PRICE LIST

OF THE

Fresno
Nursery Co.
Incorporated

**Largest Growers of Grape
Vines in San Joaquin Valley**

F. H. WILSON . . . President
THOS. JACOB . . . Vice-President
CHAS. A. CHAMBERS, Secretary
Capital Paid Up . . . \$50,000.00

Season of 1906-07

Main Office . . . Fresno, Cal.

Branches

VISALIA, CAL. THOS. JACOB, Manager
DINUBA, CAL. F. H. WILSON, Manager

N. B.—All our stock is grown at Dinuba, Lac Jac and Kaweah localities, famous for rich, mellow soil, insuring good, healthy stock. We guarantee all our trees free from root knot or any disease.

TO OUR PATRONS

In presenting this price list to the public we wish to thank our numerous patrons for past favors. It is our endeavor to conduct our business in such a manner as to merit the confidence of those dealing with us.

We personally superintend the propagation and handling of all nursery stock offered. The greatest care is exercised in having the varieties true to name, clean and healthy.

Our trees and vines have a perfect root system due to our growing same on virgin soil of such a fertile character to promote a healthy root and thrifty top. Office and sale yard is at Fresno City. Delivery of stock can be made from either Fresno, Dinuba or Visalia.

Packing of orders is done by men of long experience in the business, and no pains are spared in having shipments reach the purchaser in the best possible condition.

We recommend that upon the arrival of stock it be immediately taken from the bale or box, well heeled in the ground, and thoroughly settled with water. This will keep them in good condition until ready to plant.

In planting see that the hole is sufficiently large to admit the roots in natural form. Be careful that all damaged roots are trimmed off. Then cut the top back to the point where you desire to form the head. Would recommend in this valley that not more than 12 to 16 inches of a top remain. Thus when the head is formed it affords a protection to the trunk from the hot summer sun. The limbs should be cut back to about two buds from the body of the tree. Care should be taken in planting that the tree stands but little deeper in the soil than it previously did in the nursery. Settle the trees immediately by irrigation or with a few buckets of water. Never use manure in contact with the roots. Keep the ground well cultivated and sufficiently moist to keep up a continual growth of the trees during the summer.

Address all orders and communications to Main Office.

928 I Street

Fresno, California

NOTE.—We grow our stock on mellow, virgin soil, hence the superiority, we claim for it, over nursery stock grown in exhausted soils devoid of the requisites for making a healthy growth.

INSTRUCTIONS

Correspondents will please observe as far as possible the following regulations:

1. The name of varieties should be plainly written on a separate sheet of paper in order to prevent mistakes.

2. It is always advisable to send in orders as early as possible, as they are usually filled in the order in which they are received.

3. Persons not acquainted with the different varieties would do well to leave the selection to us, as we shall send only such as give general satisfaction.

4. State distinctly how you wish to ship—by freight or express; also designate the route; otherwise we will use our own discretion in forwarding; but in all cases the articles are at the risk of the purchaser after being shipped.

5. When contracts are made to deliver trees to any particular place, our responsibility ceases the day on which the purchaser was notified to receive his shipment.

6. Orders from unknown correspondents must be accompanied by a remittance or satisfactory references. Remittances may be made by draft on San Francisco, or postal or express money order on Fresno, Cal.

7. Customers are requested to notify us at once if errors occur in filling orders, as we endeavor to make satisfactory amends.

8. Prospective buyers are requested to send us an exact list of their wants, for in some instances, where a quantity of trees are wanted we can make special prices.

GUARANTEE

Our trees are all budded or grafted from bearing trees. Our nursery stock is handled by experienced and careful men; nevertheless, with all our caution, mistakes of minor importance may occur.

Long experience has shown us the urgency of keeping our varieties true to name, and hence we are at all times anxious and willing to replace, on good and sufficient evidence, all trees that may prove otherwise; nevertheless, it is mutually understood and agreed between purchasers and ourselves that we shall not at any time be liable for any amount greater or in excess of the original price of the stock at date of sale. We solicit your patronage, but in justice to ourselves cannot accept your orders on any other terms.

Address all communications to

THE FRESNO NURSERY CO. (Inc.)

P. O. Box 42

Fresno, Cal.

All members of our firm are thorough nursery men and give their individual attention to the different departments, insuring GOOD stock TRUE TO NAME.

VALUABLE TABLES

DISTANCE FOR PLANTING.

Apricots	20 to 25 feet apart each way
Cherries	20 to 25 feet apart each way
Apples	20 to 22 feet apart each way
Pears	20 to 22 feet apart each way
Peaches	18 to 22 feet apart each way
Prunes	18 to 22 feet apart each way
Plums	18 to 20 feet apart each way
Grapes	6 to 8 feet apart each way
Currants and Gooseberries	2 by 6 feet
Raspberries and Blackberries	2 by 7 feet
Strawberry plants for field culture	1 by 1½ feet
Rhubarb	1 1-2 by 6 feet

NUMBER OF TREES AND PLANTS ON AN ACRE AT VARIOUS DISTANCES.

1x1	43,560	10x10	435	19x19	120
2x2	10,890	11x11	360	20x20	108
3x3	4,840	12x12	302	22x22	98
4x4	2,722	13x13	257	25x25	60
5x5	1,742	14x14	222	30x30	48
6x6	1,210	15x15	193	35x35	35
7x7	888	16x16	170	40x40	27
8x8	680	17x17	150	50x50	17
9x9	537	18x18	134	60x60	12

To ascertain the number of trees or plants required for an acre: Multiply together the distance that the trees are to be set apart each way and divide this into 43,560 (the number of square feet in an acre) which will give the number required.

ONE OF OUR SPECIALTIES

We are prepared to supply unrooted Grape Cuttings of all leading varieties of grape vines, in quantities to all those wishing to root their own vines. No orders for less than 5,000 of any kind however accepted, and parties ordering cuttings from us must send in their orders so as to reach us before January 1st, 1907.

We make our cuttings from established vineyards, and those entirely free from disease, insuring healthy stock in every particular.

Send in a list of your wants for quotations.

NOTICE.—All our stock is inspected by our local Horticultural Commissioner, and a Certificate of Health accompanies each shipment.
