OUR NOVELTIES AND STANDARD VARIETIES OF SPECIAL MERIT FOR 1896.

BEE T

Archias'

Improved

BLOOD

TURNIP.

Fine turnip form, very symmetrical in shape, and free from any fibrous roots. Flesh deep blood-red, very tender and sweet; grows uniformly to a good size. Early, and when sown late desirable for winter. Per pkt., 5c; oz., 10c; 1/4 lb., 20c; per lb., 60c.

Archias' Improved Superior Wax

Bush Bean.

A Decided Improvement on the common Black wax bush bean, the result of careful selection. The plants are of good size and uniform and vigorous growth; free from runners; yields remarkable quantities of bright waxy yellow pods of uniform size; stringless, excellent flavor and unusually early. Package, 10c.; pint, 20c.; quart, 30c.; peck, \$1.50; bu., \$5.50.

POLE BEANS.

Archias' Improved Kentucky Wonder.

Here we are! Just what you have been looking for! This we regard as far ahead of any other green pole Bean. In our trial grounds last summer it was fit for the table on August 1st, which was at least ten days earlier than any other green sort. It is enormously productive, the pods hanging in great clusters from top to bottom of pole. It is entirely stringless, and the pods are a silvery green color. The pods, though large, cook tender and melting. Per pkt., 10c; pt., 20c; qt., 35c.

LAZY WIFE'S POLE BEANS.

This new pole bean has become immensely popular throughout the entire country. We presume it derived its name, which seems to us rather discourteous, from its immense productiveness, making it very easy to gather a dish, and from the ease with which they are cooked. The pods of a medium dark green color, are produced in great abundance, and measure from 4 1/2 to 6 in. in length; they are broad, thick, very fleshy, and entirely stringless. The pods retain their rich, tender and stringless qualities until nearly ripe, and at all stages unsurpassed for snap shorts, being peculiarly luscious. Each pod contains from six to eight round, white beans, which make excellent winter shell beans. The plants stick well to the poles, and the vines are covered all summer with clusters of handsome pods. They have also yielded well planted among corn. Most highly recommended. Pkt. 10c; pt. 20c; qt. 35c.

Take the Wilmer Atkinson Farm Journal, 50 cents a year. It will be sent one year to any one ordering seeds or plants from this catalogue to the amount of \$1 or over. Be sure and say you want it.

PEIRCE, CITY, Mo.—Gentlemen: Enclosed please find remittance for \$2.50. Order was satisfactory. Note the low prices of tools in back of book.

THE COMING WAX BEAN.

**KEENEY'S RUSTLESS
GOLDEN WAX.**

CORRECT SHAPE AND
1/2 NATURAL SIZE.

CORRECT SHAPE AND
1/2 NATURAL SIZE.

A bush variety of remarkable vigor and freedom from rust. Sends out short tendrils on which pods are formed in addition to those near the central stalk of the plant. Pod yellow, of fine quality and entirely stringless. The originators call it the most productive bean they have ever grown, and think it is the Coming Wax Bean. Pkt., 10c; pt., 25c; qt., 45c.

NEW JAPANESE CLIMBING CUCUMBER.

Vines are extra strong, and foliage much more vigorous than other kinds, and being a climbing sort, can be grown on trellises, fences, etc., saving valuable space in small gardens. It is very prolific, from 40 to 60 cucumbers having been counted on single plants; fruit cylindrical, about 10 inches long, thick and of fine flavor. Pkt., 5c.; oz., 15c.; 1/4 lb., 40c.

Livingston's Evergreen Cucumber.

Livingston's Evergreen. This new cucumber is quite distinct from the Evergreen White Spine. It more nearly resembles Nichol's Medium Green, equally as smooth and handsome, but does not turn yellow quickly when exposed for sale, as does that otherwise excellent sort. It is early, of strong, vigorous growth withstanding drouth, and is very prolific, bearing abundantly until frost. It possesses every qualification of a perfect pickle sort, and the firm, crisp fruits are also excellent for slicing. Per pkt. 5c; oz. 10c; 1/4 lb. 25c; per lb. 75c.

Add 8 cents a pint and 15 cents a quart extra postage on Peas, Beans and Corn.

CABBAGE, Archias' New Extra Early.

Earliest Cabbage in the world. This new and very early cabbage while not as large as the Jersey Wakefield, is several days earlier, and for a first early variety cannot be excelled. It resembles the Etampes in character and appearance, having solid, compact heads of conical form of yellowish-green color; very dwarf and very uniform. Desirable as a quick forcing sort. Pkt. 5c; oz. 25c; 1/4 lb. 75c; 1 lb. 2.50.

Archias' Improved Large Late Flat Dutch Cabbage.

A superior strain of the Late Flat Dutch Cabbage, grown expressly for us. This variety will never fail to give entire satisfaction to the grower; its growth is uniform, producing heads of immense size and unusual solidity. Pkt., 5c; oz. 20c; 1/4 lb. 70c; 1 lb. \$2.50.

GOLDEN Self-Blanching Celery.

The ribs are perfectly solid, crisp, brittle and of delicious flavor, surpassed by no other variety, while it has the decided merit of being self-blanching to a remarkable degree. Pkt., 5c.; oz., 25c.; 1/4 lb. 75c; 1 lb. \$2.

The Most Profitable Celery Grown

DWARF GOLDEN HEART:—A distinct variety of sturdy dwarf habit. It is solid, and an excellent keeper, and of fine nutty flavor. When blanched, the heart, which is large and full, is of a light yellow, making it an exceedingly showy and desirable variety for either market or private use. Pkt., 5c.; oz., 20c.; 1/4 lb. 60c.; 1 lb. \$2.00.

Remember from good seeds only can good vegetables be obtained.

ARCHIAS' NEW ARKANSAS BEAUTY WATERMELON.

SOMETHING NEW.

Just What You Have
Been Looking For.

This wonderful new melon was introduced by us in 1894. It is entirely distinct from any other variety in color and vine, very handsome and attractive in appearance being evenly mottled over its entire surface with light and dark green, flesh bright red crystalline and melting, and of excellent rich flavor. The rind is thin and very tough, thus making it a good melon for shipping long distances, it is the best keeper by far, of any melon ever introduced, holding its fine, fresh appearance, both in rind and flesh when other melons have gone to decay.

It is of vigorous growth and unusually productive, yielding fine crops of large uniform size melons of attractive beauty, when all other varieties fail. It resists extreme drouth or wet weather. In 1893 it yielded 120 large melons on eight rods of upland without manure, some specimens weighing 42 pounds, this crop being without rain from the time they commenced to bloom until the melons were gathered. During the wet

season of 1895 it yielded excellent crops, some specimens weighing 43 pounds, when all other varieties were almost a complete failure. Under favorable conditions this melon often produces specimens of the enormous weight of 85 pounds and over. It is 10 days earlier than most large melons. Owing to its superior beauty, size, quality, toughness of rind and earliness over other melons it insures the grower, good prices handsome profits and ready sales. **A Money Maker.** Our stock of seed of this melon is limited. Price per pkt, 15c; oz. 30c; $\frac{1}{4}$ lb. \$1.00. Not more than a fourth of a pound in bulk or five pkts. sold to one customer, owing to limited supply and great demand we request customers to order early.

Parker Moon of Jasper County, Mo. says: No praise is too good for Archias Arkansas Beauty Watermelon. I planted the seed rather late in May 1895 and they grew rapidly, making vigorous looking vines, the leaves having a queer metallic hue. The vines set full of fine melons and produced an excellent crop remarkably early while owing to extreme wet weather my neighbors made almost a complete failure with other varieties. Some melons I raised weighed nearly 50 lbs and none were too small for market. My neighbors who ate of these melons pronounced them the finest they ever tasted. The thrift and queer appearance of my patch of Archias Arkansas Beauty, was the curiosity of all who saw it, surely all should plant it who wish fine melons, and sure crops wet or dry.

The praise given Archias Arkansas Beauty by the **Commissioner of Agriculture of Arkansas** places it in the lead of any other variety in every particular. We could give many testimonials of this melon from the best growers over a vast territory, but space forbids. In conclusion we would say that every market gardener, trucker and private family should not fail to grow ARCHIAS' ARKANSAS BEAUTY WATERMELON.

IMPROVED LONG DIXIE.

A decided improvement over the original Dixie. It is giving better satisfaction among shippers than the Kolb's Gem, being longer and larger; hence more desirable for shipping; loads well and presents a good appearance in the car or when exposed for sale. It is darker and more beautifully striped than the Kolb's Gem. While none surpass it for shipping, few, if any, equal it for the table, the flesh being very red, sweet and juicy, it is all that can be desired in quality, flavor, etc. We wish to call the shipper's attention to the fact that this melon will **HOLD**, after it is ripe for days, and still retain its excellent qualities. This is a decided advantage because the melons may be left to ripen on the vines, or may be detained while en route to market, as is often the case, and still bring the highest market prices when offered for sale, which is very satisfactory to both shipper and seller. Shippers who have had returns from

cars of over-ripe melons will fully appreciate this point. Long Dixies after being picked and laid in the sun ten days open, juicy and of excellent quality. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 65c; 3 lbs. \$1.50.

An early variety either for forcing or open ground. Large, solid heads, of a good, light green color, and is very slow to go to seed. The leaves are crisp and tender and of excellent flavor. The shape of the head resembles somewhat the "Hanson," but is more oblong. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25.

ASPARAGUS**PALMETTO.**

Introduced by John Nix, Esq., one of the largest growers in the south. He claims for it earliness, great yield, evenness of growth and superior quality. Oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 65c.

Take the **Wilmer Atkinson Farm Journal** 50cts a Year. It will be sent one year to any one ordering seeds or plants from this catalogue to the amount of \$1.00 or over. Be sure and say you want it.

Conover's Colossal—With exception of Palmetto the best variety grown; it has no equal in size, productiveness and quality. Oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c.

LIVINGSTON'S NEW "TIP TOP" NUTMEG.

Tip Top in Quality, in Appearance, in Productiveness,

The following is taken from the Originator:

The Tip Top Melon is so distinct in appearance that it attracts attention at first sight. Gardeners tell us that their customers soon learn to pick them out and will have no other. Our first claim for the **Tip Top** is that it stands at the very **Tip Top for quality**. The universal testimony of every one using the **Tip Top** is, that every fruit produced, whether big or little, early or late in the season, is a good one—sweet, juicy, finest flavor, firm, but not hard fleshed, eatable to the very outside coating. Again, in productiveness it is unexcelled, being a very strong and willing grower. In the past almost universally dry seasons they have done better than any standard sort in cultivation. Price pkt: 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00.

Archias' Tested Seeds are Money Growers for Market Gardeners, Farmers and Truckers. Use them once, use them always.

Mr. P. H. Shafer, Ocala, Fla., writes:—"I tried your Tip Top Melon last spring and found them first-class in every respect. Can't be beat."

Mr. Geo. Heacock, Alberton, Md., writes:—"The Tip Top Canteloupe is the best I ever ate or sold."

Mr. Ezra Heald, West Branch, Iowa, writes: "The Tip Top Muskmelon cannot be too highly praised,"

"Tip Top" sells when other sorts go begging.

Do not fail to include some of this melon in your order.

New Muskmelon—Shumway's Giant.

A new melon of monstrous size, averaging 20 lbs. each. It ripens early, flesh salmon color, never stringy, and of very fine flavor. It is quite distinct from other melons, the seed being more than twice as large. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c.

Mango Melon or Vegetable Peach Melon.

The fruit is about the size of a large peach, oval shaped, and of a bright orange yellow color, somewhat russeted. When it first ripens it is quite hard, and has very little flavor, but soon they become mellow and sweet, and have a rich flavor. For sweet pickles, pies, or preserving, they are superb. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00.

NOTE—All seeds are 5 cents per package except where noted.

Giant Prize Taker Onion.

American Grown Seed.

This new, handsome variety is a splendid type of the celebrated Spanish fancy onions which are annually imported into the United States from Spain and sold by confectioners and fruiterers in our large cities at from 25 to 50 cents each, and even higher. The onions grown here quite rival the imported ones in great beauty and enormous size, weighing in many cases from 3 to 3½ pounds each. Hundreds of growers agree in pronouncing the Prize Taker the largest, handsomest and most wonderful variety they have ever grown. The outside skin is of a rich yellow color, while the flesh is white, globe shape, and so sweet, mild and tender that they can be eaten like an apple. Pkt. 5c; oz. 20c.; ¼ lb, 65c; lb, \$2.25.

Archias' Improved Extra Early Red Onion.

Archias' Improved Extra Early Red Onion—A good, medium sized, flat variety, very uniform in shape; smaller than Red Wethersfield, but about two weeks earlier; abundant producer, good keeper; very desirable for early market, and good where seasons are short on account of its rapid growth, requiring short time to mature it; it also grows a handsome shaped set when planted very thick. Pkt. 5c; oz. 15c; ¼ lb, 40c. lb, \$1.50.

Two of Our Leading Specialties.

Yellow Globe Danvers,

and Large Red Wethersfield Onions.

There are no better strains of these popular main crop varieties than we offer. We sell them in lots of 25, 50 and 100 pounds to single growers. Those buying large quantities of Onion Seed will please write for lowest prices, stating varieties and quantities. We will not be undersold for fine stock. Our seeds being especially grown for us in the finest onion seed growing section in America. Plant them once, plant them always. Order now; don't delay.

PUMPKIN.

Archias Mammoth Southern Field.

Sure to yield good crop where most other varieties fail. It is always a **prize winner** at every fair and exhibition. The flesh is of a bright golden color, very fine grained, excellent quality, and notwithstand

ing its enormous size is one of the best pie and table pumpkins grown. A splendid keeper, valuable for feeding purposes. Our stock seed is saved from prize specimens. Don't fail to try it. Pkt. 5c; oz. 10c; ¼ lb, 20c; Lb., 60c.

To try it is to appreciate it.

Market Gardener's

Early Long

Scarlet Radish.

This is a radish with every quality essential to perfection. It is of unusual quick growth, brittle, tender and sweet, the earliest of all long varieties. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 80c.

Henry Schnell Glasgow, Mo., May 22, 1894: "I think the Pearl the best radish in the U. S. either for forcing or out door. They outsell all others, no sale for others when you once ship them Pearl Forcing."

U. C. Chicote, Butler, Ind., March 9, 1894: "I think your Pearl Forcing Radish the finest radish I ever saw."

M. H. Heiner, Coal Grove, O.: "Your Pearl Forcing Radish is the finest radish I ever sent to market. They take the lead and for earliness they cannot be beat. I would recommend them to all lovers of good radishes."

LIVINGSTON'S NEW PEARL FORCING RADISH.

PEARL FORCING—(The following is copied from the originator)—This new sort, introduced in the spring of 1891, is a cross between Wood's Early Frame and White Strasburg. A most distinguishing characteristic is its rich, waxy appearance. The shape is one long sought for, and the most advantageous for bunching, being what might be called half stump rooted. The color is pearl white, with the waxy appearance above described, and the texture is very firm and solid. It is about one week later than Wood's Early frame, but after they are ready for marketing they remain in eatable condition fully two weeks longer, before they show signs of going to seed, and do not become woody. Their long standing after being ready for market without running to seed or becoming woody or unfit for table use, more than makes up for wide planting. If grown properly they have a smaller top in forcing than when grown in the open field. All things considered, we pronounce it absolutely the very best general purpose White Market Radish in existence. Pkt. 5c; oz. 15c; ¼ lb, 40c; lb, \$1.25.

THE FAXON SQUASH

COPYRIGHT, 1893, BY M.B. FAXON CO.

Have cooked the Faxon Squash in ever shape; find it superior to anything I ever heard of. It can be cooked young or ripe; very rich, quick to cook, great yielder; certainly a wonderful vegetable, even better than represented. I would not do without the Faxon for any reasonable consideration.

W. H. H. SMITH, Carthage, Mo.

Don't Fail to add this Excellent and wonderful squash to your garden.

Flesh deep orange yellow, cavity very small and few seeds. When uncooked it appears to have a shell like any other squash, when cooked there is practically none, the shell or inedible part being only about as thick as a sheet of writing paper. It is sweet and very dry, and for squash pies it must be tried to be appreciated. A distinctive feature of this squash is that the ripe squashes vary in color, some of them being pale yellow with still paler yellow stripes in the hollows, while others are green mottled, and faintly striped with lighter green. It is of superior quality without regard to size or whether it is ripe or green, and may be used either as a summer or winter squash, specimens having been kept in perfect condition until April and May.

Per pkt, 5c; oz. 15c; ¼ lb. 50c; lb. \$1.50.

From two hills I raised 44 fine Faxon Squashes.

BUCKEYE STATE

TOMATO.

Livingston's Buck-eye State.

A mammoth growing tomato of smooth form and extra quality. The largest fruited variety yet introduced. It is unquestionably the heaviest cropper known. The tomatoes are borne in immense clusters of four to eight large fruits, and occasionally ten large fruits have been found in a single cluster. It matures with the **Livingston's Stone**. In solidity and meatiness, it has no equal, in desirable quality none surpass it. The color is much the same as **Livingston's Beauty**, but of a somewhat darker and richer shade, and this, together with its very large size and clear-cut outlines, make it very showy and striking when displayed for sale. Pkt, 5c; oz, 25c; 1-4 lb, 75c.

A WONDERFUL TOMATO.

The Mansfield Mammoth Tree Tomato.

After a thorough trial, we have found this Tomato to be the greatest wonder of the age. The fruit is of mammoth size, flesh very thick, excellent flavor, ripens well up to the stem, color dark red, tough skin. It bears well throughout the entire summer, holding its large size during severe drouth while all other varieties are dried up. It continues to bear its fruit with the greatest vigor until killed by the frost. Shape round and smooth, occasionally one is slightly ribbed. The yield of this Tomato is simply enormous, one bushel having been picked off a single plant in one picking. Well cultivated plants have attained the height of 10 feet and 9 feet across. The Mansfield should not be classed with other so-called Tree Tomatoes, of some houses, as it is the only genuine Tomato of the kind now existing. We have a fine stock of seeds, price 10c per pkt; 3 pkts, 25c; oz. 30c, by mail postpaid. Send in your orders early and secure the seed of this wonderful Tomato.

✓ **Turks Cap or Hackensack**—Of large size, delicious flavor round, ends flat, very productive. Try it. Oz. 10c; 1-4 lb. 20c; 1b. 60c.

✓ **Emerald Gem**—The most distinct and delicious melon we have ever tasted. It is about the size of the Netted Gem, but perfectly smooth and a very deep emerald green color, the flesh is light red or salmon color, very thick and juicy, it ripens early and is very productive. Oz. 10c; 1-4 lb. 20c; 1b. 60 cents.

✓ **Delmonico**—One of the very finest in flavor. A good variety for the home garden. Not a good shipper. Grown largely by the local gardeners of large cities for the hotels. Oz. 10c; 1-4 lb. 25c; 1b. 75c.

They have the reputation of being the best sold in this country, having given general satisfaction in producing crops of fine, large onions of superior flavor. They are not to be classed with the cheap inferior seed quoted in some catalogues under high colors. The price of our onion seeds will be found as low as good seed can possibly be sold for. Onions are a paying crop when good seed is procured and proper culture given. Onion seeds in any quantity sent by mail, postage free. If to be sent by express deduct at the rate of eight cents per pound from prices given.

A Big Cabbage Head.

Jasper County Democrat.

For raising big cabbages Mr. W. F. Brian, the market gardener, of this city, is certainly in the front ranks. There is on display at this office a cabbage head grown this year, of the Henderson Early Summer variety, that weighs 23 pounds, solid and as fine as ever grew. Mr. Brian purchases his seeds of L. E. Archias & Bro., the well known seed firm of this city. From a little inquiry the Democrat reporter finds that quite a number of L. E. Archias & Bro.'s customers have this year grown large cabbage, and heads weighing 20 pounds are not scarce. This certainly is a favorable year for cabbage, but the seed and variety has had a great deal to do with the excellent growth attained. Mr. Brian has a most prolific crop and says there is nothing like raising the best that can be had. He says while the weather has been very favorable the seed has had a great deal to do with the excellence of his crop. Who has a cabbage head that weighs more than 23 pounds?

MORAL.—Plant Archias' Tested Seeds and your success is certain.

Archias Selected Radish Seed.

Grown From Select Transplanted Roots.

Turnip==Pedigree Seeds.

For spring crop, sow as early as ground can be worked, and none but early varieties, soil must be rich and well plowed. For fall crop, plow the land during the summer several times to kill out the wild growth. From one to two pounds of seed are required to sow an acre. Our turnip seed have always given the best results wherever tried; they never fail to please with proper treatment.

Extra Early Red Top Milan—The earliest in cultivation, two weeks earlier than Purple Top Strap Leaf. The bulb is flat of medium size, quite smooth, with a purple top. Flesh white, hard and of the finest quality, it is an extra good keeper. Oz, 10c, 1-4 lb, 25c, lb, 90c.

Early Flat Dutch—White, flat, very early, a good cropper, standard variety. Oz, 10c, 1-4 lb, 20c, lb, 59c.

ARCHIAS SELECTED PEDIGREE FIELD CORNS NEVER FAIL TO FILL THE CRIB.

We make it an invariable rule to test our Seed Corn carefully before sending out, and our customers may depend on getting Seed Corn that will grow perfectly under favorable circumstances.

The Leaming Yellow.

Qt, 10c; pk, 35c; bu, \$1.25.

A Yellow Dent variety; very small red cob, with a deep, long grain, of a rich golden color, matures a crop in ninety days, and will if planted by the 1st of June, under ordinary culture, grow, ripen and be fit to husk and crib by September 1st. Very productive, yielding from 90 to 100 bushels to the acre.

Everitt's Mortgage == Lifter Corn.

Qt, 15c; pk, 50c; bu, \$1.60. Reliability is stamped upon every feature of this corn. It is a corn that has not failed to produce a paying crop in the worst corn year we have seen in the past six years, and in favorable seasons yields 80 to 120 bushels per acre of the finest yellow corn that ever grew inside of corn husks. We know this corn will please. It is very early. The grain is very deep, compact and heavy; ears medium to large size; small cob. 70 lbs of dry corn on the ear, as our seed ears averaged, shelled 62 lbs of corn, leaving only 8 lbs of cob. We want every corn grower to plant some of the Mortgage-Lifter corn. If you plant a field of it your profit will be big. If you don't plant much, plant a small lot, a peck or pound. We are anxious to have every person who raises corn made acquainted with its merit without delay. We know it will do them good, and thus secure to us a friend and customer.

Iowa Gold Mine—A popular yellow dent corn, originated in Iowa. It has very long grain, and very small red cob. Matures in about 95 days, and has given fine satisfaction throughout the corn belt. Our seed were grown from direct headquarter stock. Qt, 15c; pk, 50c; bu, \$1.50.

Burpee's Golden Beauty Corn—The originator claims this to be the handsomest of all yellow corn. With ears of perfect shape, well filled out, 10 to 12 in. in length, and containing 10 to 14 rows of very long medium hard bright golden yellow grains. Cobs so small that two grains will span them. Good strong stalk, growing 8 feet high, and maturing its ear in 100 to 115 days. Qt, 10c; pk, 40c; bu, \$1.25.

Champion White Pearl—(100 days) The stalk is short and thick. The ears grow long on the stalk, from 7 to 12 inches in length. The grains are very deep, two grains will more than span the cob. By a test, seventy ears weighed eighty-seven pounds, of which the cobs alone weighed only seven lbs. It makes a superior quality of corn meal. We recommend it highly. Qt, 10c; pk, 35c; bu, \$1.25.

HICKORY KING.

Hickory King—This new white field corn is distinct from all other varieties. It has a very long and wide white grain, produces 2 to 3 ears per stalk. Cob very small. It is a good fielder, and matures in 120 days. Qt, 10c; pk, 35c; bu, \$1.25.

Liberal Sample Packet of any of the above Seed Corns postpaid 10c. Write for special prices.

White Giant Normandy—Qt, 10c; pk, 35c; bu, \$1.25.

An excellent late White Dent variety, grain very large and long, pearl white; cobs very small; stands drouth well, producing as high as 150 bu. per acre. Wherever exhibited at fairs or exhibitions, it takes the premium for being the largest and finest White Dent Corn.

St. Charles White—An old well known variety, early and productive, ears of ordinary size, plump, and well filled grain very white. Qt, 10c; pk, 35c; bu, \$1.25.

Early Mastodon—(100 days)—This new variety, has the largest ear and largest grain of any early dent corn. It grows strong, rank, quick, and makes the finest shelled corn of all, being purely dent of two shades of white and yellow. Can be grown with equal success in all sections. Qt, 10c; pk, 30c; bu, \$1.10.

Seed Flax.

Improved Russian—We exercise great care in the thorough cleansing of our seed, so as to rid it of noxious weeds. We probably under-state the truth when we say that fully one-tenth part of the flax crop is deducted by buyers as an allowance for weed seeds, dirt, etc. Foul seeds are the most relentless mortgage on the farm. Pk, 60c; bu, \$2.00; 2 bu, \$3.75.

Common Flax—Recleaned. Peck, 50c, bu, \$1.40. Special prices on large quantities.

Clover and Grass Seed.

Grass is King.

More Grass—More Cattle.
More Cattle—More Manure.
More Manure—More Grain.
More Grain—More Money.
But no Grass, no Cattle; no Manure, no Grain;
no Crops, no Money.

As Prices on Grass and Clover seeds are always changing, we give no prices here by the bushel, but will cheerfully give them on application.

Terms Cash with Order. Two bushel seamless sacks, 15c. each, extra. Express or freight charges always to be paid by purchaser. Drayage free.

Buying Cheap Seed is not Economy but rather the other way—VERY EXPENSIVE. Farmers who look sharp to their interests, will always buy the best, which is only handled by reliable seedsmen.

CLOVER SEED.

Red Clover—Well-known, standard variety, 15c per lb. Postpaid 25c.

Mammoth, or Sapling—Sometimes called English Clover. Grows very fast and tall, principally used for fertilizer. 15c per lb; postpaid 25c.

White Dutch—Fine for pasture, mixed with Blue Grass, it furnishes fine grazing for sheep and cows; also good for honey bees; 25c per lb; postpaid 35c.

Alfalfa, or Lucerne—A valuable forage plant, particularly adapted for the South. 20c per lb; postpaid 30c.

Alsike, or Swedish Clover—Very hardy, and stands drouth well, fine for hay, or bee pasture. 25c per lb; postpaid 35c.

Scarlet, or Crimson Clover (*TRIFOLIUM INCARNATUM*.) An annual variety, largely used for feeding green and for hay. The yield in fodder is immense, and after cutting it once, commences growing again and continues until cut by frost. Sow in April or May. It is also sown in the latter part of the summer and fall as late as Nov. 1st, in central and southern states. It is very hardy standing drouth and extreme cold where other clovers perish. Will grow in any soil except wet land. All should try it. Sow 12 pounds to the acre. 10c per lb; 100 lbs, \$7 00.

Japan Clover—It flourishes on poorest soil. Is especially adapted to the South. 20c per lb; postpaid 30c.

INSECTICIDES.

HAMMOND'S SLUG SHOT—Sure Death to Potato Bugs,
 Garden Fleas, Cabbage Worms, Striped Bugs, Curculio and Cut
 Worms. The most valuable insecticide ever offered, in every form
 in which they are injurious to vegetation.

Slug Shot is an impalpable powder, a combination of insecticides, poisonous to in-
 sects preying upon vegetation, affecting nearly all classes of insect life, so that they
 either die or leave for parts unknown.

It Kills the Potato Bugs in all stages of their growth.

It Kills the Black Fleas on Cabbage, Turnips, Beets, Radishes and Egg Plants.
 Apply by dusting over the plant.

It keeps the Striped Bugs from all vine crops. Cucumbers, Melons and Canteloupe and Squash.

It is especially destructive to Cabbage Worms. Slug Shot not only acts as an insect destroyer, but it will be found to
 be an excellent fertilizer. It contains nothing injurious to domestic animals, and does not deteriorate by age, nor is it hurt-
 ful to the person applying it.

CALL AND SEE US WHEN IN TOWN—A general banking business transacted. All collections will be given prompt attention. Drafts on commercial centers in the United States and to any part of Europe bought and sold. We have an abundance of fire-proof vault room for the accommodation of our customers who desire to use the same for the security and safety of their valuables.

SAVINGS DEPARTMENT—This bank has established a savings department for the purpose of receiving deposits of individuals, firms and societies seeking incomes from money in abeyance or at rest, and to furnish a safe and profitable place of deposit for the savings and accumulations of all classes of depositors.

These deposits are not received by the bank in Trust capacity, but constitute a loan by the depositor to the bank, payable on demand and bearing interest at a stipulated rate.

As security for its engagements this institution offers the advantage of a large capital and surplus, its large investments in United States Bonds and the additional liability of its stockholders.

Books of account will be issued in this department upon which interest at such rate as may be fixed by the Board of Directors, will be credited to the depositors on the first days of January and July, and this interest will be compounded twice in every year, without trouble or care to the depositor.

Certificates of deposit, bearing interest and payable on demand, will be issued to such as prefer this form of deposit. Attention is called to the published reports of this bank.
