EVERYTHING
FOR THE

FRUIT GROWER

F.W. REID Nurseryman

BRIDGEPORT, OHIO.

TERMS AND ADVICE.

CASH WITH ORDER. All mail addressed to REID, Bridgeport, Ohio, is safe, as we have a special pouch from the Post-Office. Remit by Post-Office or Express Money Order, or Draft on New York or Chicago.

C. O. D. We will send stock in this way, provided one-fourth the amount is sent with the order, and the purchaser pays return charges on the money.

ORDER EARLY. You have everything to gain by sending in your order early. Don't delay, as some stock is apt to be exhausted before the season ends.

ESTIMATES will be cheerfully furnished on large orders. In many cases we can quote less than catalogue rates where our stock is in surplus.

OUR PRICES include packing. Orders are delivered free to the forwarders here, when our responsibility ceases. In case of delay, we will do our utmost to expedite delivery.

SHIPPING FACILITIES. No nursery in the country has better means of transportation than we, as we can reach every point in the land over the following roads and connections: B. & O.; P., C., C. & St. L.; C. & P.; W. & L. E.; C., L. & W. (which is run by the Big Four in connection with the L., S. & M. S.), and the Ohio River Railroad. We can also ship by the Ohio River steamers, which are very handy, and their freight rates are low.

FORMER PRICES are set aside, as this list abrogates all previous prices.

GUARANTY. All our stock is true to name and carefully labeled; yet, while we exercise the greatest care to do this, we will not be held responsible for any sum greater than the cost of stock, and when varieties become exhausted we reserve the right to substitute others of the same class and value, except when orders are marked "No substitution."

PACKING SEASON. We commence packing about the 1st of October, and continue till the ground freezes—usually about the 1st of December.

AUTUMN.

1894.

Reid's NURSERIES

To Our Patrons.

WE TAKE pleasure in handing to our many patrons and friends our Handy Pocket Price-List, which will prove (we think) as interesting and as handy for ready reference as any list formerly sent out; those wishing descriptions of fruits will turn to our Illustrated Catalogue, mailed in spring, which will give full information on any subject desired.

We thank our many patrons for the past favors bestowed on us, and we will in turn try to meet their every want. Our first aim is to please all, by giving them just what they want, of the highest quality and the lowest possible price, and we think the country at large will bear us out in saying that we have given a fair exchange, and have placed the prices of stock within the reach of every buyer.

Reid's fruits are now known the world over; it is a household word, and our catalogues are sought by the leading horticulturists of the world. The personal attention that Mr. Reid has given to the upbuilding of one of the largest retail nursery businesses in the country, has been praised by all, including the agricultural and horticultural press of America.

NOTICE. We will be pleased to have our customers look after our interests in their locality. It is well known to all that we do not employ agents. Our trade has been built up by judicious advertising in nothing but the best of the American press; hence, as you will have no one calling on you to represent our stock, we ask all of our customers to get others to club together and make a club order; then you can buy your stock cheaper and save time and freight to all. In buying this way you can save from 50 to 100 per cent. over that of your fraud agent, who sells for high rates and does not give you what you want.

FRUIT TREES.

WE CALL your special attention to our fine and large stock of Fruit Trees, which is one of the largest and finest to be found in the country. Every care is exercised, in growing the stock, to have it the finest that can be had. We would also draw your attention to the fact that our stock is strictly pure. Agents many times try to make buyers believe that because we offer stock low it is not true to name.

Yet, at the same time, if the purchaser will remember, we are always at the same place, and the agent is not. We would also ask, Who pays the agent's expenses? Our business is directly with the grower, and we invite one and all to examine our stock, which is claimed to be the best in the country. We also call your attention to the fact that we are the only nursery that gives the caliper of our stock. Any grade of a tree can be first-class of its grade, but see that you compare our prices, in caliper. Many nurserymen call a $\frac{5}{8}$ to $\frac{3}{4}$ -inch tree first-class. It is of its grade, but it is not what is termed a first-class tree.

FALL PLANTING. Those who contemplate planting trees in the near future will do well to set in the fall. This is the best time to set all kinds of nursery stock that is hardy and will stand the winter. It is not only the best, but can be done to better advantage than in the spring. The ground is in better condition, you are not so rushed for time, and the work can be more thoroughly done. Still further, a tree set in November will make twice the growth the following summer of one set in April.

There is no necessity for a planter who understands the art of setting to miss a single tree. We recommend fall as the best time in the year to set trees.

APPLES.

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of other fruits, extends nearly or quite through the year. By planting judicious selections of summer, autumn and winter sorts, a constant succession can be easily obtained of this fruit, so indispensable for family use. There is no farm-crop which on the average will produce one-fourth as much income per acre as will a good Apple orchard. Prices as follows, except where noted :

Prices same as for Standard Apples.

Gen. Grant,	Kentucky Red (Cider),	Siberian,
Hewes' Va. (Cider),	Orange,	Transcendent,
Hyslop,	Quaker Beauty,	Whitney.

PEARS.

The Pear, like most other things highly desirable and valuable, cannot be had without attention, labor and skill. The relative price of the Apple and Pear being about as 1 to 10, shows at the same time the superior value of the latter, and the greater skill required to bring it to perfection. Summer Pears should be gathered at least 10 days before they are ripe, and autumn Pears at least a fortnight. Winter varieties, if they will hang so long, may be left until the leaves begin to fall.

NEW VARIETIES OF MERIT.

	Each	Doz.	100
Heavy first-class, 5 to 7 feet, $\frac{3}{4}$ in. and up .	\$0 50	\$5 00	\$30 00
Light first-class, 5 to 6 feet, $\frac{5}{8}$ to $\frac{3}{4}$ inch.	40	4 00	25 00

\$1 each, \$10 per dozen.

GENERAL LIST OF PEARS.

PRICES.

		Each	Doz.	100
Standards.	Heavy first-class, 5 to 7 ft., $\frac{3}{4}$ in. and up	\$0 40	\$3 50	\$20 00
	Light first-class, 5 to 7 ft., $\frac{5}{8}$ to $\frac{3}{4}$ in.	35	3 00	18 00
	Second-class, 4 to 5 ft. $\frac{1}{2}$ to $\frac{5}{8}$ in., .	30	2 50	15 00
	Extra, 6 to 8 feet	50	5 00	25 00
Dwarfs.	First-class, 4 to 5 feet, $\frac{3}{4}$ in.	25	2 50	10 00
	Second-class, 3 to 4 feet, $\frac{5}{8}$ in.	20	2 00	9 00
	Extra	30	3 00	12 00

We call our customers' attention to the fact that many nurserymen and dealers, in offering Pears, give prices for first-class trees and supply $\frac{5}{8}$ to $\frac{3}{4}$ -inch grade. These are first-class trees, but you should not be misled. We give grade and rate, and can supply as fine stock as ever was grown, at lowest rates.

We have a large stock of fine trees of a light grade that we will offer in lots of 100 trees at \$10 per 100, 4 to 5 feet; good selections.

Those wanting trees should write us, giving varieties and grade, and we will give special rates.

PEACHES.

The Peach tree requires a well-drained, moderately rich soil—a warm, sandy loam is probably best. To preserve the continued healthy growth of the trees and the fine quality of the fruit, the trees should have the shoots and branches shortened every year, so as to preserve a round, vigorous head with plenty of young wood; and the land should not be seeded to grass, but kept in constant cultivation in hoed crops. The following are the best among 100 sorts in bearing:

✓ **LORENTZ.** We offer this new Peach with pride, knowing personally just what it is, and that we are giving our customers full value for their money. It is among Peaches just what Timbrell strawberry is among strawberries—the best ever offered. The Lorentz is known to all fruit-growers in this section, and when it was known that we had control of the stock, many orders were tendered us before the trees were propagated.

WHAT WE CLAIM FOR LORENTZ: That it is superior in quality to any other Peach that ripens at the same time; that it is more attractive, showing both bloom and color the same as an early September Peach; that it has not failed to

Lorentz Peach. Half Natural Size.

PEACHES—continued.

produce a full crop in the five years it has been in existence, while but one crop has been gathered in the same time from other varieties ; wherefore, we believe its blooms to be frost-proof, or so much so that no harm is done Lorentz when other standard varieties are frozen. This season, when all others failed, the Lorentz was loaded with fruit. From one foot of wood, cut for photographing, there were taken 25 Peaches the same size as those sent out ; hence it will be seen that it is an abundant yielder. The fruit was not so large as usual this season, because of dry weather and neglect in thinning the over-abundant setting, but will average, as shown in the photo-engraving (see page 8), as large as Crawford Late, Stump or Wheatland. Lorentz was ready for market Octo-

PEACHES—continued.

ber 25, and kept in good shape for two weeks after being picked. It is yellow-fleshed, with a bright red cheek, and a perfect freestone of the best quality.

Opinions from the Horticultural Press.

LORENTZ PEACH.—The specimens alluded to came to hand in good condition. The Peaches have a yellow skin, some of them showing considerable red at the blossom end or on one cheek. The variety is of a large medium size, a freestone, yellow-fleshed, and of a quality equal to or excelling the average late Peach. The suture mark shows plainly on one side, and most of them have the peculiar Melocoton tip (Crawford). If it will do as well for others as for Mr. Reid, it should be a valuable addition to the list.

E. S. CARMAN, Editor *Rural New-Yorker*.

We have received from E. W. Reid, the well-known nurseryman of Bridgeport, O., a basket of the Lorentz Peach. They were sampled, and found to be all that was claimed for them, so far as quality was concerned. When Reid says Peaches are good, we are ready to believe it.

PLUMS.

The Plum, like the pear and other finer fruits, attains its greatest perfection on our heavy soil, being entirely free from disease. The curculio, a small, dark brown beetle, often stings the fruit, causing it to drop off; but the following directions, faithfully observed, will secure a good crop of this splendid fruit everywhere :

As soon as the blossoms are fallen, spread two sheets under the tree, and give the tree a sudden jar by striking a smart blow with a hammer upon the stub of a limb sawed from the tree for the purpose ; the insects will drop on the sheet, and can be killed. Collect all the fallen fruit and burn or feed to swine. Repeat the operation every day for two or three weeks. It should be done before sunrise.

CHERRIES.

The Cherry tree universally requires a dry soil, and is naturally a hardy tree, succeeding in the lightest soil or dryest situations. The Heart and Bigarreau varieties are of rapid growth, with large, glossy leaves, forming fine, pyramidal-shaped heads, and producing large crops of luscious fruit; are well adapted for planting along streets, or in yards as shade trees.

MALDEN ON HUDSON, N. Y., *April 30, 1894.*

DEAR SIR—I received plants in good condition, and I am well pleased; indeed, I could not be otherwise. I shall call again.

Yours truly,

CHAS. HOFF.

OWENSVILLE, OHIO, *April 28, 1894.*

DEAR SIR—My order, 10,824, came on the 24th inst., all in good condition. Thanks for promptness.

Respectfully,

J. O. RAPP.

CRAYON, OHIO, *April 26, 1894.*

SIR—The nursery stock was received the 14th. I was very much pleased with everything, Agents have received my last order; they sell inferior stock at exorbitant prices.

Yours with respect,

MRS. FRANK THOMSON.

THE TIMBRELL

STRAWBERRIES.

TIMBRELL (P.) is the Gem of Strawberries. Growers have become acquainted with it, and they cannot say too much in its favor. The press has also said for it more than for any other new fruit put on the market. It has been confirmed by the leading horticulturists as the best variety ever introduced, and has even surpassed its former record this last season. We claim that it is to-day the best berry in existence, and not only the best berry, but the most profitable for the commercial grower to plant; and also the best variety for family gardens. Points that are essential in making a good variety are **productiveness, hardiness, healthiness**, with solidity of fruit sufficient to place it in good condition on the market. Timbrell not only possesses these points, but is one of the most hardy, if not the most hardy, of the Strawberry family, and in quality it surpasses any known kind. Growers have said that it was hard to get a variety perfect in all points. This we know, but perfection is more nearly attained in Timbrell than ever before. What has been wanted was a good late

STRAWBERRIES—continued.

variety. In Gandy's Prize we have a good berry, yet it is lacking in the most important points, viz., productiveness and hardiness, while these two points alone would make Timbrell the most desirable for a late berry. Another point in its favor is that it is the latest of all Strawberries to bloom and ripen fruit. **It has never lost a full crop!** The bloom being imperfect greatly increases the value of the variety, as imperfect-flowered varieties stand much more frost than perfect ones; hence in Timbrell, you will note, we have the best berry that has ever been offered.

There is no berry in existence to-day that includes the same combination of merits attained in Timbrell. Indeed, we say without fear of contradiction, that there are not **six** berries on the market that combine the good qualities possessed by Timbrell alone. Hence, you get in Timbrell the same points that you would get in half a dozen of the best varieties of the day. We claim still more: There is no variety in existence that can compare with Timbrell in **quality, healthiness, vigor and large average size**, and there is but one other that equals it in productiveness, and in this the berries are soft and of poor quality.

We have heard of but two places where Timbrell has not met approval, and surpassed all other varieties, hence we must lay it to care or soil, while we have hundreds of letters confirming all we have claimed, and adding much to the popular opinion of its merits. It is said that berries grown of Timbrell exceed in weight any that have ever been offered. At this writing we have a sworn statement regarding 10 berries which weighed 25 ounces, or in other words, equal to about 1½ quarts.

We have photos. of a single vine with 90 perfect berries, and many reports of others that run from 16 to 23 ounces for the 10 best berries.

There has never been a fruit that has met the approval of so many growers in one season's trial.

See that you get the genuine stock. \$1 per doz., \$5 per 100, \$30 per 1,000.

WINEBERRY.

Japanese	\$1 00	\$6 00
--------------------	--------	--------

BLACKBERRIES.

ELDORADO. This is the most valuable Blackberry ever put on the market, and is endorsed by the strongest recommendations from the highest authority on new or old fruits. The entire stock of this variety is ours; it is under our personal supervision, but will be offered to the public by some other reliable nurserymen as a novelty.

It has been cultivated 12 years, and under careful test at different experiment stations for four years has never winter-killed or failed to produce a full crop of the finest fruit. The vines are very vigorous and hardy, enduring the winters of the far Northwest without injury, and their yield is enormous. Berries are very large, jet-black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep 8 or 10 days after picking with quality unimpaired.

From the Pennsylvania Experiment Station.

Eldorado is an immense producer. The berries ripen evenly, are very sweet and of good size; the yield was greater than any others on our grounds.

NOTE. We have an immense stock of leading varieties. Write us before you buy.

ELEAGNUS LONGIPES.

This new and valuable acquisition, a native of Japan, is one of our most promising new fruits, and we highly recommend it for more general planting. It is worthy a place in both fruit and ornamental collections, as its beautiful shape as a shrub, with its dark green foliage, make it a very conspicuous sight, especially when loaded with its fruit; it is also very attractive when in bloom in May, the flowers being a beautiful lemon-yellow color. The bush begins to bear at two years old, and the fruit is very highly prized by those who have fruited it for its peculiar piquancy, making a very delicious sauce, and is considered much superior to the cranberry. It is about the size of an ordinary cherry, but more oval, and is borne in large clusters in great profusion. The bush is very hardy and free from insects and disease, and will thrive in any soil with ordinary culture; it grows to the height of about six feet. It is seldom we have to offer a plant which combines valuable fruiting qualifications with so ornamental a character. Price, mail or express, 20 cts; doz., \$2.

A NEW HARDY ORANGE.

This is the most hardy of the Orange family, and will stand our northern climate with little or no protection, and is also desirable for pot-culture. In the parks of both New York and Philadelphia it grows luxuriantly, and blooms and fruits profusely. You can have an Orange tree growing, bloom and fruiting on your lawn or yard. It is a dwarf, of low, symmetrical growth, with beautiful trifoliate, glossy green leaves, and many large, white, sweet-scented blossoms, finer than any other variety of Orange blossoms, and borne almost continually. Price, mail or express, 20 cents each, \$2 per doz.

Anna Maria,	Gem of the Prairies,
Baltimore Belle,	Queen of the Prairies.

REID'S SPECIAL COLLECTIONS OF SMALL FRUITS.

One dollar each, by mail, postpaid.

Order Collections by Number and Class only, not by Variety, and do not ask for any change.

We have made these collections for the benefit of our customers. If they are carefully studied, almost any selection may be made from them at small cost.
