40 " " " " " " " "	27	31
50 " " " " " " " "	18	20

RULE—Square Method—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

RULE—Equilateral Triangle Method—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

DISTANCE FOR PLANTING

Variety	Feet apart each way
Standard Apples	25 to 30
Standard Pears	20 to 24
Strong-growing Cherries	20 to 24
Duke and Morello Cherries.....	18 to 20
Standard Plums and Prunes.....	20 to 24
Peaches and Nectarines.....	20 to 24
Apricots	20 to 24
Almonds	24 to 30
Walnuts	40 to 50
Grapes	7 to 10
Currants and Gooseberries.....	4 by 6 feet
Raspberries and Blackberries..	3 to 4 by 5 to 7 feet
Strawberries for field culture, 1 to 1½	by 4 to 5 feet
Strawberries for garden culture..	1 to 2 feet apart

Hughes Hotel Bldg. Fresno, California
955 I Street P. O. Box 615

Suggestions to Buyers

1. All orders should be plainly written on a separate sheet of paper and not mixed up in the body of the letter. This prevents confusion in booking orders.
2. When ordering please advise us if substitution will be permitted, as we feel at liberty when no instructions accompany the order to substitute other sorts equally as desirable. In cases where we substitute it is our general rule to send our patrons a better variety than the one ordered.
3. All our stock is well packed and carefully labelled. We make a small charge to cover cost of material used in packing. We make no charge for drayage.
4. Advise us plainly how you wish us to ship—by express, freight or parcels post; also state the route; otherwise we will use our own judgment in forwarding.
5. After we delivery nursery stock to the carriers in good condition we cannot hold ourselves responsible for any loss or injury. All customers are requested to hold their shipping receipt, for in many instances, it is necessary to file a claim with the railroad company and other carriers for damages or delay in transit, and the original shipping receipt is necessary when filing such claims.
6. All claims for mistakes in filling orders, and stock which may be unsatisfactory upon arrival, must be reported to us within 10 days after receipt of shipment; otherwise we cannot allow same.
7. Parties unknown to us must accompany their orders with a remittance or furnish satisfactory reference.
8. Please remember to write your name, post office, county, state, street address or rural route when ordering. This prevents your mail from going astray.
9. Remittances can be made either by post office money order, registered letter, express money order or bank draft. Where parties have a bank account with their local bank we will accept their personal check in payment of any stock they may order, providing, of course, they have ample funds in their local bank to meet payment upon presentation. Many times it is more convenient for our customers to send us a check on their local bank when ordering, for they may live a considerable distance from town.

CERTIFICATE OF INSPECTION

Our nurseries are inspected several time each year by the local Horticultural Commissioner, under the direction of the State Commission of Horticulture and Entomology. Every shipment we make is accompanied with a tag of inspection. Aside from this we exercise every care to have our stock free from disease and pests.

OFFICE OF HORTICULTURAL COMMISSIONER Fresno, Fresno County, Cal.

To Whom It May Concern:

As Horticultural Inspector of Fresno County, I have always found the Fresno Nursery Co. not only reliable, but the members of this firm exercise every care to have their stock free from disease. Indeed, they would not send out a tree, vine or plant knowing it to be affected in any way. I am assured that all nursery stock sent out they would not hesitate to plant themselves.

F. P. ROULLARD,

Horticultural Inspector, Fresno County, California.

WEIGHT OF NURSERY STOCK

The general run of deciduous fruit trees, either in bales or cases, average about as follows: 4/6 ft. size, 1½ pounds each; 3/4 ft. size, 1 pound each; 2/3 ft., ½ pounds each; grape vines, 1-3 of a pound each.

Citrus trees, balled, packed in boxes, 40 pounds each, and with naked roots, 3 pounds each. Balled palms and other ornamental trees, where the stock is taken up with a ball of earth on roots, average 40 pounds each. Grape cuttings, 14 to 16 inches long, 90 pounds to the thousand cuttings. Eucalyptus trees in flats, 100 plants to the flat, weight 50 pounds per flat. The approximate weights given above include the weight of packing material used in packing stock for shipment.

In order to determine the approximate freight charges on a shipment, patrons can ascertain freight rates from their local agent from Fresno to their destination (rate per 100 lbs.), and in this way can figure about the cost of transportation charges.

In less than carload lots we make a small charge to cover cost of material used in packing. Where parties order a carload of stock we make no charge for packing. In shipping carloads we pack stock in the cars, which requires no boxing. Sufficient straw and shingle tow is used to keep stock in good condition. Our packing methods are perfect and we exercise every care to protect the interests of our patrons, being anxious to please them in order to merit their future patronage.

SPECIAL QUOTATIONS ON LARGE ORDERS

When you are in the market for a large amount of stock we would be pleased to have you send us an exact list of your wants for quotations. We will cheerfully furnish estimate on large orders and give intended buyers every information in our power regarding the best varieties to plant and other data in detail.

A WORD OF CAUTION

Address all orders and make all remittances payable to the firm direct. Pay no money to agents who claim to represent us unless they show a letter of authority. All our agents carry with them a certificate of agency, and when placing orders with traveling solicitors be sure, if they claim to represent us, to have them show you our authority.

Deciduous Fruit Trees

APPLE

On Apple—

	Each	10	100	1000
4 to 6 ft., 1 year.....	\$0.25	\$2.00	\$18.00	\$150.00
