Pretty Lake

....Nurseries

WM. HOLLAND & CO., Proprietors.

Nurseries 2½ Miles West of Plymouth, Marshall County, Ind.

NOW THE LARGEST NURSERIES IN THE STATE.

Our stock is the most complete we have ever had—all young, smooth and thrifty, and we invite personal examination. In sending you this circular we wish to call your attention to our stock of Plants, Trees, etc., which are first-class in every particular. We cultivate only such varieties as we consider hardy and adapted to our climate, and if selections are left to us in making up your orders, we will give you the benefit of our years of experience.

We also desire to thank our many friends for their liberal patronage, and trust by square dealing and close attention to business, to merit a continuance of the same.

SPECIAL NOTICE.

We have been annoyed with parties representing our Nurseries and then procuring their stock from other growers. From this on we shall not only expose such parties, but deal with them according to law.

TERMS.

Cash with Orders. Money may be sent by Drafts on New York or Chicago, Express Orders, Post-Office Order or Registered Letter.

References: First National Bank, also Buck & Toan, Bankers, Plymouth, Indiana, Express Agents, Postmaster or any of our business men of Plymouth, Indiana.

Prices given in this Circular are for first class Trees, Plants and Vines Well Packed, and *Express Freight Charges Will be Paid by us*, to the nearest Railroad Town of the Purchaser.

We take special care in growing and sending out our Trees and Plants and guarantee them true to Name. Although we try to guard against mistakes they will some times occur, and when promptly notified of such we will cheerfully make all satisfactory. But it is mutually agreed between the purchaser and ourselves that our guarantee shall in no case make us liable for any sum greater than that originally received for said stock.

Half doz., fifty and five hundred of a kind at doz. hundred and thousand rates. Plants sent by mail at doz. rates if so desired.

ONE ACRE OF OUR MANY.

This is a small piece of land, yet it would give you fruit and vegetables enough for the entire season, if you would plant and care for it as well as you do for your corn-fields. The time is *coming and is here*, when we will see that fruit is our *best doctor* and one of our greatest comforts. Not only our *best doctor* but our *cheapest*.

Raise fruit for your table, making an entire season as follows: Strawberries, Raspberries, Blackberries and Grapes; if you have early and late kinds of these varieties they will cover four months at least. Add to this a few fruit trees, considered and proven to be as good and hardy as can be grown in our climate.

NUMBER OF TREES OR PLANTS REQUIRED TO SET AN ACRE.

30x30 ft.	Apple trees.....	59	5x3 ft.	Currants and Gooseberries...	2904
25x25 ft.	Apple trees.....	75	4x3 ft.	Currants and Gooseberries...	3630
20x20 ft.	Apple trees.....	110	4 ft.x18 inches,	Strawberries.....	7260

Crandall, (Worm Proof).....	25	2 50	15 00

GOOSEBERRIES.

Cultivate and treat the same as currents.

HOUGHTON. Our hardiest, most productive and best variety of American Gooseberries, medium size and never mildews, fruit, smooth, red, tender and very good, a valuable variety.

DOWNING. Fruit, large, roundish, light green, with distinct veins, skin smooth, juicy, and very good.

SMITH'S IMPROVED. Large, oval, light green, sweet, very good, vigorous grower.

MOUNTAIN SEEDLING. A strong grower and heavy bearer, berries large, dark red smooth; a profitable variety.

GOLDEN PROLIFIC. A strong, vigorous, upright grower. Fruit, large, color golden yellow, flavor sweet and good, very productive.

INDUSTRY. Lately introduced and said to be one of our largest and most productive varieties. Dark red color with a pleasant, rich flavor.

PRICE LIST.

Houghton.....	\$ 10	\$1 00	\$ 8 00
Downing Smith Improved, Mountain Seedling.....	15	1 50	12 00
Goldea Prolific Industry.....	35	3 00	20 00

GRAPES.

By making a proper selection of this delicious fruit it can be had for several weeks. Plant 8 by 6 feet apart; let one or two vines grow from the root; prune back leaving three to five buds first year, after this allow to grow 3 or 5 feet as it suits you. There are many ways of training them, but we prefer training them to stakes. We sell nothing but sorted vines of strong growth.

CONCORD. Decidedly the most popular Grape in America. Bunch large, shouldered, compact. Berries large, covered with rich bloom. A number of these vines should be in every garden.

WORDEN. One of the sweetest, most reliable early black grapes. Thrifty, hardy, productive. Larger berry than Concord, better quality and about one week earlier.

DELAWARE. The most popular red grape in this country. Early, small and very sweet. Always a favorite.

MOORE'S EARLY. We think heads the list of early black grapes. Quality good and should be included in every collection.

BRIGHTON. A new variety; early, vigorous grower, productive, berries medium size, dark red color.

EMPIRE STATE. A pure native, a vigorous grower, cluster large. Berries medium, color yellowish white, early, tender, juicy and sweet.

NIAGARA. A remarkable strong grower, very hardy. Berries as large as Concord bunches very large and uniform. Very little pulp, melty and sweet. Color white.

POCKLINGTON. Very hardy both in wood and foliage. Is a light golden yellow, clear, juicy and sweet. Bunch very large, berries round, very large and thickly set.

ELVIRA. A valuable small white grape similar in growth and size to Delaware. An equally prolific bearer and very hardy vine. Strong grower.

PRICE LIST.

	Each.	Per Doz.	Per 100.
Concord.....	\$ 10	\$1 00	\$ 7 00
Worden, Delaware, Moore's Early, Brighton.....	20	2 00	15 00

We also have a fine lot of choice, Flower Seeds, fresh of our own growing, at 10 cents per packet.

ADVICE TO PLANTERS.

Select thrifty young trees in preference to old or very large ones; the roots are more tender and fibrous, and they bear transplanting better and far more apt to live; they can also be more easily trimmed and shaped to any desired form, and in the course of a few years will usually outstrip the older ones in growth.

THE SOIL.

A rich loam is the best for fruit, made sufficiently dry by artificial draining, if necessary, but all soils may be made available by judicious treatment.

PREPARATION FOR PLANTING.

Plow and subsoil repeatedly so as to thoroughly pulverize to a depth of 12 to 18 inches. When planting upon the lawn or grass plots, remove the sod for a diameter of 4 or 5 feet, and keep this space well worked and free from weeds. Dig the hole deeper and larger than is necessary to admit all the roots in their natural position, keeping the surface and subsoil separate. Cut off broken and bruised roots and shorten the tops to a half a dozen good buds, except for Fall planting, when it is better to defer top pruning until the following Spring. If not prepared to plant when your stock arrives, "heel in," by digging a trench deep enough to admit all the roots and setting the trees therein as they can stand, carefully packing the earth about the roots, taking up when required. Never leave the roots exposed to the sun and air, and "puddle" before planting.

PLANTING.

Fill up the hole with surface soil, so that the tree will stand about as it did when in the nursery after the earth has settled, except Dwarf Pears, which should be planted deep enough to cover the quince stock upon which they are budded two or three inches. Work the soil thoroughly among the roots, and when well covered tramp firmly. Set the tree firm as a post, but leave the surface filling (of poorer soil) light and loose. No staking will be required except with very tall trees. Never let manure come in contact with the roots.

MULCHING.

A covering of coarse manure, straw, marsh hay, or loose chip dirt, during the first season, will effectually prevent injury from drought, and is a benefit at all times.

The time for planting in the spring is as soon as the ground is well thawed out and from then to about the 1st of May. For planting in the fall the months of October and November. But Evergreens should always be planted in May for success.

We shall be pleased to have any parties give our Nurseries and Stock a personal inspection at any time. Also to have any parties desiring to buy their stock direct from the grower, to visit our Nurseries.

Special inducements offered to men to take orders in their own vicinity. Write for terms.

Yours truly,

HOLLAND & CO.,
