Es stammt aus den Kreuzzügen des zwölften Jahrhunderts und wurde einem unserer Vorfahren als Anerkennung seiner Tapferkeit zuertheilt. Die 14 Punkte im Schilde bedeuten 14 Blutstropfen, da er in einer Schlacht 14 Heiden tödtete. In diesem Katalog haben wir diese Geschäftsmarke allen Sorten von Samen, u. s. w., welche von uns eingeführt und genannt wurden beigelegt, und kann man sicher sein wo immer dieselbe erscheint, daß es sich um eine Sorte von großem Werth handelt.

— für —

Dauerwiesen und Dauerweiden.

Alle Autoritäten stimmen darin überein, daß für **Weide und Heu** die besten Ergebnisse erzielt werden durch den Gebrauch von **Gras-Sämereien im Gemenge**. Die Ursachen sind handgreiflich: Erstens:—Eine Anzahl von Arten sichert ein viel **dichteres Wuchstum**, als die gleiche Menge Samen von nur einer oder zwei Sorten, und erweist sich als **weniger auslaugend** für den Boden, zumal sie größtentheils von verschiedenen Bestandtheilen leben. Zweitens:—Jahreszeiten, welche manchen Gräsern ungünstig sind, sind für andere Arten günstig, so daß bei Gemengen ein Fehlschlag **thatsächlich unmöglich** ist, vorausgesetzt natürlich, daß der Samen gut ist. Wir tragen große Sorgfalt bei der Auswahl von Gras-Sämereien, um die höchste **Keimkraft** zu sichern, und die Gemenge beruhen auf einer vollen Würdigung der Erfordernisse der verschiedenen Boden-Arten für welche sie bestimmt sind.

Für Dauerwiesen:

Auf trockenem Boden. Wiesenrippengras, Englisches Raigras, Italienisches Raigras, Ananlgras und Kother Klee. Bushel 15 Pfd. \$2.00, 100 Pfd. \$12.50.

To our Friends and Patrons!

We cannot too forcibly express our thanks and gratitude to our many thousand friends and patrons for the general good feeling that exists for us and the principles on which we conduct our business and it is with much pleasure for us to state that last year was the largest in our business.

We do not mention this fact in a boasting spirit; but we know that our many friends will share with us the satisfaction that we grow as well as our seeds. We have concentrated all our thoughts, ideas, efforts and extensive knowledge gained through many years of practical experience to one point—and that point is how best to serve all who send in their orders with the best seeds that grow. You can rely on us to serve you with the highest quality of seeds at the very lowest prices. We thank you for the many past favors and solicit a continuance of same for the year 1896, and wish you, one and all, a prosperous year to which we shall contribute our best endeavors.

Very respectfully yours,

Theo. Koss.

KOSS' SEEDS *are warranted fresh and pure, true to name and reliable in every respect.*

Farmers it will pay you to thoroughly examine our field seed department. This is a specialty with us and we believe that there is no seed firm in this country which gives more close attention to growing and handling farm seeds. We have many desirable new sorts, and it will pay you well to renew your seed corn, oats, etc., with better and more profitable varieties. Wisconsin grown seeds are the best.

TRADE MARK.

Our trade mark is the ancient coat of arms of the Koss family, adopted in the 12th century. Throughout this catalogue we have affixed this trade mark to all varieties of Seeds, etc., named and introduced by us; you can rely upon it being a variety of great worth wherever it is attached.

We guarantee that all seeds and other goods shall reach the purchaser safely and in good condition. Our customers can thus purchase their supplies from us and have their orders as carefully filled as if they personally called at our store, and we further guarantee that all seeds sold by us are first-class, pure and true.

Half pounds supplied at pound rates; half bushels at bushel rates. Market Gardeners and Farmers requiring larger quantities of seeds than are here offered are invited to ask for special prices.

SEEDS BY MAIL.—All seeds in packets, ounces and quarter pounds will be sent postpaid by mail at prices quoted, on parcels containing more than a quarter pound postage must be added at the rate of 8 cents per pound, on Beans and Peas 8 cents per pint and 15 cents per quart, and on corn 6 cents per pint and 10 cents per quart.

SHIPPING DIRECTIONS.—Shipping directions should accompany all orders. Where no particular mode of transportation is designated, we shall exercise our best judgment, and forward by express, freight or mail, as may seem most advisable.

REMITTANCES.—Cash should always accompany the order. We will be responsible for money sent to us by Money Order, Bank Draft, Express or Registered Letter. Every postmaster is required to register any letter on payment of eight cents extra postage. The cost of remitting may in all cases be deducted from the amount sent.

LIBERAL DISCOUNT.—To those who buy seeds in packets, we will allow 25 cents on each dollar sent us. Thus, purchasers remitting \$1.00 may select seeds (in packets only) to the amount of \$1.25; those remitting \$2.00 to the amount or \$2.50 and so on. This discount applies *only* on seeds in packets, and cannot be allowed on seeds by weight or measure, collections, bulbs or tools.

PURCHASING BY EXPRESS.—Express companies have now purchasing departments in all their offices. If you wish to order goods from us to be sent by express, ask for a purchasing order blank at any express office, and it will be supplied and forwarded without extra charge, other than usual rates for returning goods.

THIS IS VERY IMPORTANT.

SIGN YOUR NAME AND ADDRESS. Many orders reach us every season in which the Name or Post-Office Address is lacking. It is of course impossible for us to fill these orders until they are identified.

WE ARE DETERMINED to do business so as to give our patrons complete satisfaction, and thus secure their entire custom, and have it remain with us from year to year. Permanent trade is what we are after, and, by honest business principles, determined to have.

JERUSALEM ARTICHOKE.

This variety is not produced from seed. They are sometimes used as a table vegetable when pickled or as a salad, but their greatest value is for feeding stock. They are the best hog food known and are attracting much attention on account of their great fattening properties, great productiveness (over 1000 bushels having been grown on one acre), and ease with which they can be grown. They need not be dug in the fall; the hogs should be turned in on them, and will help themselves by rooting for them. One acre will keep from twenty to thirty head in fine condition from October until April, except when the ground is frozen too hard for them to root. They are also said to be a preventative of cholera and other hog diseases; and they are also highly recommended for milch cows, increasing the yield of milk and at the same time improving their condition. They are well adapted to any soil where corn or potatoes can be grown. Three bushels will seed an acre, and they should be cut the same as potatoes, one eye to a cut being sufficient, planted in April or May, in rows three feet apart and two feet in the rows, and covered about two inches deep. Per lb. 30 cts., 3 lb. 75 cts. postpaid. By freight or express, peck. 65 cts., bushel \$2.00, bbl. of 3 bushel (enough for one acre) \$4.50.

Selected FARM SEEDS.

As the field crop is more important to the general welfare of the country than any other, so the Farm Seed department should have the prominence in seed catalogues, but we regret to say, that with most seedsmen it has very little attention. During the past year our trade in this department has been more than double what it ever was before. Realizing the vast importance of this branch of our business, we devote our careful attention to the selection of the best Farm Seeds of all sorts.

We are located in the heart of the great farming country, and our seed grain is grown especially for seed, in the section best suited to its development and perfect maturity. It is all carefully selected, thoroughly cleaned, of the best quality, and we sell at reasonable prices. *No charges made for bags or cartage.* Write for special prices on large quantities.

Alfalfa or Luzerne. Furnishes an enormous quantity of fodder, and can be cut three or four times in a season. When once started, its roots strike so deep that neither frosts or droughts affect it. Sow at the rate of 10 to 15 lbs. per acre on light, dry soil. Lb. 15 cts., peck \$2.00, bushel \$7.75.

CRIMSON CLOVER.

CRIMSON CLOVER—Also called **Scarlet** or **Italian**. This is an annual variety in common use in Italy and the south of France, for feeding green. The yield in fodder is immense, and after cutting, it at once commences growing again, and continues until severe cold freezing weather. It grows about one foot high, roots nearly black; leaves long; blossoms long, pointed, and of a very deep red or carmine color. Makes good hay. Sow in April or May, 10 to 15 lbs. of seed per acre. Where the weather is not too severe, it will live and continue to grow all winter, furnishing winter pasture or a crop of hay before corn-planting time in the spring. It can then be turned under, and will add greatly to the fertility of the soil. Thus a hay crop and a corn crop may be grown on the same ground in one year, and still the soil will

be improved. It may be sown every year in corn, wheat, oats or potatoes, and two crops obtained. Lb. 12 cts., peck \$1.50, bushel \$4.80.

Sainfoin or Esparsette. An excellent perennial fodder plant, growing to the height of about three feet and flowering in June and July its stand improving by age. It is naturally adapted for light, chalky soils, being an enriching, heat resisting clover. Lb. 12 cts., 10 lbs. \$1.00.

Seradella. Excellent on very dry soils. Lb. 15 cts., 10 lbs. \$1.30.

Medium Red. The seed we offer is clean and free from weeds. Price varies according to market, about \$5.50 to \$6.25 per bushel, lb. 12c.

Manimoth or Sapling Clover. This variety grows five to six feet high, and is used almost exclusively for plowing under for manure. Price varies, about \$5.75 to 6.50 per bushel, lb. 12 cts.

White Dutch. A small creeping, perennial variety, valuable for lawns and pasturage. Lb. 30 cts., peck \$4.00, bushel \$15.00, subject to market changes.

Alsike or Swedish. Perennial and very hardy. The heads are round, flesh-colored, fragrant and much liked by bees, which obtain a large amount of honey from them. Thrives best on moist, rich soils. Lb. 15 cts., peck \$1.95, bushel \$7.25, subject to market changes.

Grass Mixtures for Hay and Permanent Pastures.

Many of our western farmers have not yet learned that a pasture or meadow, of mixed grasses is far superior to clover and timothy alone, but such is the case.

All authorities agree that for *Pasture or Hay*, best results are obtained from the use of *grass seeds in mixtures*. The reasons are obvious.

FIRST.—A number of varieties will insure a *much denser growth* than the same amount of seed of one or two varieties, and prove *less exhausting* to the soil, since they live to a large extent on different constituents.

SECOND.—Seasons that effect some grasses adversely are favorable to other sorts, so that with mixtures a failure is *practically impossible*, provided of course, the seed is good. We take great pains in selecting grass seeds in order to secure the *highest germination*, and mixtures are based on a full appreciation of the requirements of different soils for which they are intended.

KOSS' FANCY LAWN GRASS SEED.

FRESH, PURE AND CLEAN.

The necessary Requisite for a Beautiful and Enduring Lawn.

This Grass Seed is a carefully prepared combination of the various grasses designed to produce a fine, dwarf, compact and permanent turf.

Many Lawns dry out and turn brown during the hot, dry summer months and do not revive until the cooler weather of autumn. By a judicious use of some of the European Grasses with the standard Lawn Grasses of America, we are enabled to offer a mixture to the public, which, from the habits of the various grasses of which it is composed, to ripen successively, will grow and flourish during the different months of the season, so that a rich, deep green is constantly maintained.

Seeds of the highest grade, carefully re-cleaned, and of the best quality in every respect are used in this mixture.

PRICE: Pint 10 cts., Quart 20 cts., Peck \$1.00, Bushel \$3.75.

Fine Mixed. A cheaper mixture than the preceding. Quart 15 cts., Peck 75 cts., Bushel \$2.75.

For forming new Lawns sow 4 bushels on an acre.—100x100 feet, 10,000 square feet, 1 Bushel; 50x50 feet, 2,500 square feet, 1 Peck. 25x25 feet, 625 square feet, 2 Quarts.

Instructions how to prepare and make a lawn are contained in each package.

KOSS' SELECT LIST OF FLOWER SEEDS.

Merton, Wis.
 DEAR SIR —Am much pleased with the
 seeds. Send enclosed order by mail.
 Respectfully yours,
 R. AINSWORTH.

We do not offer so extensive a list as many of our brother Seedsmen do, but our assortment contains the *Cream*, and only varieties of *Real Value*, and those best adapted to our climate and worthy of general culture by the amateur. There is much offered to the public that is only valuable in a botanical collection, and will not please the amateur who grows flowers for beauty; and to experiment with high priced greenhouse seeds, which takes a professional florist to manage,

generally ends in a waste of time and money.

Success makes Flower Culture delightful, and we desire all our customers to succeed. We are confident that our Flower Seeds are unquestionably the best, and will grow if properly taken care of and sown at the proper season. We warrant our Flower Seeds to be fresh, true to name and of strong vitality.

To those who are not acquainted with the different varieties, we can especially recommend the collections offered on the cover of this catalogue.

Directions for Sowing. The soil best adapted to most flowers is light, rich loam, containing enough sand to make it porous. If there is some clay with it the colors will be brighter. Make the surface as smooth as possible, sow seed in rows, covering each sort of seed in proportion to its size, a good general rule being to cover twice the diameter of the seed, and press the soil down firmly over it. Do not plant seeds when the ground is wet. Never allow the ground to become thoroughly dry while the plants are small. The soil should be kept moist, but never wet.

A Beautiful Lawn is easily obtained by sowing our Fancy Lawn Grass Seed. It is vastly cheaper than sodding, and you are not bothered with weeds, which are in the sod. See description and price on preceding page.

Customers are allowed to select Flower Seeds in packets to the value of \$1 25 for each dollar. All Flower Seeds sent free by mail.
