1895.

Vorwort.

1895.

Es ist in unserem Geschäfte der Gebrauch, unter unseren deutschen Kunden einen theilweise in der deutschen Sprache gedruckten Katalog zu verbreiten. Auch in diesem Jahre bleiben wir diesem Gebrauche um so mehr treu, als wir uns ganz besonders verpflichtet fühlen, unseren deutschen Freunden unseren warmen Dank auszusprechen für die Unterstützung, welche sie bisher unserem Geschäfte in so großem Maasse zu Theil werden ließen. Wir geben unseren deutschen Kunden die Versicherung, daß sie auf prompte und gewissenhafte Ausführung aller Aufträge, mit denen sie uns beehren werden, mit Bestimmtheit rechnen dürfen. Wir werden namentlich darauf bedacht sein, gerade unsere deutschen Geschäfts-Freunde zu befriedigen, da uns besonders daran gelegen ist, uns deren Rundschaft mehr und mehr zu sichern und zu erhalten.

Wir haben in unserem Geschäfte eine vieljährige Erfahrung hinter uns. Diese setzt uns in den Stand, die Art des Betriebs mehr und mehr zu vervollkommen.

Rabatt: 25 Cents am Dollar erlauben wir an alle in „Packets“ verpackte Sämereien. Gärtnern, welche Samen, u. s. w., in Quantitäten brauchen, erlauben wir einen besonderen Rabatt. Senden Sie uns Ihre Liste von Samen, u. s. w., welche Sie wünschen, und mit rückkehrender Post geben wir Ihnen unsere niedrigsten Preise.

Beim Ausstellen von Aufträgen sollte man vorsichtig sein und den vollen Namen und die Adr. sie genau schreiben, um Irrthümern und Verzögerungen vorzubeugen.

Geld kann auf meine Kosten und Risiko wie folgt versandt werden: Postanweisung, Wechsel auf New York, Chicago oder Milwaukee, Express-Anweisung oder auch im registrierten Brief. „Postal“-Noten und Geld in irgend einer anderen als der vorgeschriebenen Weise versandt, geschieht auf Gefahr und Risiko des Absenders.

Samen per Post.—In „Packets“ verpackte Sämereien und Pakete, welche nicht mehr als $\frac{1}{4}$ Pfund wiegen, werden von mir frei nach irgend einer Poststation in den Ver. Staaten versandt. Bei größeren Quantitäten muß 8 Cts. per Pfund zum Katalogpreis zugefügt werden, bei Bohnen und Erbsen 8 Cts. per Pint und 15 Cts. per Quart, und bei Korn 6 Cts. per Pint und 10 Cts. per Quart, um das Porto zu decken.

Besonders empfehlungswerthe Collectionen.

Dauerwiesen und Dauerweiden.

Alle Autoritäten stimmen darin überein, daß für **Weide** und **Heu** die besten Ergebnisse erzielt werden durch den Gebrauch von **Gras-Sämereien im Gemenge**. Die Ursachen sind handgreiflich: Erstens;—Eine Anzahl von Arten sichert ein **viel dichteres Wachsthum**, als die gleiche Menge Samen von nur einer oder zwei Sorten, und erweist sich als **weniger auslaugend** für den Boden, zumal sie größtentheils von verschiedenen Bestandtheilen leben. Zweitens;—Jahreszeiten, welche manchen Gräsern ungünstig sind, sind für anderen Arten günstig, sodaß bei Gemengen ein Fehlschlag **thatsächlich unmöglich** ist, vorausgesetzt natürlich, daß der Samen gut ist. Wir tragen große Sorgfalt bei der Auswahl von Gras-Sämereien, um die höchste **Keimkraft** zu sichern, und die Gemenge beruhen auf einer vollsten Würdigung der Erforderniß der verschiedenen Boden-Arten für welche sie bestimmt sind.

Für Dauerwiesen:

Auf trockenem Boden. Wiesenrispengras, Englisches Raigras, Italienisches Raigras, Knaulgras und Rother Klee. Bushel 15 Pfund \$2.00, 100 Pfund \$12.50.

Greeting.

IN submitting our Catalogue for 1895, we take this opportunity of again thanking our numerous friends and patrons for their liberal support and recommendations. From those who have not given our Seeds a trial, we would respectfully solicit a trial order, which we are positive will lead to increased confidence. We assure them that all orders intrusted to our care, either large or small, will receive our prompt and personal attention.

The relation of the Farmer and Market Gardener to his Seedsmen are from necessity more closely allied than those of any other calling. The word of the Seedsmen must be taken for the quality of the goods, which it is impossible for the buyer to determine from examination. It is as it seems to us the height of folly to embellish a seed catalogue with outlandish and extravagant illustrations and erroneous and overdrawn descriptions. As a class the seed-buying public are possessed of sufficient sound sense and judgment to at once stamp such an author a knave or a fool, either or both. It is likewise in our opinion equally absurd to advertise the "cheapest seeds in the world," "cheap as dirt," etc., good honest seeds represent *time, labor* and *cash*, and any seeds that are sold ridiculously low must necessarily be lacking in vitality, purity or some essential element. We have endeavored in our descriptions and illustrations to deal only with *truth* and *facts*, to hedge no important points and if possible to establish full and complete confidence between ourselves and our customers or prospective buyers.

Half pounds supplied at pound rates; half bushels at bushel rates. Market Gardeners and Farmers requiring larger quantities of seeds than are here offered are invited to ask for special prices.

SEEDS BY MAIL.—All seeds in packets, ounces and quarter pounds will be sent postpaid by mail at prices quoted, on parcels containing more than a quarter pound postage must be added at the rate of 8 cents per pound, on Beans and Peas 8 cents per pint and 15 cents per quart, and on corn 6 cents per pint and 10 cents per quart.

SHIPPING DIRECTIONS.—Shipping directions should accompany all orders. Where no particular mode of transportation is designated, we shall exercise our best judgment, and forward by express, freight or mail, as may seem most advisable.

REMITTANCES.—Cash should always accompany the order. We will be responsible for money sent to us by Money Order, Bank Draft, Express or Registered Letter. Every postmaster is required to register any letter on payment of eight cents extra postage. The cost of remitting may in all cases be deducted from the amount sent.

LIBERAL DISCOUNT.—To those who buy seeds in packets, we will allow 25 cents on each dollar sent us. Thus purchasers remitting \$1.00 may select seeds (in packets only) to the amount of \$1.25; those remitting \$2.00 to the amount of \$2.50 and so on.

CABBAGE.

There is nothing the gardener raises that requires a more careful selection of seed for a profitable crop than the cabbage. The seed must not only be of good germinating quality, but must be true to name, of uniform type, grown from perfect solid heads, and in a climate especially adapted to its perfect maturity. Such seed we offer our patrons with the utmost confidence that it will give the highest satisfaction in every respect. We exercise the greatest care in selecting our supplies, obtaining them from growers who make it a specialty, whom we know to be thoroughly reliable. We handle no cheap imported seed, or those of doubtful quality.

Henderson's Early Summer. A most excellent variety; twenty days later than the Wakefield, but it grows to fully double the size of the latter. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.25.

MEADOW FESCUE GRASS.

Grass Mixtures for Hay and Permanent Pastures.

All authorities agree that for *Pasture or Hay*, best results are obtained from the use of *grass seeds in mixtures*. The reasons are obvious.

FIRST.—A number of varieties will insure a *much denser growth* than the same amount of seed of one or two varieties, and prove *less exhausting* to the soil, since they live to a large extent on different constituents.

SECOND.—Seasons that effect some grasses adversely are favorable to other sorts, so that with mixtures a failure is *practically impossible*, provided of course, the seed is good. We take great pains in selecting grass seeds in order to secure the *highest germination*, and mixtures are based on a full appreciation of the requirements of different soils for which they are intended.

GREATEST ON EARTH.

**Everitt's Celebrated Man-Weight Farm and
Garden Tools,** The weight of the body is the power. The
Drag Bars are hinged and the tools are guided all around the
plants, much the same as a hoe in your hand.

One man with a man weight will do as much work as 6 men
with hoes or 3 men with old style machines. The saving in hand
hire will be enormous. A Man-Weight machine will save its cost
many times every year, in saving of hand hire, in closer planting,
in rapid work, in better work, in larger crops, in crops of better
quality, in freeing the ground of grass and weeds; In short it can
be made the best paying tool on the place. The question is not,
can I afford to buy it? but can I afford to be without it?

The Man-Weight Machines are the most convertible tools
made. You get many machines in one.

Koss' Fancy Lawn Grass Seed.

FRESH, PURE AND CLEAN.

The Necessary Requisite for a Beautiful and Enduring Lawn.

This Grass Seed is a carefully prepared combination of the various grasses designed to produce a fine, dwarf, compact and permanent turf. Many Lawns dry out and turn brown during the hot, dry summer months and do not revive until the cooler weather of autumn. By a judicious use of some of the European Grasses with the standard Lawn Grasses of America, we are enabled to offer a mixture to the public, which, from the habits of the various grasses of which it is composed, to ripen successively, will grow and flourish during the different months of the season, so that a rich, deep green is constantly maintained.

Seeds of the highest grade, carefully re-cleaned, and of the best quality in every respect are used in this mixture.

Es ist eine anerkannte Thatsache, daß ein schöner Rasen eine wirklich großartigere, anmuthigendere, und von Geschmack zeugende Wirkung um ein Wohnhaus her ausübt, als irgend etwas Anderes, was menschliche Kunst hervorzubringen im Stande ist.

Koss' „Fancy Lawn“-Grassamen besteht aus einer Mischung der feinsten, wiederholt gereinigten Grassämereien, welche zu haben sind, und erzeugt mit Sicherheit eine herrliche, niedrige, sichere, grüne, compacte Rasendecke, welche grün und frisch bleibt während unserer heißen, trockenen Sommermonate.
