Information for Purchasers

PRICES: All prices quoted in this list are for stock at Fresno, Freight and Express Charges are to be paid by purchasers. Prices quoted in this list supersede all others.

QUANTITY RATES: Stocks mentioned in this list will be furnished as follows: 5 of a kind at the 10 rate, 50 of a kind at the 100 rate; 500 of a kind at the 1,000 rate.

ERRORS: Errors or complaints must be reported within ten days after receipt of goods.

PACKING CHARGES: We charge for same only to cover the cost of material used.

TERMS AND REMITTANCES: All of our stock is sold for cash, unless other arrangements are made. Remittances can be made to us by either Postoffice or Express Money Order, Registered Letter, Bank Draft, or Check. It often happens that our customers find it more convenient to send us a personal check on their local bank and such checks will be accepted for collection.

On all orders placed in advance we ask that a deposit of not less than 20% be forwarded with the order and we will then reserve the stock for shipment at any time designated by the customer.

NUMBER OF TREES OR PLANTS TO AN ACRE

		SQUARE METHOD	
		No.	No.
		Plants	Plants
9 feet apart each way.....	537	22 feet apart each way.....	90
10 feet apart each way.....	455	24 feet apart each way.....	75
12 feet apart each way.....	502	25 feet apart each way.....	69
14 feet apart each way.....	222	30 feet apart each way.....	48
15 feet apart each way.....	195	35 feet apart each way.....	35
16 feet apart each way.....	170	40 feet apart each way.....	27
18 feet apart each way.....	154	50 feet apart each way.....	18
20 feet apart each way.....	109	60 feet apart each way.....	12

Rule—Square Method. Multiply the distance in feet between the trees by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560) will give the number of plants or trees to the acre.

All of our fruit trees are graded by caliper rather than by height. By doing this we are able to give our customers a more uniform grade of trees than by the old method of grading. Trees graded by caliper, when planted in orchard form and cut back, will be of uniform size and much more satisfactory to the planter. The following is the basis of sizes and caliper measurements for deciduous trees with the exception of Figs and Walnuts.

- 6 to 8 grade trees to caliper not less than $\frac{3}{4}$ inch.
- 4 to 6 grade trees to caliper not less than $\frac{1}{2}$ inch.
- 5 to 4 grade trees to caliper not less than $\frac{3}{8}$ inch.
- 2 to 5 grade trees to caliper not less than $\frac{1}{4}$ inch.

We accept all orders on condition that same shall be void should injury befall our stock from fire, frost, floods, drouth or any other cause which could not be prevented and over which we have no control.

"The Fancher Creek Nurseries will exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name, the Fancher Creek Nurseries shall be liable only for the sum paid for the stock which may prove untrue, and shall not be liable in any greater amount."

FRUIT TREE DEPARTMENT

THE RIPENING PERIOD. It should be borne in mind that the season for ripening covering the several fruits apply more especially to the San Joaquin Valley and are at best only approximate. In the Coastal region and the higher mountain valleys, the season quite naturally will be a few days later.

PRICES

Single-rate prices are for less than five of a kind.

Ten-rate prices are for five or more and less than forty-nine of a kind.

Hundred-rate prices are for fifty or more of a kind.

Thousand-rate prices are for 300 or more of a kind.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

The following is the basis of sizes and caliper measurements for deciduous trees with the exception of Figs and Walnuts.

6 to 8 grade trees to caliper not less than $\frac{3}{4}$ inch.

4 to 6 grade trees to caliper not less than $\frac{1}{2}$ inch.

3 to 4 grade trees to caliper not less than $\frac{3}{8}$ inch.

2 to 3 grade trees to caliper not less than $\frac{1}{4}$ inch.

DELICIOUS APPLE

Popular in the mountains and coastal regions

ARKANSAS BLACK

Valuable market variety; maroon, nearly black. Tree vigorous and prolific bearer. December to April.

BEN DAVIS

A large, handsome, striped apple of good quality and a late keeper. October and November.

BLACK BEN

(Gano)

Very handsome in color. Darker than Ben Davis, and much superior in quality. The tree is similar to Ben Davis in habit of growth but is much more resistant to drouth. November.

DELICIOUS

No apple of late introduction has been more extensively planted. Fruit long and tapering, visibly ribbed; skin yellow overspread with dark red, bright crimson on the sunny side; flesh white, fine grained, sweet acid with a pleasant aroma. Does well in mountain and foothill regions of the State. Season, November.

ESOPUS SPITZENBURG

Medium in size, flesh yellow, firm, crisp, juicy, aromatic and sprightly subacid. Tree open and spreading. Fruit of fine flavor, attractive. November.

EARLY HARVEST

Medium size, pale yellow; tender, mild, fine flavor; erect grower and good bearer. July.

GRAVENSTEIN

A most popular market and shipping fruit. It is of uniform size and irregular shape; skin a greenish yellow, striped with light and dark red shadings; flesh yellow, of good texture, crisp, juicy and tender. August.

JONATHAN

The fruit is medium size, roundish and oval, skin bright red, on the sunny side quite dark and in some specimens almost black. Flesh a delicate cream with a faint suggestion of red; flavor excellent. October.

RED JUNE

A beautiful red dessert apple of uniform size and shape. Medium size; flesh white tender; subacid. July.

RED ASTRACHAN

A July apple, fine for home use and local market. Fair size slightly flat; skin thin, tender, a mild deep crimson stripes; flesh white with faint greenish tinge, tender, subacid, juicy and of good flavor.

ROME BEAUTY

Medium in size and somewhat oblong in shape; skin rather tough but smooth, splashed and mottled with brilliant red over a base with green, fine grained, juicy, with a subacid flavor. November.

STAYMAN WINESAP

The fruit is large and round; skin dull carmine, smooth and thick; flesh greenish yellow, firm and quite acid in flavor. Tree vigorous, spreading and open December.

WHITE ASTRACHAN

Large, almost round, slightly flattened at either end skin deep yellow suffused with pink and red; flesh white and decidedly acid. One of the best of the early varieties. July.

WHITE WINTER PEARMAIN

Medium to large in size and oblong in shape; skin pale yellow with a brilliant blush on sunny side, surface covered with russet dots; flesh yellow, fine grained, tender and juicy. November.

WINESAP

Medium size; oblong; skin smooth, dark red; flesh yellow, firm, crisp, with a rich high flavor. November.

WINTER BANANA

Fruit large, almost round, somewhat conical and flattened at base; skin thick, tough, yellow in color with a dark pink cheek on sunny side; flesh crisp and tender, subacid in flavor and of good quality. October.

YELLOW BELLFLOWER

The fruit is large conical and ribbed which is intensified toward the blossom end; skin yellow suffused with a tinge of green, pink blush on sunny side; flesh nearly white, firm, tender and juicy. Season October.

YELLOW NEWTOWN PIPPIN

The fruit is irregular, oblate and somewhat angular; skin rather tough, overspread with russet dots. Yellow in color shading to pink; flesh cream white, firm, tender and slightly acid. December.

HYSLOP

Fruit medium size and borne in clusters; skin deep crimson overspread with a thick blue bloom; flesh yellow tinged with red, firm, fine, astringent, subacid, good. Season, November.

RED SIBERIAN

Fine for cooking and preserving. Fruit rather small round and somewhat flat at base; skin bright red on a yellow field. Tree vigorous, long lived and a good bearer. August.

TRANSCENDENT

Season September. Fruit quite large and flattened at the end; skin golden yellow with a rich red cheek; flesh crisp, tender and subacid. The best large crab apple.

WHITNEY

Fruit extra large, uniform in shape, round conic or ovate; skin a bright green with yellow tinge striped red; flesh yellow, crisp, firm, juicy and of excellent flavor. Season August.

BARTLETT PEAR

California's leading variety for all purposes

BARTLETT

Season, August; quality canning, drying, market and shipping. Fruit large and regular in shape; oblong-obtuse pyra-form, tapering slightly towards the apex; skin bright yellow with rose blush on sunny side flesh fine grained, white, buttery, juicy.

BEURRE BOSC

The fruit is uniform in size, acute egg shaped with long tapering neck; skin brownish yellow; flesh yellowish white, rich, juicy, very aromatic, tender and melting. Season September.

BEURRE CLAIRGEAU

A splendid pear ripening in September. Fruit large, especially at the blossom end and tapering to the stem; skin shaded yellow, orange and red; flesh yellowish, juicy, buttery, somewhat granular. Has a rich vinous flavor.

BEURRE D' ANJOU

Fruit is large, obtuse pyraform; skin is a greenish color, partially covered with russet and often shaded with a dull crimson. The flesh is white, melting, juicy and of a vinous flavor. September.

BEURRE HARDY

The fruit is regular and of medium size with tapering neck; skin yellow with pink flush on sunny side; flesh white, somewhat granular, juicy, tender, sweet with a pleasant vinous flavor. September.

DANA'S HOVEY

Sometimes called Summer Seckel. Skin greenish yellow, netted with russet. Flesh yellowish, juicy with a rich aromatic flavor. Heavy bearer. September

DOYENNE DU COMICE

The fruit is large, roundish, tapering towards the stem end; skin greenish-yellow shaded crimson on sunny side; flesh rich buttery, melting and aromatic. October.

EASTER BEURRE

Large and roundish in shape; skin yellowish green covered with russet dots; flesh white, juicy, fine grained with a sprightly sweet flavor. October.

FORELLE OR TROUT

Large, oblong, pyraform, yellow marked with red and covered with large gray dots; flesh rich, buttery, fine grained and melting. September and October.

GLOU MORCEAU

It is egg-shaped but irregular and somewhat ribbed, skin russety of a pale greenish-yellow with numerous small dots; flesh tinged yellow, tender, buttery, and aromatic. Season November.

HOWELL

Medium; yellow with minute russet dots. A very prolific bearer. August.

LAWSON OR COMET

Large; bright crimson on yellow ground. Flesh of fine texture, melting and highly aromatic. A splendid Pear. June.

MADELEINE

Medium size, pale yellow, dotted with brown dots. Flesh melting and juicy. First early Pear. June.

P. BARRY

Large, yellow, juicy, fine grained, excellent keeper Tree vigorous grower and heavy bearer. December.

SECKEL

Known as Summer Seckel. Season August. For local and home use. Fruit is Pear shaped, symetrical and uniform in size ,skin smooth, yellowish brown, suffused with russet red; flesh creamy white, melting buttery, spicy with a honey-like flavor.

WINTER NELIS

It is medium in size and of a roundish formation; skin decidedly brown dotted with gray russet; flesh cream colored, fine grained, juicy and of a rich aromatic flavor. Produces enormous crops when pollenized with Easter Beurre. November.

We have marked the Hearts or Bigarreus "H" and the Dukes or Morellos "D".

BING CHERRY

Recognized as our leading market and distant shipping cherry.

BING "H"

Season, middle June. Fruit of large size, firm, heart-shaped and regular; skin smooth, glossy maroon verging to black in color; flesh sweet, meaty and of good flavor.

BLACK TARTARIAN "H"

Fruit very large, heart shaped and uniform; skin an intense black; flesh reddish purple in color, sweetly aromatic, fine grained and melting. Late May.

CENTENNIAL "H"

Season May-June. Fruit large; skin amber-yellow speckled and splashed crimson: flesh white, clear juice, meaty, crackling and sprightly sweet.

CHAPMAN "H"

The fruit is medium in size and of heart formation; skin purplish black and thin; flesh deep pink with dark colored juice, meaty, tender, melting, May.

EARLY RICHMOND "D"

Ripens in May. Fruit medium size; skin dark red overspread with russet dots; flesh light yellow and pink tinged, juicy, tender and acidulous.

ENGLISH MORELLO "D"

Fruit round-cordate, uniform and solid; skin dark red to black; flesh red with dark juice, tender, melting and tart. July.

GOV. WOOD "H"

Season early June. Fruit large, good shape; skin bright pink yellow shaded; flesh quite tender, juicy, sweet and acidulous.

LAMBERT "H"

Its large size, rich, glossy, deep red color, firm flesh, unsurpassed flavor makes it one of the leading market varieties. Middle of July.

LEWELLING "H"

Black Oregon, Black Republican. Fruit large; skin purplish black, netted with russet dots; flesh firm, yellowish white tinged red, tender, sprightly. July.

MAY DUKE "D"

Season May. Fruit heart shaped; skin pink changing to red at maturity. Flesh dark red with pink colored juice, tender, melting and delightfully subacid.

NAPOLEON BIGARREAU "H"

Known as Royal Ann. Ripens in late June. Fruit rather long and heart-shaped; skin pale yellow to deep amber suffused with red and dotted; flesh yellow, clear juice, crisp and sweet.

GOWER

Fruit large and round; skin yellowish green mottled red; flesh creamy white tinged with green, reddish pink at pit, juicy, firm, good flavor. Early July.

HUMBOLDT

August. Fruit very large; skin bright orange-yellow mottled and streaked with crimson on sunny side; flesh orange, very tender and juicy.

NEW WHITE

Fruit quite large and nearly round; skin greenish-white with an occasional touch of red; flesh white, tender, juicy with a rich vinous flavor. Early July.

STANWICK

Season August. Fruit large, round-oval, heart-shaped at base; pit rather large; skin pale green, purplish red or violet on sunny side; flesh white, tender, juicy, aromatic and delicious. One of the best for drying.

VICTORIA

The fruit is medium large and roundish oval; small pit; skin greenish yellow, crimson on the sunny side; flesh medium firm, sugary, flavor of the best. Season August.

ADMIRAL DEWEY

Large and handsome; the first early yellow meated peach to ripen; a good market variety. Middle of June.

ALEXANDER

Season June. Fruit large, round and sides equal; skin greenish white with deep maroon shadings; separated readily from the pulp; flesh greenish white, juicy, melting and of a piquant flavor.

BILYEU LATE

A late peach ripening in October. Fruit round, regular and large; pit rather large and free; skin greenish-white with red cheek; flesh white, firm, juicy and sweet.

BRIGGS RED MAY

Season, middle of June. Fruit round or round-oblong, large; pit small and nearly free; skin pale green with bright red cheek; flesh white, melting, juicy, sweet.

EARLY CRAWFORD

A splendid variety for home use and shipping; Fruit extra large, pit medium small and free; skin deep yellow with rich red cheek; flesh deep yellow tinged with red near the pit, firm, tender, juicy. Season July.

ELBERTA

The well known shipping, canning and drying variety. Fruit round-oblong or cordate, compressed with a slight bulge on one side; pit free; skin greenish to orange yellow overspread with red; flesh yellow stained red near the pit, sweet to subacid and sprightly. July.

FOSTER

Season, middle of June. Fruit extra large, pit small and free; skin clear yellow with dark red cheek; flesh deep yellow, bright pink near the pit, firm, tender, sweet and spicy.

HEATH CLING

The favorite home canning peach. Fruit very large skin creamy-white, thin, adhering to pulp; flesh white, juicy, firm, tender, sweet and of good quality. Late September.

J. H. HALE

One of the best. Fruit very large, regular, round; pit free; skin clear yellow overspread with mottlings and splashes of carmine; flesh yellow, red at the pit, fine grained, sprightly, firm and sweet. Season July.

LATE CRAWFORD

Very large; yellow with red cheek; flavor excellent; dries well. Early August.

**LEVY LATE OR
HENRIETTA CLING**

Known as Salway Cling. Fruit large, round, cordate; pit clinging, oval and plump; skin golden yellow with splashes of dull red; flesh yellow, meaty, acidulous. Middle of September.

LOVELL

The popular canning and drying peach. Fruit round and regular in shape and size; pit small; flesh yellow to the pit, heavy and of good flavor. August.

MAYFLOWER

A fine shipping variety. Fruit round and medium to large; skin creamy-white with red blush, mottled and splashed; flesh greenish-white suffused with red near the skin, juicy, tender and subacid. Season, May.

McKEVITT CLING

Said to be superior to Heath Cling. Skin creamy-white with delicate blush on sunny side; flesh firm, rich and sugary. Late August.

PALORA CLING PEACH

One of the best midsummer canning peaches

MUIR

Fine for drying because of density. Fruit large; pit small and free; skin clear yellow with little or no blush; flesh yellow faintly tinged at the pit, tender, sweet and mild. Late July.

PALORA CLING

A midsummer variety ripening between Tuscan and Phillips Cling. Fruit large and round; pit round and small; skin a deep, solid, golden yellow; flesh clear yellow to the pit, firm good grain and fine flavor. Season late August.

PEAK'S CLING

Ripens between Tuscan and Phillips. Fruit round-oval, large; pit very small; skin a golden yellow slightly tinged with red on sunny side; flesh clear yellow to the pit, fine grained and of excellent flavor. Late August.

PHILLIPS' CLING

A leading canning variety. Fruit round-oblong and of uniform size, pit quite large; skin pronounced yellow with bright red tinge on sunny side, thin and adherent; flesh yellow to the pit, firm, fine grained and of excellent flavor. Season middle of September.

RED BIRD CLING

EARLINESS, EXCEPTIONALLY HIGH COLORING AND GOOD QUALITY MAKE IT VERY VALUABLE. SKIN CREAMY-WHITE, OVERSPREAD WITH A BRIGHT, GLOWING RED; SIZE EXTRA LARGE FOR AN EARLY PEACH. RED BIRD CLING IS THE FIRST EXTRA EARLY GOOD SHIPPING PEACH AND THE MAN WHO HAS THESE FINE, HANDSOME, SHOWY, EARLY PEACHES WILL HAVE THE MARKET HUNTING HIM.

SALWAY

Fruit round-cordate, bulged near the apex; pit oval plump and free; skin greenish yellow, brownish red blush, splashed with dark red, thin, adheres to the pulp; flesh clear yellow, tinged with red near the pit, tender, sweet and good quality. Late September.

SELLERS' ORANGE CLING

The popular Orange Cling variety. Fruit large to very large, round-oblong, somewhat flattened; pit medium size; skin a rich gold color, with a faint tinge of red on the sunny side; flesh deep yellow clear to the pit, firm, juicy, sweet and rich. Early August.

STRAWBERRY FREE

Season, early July. Fruit of good size; pit oval and free; skin pale greenish yellow marbled with dark red; flesh white, melting, juicy and refreshing. A fine local market variety.

STRAWBERRY CLING

The best white cling for home use. Fruit large and oval; skin yellowish white splashed with red and somewhat downy; flesh creamy turning to pink at the pit and of fine flavor. September.

TUSCAN CLING

Known as Tuskena. Yellow Tuscan. Season late July; quality canning. Fruit round, large and uniform; pit medium size; skin yellow with a dark red cheek. Flesh yellow to the pit, solid, sweet and vinous.

YELLOW ST. JOHN

One of the best of the early peaches. Fruit large in size; roundish, orange yellow color with deep red cheek. Juicy, sweet and a perfect freestone. Late June.

PLUMS

BAVAY'S GREEN GAGE

Known as Reine Claude de Bavay. Fruit medium in size, round oval, halves equal; skin with light bloom, straw color faintly spread and splashed; flesh golden yellow, juicy, sweet, good. August.

BEAUTY

Valuable for market and shipping. Heart-shaped; skin crimson sprinkled with white dots; flesh amber streaked with scarlet. Excellent flavor. June. Self fertile.

BURBANK

Fruit large, egg shaped; skin bright red slightly yellow mottled; flesh deep yellow with an agreeable flavor. Late June. Requires thinning in a commercial orchard.

CLIMAX

A very highly flavored plum ripening the middle of June. Fruit is heart-shaped and uniform in size; skin deep vermilion red in color; flesh yellow, firm, fragrant.

DAMSON

A late August variety desirable for home canning and local market. Fruit oval and medium to large; skin thin, purplish-black overspread with thick bloom.

Flesh greenish yellow juicy, tender, firm and agreeably tart.

GAVIOTA PLUM

Fruit large, pit small; tree a good bearer

FORMOSA

Requires pollination with either Wickson or Santa Rosa. Season July. Fruit is large, heart-shaped; skin smooth, light cherry red in color; flesh pale yellow, firm, sweet and of a delicious apricot flavor.

GAVIOTA

Another Burbank introduction of real merit. Fruit large and oval, pit very small; skin dark red on yellow base; flesh firm, yellow, sweet, fragrant, aromatic. Season July. Should be pollinated with Beauty and Wickson.

JEFFERSON

A truly canning plum; fruit large, round oval, freestone; skin thin greenish yellow with red blush on sunny side; flesh orange yellow juicy, firm and sweet. Season, August-September.

KELSEY JAPAN

A fine shipping and market variety ripening in September. Fruit large, cordate, conical and uniform; skin thick, green turning to yellow blotched with red when fully ripe; flesh delicate yellow, firm, juicy and sweet.

PRESIDENT

Season, September. Quality market and shipper. Fruit uniform, large and egg-shaped; skin purple with a deep bloom; flesh yellow and of fine texture.

SANTA ROSA

This plum remarkably fine, even in size, is smooth and clear of defects. Fruit large, conical, uniform in type; skin purplish crimson in color with a pale yellow flesh yellow, mottled and streaked with crimson, juicy and a decided plum flavor. Middle of June. Self-pollenizer.

SATSUMA

Blood Plum. Fruit large and almost round in shape, pit small; skin a deep dark red; flesh red in color, firm, juicy and of fine flavor. July-August.

SIMON

Prunus Simoni. One of the best of the foreign plums. Fruit large, in shape, resembles a tomato; skin a rich red cinnabar-red color; flesh yellow, firm, sweet, with a marked pineapple flavor. July.

TRAGEDY

Probably classified as a prune on account of its shape. It is a plum in ever sense of the word; skin dark purple; flesh cream shaded yellow, firm, sweet and juicy. Early July.

VESUVIUS

Purple Leaved. Prized for its beautiful purple foliage. It is superior to all other varieties of purple leaved plums. The leaves are larger and a more decidedly pronounced crimson color. The fruit is small and of no commercial value.

WICKSON

An old favorite; a good keeper and shipper. Fruit symmetrical, large, and heart-shaped; skin a cherry-red to a deep scarlet; flesh amber, firm, sugary, good. August. Should be pollenized with Beauty or Santa Rosa.

YELLOW EGG

Well and favorably known for home use and canning. Fruit long oval, of good size, skin a deep golden yellow covered with white bloom; flesh deep yellow, firm, juicy, good flavor but rather acid.

Burton Prunes 5c per tree higher.				

BURTON

The fruit is in type like the French Prune, but in size is the largest and best drying prune yet produced. Skin is a rich violet-purple covered with light blue bloom; flesh rich golden yellow, fine grained, tender, aromatic and sprightly. The fruit averages 20-30 to the pound. August-September.

DOUBLE X FRENCH PRUNE

Originated at Saratoga, Santa Clara Co. Fruit large size; skin a deep purple; flesh sweet and sugary. Pit small. Dries to the larger sizes. August.

FRENCH IMPROVED

Averages 30-40 to the pound. Fruit identical in shape to the French Prune; skin of good texture, dark blue; flesh golden yellow, firm, sweet and fine grained. High sugar content. August.

IMPERIAL EPINEUSE

Season August-September. Fruit large and regular in form without any neck. Skin a purplish red color; flesh greenish yellow with a high sugar content.

HUNGARIAN

Known as Ponds Seedling. Gross Prune d'Agen. August-September. Fruit large, ovate; skin thick, reddish violet with numerous brown dots, juicy and sweet.

STRAWBERRIES AND PRUNES

Showing the economy of interplanting while the trees are young.

IMPERIAL EPINEUSE

When eaten fresh has a most delicious flavor. Fruit is large and regular in form with no neck; skin a purplish red; flesh greenish yellow and with a high sugar content. August-September.

ROBE DE SARGENT

Valuable for both drying and preserving. Fruit medium to large and somewhat oval; skin deep purple with thick blue bloom; flesh greenish yellow, sweet and good. August-September.

SUGAR

Extremely early, very large, tender and sugary. Skin dark purple covered with thick white bloom. A heavy bearer. Early August.

EUREKA

Nut large and uniform, elongated; shell smooth, medium thick, well sealed. Kernel cream color, cracks easily and of good flavor.

FRANQUETTE

Nut large, elongated and tightly sealed. Shell rather thick and smooth; kernel plump, white, sweet and of rich nutty flavor. A good grower and bearer.

PAYNE'S SEEDLING

A new variety and does exceptionally well in the Sacramento and San Joaquin Valleys. The tree is a vigorous grower and comes into bearing at an early age. It produces good crops of very fine nuts.

POMELO-GRAPE FRUIT

MARSH SEEDLESS

The best variety grown. Fruit medium to large and practically seedless; skin good texture; flesh juicy, melting, free from rag and has a delightful aromatic flavor. Season, January.

ORANGES

SATSUMA

Known as Unshiu and Oonshiu. Deep yellow; flesh very tender, juicy. October to December.

THOMPSON IMPROVED NAVEL

Medium size; very smooth and thin; pulp juicy. Earlier than Washington Navel.

VALENCIA LATE

Fruit oblong-roundish, medium and regular in size; skin pale yellow, fine grained; flesh juicy, crisp and amber in color, aromatic and sweet. April-September.

WASHINGTON NAVEL

Fruit medium to large, solid and heavy; skin of fine texture and substance, melting, sprightly sweet and agreeable, practically seedless with no rag. November to March.

LEMONS**EUREKA**

Fruit medium to large, uniform and regular; skin smooth, fine grained and good substance. Flesh abundant, very juicy, little pulp and decidedly acid.

NEW SEEDLESS

The fruit is shaped like Eureka and twice as large, with an abundance of juice. For sturdiness of growth there are very few lemons to compare with it, both tree and fruit being very resistant to cold.

TROPICAL FRUITS**OLIVES**

ASCOLANO

The "White Olive of Ascoli". Fine for pickling. Fruit large to very large; skin light green; flesh tender. October.

MANZANILLO

Fruit nearly round, large with a round-oval pit; skin a purplish black, covered with specks of a lighter shade; flesh solid, good grain and oil content. October.

MISSION

Tree valuable for roadside or border planting. Fruit medium to large and oval in shape; skin deep purple veering to black; flesh abundant, firm and good oil content. October.

SEVILLANO

"Queen Olive of Spain". Fruit extra large, skin blueish-black; flesh solid, good grain and flavor. October.

FIGS

(Purchasers should order Capri Fig trees with all orders of Calimyrna trees.)

CALIMYRNA

Fruit large to very large, turbinate, pyraform, very short, stalk short, ribs distinct, orifice large and of a pale ochre color and widely opened when the fig is matured; skin lemon-yellow; flesh reddish amber, turning to dark amber just before falling. Flavor and quality unsurpassed.

MISSION

The best black fig. Fruit medium to large, long neck and short stalk, ribbed; skin rough, mahogany violet; flesh good grain, dull red or brownish amber, very sweet and good flavor.

KADOTA

The canning and preserving fig of California. Fruit of medium size and good shape; skin thin and light green in color; flesh white tinged with pink and of good flavor.

CALIMYRNA FIG

The genuine fig of commerce; note abundance of pulp

WILD OR CAPRI FIGS**CAPRI NO. 1**

Particularly valuable on account of producing all the crops necessary for successfully carrying through all the generations of the Blastophaga. A rapid grower and heavy producer of all crops.

CAPRI NO. 3

Figs of the Profichi crop very large, heavily ribbed and developing a larger number of galls with insects than either of the two other varieties. Leaves small and serrate.

CAPRI STANFORD

This fig is large and ripens about the same time as No. 3. It caprifies well and always carries a good over-winter crop of the Mamme figs.

MISCELLANEOUS FRUITS**PERSIMMONS**

	Each Rate	10 Rate	100 Rate
4 to 6 grade.....	\$ 1.75		\$1.50
3 to 4 grade.....	1.50		1.25

JAPANESE PERSIMMONS

It is conceded by all that this type of the Persimmons is best of all. The trees are quite hardy and fruit freely in all sections of the State and also in the Southern States as well. The trees are grafted.

POMEGRANATES

	Each Rate	10 Rate	100 Rate	1000 Rate

WONDERFUL

Fruit extra large, round, flattened at the ends; skin pale green yellow suffused with pink and red; flesh a rich garnet color, abundant juice and of a delightful piquant flavor. On account of its gorgeous red flowers, bright glossy green foliage and the brilliant colored fruits, the tree is admirable for aligning streets, drive-ways and for grouping, mass effects and borders. Season October.

BLACK CORNICHON

Sometimes called Red Cornichon. Desirable for its shipping qualities. Berries long, bourne in long, loose bunches; skin thick, dark and spotted. Season, October

BLACK HAMBURG

Berries large, round-oval; skin rather thick, dark purple becoming black when fully ripe; flesh firm, very juicy, sweet and vinous. Late September.

EMPEROR

The best red grape. Berry long, oblong and large, bourne in heavy bunches; skin deep rose color covered with thick bloom; flesh thick and good flavor. October.

FLAME TOKAY

A good shipper. Berries large and oblong, bourne in immense bunches; skin pale red covered with lilac bloom. Flesh firm, crackling, abundant and good vinous flavor. September.

FRESNO BEAUTY

Season October. Berry as large as Damson plums set on a loose cluster; skin thin, dark, covered with bloom; flesh firm and of a pleasant vinous flavor.

GROS COLMAN

Bunches large thick and shouldered. Berries large round and skin tough; dark purple or black. October.

MALAGA

The popular white shipping variety. Berry of good size, loose clusters; skin thin, tender, crackling and good flavor. August.

RED MALAGA

Season September. Berry large, conical, oval on long loose clusters; skin a sparkling red; flesh firm, crisp, crackling and delicious flavor. September.

ROSE OF PERU

The berries are large, round, bourne on shouldered clusters; skin brownish black with a thick bloom; flesh dark juicy and sweet. September.

SPECIAL VARIETIES

	Each	10	100	1000
	Rate	Rate	Rate	Rate
Standard No. 1.....	\$.25	\$.15	\$.10	\$.06½

DIZMAR

The golden grape. Berry medium to large; somewhat flattened at the ends; skin a rich yellow, semi-transparent; flesh firm, craps, tender with a sweet but pleasant flavor. A good bearer if properly long pruned.

OLIVETTE BLANCHE

Lady finger. Berries are long or oblong tapering to a point on large conical bunches; skin thick, yellowish white; flesh firm, amber in color, juice, sweet and crackling. Season, September.

RIBIER

Berries extra large carried on medium sized bunches. Their intense blue-black color gives the appearance of being moulded in wax. Vine an enormous producer, should be pruned to spurs or bilateral cordon. Middle August.

JUICE VARIETIES

ALICANTE BOUCHET

Our most popular juice grape; berry medium round bourne in compact bunches; skin black and thick; flesh thick; flesh red, high in sugar, tart. Season, September.

RIBIER GRAPE

It promises to be one of the best early black grapes for shipping and table use. It is sometimes used as a juice variety. Early August

BLACK MALVOISE

Berries medium size and oblong; skin reddish black; flesh firm, juicy and sweet. Desirable as a dessert fruit. August.

CARIGNAN

The berries are large and round; skin a deep blue-black and tough; flesh amber, very juicy and sweet. September.

MISSION

A table and juice grape. Berry medium size and round; skin purple black; flesh crackling, sweet and delicious. September.

ZINFANDEL

Berry round bourne in compact clusters; skin dark purple covered with a heavy bloom; flesh abundant and of good vinous flavor. August.

MUSCAT

The popular Raisin Grape. Berries large slightly oval, produced in large clusters; skin pale amber with thin white bloom; flesh firm with a very distinctive aroma and pleasing flavor. Season September.

SULTANA

The bunches are cylindrical, berries small seedless, skin thin, greenish yellow, tart. August-September.

THOMPSON SEEDLESS

The popular Seedless Raisin. Berry oval and seedless bourne on long clusters; skin greenish-yellow; flesh abundant and mildly flavored. Should be cane pruned. August.

ZANTE CURRANT

Bunches medium, berries very small, seedless. Vine a good grower and fine producer. August.

ARAMON X RUPESTRIS GANZIN NO. 1

Thrives well on light and heavy compact soils and grows well on soil containing a large percentage of lime. It is better adapted to moist than to dry soils.

RIPARIA GLORIE DE MONTPELLIER

It does well in California where conditions are favorable for its development. Should be planted on moist alluvial soil.

RUPESTRIS ST. GEORGE

Adapts itself to a wide range of soils. It has a facility of sending its roots down in search of moisture. Will thrive in soils with a moderate amount of lime.

MOURVEDRE X RUPESTRIS 1202

Particularly adapted to alluvial as well as compact soils underlaid with lime formations.

**RIPARIA X CORDIFOLIA
X RUPESTRIS 106-8**

This is a very desirable hybrid for dry soils having no substrata of lime.

THE BERRY FRUITS**CORY THORNLESS BLACKBERRY**

Fruit very large, sometimes 2 inches long; core small, skin tender, color glossy black; flesh sweet, delightfully acidulous, flavor piquant and suggestive of wild raspberry. Absolutely thornless.

Each	10	100
Rate	Rate	Rate
.25	.20	.12½

MAMMOTH BLACKBERRY

Supposed to be a cross between the wild blackberry of California and the Crandall Early. Deep red, enormously productive and exceedingly early.

ORNAMENTAL DEPARTMENT

JUST A WORD ABOUT OUR STOCK

Our trees and plants are propagated under the most favorable conditions for their best development. This can only be secured by planting them in the field and lath house insuring them to be thrifty bushy and vigorous. By using such stock immediate landscape effects can be obtained at a nominal price within the reach of all who wish to plant.
