in globose heads.
- * **CYTISUS PALMENSIS**, Canary Islands 50
- All through winter and spring covered with thousands of pure white, deliciously fragrant flowers; excellent for pot growing, as well as for cutting.
- Cytisus scoparius Andreanus*, Europe 50
- A sport of the so-called English or Scotch broom; flowers large, red and yellow (known also as "*Genista Andreana*").
- EDWARDSIA CHILENSIS**, Chile
- Small tree; deep green foliage; flowers large, pea-shaped, golden yellow.
- GENISTA ETHNENSIS**, Sicily
- " **FLORIDA**, S. Europe
- * " **LINIFOLIA**, S. Spain
- " **MADERENSIS**, Madera 50
- All these with differently shaded yellow flowers; the first hardy in Paris and at Kew.
- * **GENISTA (Retama) MONOSPERMA**, Sicily 50
- Stems glaucous prostrate; flowers large, white with crimson center deliciously fragrant.
- GENISTA VIRGATA**, S. Spain 50
- Considered to be one of the very best of the yellow flowered kinds.
- GLOBULARIA ALYPUM**, Greece 50
- A low shrub, covered all winter with globose heads of bright blue flowers, keeping well in water.

- LABURNUM VULGARE PARKSII**, England.....
An improved variety of the common laburnum.
- Lonicera tatarica pulcherrima**, Central Asia.....
An improved form of the very well known type.
- *MEDICAGO ARBOREA**, Greece.....
The "tree alfalfa," making good sized trunks; bright green foliage; flowers orange yellow; wood is black and so hard that it was called "ebony" by the ancient Greeks.
- *MELIA SEMPERFLORENS**, ?..... 50
Quite dwarf species or form, with feathery foliage, bearing its pretty panicles of blue fragrant flowers nearly all the year round.
- *PHLOMIS FRUTICOSA**, Greece.....
Not unlike the so-called "lion's tail" in habit, with golden yellow whorls of flowers all winter.
- *PIPTANTHUS NEPALENSIS**, Nepal..... 50
Broad glossy leaves; pea-shaped, large yellow flowers.
- *POLYGONUM ELEGANS**, S. Italy.....
Fine hairy stems in clumps, bearing countless minute pinkish white flowers, much adapted for pot culture.
- *Poinsettia pulcherrima**, Mexico.....
This well-known gorgeous plant will grow to perfection here. Heads attaining at times two feet in diameter.
- Robinia hispida**, Carolina..... 50
A most elegant plant when in bloom.
- SOLANUM UMBELLIFERUM**, S. California.....
Shrubby; flowers large, blue and delicately fragrant all through the winter.
- *SOPHORA SECUNDIFLORA**, Texas and Mexico.....
A moderately sized tree with blue fragrant flowers in spikes; seeds bright scarlet.
- Spartium juncum**, S. Europe.....
The "Spanish" or "Italian broom," here blooming all the year round.
- Xanthoceras sorbifolia**, N. China.....
One of the prettiest early flowering deciduous shrubs; stands many degrees of frost.

CLIMBERS

- *Antigonum leptopus** 25 to 50
The "Rosa de Montana" and "San Miguelito", covered in summer and autumn with a mantle of bright pink flowers.
- *Aristolochia elegans**, S. America..... 50
A neat growing species with curious, good-sized flowers, free of any bad smell.
- *BIGNONIA CHRYSANTA**, S. America..... 50
- " **Manglesii**, Australia.....
- " **speciosa**, River Plate.....
- " **Tweediana**, ".....
- " **TWHAITESI**, Ceylon..... 50
- " **venusta**, Brazil.....
Second with cream-colored flowers in early spring; third large lilac flowers; sixth with bright orange flowers in winter; the remaining with yellow flowers of different shades.
- *BRUGMANSIA SARMENTOSA**, C. America..... 50
Known also as "Solandra grandiflora;" a glorious climber, white, fragrant, with trumpet shaped flowers larger than Daturas.
- CAMPSIDIUM VALDIVIANUM**, Chile.....
The true species (plant sold under this name in California are "Bignonia Manglesii;")
- *Cereus Macdonaldiae**, S. America.....
Unquestionable the best of night blooming Cereus; flowers immense, buff colored, vanilla scented

- ***CISSUS INCISA**, S. Texas and Mexico
 "Yerba del Buey," a most tropical looking vine.
- ***CLEMATIS DRUMMONDI**, S. Texas and Mexico
 White flowered, with silky plumose tails 4 inches long.
- ***CLITORIA ternatea**, S. Asia
 Pea shaped flowers of the brightest sky blue.
- CLITORIA BLUTHIERII**, Central America
 Flowers bright yellow.
- ***CRYPTOSTEGIA GRANDIFLORA**, Central America 50
 Large, white fragrant, funnel-shaped flowers.
- CUCUMIS ECHINOPHORUS**, S. Africa
 A vigorous grower with ornamental fruits.
- Gelsemium sempervirens**, From Virginia southwards
 " " Fl. Pl., Virginia 50
 The "Virginia" or "Carolina jessamine," single and double; flowers bright yellow, deliciously fragrant.
- Hedera helix chrysocarpa**, S. Europe
 The common "ivy," with golden colored berries.
- JASMINUM HUMILE**, Himalaya
 Trailing, dark green, yellow flowers.
- ***IBATIA MURICATA**, Central America 25 to 50
 White fragrant flowers.
- Lathyrus splendens**, S. California
 Well named "The Pride of California," being indeed one of the most gorgeous climbing plants.
- Mandevillea suaveolens**, Chile
 The well-known "Chilian jessamine."
- ***Passiflora manicata**, Central America
 The scarlet passion flower, growing so freely in Santa Barbara.
- PITHECOCTENIUM MURICATUM**, Mexico
 A most vigorous climber, with bignonia like, whitish and yellow flowers.
- PITHECOCTENIUM CLEMATIDEUM**, River Plate
 Pure white flowers.
- Pueraria thunbergiana**, Japan
 One of the most vigorous climbers, with immense trifoliate leaves. Stands winter in Philadelphia.
- Solanum jasminoides grandiflorum**, gard. var.
 A remarkable improvement on the original type.
- * **Seaforthianum**, West Indies
 More herbaceous looking; blue flowers, red berries
- * **Wendlandi**, Guatemala 25 to 50
 A truly magnificent climber, to be grown mixed with others, being deciduous in winter with us.
- ***Tacsonia Van Volxemi**, Columbia
 Long stemmed, drooping flowers of the richest crimson.
- * **JAMESONI**, Ecuador
 Flowers salmon colored.
- Tecoma capensis**, S. Africa
 The well-known scarlet species, growing so freely in California.
- * **jasminoides, alba magna**, Australia 50
 A pure white larger flowered variety of the well-known type
- Mackenni**, S. Africa
 An exceedingly vigorous climber, bearing large, pinkish flowers in huge bunches.

MISCELLANEOUS TREES AND SHRUBS.

*ABROMA AUGUSTA, India.....	50
A majestic foliage plant, nearly related to Theobroma cacao.	
*ABUTILON LONGICUSPE, Abyssinia.....	50
**AGLAIA ODORATA, S. Asia.....	2 00
ACACIA FLEXICAULIS, S. Texas and Mexico.....	50
Tall growing; shining leaves; flowers yellow fragrant; dark red seeds used as a substitute for coffee.	
*BAUHINIA DIPHYLLA, India.....	50
*BAUHINIA MONTANA, Himalaya.....	50
**CALOPHYLLUM CALABA, W. Indies.....	1 00
The "Santa Maria;" beautiful evergreen tree; white fragrant flower.	
*CASSIA CANCHA, Tropics.....	
* " LAEVIGATA, Tropics.....	
* " SCHINIFOLIA, ".....	
* " TOROSA, ".....	
Cedrela Sinensis, China.....	50
A most ornamental deciduous tree; hardy at Philadelphia.	
*CELTIS SINENSIS, India and China.....	
A beautiful shade tree, with dark green coriaceous leaves and dull red berries.	
CONVOLVULUS OLEOIDES, Greece.....	
Shrubby, not climbing, covered with thousands of light pink flowers in summer.	
*DRIMOSTACHYS NUTANS, Nubia and Abyssinia.....	50
*DUVAUA DEPENDENS, Chile.....	
A pretty aromatic evergreen tree, with white flowers.	
Eleagnus Simoni, China.....	
*ENTEROLOBIUM CYCLOCARPUM, W. Indies.....	
A beautiful tree with glaucous finely cut foliage.	
*EHRETIA ELLIPTICA, S. Texas and Mexico.....	
The "Anagua," a beautiful small tree, with pretty white flowers.	
*ERYTHRINA BOGOTENSIS, Columbia.....	50
* " INSIGNIS, S. America.....	25 to 50
* " VIARUM, " ".....	20 to 50
All these "coral trees" grow to a large size, and are conspicuous for their scarlet flowers.	
*EUCALYPTUS CITRIODORA, Australia.....	
* " PUNCTATA, ".....	
*Ficus aurea, Florida.....	
" australis, Australia.....	25 to 50
" macrophylla, ".....	25 to 50
Grevillea robusta pyramidalis, Australia.....	
HALIMODENDRON ARGENTEUM, Siberia.....	
A prickly, glaucous shrub, with pretty pea shaped pink flowers in summer, will stand any amount of cold and of drought too, and will thrive also in saline or alkaline soils.	
*HIBISCUS CRASSINERVIS, Abyssinia.....	50
Dwarf growing with pretty vermilion colored flowers.	
*JACARANDA MIMOSAEFOLIA FLORE ALBO, S. America, 25 to 50	
White form of the well known type.	
*Jacquinia armillaris, Florida and W. Indies.....	
A pretty evergreen with white fragrant flowers.	

JUNIPERUS PHOENICEA, Mediterranean Region	
Arborescent will stand heavy sea-winds better than any other conifer.	
JUNIPERUS PROCERA, Abyssinia	50
A large tree, growing much in the shape of the cedar of Lebanon.	
*Leucadendron Argenteum, Cape of Good Hope	50 to 2 00
The much admired "Silver tree" growing so freely with us.	
LEUCAENA GLAUCA, from Texas Southwards	
A pretty small tree related to "Acacias" with white flowers.	
*MICHELIA CHAMPACA, India	2 50
A stately tree, planted near the pagodas on account of its beautiful foliage, and of its sweetly fragrant flowers.	
Michelia (Magnolia) fuscata, China	50 to 1 00
The so called banana shrub; flowers deliciously fragrant.	
MIMOSA ACANTHOCARPA, S. America	
" DENHARDTI " " "	
" SPEGAZZINI, River Plate	
All three with finely cut leaves and pink flowers.	
Parkinsonia aculeata, from Texas southwards	
The "Retama" a tree with light foliage and beautiful yellow flowers, in appearance like some "Oncidium."	
PITHECOLOBIUM BREVIFOLIUM, S. Texas and Mexico	
The "Huajillo," a beautiful evergreen tree much prized also for fodder.	
Pittosporum nigricans, N. Zealand	
**PLUMIERIA ACUMINATA, India	1 00
** " HYPOLEUCA, " " "	1 00
