FANCHER CREEK NURSERIES

FRESNO, CALIFORNIA

PRICE CATALOGUE

Season
1926-1927

WONDERFUL
POMEGRANATE

F. Sanger.

Information for Purchasers

PRICES: All prices quoted in this list are for stock at Fresno, Freight and Express Charges are to be paid by purchasers. Prices quoted in this list supersede all others.

QUANTITY RATES: Stocks mentioned in this list will be furnished as follows: 5 of a kind at the 10 rate, 50 of a kind at the 100 rate; 500 of a kind at the 1,000 rate.

ERRORS: Errors or complaints must be reported within ten days after receipt of goods.

PACKING CHARGES: We charge for same only to cover the cost of material used.

TERMS AND REMITTANCES: All of our stock^o is sold for cash, unless other arrangements are made. Remittances can be made to us by either Postoffice or Express Money Order, Registered Letter, Bank Draft, or Check. It often happens that our customers find it more convenient to send us a personal check on their local bank and such checks will be accepted for collection.

On all orders placed in advance we ask that a deposit of not less than 20% be forwarded with the order and we will then reserve the stock for shipment at any time designated by the customer.

ALL PRICES QUOTED IN THIS LIST SUBJECT TO CHANGE WITHOUT NOTICE

14 feet apart each way.....	222	60 feet apart each way.....	12

RULE—Square Method. Multiply the distance in feet between the trees by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560) will give the number of plants or trees to the acre.

All of our fruit trees are graded by caliper rather than by height. By doing this we are able to give our customers a more uniform grade of trees than by the old method of grading. Trees graded by caliper, when planted in orchard form and cut back, will be of uniform size and much more satisfactory to the planter. The following is the basis of sizes and caliper measurements for deciduous trees with the exception of Figs and Walnuts.

- 6 to 8 grade trees to caliper not less than $\frac{3}{4}$ inch.
- 4 to 6 grade trees to caliper not less than $\frac{1}{2}$ inch.
- 3 to 4 grade trees to caliper not less than $\frac{3}{8}$ inch.
- 2 to 3 grade trees to caliper not less than $\frac{1}{4}$ inch.

We accept all orders on condition that same shall be void should injury befall our stock from fire, frost, floods, drouth or any other cause which could not be prevented and over which we have no control.

"The Fancher Creek Nurseries will exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name, the Fancher Creek Nurseries shall be liable only for the sum paid for the stock which may prove untrue, and shall not be liable in any greater amount."

We accept all orders on condition that the same shall be void should injury befall our stock from fire, floods, frost drouth or any other cause which could not be prevented and over which we have no control.

We cannot hold ourselves responsible for any loss or injury to trees or plants after they have been packed and, delivered to the carriers.

We exercise great care to have all nursery stock true to name, nevertheless it is understood that should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stocks as shall prove untrue.

Strong, Sturdy Deciduous Fruit Trees, "Full O Pep"

The above are samples of our "rightly grown" deciduous fruit trees.

THEY ARE HEALTHY. Grown under the most favorable climatic conditions in soils particularly selected to produce trees with strong bodies and well branched root systems.

THEY ARE DEPENDABLE. Utmost care is used in the cutting of the buds and grafts by properly labeling them as they are cut and when used the budded or grafted stock are labeled so that when the stock is dug it can be relabeled as dug so that errors of mis labeling are very rare.

THEY ARE PRODUCTIVE. All of our buds and scions are cut by ourselves from the best record bearing orchards and vineyards so that our customers will not only receive the best stock that can be produced but as well secure trees that will produce heavy crops of fruit where the trees are planted in favorable climatic and soil conditions.

OUR STOCK IS PLANTED as thousands of planters have been supplied annually with Fancher Creek Nurseries home grown stock.

FRUIT TREE DEPARTMENT

THE RIPENING PERIOD. It should be borne in mind that the season for ripening covering the several fruits apply more especially to the San Joaquin Valley and are at best only approximate. In the Coastal region and the higher mountain valleys, the season quite naturally will be a few days later.

Prices

Single-rate prices are for less than five of a kind.

Ten-rate prices are for five or more and less than forty-nine of a kind.

Hundred-rate prices are for fifty or more of a kind.

Thousand-rate prices are for 300 or more of a kind.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

The following is the basis of sizes and caliper measurements for deciduous trees with the exception of Figs and Walnuts.

6 to 8 grade trees to caliper not less than $\frac{3}{4}$ inch.

4 to 6 grade trees to caliper not less than $\frac{1}{2}$ inch.

3 to 4 grade trees to caliper not less than $\frac{3}{8}$ inch.

2 to 3 grade trees to caliper not less than $\frac{1}{4}$ inch.

Wonderful (See Cut Front Cover)

The leading variety in the San Joaquin Valley, and the only one possessing commercial rank. Fruit extra large; round, flattened at the ends; skin pale green yellow suffused with pink and red; flesh a rich garnet color, abundant juice, of a delightful piquant flavor. On account of its gorgeous red flowers, bright glossy green foliage and the brilliantly colored fruits, the tree is admirably adapted for aligning streets, drive ways, for grouping, mass effects, and borders. Season, October.

DIZMAR GRAPES

Sixteen months old Dizmar graft on a 4 year old Thompson Seedless Vine. This crop sold at \$75.00 per ton at vineyard.

A leading shipping, table, raisin and market variety, because of its early ripening qualities. Berry medium to large, somewhat flattened at the ends. Skin a beautiful golden amber, semi-transparent, flesh firm, crisp and tender, with a sweet and pleasant flavor. Vine a strong grower with dark green, glossy foliage. As a raisin grape it is in a class by itself. It should be cane pruned and trellised the same as Thompson Seedless or Sultana. Season July.

REBIER GRAPE

The grape that set a new price record this past season. Express shipments to New York averaged \$4.16 per lug.

It promises to be one of the best early black grapes for shipping and table use. It is sometimes used as a juice variety. Early August.
