"OUR TREES, FLOWERS AND SERVICE ARE BETTER"

At the close of our shipping season for the spring we feel that we are justified in making the above claim, for it is with consciousness that we each and everyone, in the office, in the field and in the sales and collecting departments, have done our best. We now stand at the opening of a new season, ready to profit by any mistakes we have made in the past and to carry into effect the new lessons we learned so that we may render **A MORE PERFECT SERVICE.**

This List is prepared looking to that end and to assist our Salesmen in selling the stock we grow and to more intelligently serve our retail customers as to what they should plant, and where.

FRUIT DEPARTMENT

We have a large stock, well assorted and well grown. Our order sheets show the varieties we grow and they are the best adapted to this section. **SELL THESE.** We wish to recommend as our five best Plums the following: Six Weeks, Milton, Kernuco, Pool's Pride and Golden Beauty, they are very excellent Plums, and should be sold in preference to the others. We offer four of the Plum-Cherries, as you can see by referring to the new order sheet. We hope you will sell them largely.

PEACHES.—A fine stock. They promise as good as we ever grew. Apples, Apricots and Pears promise equally well. Also Plum and Plum-Cherry.

GRAPE VINES.—We have a large stock, especially two year vines. Push them. They will please everyone.

BERRIES.—There is nothing more profitable, or giving quicker returns in money, comfort and healthfulness than Blackberries and Dewberries. **SELL THEM IN EVERY ORDER,** and especially Thornless Dewberries. They are very fine. Strawberries are not profitably handled with other nursery stock. Do not sell them if you can avoid it.

SHADE TREES.—We have a full stock of young, vigorous trees, up to 1½ to 2 inches in caliper. Also Black Walnut up too '8 feet. Fine for both shade and nuts. **SELL THEM.**

We refer you to our new catalogue, which we have revised and brought up to date. The stock here shown is all well known, tested varieties and will give satisfaction. All stock true to label, and grown with utmost care from the seed bed on through all of the operations until ready for the Planter.

ORNAMENTAL DEPARTMENT

THE DEMAND FOR ORNAMENTAL PLANTING is increasing year by year. Discretion in planting Evergreens and Blooming Shrubs as to their relative sizes especially is to be observed. In grouping such plants, the tall growing ones should be planted at the back, the medium growing ones in front of these, and finish with the small or dwarf growing ones. The following tabulation we believe will help you,
