TRADE

MARK.

BUSINESS CONDITIONS.

ON CUTTINGS AND PLANTS.

When not otherwise noted, or ordered, the sorts listed and priced, are offered for delivery at our option after receipt of orders, between February 1st and April 1st; all orders received subject to stock being unsold.

The receipt of orders by us will be promptly acknowledged, together with the most reliable advice obtainable as regards supplying of same.

Excepting when listed and priced otherwise, 25 cuttings will be supplied at 100 rate, 250 at 1,000 rate. No order will be filled for less than 25 cuttings, nor for less than 25 cuttings of a variety. If orders call for smaller numbers, we exercise our liberty, at our discretion, of supplying a full 25 in number, or none.

No Charges for packing and shipping by express.

Shipping ~~/~~ ^g all orders by express is recommended as being most reliable for safe and prompt transmission and delivery, at moderate cost.

When practicable and advantageous, orders, or portions of same, will be forwarded to customers direct from the growers' establishments.

ON BULBS, SMILAX AND CLEMATIS ROOTS, ETC.

All stock offered subject to being unsold on receipt of orders.

Cases charged at net cost. When Bulbs are ordered by freight, cartage is charged on orders of less than \$10.

Not less than 6 at dozen rates, 25 at hundred rates, or 250 at thousand rates.

Our responsibility ceases on delivery of shipments in good order to the transportation companies, and proper bills of lading taken therefor.

TERMS.

Bills under \$10, net cash, or 30 days to customers of approved standing.

Three per cent. discount will be allowed on all bills over \$10 that are paid within twenty days from date.

Sixty days' time on bills over \$10 and under \$25.

Any amounts remaining unpaid on June 1st next, are subject to sight draft without notice.

References positively required from strangers unknown to us desiring credit.

We hold ourselves ready to exert all reasonable efforts necessary to fill any orders, but make no guarantee that binds ourselves in matters beyond our control, for supplying any orders, as regards variety, quantity, quality, time or place, nor do we guarantee the flowering of Seeds or Bulbs supplied.

Any reasonable complaints that are made promptly will be given due consideration.

Remit by New York Draft, Registered Letter, Express Co. or P. O. Orders. Checks on local banks are subject to discount, and cannot be received at face value.

Address all orders plainly,

DAN'L B. LONG,

BUFFALO, N. Y.

TO THE TRADE:

Our continually growing trade enables us to present a greatly improved selection in the articles herein listed, for florists' use, for the present season.

A result gained by us in daily handling an extended stock of Cut Flowers, is that of unequalled opportunities for estimating the value of kinds; and, also through dealing with so many growers, we have the advantage of drawing our stock of cuttings from such growers as can furnish the best stock of the best kinds, while we do this wholly unprejudiced by the influence of direct ownership and special contracts. This arrangement admits of orders for either few or many articles, or kinds, being made up complete in a single transaction.

All business entrusted to us will receive our personal attention, ensuring the advantage of experience, and the best possible care in handling. In cuttings and plants the utmost care will be taken to send out only clean, vigorous and healthy stock.

In the case of the 1896 Novelties, the descriptions given are furnished by the introducers.

DAN'L B. LONG.

THE NOTED NEW ROSE, MRS. PIERREPONT MORGAN.

This new sport from the well-known Mad. Cusin rose, bids fair to at once attain a high position among forcing roses. It is receiving the strongest endorsements of leading rosarians. In character and appearance it is a Cusin, but improved in every way. Deeper in color, assuming that of rose pink, much more full petaled or double, and noticeably larger, while its blooming qualities are unusual. Grows on long, firm stems, freely set with deep green foliage. The flower petals are heavy and of firm substance, hence it handles and keeps well.

In this, its second year of introduction with stock still limited, the demand no doubt will be ahead of the supply, so orders should be sent in early.

We are prepared to supply from one of the largest growing stocks, strictly A 1 plants at the following low prices:

From 2 in. pots per 100, \$12.00; per 1,000, \$ 90.00

“ 3 “ “ 100, 14.00; “ 1,000, 110.00

Ready March 1st.

Intending purchasers will be supplied with sample plants on special terms.

ROOTED CUTTINGS ^{AND} PLANTS.

NEW 1896 INTRODUCTIONS.

The Two Philadelphia Carnation Novelties

DELLA FOX, Pink,
ANNA H. LONSDALE, White.

(INTRODUCED BY MYERS & SANTMAN.)

THE NEW DELLA FOX CARNATION

is a seedling of 1892. A cross between Wilder and Daybreak. In color it is an improvement over the latter, being about four shades deeper.

It is a strong robust grower, producing large flowers on long strong stems. Adapts itself to a high temperature—50 to 55 at night—and has done well in clay soil. Grows free from rust.

This flower has attracted wide-spread attention during the past 12 months, and in which brief period the prizes awarded it included Five Certificates of Merit, One Silver Cup, One Silver Medal and Two First Premiums. This unprecedented record speaks stronger than words can, in its favor.

ANNA H. LONSDALE,

A new white, is a seedling of same parentage as Della Fox variety, and possessing the same character in growth and habit. It is a fine formed large flower of pure white.

A Certificate of Merit was awarded it in November, 1895, for best new seedling, by the Pennsylvania Hort. Society, the only occasion of its being exhibited.

Price of the two above for rooted cuttings.

Ready March 1st. Per 100, \$12.00; 500 or up, at \$75.00 per 1,000.

HILL & CO.'S NEW 1896 CARNATIONS.

JUBILEE, Scarlet.

TRIUMPH, Pink.

ARMAZINDY, Variegated.

ABUNDANCE, Deep Pink.

JUBILEE.

In newest introductions this can well be called the "Red of the Reds." Its intense rich shade of scarlet must indeed be seen to be appreciated. The blooms are large and full. Stems slender but strong. Free bloomer and a good keeper.

HILL & CO.'S NEW CARNATION "JUBILEE."

It is susceptible to rust in a slight degree. This variety has promise of at once taking a standard place among the red kinds for Commercial growers.

Was awarded Certificate of the National Carnation Society, at Indianapolis, in 1894, and First Premium over all Reds, at Boston Meeting, in February, 1895.

TRIUMPH.

Pure pink of yellowish tinge. Very large flower on straight and very long stems. Has a strong non-bursting Calyx. Heavy grower and prolific. Responds to ordinary culture; grows free from disease, and can be classed as absolutely RUST PROOF. Received Certificate of National Carnation Society, Boston, 1895.

ARMAZINDY.

White, pencilled with Scarlet. Stem very stiff, quite slender and tall growing. Large flower that does not burst its Calyx. Also rust proof. Was granted Certificate by National Society, at Boston, in 1895.

ABUNDANCE.

So named on account of free blooming qualities. It flowers continuously and profusely throughout the year. Color, a reddish Salmon Pink. Of Dwarf height, but of clean and healthy growth. A variety that promises to become an acquisition to the general all-round grower.

Price of the above four varieties, Rooted Cuttings.

Ready March 1st, \$10.00 per 100; \$75.00 per 1,000.

IVORY (HANCOCK & SON.)

A pure white seedling of Puritan crossed with Aurora. Resembles Scott in appearance and growth. Well formed flower, fringed, non-bursting, and very abundant bloomer.

Price, Rooted Cuttings, ready March 1st,

\$10.00 per 100; \$75.00 per 1,000.

CRIMSON SPORT.

(DILLON.)

This originated six years ago. As its name will imply, it is a sport from Unique, which was a sport from Lydia, Crimson Sport has the strong, healthy growth of its parent, very large crimson flowers, very prolific, long stiff stems, perfectly healthy growth, it being free from rust or disease, a good shipper and a good keeper.

Cuttings will be taken from perfectly healthy plants that have not been forced, or over propagated.

Price for Rooted Cuttings,

\$1.50 per dozen. \$10.00 per 100. \$70.00
per 1,000.

HILL & CO.'S NEW CARNATION "ARMAZINDY."

who may be interested in field-grown Carnation Stock in the Fall are requested to consult our Catalogue of this stock in its season, free on application after September 1st.

CARNATIONS OF SPECIAL MERIT.

1895 INTRODUCTIONS.

Rose Queen. So many flattering reports have been given this variety that it seems destined to at once occupy a leading position among Pink Carnations for the general trade, and to realize the predictions of its introducers, the Messrs. Simmons, that it will be "A money-maker for the cut-flower grower."

Its color is a soft pure rose. It is clean and healthy of growth, producing large-sized flowers on good stems, and beyond question is the best of keepers. Not inclined to rust.

The demand for it no doubt will be large this year, so that early ordering will be an advantage.

Price, Rooted Cuttings, \$5.00 per 100; \$40.00 per 1,000.

Plants from 2 $\frac{1}{4}$ in. pots, 8.00 " 100; 50.00 " 1,000.

Eldorado. This is receiving high praise as filling the urgent need of a vigorous yellow variety that possesses habits of free, vigorous and healthy growth, combined with free blooming qualities. The flowers grow large and full, in a well-built, firm calyx, and are borne on long strong stems. In appearance the blooms closely resemble Buttercup, the ground being a shade lighter, and not so deeply marked. But unlike that variety, Eldorado has proved itself possessed of so many good traits of growth and habit that those in a position to judge, predict a great future for it.

Bridesmaid. This promises to be a leader as a Pink Carnation in the grade that are styled "Fancies." When well grown, it is truly fine, and distinctive in character. In color it is a bright, clear and evenly shaded pink, of pleasing tone. Free growth, producing large flowers, borne on long, strong stems, and with firm calyx. Seems adapted to both light and heavy soils.

Storm King. A variety that is proving an ideal bloom where large and fine flowers are specially wanted, and might be classed as a "fancy white." It produces a very large, snowy white flower, on good strong stems. Calyx non-bursting, moderate grower that blooms freely. Requires moderately heavy, rich loam, and moist, cool atmosphere, with free ventilation.

Meteor. In its class this is a variety of marked merit. Its color is brilliant crimson scarlet. Blooms are very large on strong stems. Good calyx. Vigorous and free habit. A good bloomer, with clean foliage. Does well on light soils. The blossom shows a velvety sheen in its texture, and a bunch of them readily rival, in beauty, its namesake—the Meteor Rose.

Alaska. This variety to-day enjoys the prospect of being the most abundant bloomer of all recent introductions in White Carnations, and promises to be a flower "for the million."

It is purest white in color, while of vigorous and healthy constitution. Of low growing habit but unusually free-blooming, erect and clean of growth, and produces a good sized flower.

Price of the above five sorts:

Rooted Cuttings, \$5.00 per 100; \$40.00 per 1,000.

STANDARD SORTS OF CARNATIONS.

Wm. Scott. On account of its ease of growth, unusually prolific and persistent blooming qualities, freedom from rust and disease, and attractive color, this to-day undoubtedly occupies the pinnacle, as regards general popularity in a standard Pink Carnation. No commercial place where Carnations are grown at all is complete without it.

The flower grows full, of good size, finely fringed and fragrant. In color it is an even rosy pink, and which lights up beautifully by artificial light, instead of taking on a faded look, as do many pink flowers, hence it is peculiarly adapted for use at night.

The Cuttings we will supply are from absolutely healthy and vigorous stock only, while the variety is unusually rust-proof.

Price, \$2.00 per 100. \$17.50 per 1,000.

Daybreak. Well known and deservedly popular variety of Pink Carnation that still continues to hold its high position. When well grown it is hardly ever excelled in beauty and good qualities. This season good healthy stock is offered at the following low prices:

Per 100, \$2.00. Per 1,000, \$17.50.

Mme. Diaz Albertina. A "Fancy Pink" of the highest grade. Flowers unusually large and many-petalled and fringed. Light pink. The petals of its full and double center being still lighter shaded. The blooms command high prices. Medium productive.

Price, \$3.00 per 100. \$27.50 per 1,000.

Thos. Cartledge. A beautiful light red variety, a shade deeper than the well known Tidal Wave. This Carnation does remarkably well in all respects in certain sections, and deserves to be better known. When well grown, its color practically sells it each and every time.

Price, \$2.00 per 100. \$15.00 per 1,000.

WELL KNOWN AND POPULAR STANDARDS.

Lizzie McGowan.—White.

Silver Spray.—White.

Portia.—Bright Scarlet.

Nellie Lewis.—Pinked Striped.

Heinzes' White.—Cream White.

Garfield.—Dark Red.

\$1.50 per 100. \$12.00 per 1,000.

Special prices on application on orders of 1,000 and upwards of a variety.

Pot Grown Plants furnished to special order later in the season. Price of same generally ranges \$2.00 per 100 higher than for cuttings. Correspondence invited.

CHRYSANTHEMUM NOVELTIES.

READY MARCH 1ST.

NATHAN SMITH & SON'S 1896 LIST.

-
Autumn Bride. —(Exhibited as October Queen) Pure White, incurved. Resembles the Queen in form and size. Full center, stiff stem, 3 feet.....	} Each, 35 cts.

Daydawn. —White, with lemon Center, which becomes pure white. Flower 7½ inches across. Fine foliage well up to flower. October 15th. 3 feet.....	
- The above set of four for \$1.75.

AN EARLY WHITE. (FOR COMMERCIAL GROWING.)

Florence Teall.—(F. Schlegels' Sons.) A sport from Jessica in 1891. Style of Mad. Bergman. A medium size globular white flower. 2½ to 3 feet. Produces good second blooms from side shoots, available for cut flower trade.

It has blossomed repeatedly as early as September 15th, and regularly comes into full crop by September 28th. On account of its unusual earliness in perfect condition, it is specially desirable and will show large profits to the cut flower grower. Ready April 1st.

Plants from 2½-in. pots. \$10.00 per 100.

Standard Sorts of Market Varieties of Chrysanthemums supplied to Special Order at Low Prices. Correspondence invited.

GERANIUM NOVELTIES FOR 1896.

Some intelligent florists to day predict that the same era of advanced improvement seen in the last decade, in Roses, Carnations and other kinds of flowers is about to be duplicated in the Pelargonium family. The recent introductions in this country by our most skilled cultivators of the Bruant and similar types of these flowers are notable strains, new to us, and which must be seen in order to realize their attractive beauties.

NEW FRENCH IMPORTATIONS.

The following have been carefully selected from a large list, after actual and thorough trials, hence they all possess unusual qualities. Prices given are for plants from 2-in. pots.

DOUBLE VARIETIES OF 1896.

- Pres. Leon Picas.**—A dwarf vigorous growing variety and abundant bloomer; color very bright ruby red, spotted and shaded dark violet. A superb variety of the color.
- Comtesse de Castries.**—Enormous trusses on long stout footstalks, flowers of very large size, petals elegantly undulated, very bright soft rose marked with white. A robust grower and a superb rose colored variety for bedding.
- Edw. Danglede.**—Plant robust and very free flowering, large spherical trusses well above the foliage, large semi-double florets, beautiful magenta color. Base of upper petals, marked orange. An excellent bedding variety of a bright and novel color, one of the best.
- Francis Magnard.**—Flowers and trusses large, maroon crimson brightened with violet base of upper petals, marked orange; this variety is remarkable for its very dark color.
- Hedwige Buchner.**—A very fine double white variety raised by M. Lemoine of the type of Ayne de Chevriere, but we believe much superior to that variety.

BRUANT TYPE.

- H. Dauthenay.**—Plant short and robust, extremely free flowering, trusses of immense size, composed of very large round florets, color coppery orange red with white eye. This variety resembles in color and habit the splendid variety, Mrs. A. Blane, but is in every way superior, having larger trusses and flowers and being brighter in color, and is certainly a grand acquisition.
- J. D. Cabos.**—Plant dwarf and free, bearing large trusses of flowers of a novel and pleasing color in this type, color very soft rose. Will be very useful for massing.

NEW SINGLE VARIETY.

- L'Aube.**—Enormous sized trusses, large round florets, pure snow white, retaining its pureness the entire season. In freedom of bloom, splendid habit and growth of plant, this variety resembles the excellent double white variety, La Favorite. We believe this to be the very best single white up to date.

NEW IVY LEAVED GERANIUM.

- Centenaire.**—Rich brilliant solferino, immense sized florets of the most perfect form. One of the finest that we have ever seen.
- Prices of above nine varieties,**

40 cents each, \$3.50 per doz. The set of above five double sorts, \$1.60.
The above entire set of nine varieties, \$3.00.

NEW 1895 GERANIUMS.

These Varieties are the cream of the finest yet introduced, and should be grown by every live Florist. Bruant Type.

- M. Alphonse Ricard.**—Clear orange red, trusses of the largest size, composed of semi-double florets that are much larger than anything in the color, and being equalled in size only by the following variety, J. J. Harrison. A wonderfully free bloomer. This is the coming variety that will be used for bedding.
- J. J. Harrison.**—It is impossible to say too much in praise of this Geranium, for we are certain that it is the best semi-double scarlet Geranium of any type ever offered up to the present date. Plant of vigorous growth and free blooming. Like the preceding sort the trusses are large and the florets exceptionally large; the color is of that most vivid capucine scarlet that is so much admired.
- W. P. Simmons.**—This variety has proved to be such a grand bedding sort that special mention of it is again made this year, and to still further recommend it to the trade; color, orange red pencilled lilac; plant, a very dwarf but robust grower.
- Price of above three sorts, 20 cents each. \$1.75 per dozen. The set of three, 50 cents.

SELECTED GERANIUMS.

A Trio of thoroughly tested Choice Varieties at Popular Prices.

- S. A. Nutt.**—A popular bedding dark colored sort.
- La Favorite.**—The best double white for all purposes.
- Heteranthe.**—Commonly called Double Gen. Grant. A great bedder
- Price, 65 cents per dozen. \$4.00 per 100.

A WONDERFUL FUCHSIA.

Md. Bruant.—M. Bruant, the originator of this Fuchsia, says: The purchasers of this novelty will be better able to judge of its beauty than we can describe it to them. The "Revue Horticole" says: "That it will become the favorite of amateurs as soon as it is known."

The plant is vigorous, well formed, and, as expressed by one of our Parisian connoisseurs, "the flowers are of a grandeur never before seen;" color, an exquisite lilac mauve maculed and veined with rose; sepals bright red, to which a number of the petals curiously adhere on account of the extreme doubleness of the corolla. Plant vigorous and produces its beautiful pendant flowers the entire season, and is of easy growth. 35 cents each. \$3.00 per dozen.

COLEUS

Verschaffelti

... AND ...

Golden Bedder

The Standard and the Cream of all Coleus varieties yet introduced.

Strong rooted stock from cutting bed, ready February 1st and later, \$1.00 per 100; \$8.00 per 1,000.

Plants from 2½ in. pots, \$2.00 per 100. Special quotations on larger quantities on application.

ASTER SEED.

The kinds here mentioned have in a short time gained an unusual record in this locality with cut-flower growers, for commercial trade. The flowers are unusually large, borne on long firm stems, so they much resemble Chrysanthemums in appearance, while in form, colors and full double character, the blooms are faultless. They also possess the advantage of flowering as late as October, when good bloom is scarce and in demand.

The strain of seeds here offered commends itself most highly in having for continuous seasons produced flowers that sold on sight in open market, at prices double—and in cases treble—that of other kinds. It is the very best obtainable, we receiving it first hand from the growers. Low priced seed claimed to be this strain, or seed irregularly offered as this, should be treated with caution.
