Buy “TESTED TREES”

Stanford Peach

OF largest size; oblong, yellow with red blush, cling stone, very valuable; ripe in August.

The illustration above is only two-thirds natural size. Prices are the same as for Dixie Apple.

The Largest Peach Grown Anywhere

The late Mr. J. R. Mayhew speaking of the Stanford or Minnie Stanford stated that this was the largest peach he had ever seen and he had spent fifty years of his life among growing trees and bearing orchards. He had visited every section of the United States.

Twenty-nine Year Old Trees Still Bearing

Mr. Joe Funk of Sadler, Texas, states that his Bessie Kerr peach trees planted in 1898 were still bearing at this time, 1927. He says: "The Bessie Kerr is the best all-round peach he has ever grown." Mr. Funk has been living on the same farm forty-two years and has maintained a Peach orchard all that time.

Bessie Kerr

A WHITE Cling, with red blush cheek, of very best quality; this Peach ripens middle of July and is the best fruit obtainable for making sweet pickles. It was introduced by us thirty years ago and has set the standard among fine Peaches ever since. See prices under Dixie apple.

Dixie Apple

A NORTH TEXAS Apple introduced by us; round, yellow, handsome, fine flavor; superior and desirable. Ripe first of July.

PRICES:	Each	Dozen
5 to 6 ft. high	\$1.00	\$10.00
4 to 5 ft. high	.75	7.50
3 to 4 ft. high	.50	5.00
2 to 3 ft. high	.35	3.50

Eighty-three Years Old

A Fifty-three Year Customer, and Still Planting Kerr's

I, G. D. Brown, state that I furnished the late Mr. Jno. S. Kerr some of the first Berry plants he used in starting his Nursery when he began in 1874—in Collin County. I have been dealing with this Company, as I needed their products ever since that date; am still buying from them. Their goods have proven satisfactory and I have always received fair and courteous treatment.

I am now eighty-three years old and still planting Kerr's Products.

You Send Your Check Willingly When You Get Your Money's Worth

San Angelo, Texas.
Dec. 11, 1926.

The John S. Kerr Nursery Co.
Sherman, Texas.

Gentlemen:

We received our stock December 9th, 1926, all O.K., and want to thank you for the nice stock you sent us, also for the extra pink Honeysuckle and the two extra trees each in the Winesap and Red June apple. We are well pleased. Enclosed find our check for \$20.75 to balance bill enclosed.

Yours very truly,

A. E. MUELLER.

San Jacinto Apple

SOMEWHAT similar to Red June; but larger, finer, more vigorous and productive. Extra good, don't miss it. Ripe last of June.

See price under Dixie Apple.

Cherries for Texas

NURSEYMEN and Planters have discovered that the old-fashioned varieties of Cherry, which succeed well in the East and North will not grow successfully or be profitable in our southwestern climate. We therefore regard the introduction of the Hybrid Cherry as of first importance to this section. Although originated in the far northwest, they have proven themselves adapted to almost the whole of our section. Of several varieties, we regard the one illustrated above as the best.

COMPASS PLUM-CHERRY

PRICES:	Each	Dozen
5 to 6 ft. high	\$1.15	\$12.00
4 to 5 ft. high	1.00	10.00
3 to 4 ft. high	.75	7.50
2 to 3 ft. high	.50	5.00

Equal to Two-Year-Olds

Mr. J. H. Jouett, Vernon, Texas, writes us that our plum trees planted only one year are as large now as some two-year-old trees from another nursery. It pays to plant first class trees grown right, dug right, and shipped to the planter in good condition to grow. Our trees are this kind.

A Satisfied Customer

TO WHOM IT MAY CONCERN:

I, J. W. Burnam, living in southeast Sherman, state that I planted an orchard in 1918 of 130 trees that have for the last three years paid me an average of \$400.00 per year in profits. I bought these trees of J. V. Smith, and I have been well pleased with my purchase. So far as I was able to determine all of the trees have borne True-to-Name.

I am still buying of Mr. Smith, and so long as I receive the courteous treatment I have had in the past, will continue to do so.

*Signed at Sherman, Texas,
December 17, 1926.*

J. W. BURNAM.

Big Extra Grape

LARGEST bunch and Berry. Black and of fine quality; vine grows vigorously; Post Oak Hybrid.

PRICE:

Each \$.50

Dozen \$5.00

A Final Word

THIS little pamphlet shows only a few of our choice Fruits, each one however, the cream of its class. Our general catalogue will be mailed free if you write for it. The book is valuable and interesting to every home owner. It shows our general line of Fruit trees, "Tested" for bearing qualities and proven best for the southwest.

TEXAS TREES GROWN RIGHT

by men of long experience will produce right in your orchard.

We are always glad to answer questions concerning Trees and Plants. Trusting to have the pleasure of serving you further, we are,

Yours very truly,

Paper Shell Pecans Bear Early and Long

Burk Burnett, Texas.

Oct. 30, 1926.

Mr. W. J. James, Salesman for
John S. Kerr Nursery Company,
Burk Burnett, Texas.

Dear Sir:

I purchased three paper shell pecan trees from the John S. Kerr Nursery, Sherman, about ten years ago. The trees were four years old at time of purchasing them. They had a small crop the second year after planting them, and have borne good crops every year since.

(Signed) JUDGE W. E. BEALL.

We Couldn't Say As Much About Ourselves In a Couple of Pages

WHEN my husband and I first came to Texas and purchased our farm, seven miles west of Sherman, we decided to plant an orchard. This was in 1899. We bought trees of Mr. John S. Kerr, who was then owner of The Commercial Nursery & Orchard Company.

Some people told us we could not grow fruit in Texas, but we went ahead and showed them, and we have had much pleasure from the fruit which we grew. Some of the trees are still bearing—1926—it seems to be the rule of this Company to secure buds from fruiting trees, and I have given the present Company buds from my fine Late Elberta Peach Trees.

I have decided to plant another orchard and shall go to Mr. Kerr's Company, now known as The John S. Kerr Nursery Company, for my trees. I consider them fair people and their trees have proven True to Name and given me good results.

MRS. C. D. HUGHES,
Sherman, Texas.

The Testimonials used in this Folder are just a few of the ones that come into our Office. We have many thousands of satisfied customers.

Thirty-five Peaches Second Season!

UNDER date of August 14th, 1926, Mr. T. C. Rowland of Ferris, Texas, writes us that among other peach trees, he bought one of the Mixon Cling variety and that eighteen months later it bore thirty-five peaches, well developed, red, alternating in color, with a slight tinge of yellow. With proper care of our products, you may do as well.

A great deal depends on the care you give the plants when they have been received.

Ask advice if you are not sure.

A Service Booklet Gives You Advantage of Our Experience

WHEN we receive your order we will mail you our Booklet of "Suggestions for the Planting and Care of Trees and Plants," the results of long years of experience in our Texas climate and with our Texas soil.

This pamphlet tells where to locate the orchard, how to prepare the ground to receive the trees, the best fertilizer to use, and how to prune the trees for planting. It also gives methods of cultivation for the orchard and the care of Shade and Street trees. There are also suggestions which will help you to start in the right manner to have a fruitful orchard or beautiful flowers.

Plant Peaches for a Long Season in the Home Orchard

Plant our BEST peaches for the Home Orchard. Plant twenty-five feet apart each way. Sixty-nine trees to an acre. Give Proper Cultivation and care and you will find THIS the most profitable acre of your farm; besides giving all the fresh fruit your family can use from May to August.

We also have a general line of TESTED Ornaments, Evergreens, Shade Trees, Blooming Shrubs; Roses; etc.—All proven BEST for this section. Write for Our Catalogue—Sent Free.

Give us a trial order or pay our nursery a visit.

Let us prove to you that our
