PRICE LIST

OF THE

FRESNO NURSERIES

F. H. WILSON, Proprietor

Season of 1904-1905

FRESNO, - CALIFORNIA

U.S. Department of Agriculture
Library
Washington, D. C.

N. B.—We beg to announce to our patrons that the Calimyrna and Smyrna classes of Figs we quote herein, were grown by the introducer, Mr. Geo. C. Roeding. All trees bear his Seal and Trade Mark. We have made arrangements with Mr. Roeding to handle his Smyrna classes of Figs, and we can supply this stock at the same prices he quotes. All other stock listed is of our own growing.

Prices Subject to Change Without Notice. Publication of this
List Abrogates All Previous Quotations.

SEASON OF 1904-1905

PRICE LIST

OF

Deciduous and Citrus Fruit Trees,
Grape Vines and Small Fruits,
Ornamental Trees and Plants,
Palms, Roses, Etc.

320 ACRES

Nursery and Propagating Grounds:
DINUBA, CAL.

Main Office and Sales Yard:
928 I STREET, FRESNO, CAL.

TELEPHONE MAIN 374.

N. B.—All our stock is grown at Dinuba, a locality famous for its rich, mellow soil, insuring good, healthy stock. We guarantee all our trees free from root knot or any disease.

P r e f a c e

In presenting this price list to the public we wish to thank our numerous patrons for past favors. It is our endeavor to conduct our business in such a manner as to merit the confidence of those dealing with us.

This stock is all our own raising. We personally superintend the propagation and handling of all nursery stock offered. The greatest care is exercised in having the varieties true to name, clean, and healthy.

Our nursery is now located near Dinuba, on soil particularly suited to the growing of nursery stock. Our trees and vines have a perfect root system due to our growing same on virgin soil of such a fertile character to promote a healthy root and thrifty top. Office and sale yard is at Fresno City. Delivery of stock can be made from either Fresno or Dinuba.

Packing of orders is done by men of long experience in the business, and no pains are spared in having shipments reach the purchaser in the best possible condition.

We would recommend that upon the arrival of stock, it be immediately taken from the bale or box, well heeled in the ground, and thoroughly settled with water. This will keep them in good condition until ready to plant.

In planting see that the hole is sufficiently large to admit the roots in natural form. Be careful that all damaged roots are trimmed off. Then cut the top back to the point where you desire to form the head. Would recommend in this valley that not more than 12 to 16 inches of a top remain. Thus when the head is formed it affords a protection to the trunk from the hot summer sun. The limbs should be cut back to about two buds from the body of the tree. Care should be taken in planting that the tree stands but little deeper in the soil than it previously did in the nursery. Settle the trees immediately by irrigation or with a few buckets of water. Never use manure in contact with the roots. Keep the ground well cultivated, and sufficiently moist to keep up a continual growth of the trees during the summer.

NOTE—We grow our stock on mellow, virgin soil, hence the superiority we claim for it—over nursery stock grown in exhausted soils devoid of the requisites for making a healthy growth.

Just a Word to Buyers

Correspondents will please observe as far as possible the following regulations:

1. The name of varieties should be plainly written on a separate sheet of paper in order to prevent mistakes.
2. It is always advisable to send in orders as early as possible, as they are usually filled in the order in which they are received.
3. We sometimes have complaints from customers for not filling their order. This implies that our stock of such varieties as are not sent is exhausted. It is our rule never to substitute, unless given authority to do so on the part of patrons.
4. Persons not acquainted with the different varieties would do well to leave the selection to us, as we shall send only such as give general satisfaction.
5. State distinctly how you wish us to ship—by freight or express; also designate the route; otherwise we will use our own discretion in forwarding; but in all cases the articles are at the risk of the purchaser after being shipped.
6. When contracts are made to deliver trees to any particular place, our responsibility ceases the day on which the purchaser was notified to receive his shipment.
7. Orders from unknown correspondents must be accompanied by a remittance or satisfactory references. Remittances may be made by draft on San Francisco, or postal or express money order on Fresno, Cal.
8. Customers are requested to notify us at once if errors occur in filling orders, as we endeavor to make satisfactory amends.
9. Prospective buyers are requested to send us an exact list of their wants—for in some instances, where a quantity of trees are wanted, we can make special prices.

What We Guarantee

Our trees are all budded or grafted from bearing trees. Our nursery stock is handled by experienced and careful men; nevertheless, with all our caution, mistakes of minor importance may occur.

Long experience has shown us the urgency of keeping our varieties true to name, and hence we are at all times anxious and willing to replace, on good and sufficient evidence, all trees that may prove otherwise; nevertheless, it is mutually understood and agreed between purchasers and ourselves that we shall not at any time be liable for any amount greater or in excess of the original price of the stock at date of sale. We solicit your patronage, but in justice to ourselves cannot accept your orders on any other terms. Address all communications to

THE FRESNO NURSERIES,

F. H. WILSON, Proprietor.

P. O. Box 42

FRESNO, CAL.

We make a specialty of growing fruit trees and grape vines and can supply the stock in car load lots. Parties requiring a large amount of stock are requested to send us a list of their wants and we will make special prices on quantities.

Palms	12
Roses	13

To Our Patrons.

In compiling our price list, we have only made quotations on such stock as we grow and have for sale in quantities. In our Descriptive Catalogue we have a number of sorts listed on which we have made no quotations. Parties wanting quotations on stock not quoted herein, we will be pleased to make them prices on such stock, if a list of their requirements are submitted to us.

We beg to call the attention of prospective buyers to a new Winter Pear we have listed herein. This pear has recently been introduced from England and is called the "Pitmaston." It is a vigorous grower, a heavy cropper of the best quality of fruit, making it one of the best of the Winter varieties. We can recommend it for shipping, canning and drying.
