SUMMER AND FALL PLANTING.

SPIRÆA ASTILBOIDES

SPIRÆA ASTILBOIDES.

This new type of Spiræa is handsome and distinct, and cannot be too highly appreciated by florists as a decorative plant for early forcing. It is considerably dwarfer and much more graceful than *S. japonica*. The flowers are produced in greatest profusion, on branching spikes, terminated by elegant, dense plumes of pure white, well displayed above the foliage. It is perfectly hardy, and is certain to become the leading variety for market purposes. Certificated both by the Royal Horticultural and Royal Botanical Societies of London. 10 cts. each, \$1.00 per doz., \$6.50 per 100; \$60 per 1000. (For other *Spiræas*, see page 2.)

➡Owing to the recent introduction of this variety only a limited quantity was grown the past season, but wherever offered it was quickly taken up at much higher prices than the standard sorts.

ROMAN HYACINTHS.

All growers of flowers for market will remember the great disappointment caused by the short deliveries of Roman Hyacinths last year, some who delayed ordering until late in the season having to pay about double the regular price, or were unable in a great many instances to secure any Bulbs at all. Those who placed their orders early received Bulbs from the first deliveries at import prices, in consequence of which their returns were much more profitable.

This proves the advisability of placing orders early, especially for such an important Florist's Bulb as this.

The Bulbs we offer are guaranteed up to measurement, and the best quality grown in France.

DUTCH ROMAN HYACINTHS.

We can recommend this stock to the florist who requires a Hyacinth which blooms later than the French Roman, producing stronger stalks and better flower-spikes, and as the price will be found much cheaper it is without doubt a most profitable Bulb to plant.

DUTCH HYACINTHS.

The great demand and short crops of Dutch Hyacinths last year have materially effected prices for this season, but while the prices will be found slightly higher, the quality promises to be much better.

TULIPS.

Present reports from Holland indicate a bountiful crop of Tulip Bulbs, in consequence of which prices are much lower this year than ever before.

We would call special attention to our mixtures of Early Tulips for forcing. They are made up especially for us, and contain a large variety of the very best named kinds for early forcing and cut-flower trade.
