DESCRIPTIVE PRICE=LIST

OF . . .

NURSERY STOCK

SIoux CITY NURSERY AND SEED CO.

SIoux CITY, IOWA.

This PRICE=LIST is our AGENT.

It promises that you will get

Good Stock, true to name and low prices.

This **Price-List** tells you of fruits, trees, etc. as they are, and not what they are imagined to be. In the **best of times** it is hard enough to pay the high prices asked by **traveling agents**. In these **hard times** it is out of the question.

Why do you pay **agent's prices** when you positively can get the **very best stock** of us at **one-half** the cost. Convince yourself by examining **our prices** and compare with **agent's prices**. It costs 50 per cent. to sell through agents. When you buy **direct of us** you will get **just what you order**, and if mistakes are made we stand ready to correct them.

TIME OF SHIPMENT. We can ship from about March 25th to the close of the season. **ORDER EARLY.** We are certain to be short on **VERY MANY KINDS** of stock before the close of the season. You had better order us to book you for what you want **EARLY**. **FIRST COME, FIRST SERVED.** You can order stock booked, and pay for it when you want it shipped.

PAYMENT. Our terms are strictly **CASH**, before shipment, unless parties are favorably known. We refer you to any bank or business man in **Sioux City** as to our reliability.

CAUTION. Write your name and address plainly. Instruct us whether to ship by **FREIGHT OR EXPRESS**.

FREE. We make no charge for boxing or drayage.

VARIETIES. We wish to call the attention of our patrons to this very important fact that we are only propagating and offering new varieties the **VERY BEST AND HARDEST** known. This list is yet very short. There are many nurseries that are selling at **FANCY PRICES** to the trade that, in **NINE CASES OUT OF TEN** are valueless. The place to test the value of new varieties is in the **NURSERY** not on the **FARM**.

Nursery Stock by Mail . . .

To accommodate our patrons who do not get their mail at railroad towns, and to save express on small orders, of roses, shrubs, small fruits, etc. we have a **mail department** but we shall only mail the following kinds of stock, and in orders running from about 50 cents to \$2.00: Dewberries, Raspberries, Blackberries, Currants, Juneberries, Huckleberries, Gooseberries, Strawberries, Rocky Mountain Cherry, Grapes, Roses, Shrubs, Climbing Plants, Seedling Evergreens. In remitting, don't fail to add to the prices in the list at the rate of 10 cents for each \$1.00 of order to pay postage. If your order is 50 cents, send us 55 cents; if \$1.00, send us \$1.10, etc. Small stock can be sent just as safely by mail as by express.

What a few of our Patrons say of us.

DON'T UNDERSTAND.

ODEBOLT, IOWA, Nov. 19, 1895.

SIoux CITY NURSERY AND SEED CO.

GENTLEMEN:—I take pleasure in stating that I have been planting nursery stock bought of you for the past four or five years, and I have always found stock to be first-class and true to name. Your packing is the very best. I cannot understand why planters continue to buy of traveling agents when they can buy direct of you for fully one-half.

Very respectfully, H. B. SMITH.

FARMERS OF DAKOTA.

ORIENT, S. D., Nov. 25, 1895.

SIoux CITY NURSERY AND SEED CO.

GENTLEMEN:—We have bought trees from you for six years, and they have given the very best of satisfaction. We cannot recall an instance where they have not done well. We believe your stock is the very best for the farmers of Dakota. Yours respectfully, CONWAY BROS.

WELL PACKED.

YALE, IOWA, Nov. 23, 1895.

SIoux CITY NURSERY AND SEED CO.

DEAR SIR:—Having bought your nursery stock for two seasons, we heartily recommend it to anyone wanting anything in that line. The goods have always been well packed, hence have arrived in splendid condition, and given excellent satisfaction. Truly yours,

DEARDORFF & DEARDORFF.

CORRECT ERRORS.

ELDORA, IOWA, Nov. 22, 1895.

SIoux CITY NURSERY AND SEED CO.

GENTLEMEN:—From an acquaintance in a business way of three years I am well satisfied with the firm and with the nursery stock bought of you, and will also say I have found your firm ready to correct any errors in a very liberal way, and your prices are right.

Yours truly,

J. W. BUCHANAN.

PEAR or RUSSIAN APRICOT same sizes and prices as Plum.

We carry in FULL STOCK the following varieties, but have other varieties in SMALL LOTS. If the purchasers will leave to us the selection of varieties we will exercise great care in selecting only those suited to their latitude. We have in

APPLE—SUMMER—Duchess, Yellow Transparent,—FALL—Wealthy, Snow, Tetosky, Jonathan,—WINTER—Ben Davis, Wine Sap, Walbridge, Pewaukee, Haas, Mann, Perry Russett, Talman Sweet, Iowa Blush, R. Janet.

CRAB—SUMMER—Whitney,—FALL—Nartha, Transcendent, Red Siberian, Golden Beauty,—WINTER—Hyslop, Soulard Briar Sweet.

CHERRY—Early Richmond, Olivet, Wragg, Ostheim, English Morello, Large Mont.

PLUM—Wild Goose, Minor, Wolf. DeSoto, Weaver, Forest Garden, Pottawattamie, Hawkeye.

PEAR—Keifer's H., LeConte.

The varieties of Apple, Crab, Cherry, etc. printed in black letters are the best and hardiest.

DON'T FAIL TO SEE OUR PRICES AND DESCRIPTIONS ON RUSSIAN APPLE, PEAR, CHERRY, ON PAGE 3.

HARRY KAUMP APPLE.

Originated in Wisconsin. This is without doubt one of the best and hardiest apples propagated today. It comes into bearing early and is a continuous bearer. Fruit medium green with show of color on sunny-side. Mildly acid, and unsurpassed for dessert uses. Late fall and early winter. After the Duchess we consider this the next best apple for Dakota, Iowa and Southern Minnesota. You will never regret it if you buy a half dozen of these trees for family use

4 to 5 ft. 25c. each; six for \$1.00.

ROOT GRAFTS.

APPLE OR CRAB,			
100	500	1000	5000
\$1 00	\$4 00	\$ 6 00	\$25 00
CHERRY OR PLUM,			
100	500	1000	5000
\$1 50	\$7 00	\$13 00	-----

We cannot accept orders for ROOT GRAFTS later than March 20. Grafts should be planted just as early as possible. We offer the leading varieties.

The . . . Wragg Cherry.

Is one of the most promising novelties in the fruit line. It is a sturdy grower and immense bearer of large, handsome, dark colored fruit. Is one of the VERY HARDEST cherries, and is especially desirable in the north.

THE WPAGG CHERRY.

DESOTO PLUM. The hardest and best plum known. It is placed at the head of the list by all horticulturalists in the northwest. Fruit red, and quality excellent.

OSTHEIM. One of the hardest of cherries. Brought from the nurseries of Dr. Regal, of St. Petersburg, Russia. Fruit large, flesh liver colored, tender, juicy and sub-acid.

The fruit is large size, deep red, having very small pit, which separates readily from the flesh. Very rich to the taste, with none of the wild flavor perceptible in the Wild Goose. We offer a nice stock of this plum for this season.

HAWKEYE. Very large; color light mottled red, superior of quality, firm, carries well to market. Tree hardy, thrifty, annual bearer.

EARLY RICHMOND. Medium size, dark red, melting juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is unsurpassed for cooking purposes, and is exceedingly productive. Ripens first of June.

Genuine Russian Stock. Newer Varieties.

Another season's fruiting has placed beyond all doubt that many of our RUSSIAN FRUITS have come to stay, and are worthy of confidence. The stock itself is hardy, and fruit excellent. We offer only the VERY BEST. OUR STOCK can be depended on as GENUINE. OUR PRICES ARE VERY LOW.

KIND	AGE	SIZE	EACH	10	25	50	100
RUSSIAN APPLE	2 yr.	4 to 5 ft.	15 cts.	\$1 25	\$3 00	\$5 00	\$9 00

"	3 yr.	5 to 6 ft.	40 cts.	3 50	7 50	14 00	25 00

Varieties:

- APPLE—Longfield, No. 161,** fruit yellow and tree very hardy, and free from sun scald. Most excellent for cooking. Annual bearer, season autumn.
- Hibernal, No. 378,** late fall. Extra hardy, fruit highly colored, heavy bearer, excellent market variety.
- Repka Malenka, No. 410,** late winter. Fruit medium size, and yellow; quality excellent, hardy as the Duchess.
- CHERRY—Vladimer, (25 Orel)** hardy and very valuable. Fruit black and as large as the Montmorency. Flesh firm, sweet and juicy. Plant deep.
- Lutovka,** hardy as an Early Richmond. Tree fine grower, fruit large dark red, flavor fine.
- PEAR—Bessemianka, No. 508** hardy on dry soil. Fruit medium size; nearly seedless. Flesh tender and juicy, excellent for dessert. Plant deep.
- Gakovska, No. 347,** very hardy on dry soil; can be grown far north. Valuable for cooking. Plant deep.

Dwarf Rocky Mountain Cherry.

ANOTHER year's experience with this fruit satisfies us that it is one of the most valuable fruits now offered. Without any hesitation we can honestly urge all our patrons to buy liberally.

From the Board of World's Fair Managers for Colorado.

HORTICULTURAL DEPARTMENT,
DR. ALEXANDER SHAW, Secy.
DENVER, COLO., Oct. 11, 1892.

To Fruit Growers:

This is to certify that I have seen growing in the nurseries and also fruiting on the grounds of Chas. E. Pennock, the Improved Rocky Mountain Cherry, and I regard it as a very remarkable adjunct, worthy of culture. I have eaten of the fruit and in form of jellies and marmalades, and pronounce it excellent.

ALEX. SHAW.

U. S. DEPT. OF AGRICULTURE,
DIV. OF POMOLOGY,
WASHINGTON, D. C. Jan. 6, 1892.

"I have seen the Dwarf Cherry, grown on Mr. Pennock's place, and in other places near Fort Collins. The bush is a most wonderful bearer. I have yet to see one that was not heavily loaded with fruit. The cherry is of the size of the Early Richmond, is black when ripe, is very free from insect injuries, and the fruit is good to eat out of hand as well as when preserved. I certainly consider this cherry a very valuable addition to our list of cultivated fruits for this locality."

PROF. C. P. GILLETTE.

The originator speaks of it as follows:—"It is the most productive fruit of which I have any knowledge. I have picked eighty cherries off a branch twelve inches long. The fruit is jet black when ripe, and in size averages somewhat larger than the English Morello, the season of ripening being after all others are gone. In flavor, it is akin to the sweet cherries. It has the best system of roots of any shrub or tree I have ever planted, which accounts for the wonderful productiveness of plants at such an early age. It bears every year, and is prolific as a currant bush. Grows to a height of four feet, and has never been affected by insects, black-knot or other disease. Valuable for pies, sauce or market purposes. It makes a handsome flowering bush with its mass of pure white flowers."

Ripens in August. Don't use until very ripe.

SATSUMA.

JAPAN PLUMS.

There is no longer any doubt about the hardiness, bearing and quality of these new plums, especially when planted on high dry soil. Trees that fruited here this year were the wonder and astonishment of scores of people who saw the full-fruited trees. They are positively from one and one-half to twice as large as our native plums. Quality equal to the European varieties. Trees are magnificent growers, fine upright form. Come into bearing early, have a very small pit. While they are called Japan Plums, they in fact come from the highlands of Northwest China.

To the Sioux City Nursery and Seed Co.

GENTLEMEN:—I purchased from you two years ago a Japan Plum, (Prunus Simon) two years old, and planted it among a number of native plums of the same age. This tree has proven as hardy as the others, and this year fruited fuller than they. The quality of the fruit is of the very best. My soil is high bluff land.

Respectfully,
I. P. CUMMINGS, Druggist, Sioux City, Ia.

SIoux CITY, IOWA, Nov. 10, 1893.

Varieties of Japan Plums.

SIMONS PLUM.

(Also called Prunus Simoni.) The leaves and bark look like the peach, while the fruit resembles an apricot. It is a perfectly hardy tree from Northern China. Has a peculiar aromatic flavor not found in any other plum. Very desirable both for fruit and as an ornamental tree.

ABUNDANCE.

Tree a strong and handsome grower, thrifty and hardy, commences bearing young, and annually produces a large crop of showey fruit in the greatest profusion. Large, red, flesh orange yellow, sweet, melting, juicy, and of most excellent quality.

BURBANK.

Another exceedingly valuable sort that is proving a bonanza to all planters. A very vigorous grower, usually producing a crop second year after transplanting. Large, clear cherry red, flesh a deep yellow, very sweet, with a peculiar and very agreeable flavor, hardy, one of the best.

SATSUMA.

Large, color purple and red with blue bloom flesh firm, juicy, dark red or blood color, fine quality, pit very small. Hardy and vigorous grower.

BURBANK PLUM.

AGE	SIZE	EACH	5	10	25	100
Trees 2 years old	4 to 5 ft.	30 cts.	\$1 25	\$2 25	\$5 50	\$18 00
Trees 2 years old	5 to 6 ft.	40 cts.	1 75	3 00	6 50	24 00

Small Fruit Department.

There is nothing that gives greater returns and more satisfaction than small fruits, and every family owning land from a lot to a farm should have a "patch of small fruits." It is a known fact that the climate and soil in Northwest Iowa produce the strongest and hardiest of small fruits. This is recognized by horticulturalists in the east and south, and many of them are either propagating or buying their small fruits from this section. It is undeniable that all kinds of small fruits propagated here are more vigorous, productive and hardy than those of the east or south.

Fay's Prolific. - - -

Decidedly one of the best currants in cultivation. Has been widely planted and given general satisfaction. It is a strong grower, wonderfully prolific and bears early. Fruit large, bright red, and of good flavor, and very uniform in size. It is THE BERRY for market or home gardens, and you cannot afford to omit it from your list.

See prices below.

STRAWBERRY PLANTS.

Plants marked (S) have perfect flowers and need no fertilizing. Those marked (P) need a plant marked (S) to fertilize them.

PARKER EARLE (S.) Undoubtedly the best new variety offered for ten years. Very vigorous, remarkably productive. Stands drouth well.

Fruit medium to large. Plants extremely large. Does well on any soil.

WARFIELD (P.) A variety that is very likely to supercede the Crescent, which it rivals in yield and excels in size, beauty and firmness. Plant is a vigorous grower of bright, healthy foliage. Fruit large, dark red, excellent for shipping. Bederwood is a fine fertilizer for this plant.

BEDER WOOD (S.) By some considered the very best early berry. Immensely productive, healthy grower. Fruit large, bright red, excellent quality. For near market and home use this will be one of the most satisfactory. Excellent fertilizer, especially for the Warfield.

ROBINSON (S.) One of the best fertilizing plants known. Fruits heavy, berries perfect; larger than Crescent. Good shipper, plants bright and clean, no rust.

BUBACH, No. 5, (P.) This berry combines great and uniform size; fine color, with unsurpassed productiveness and good quality of fruit. The leaves are very large and the hottest sun does not appear to effect them. Carries every blossom to a perfect berry. In vigor of plant and yield of fruit it is wonderful, even under careless culture.

HAVERLAND (P.) Plants are very large, vigorous, and ripen their fruit evenly and early holding on through the season. Fine in shape, very large, excellent flavor, and bright red.

GOVERNOR HOARD.

Governor Hoard

Very heavy fruiter, fine, large size, roundish brilliant red, good shipper, fine plant to fertilize with. We consider this among the very best we are offering.

Prices of Strawberries.

	25	100	500	1000
Crescent, Warfield, Jas. Vick,				
Sharpless	25 cts	\$ 80	\$3 50	\$6 00

Parker Earle, Gov. Hoard,				
Robinson	40 cts	1 25	5 00	9 00

Please do not order fewer than twenty-five of one variety as we do not break bunches.

GOLDEN QUEEN. A beautiful large golden yellow berry, seedling of the Cuthbert. Beauty, quality and adaptability succeeding in all sections. Canes hardy, of strongest growth, wonderfully productive.

MARLBORO. Has proven to be one of the hardiest, earliest and one of the best carrying red varieties known; brighter red in color, firm and hardy. Fruit very large and very productive. The largest early red raspberry yet introduced.

CUTHBERT. A remarkably hardy variety, stands the northern winters and southern summers equal to any. Berries very large, measuring three inches around; conical, rich crimson, and so firm they can be shipped hundreds of miles by rail in good condition.

SHAFFER'S COLOSSAL. Colossal both in bush and berry; carries to market well, excellent to dry and unsurpassed for canning. Berry dark crimson in color, and excellent in quality; a very valuable variety; does not sucker, but roots from the tips like Black Caps.

SNYDER BLACKBERRY

Extremely hardy, enormously productive, medium size; no hard, sour core, nor half as many thorns as Lawton's or Kittatinny, and they are nearly straight, and short. The most prolific blackberry grown.

TURNER. The Turner is valuable on account of its early ripening and fine quality. It is full medium size, and of fine red color. The bush is very hardy, standing uninjured where many varieties have winter-killed outright.

Testimonial from I. N. Stone, Sioux City, Iowa, one of the largest and most successful small fruit growers in the northwest.

"Another season's experience with Bartle's Dewberry has demonstrated to me and all who saw it by the side of other varieties on my grounds that it is of great value in the northwest, and all thought it better than any other dewberry both as regards quality and productiveness. I consider it better than any blackberry for the prairies or any dry or cold climate, as winter protection can be so easily given it.

There is nothing in the small fruit line that will carry its fruit through a severe drouth as well as the Bartle's Dewberry, or is longer lived. With good care it will fruit heavily fifteen years on the same ground without being reset. My fruit crop from the Bartles this season net me double any other berries I grew (on the same area) for market."

Bartle's Dewberry.

OHIO. The greatest producer among Black Caps, and for canning and evaporating claimed to be the most profitable of all sorts. Berries not quite as large as Gregg, but of finer quality and the plants more hardy and will bear more successive crops.

I. N. STONE.

GREGG RASPBERRY.

Gregg Raspberry.

The largest of the Black Caps, fine flavored and very hardy: superior for table, valuable for family use and also a good shipper.

Houghton Gooseberry.

A medium sized American variety which bears abundant and regular crops, and never mildew; fruit smooth red, tender and good; very valuable and very hardy.

HOUGHTON GOOSEBERRY.

The North Star Currant.

"The North Star Currant" is an accidental seedling, probably of the Victoria; as, like that variety it is seldom affected by the borer. Notwithstanding its great vigor, it has proved to be hardy wherever tried, without a single exception. Single berries of the short bunched Cherry Currant can be grown to a larger size than the North Star, but the average bunches of latter are much heavier, while in quality the fruit is less acid and more agreeable to eat out of hand than the Cherry, or any other common variety.

The ability of currants to produce fruit is measured by the length of the new fruiting wood annually produced. The average growth of the wood of the North Star is from three to four feet. Before offering the North Star to the public we gave it a thorough test. Its rapid growth and prolific fruiting gave us confidence that it would prove to be the most desirable currant yet introduced, and we are now satisfied that the North Star Currant is, without exception the most rapid grower, the most prolific fruiter and best in quality of any red currant grown anywhere. The commendation and testimonials of our customers are the best possible evidence of its superiority.

What are the claims of the North Star? Extreme hardiness, early and abundant fruiting and a strong grower, berries do not shell and drop off, most prolific fruiter, a sure cropper and the sweetest and best red currant on earth. You will make no mistake in buying the North Star if you want the BEST RED CURRANT GROWN.

Plants 2 yr. each, 25c; six for \$1.00; one doz. \$1.75.

Crandall Currant.

A native black seedling of the western wild currant, and much superior to any of the named varieties yet introduced; distinct from the European black varieties and without their strong odor. Wonderfully productive, a strong, vigorous grower, large size, one-half to three-quarters inch in diameter; easily picked, can be shipped farther and kept longer than any other small fruit. Free from all attacks of insect enemies. Plants 1 yr. strong, 25c each; six for \$1.00; one doz. \$1.75.

COLUMBIAN MAM. WHITE.

GARDEN ROOTS.

Every garden should have a large bed of Asparagus, Rhubarb and Horse Radish. They always grow, never freeze; the first to come in the spring and require but little and will last a lifetime. The soil should be made as rich as possible.

KIND	12	25	100	500	1000
ASPARAGUS—Columbian Mam. White, 30 cts.	12	25	100	500	1000

Barr's Mammoth..... {	75 cts	1 50	5 00		
RHUBARB or PIE PLANT.....	50 cts	1 00	3 00		
HORSE RADISH.....					

COLUMBIAN MAMMOTH WHITE. This is a valuable, new and most distinct variety, first discovered on Long Island a few years since. The stalks are very large, producing abundantly and very early. They are a beautiful, clear white and remain so, in favorable weather. The crown or bud of the young stock is considerably smaller than the part just below it; thus still further distinguishing the variety. This sort has been grown by a few Long Island growers who have been realizing an extra price, not only on a fancy market but from canners, who find that when put up, under a special brand, it sells so readily at a high price as to warrant them paying the grower an extra price for it.

BUFFALO BERRIES. They make excellent jelly, butter, sauce and wine and to serve with sugar and cream are nearly equal to strawberries. They ripen in July and hang on the bush until nearly spring. They are excellent to eat from the bush after frost has come. They begin to bear when quite small and yield enormously. As the male and female blossoms are borne on different plants, they should be planted in clusters of six or more for best results. The fruit is round, smooth and glossy, resembles in size, form and color the cultivated red currant. Plant the Buffalo Berry for a winter supply of berries, as they are a most delicious fruit from December until March. Plants 20 to 24 in. 25c each; six for \$1.00.

NEW DWARF JUNE BERRY. We have brought before the public this most superb new berry. It is of the most ironclad hardness; it is a quick grower, forming dense clumps of bushes which bloom and bear heavily when only one or two feet in height. The berries being green in an unripe state, then changing to bright scarlet, and when fully ripe to a dark purple blue; and as three colors hang in clusters upon a bush they present a most charming and appetizing sight. Aside from its value as a fruit it is one of the most showy flowering shrubs, as it blooms very early in the spring; before leaves start, and every stem and branch of the bush is a solid wreath of delicate feathery whiteness, so numerous are the flowers. No garden is complete without this magnificent fruit. Plants 20 to 24 in. 20c each; ten \$1.50; twenty-five, \$3.00.

TREE CRANBERRY. Among the ornamental berry-bearing shrubs there are few superior, either for the beauty or for the usefulness of their fruit, to the Tree Cranberry, or, as it is often called, the High Bush Cranberry. And yet this useful and ornamental shrub has been singularly neglected, being confined, except in a few rare instances, to its native haunts in the north and east. It forms a symmetrical little tree under culture, and is a pleasing ornament on the lawn. Its juicy, acid fruit is of a bright red, and is used as an excellent substitute for the swamp cranberries. The berries hang on well to the grayish branches and present an effective appearance in winter. The shrub is well worth planting for ornamental effect alone, its excellent fruit makes it a profitable adjunct. Plants 2 ft. high 25c each; 5 \$1.00; 10 \$1.75.

NEW DWARF JUNE BERRY.

TREE CRANBERRY.

GRAPE VINES.

There is nothing in the fruit line that grows quicker, surer and with more abundant results than grapes. Vines have never been cheaper nor of better quality.

NIAGARA—White—hardy,	15 cts.	20 cts.	75	1 00	2 50	3 00	4 00	5 00	—	—

NIAGARA. This is the best white grape today. Extraordinarily vigorous grower, free from diseases. Perfectly hardy, bunches large and beautiful, quality good. Ripens five to eight days before the Concord.

MOORE'S EARLY. One of the best extra early grapes, ripening fully two weeks ahead of Concord. The berry is very large, entirely hardy and on rich soil very productive.

BRIGHTON. New, dark red, ripens with or before Delaware. Bunches large, long and shouldered, berries medium, skin thin, flesh tender, sweet and of best quality. Vine vigorous and fairly productive. A valuable and desirable grape for garden and vineyard.

WORDEN. A seedling of the Concord, ripens earlier; larger in bunch and berry, and better in quality. Without doubt the best black grape ever known. Vine very hardy and healthy. See price in list.

CONCORD. Bunches large, berries large; round, skin thick and covered with bloom, flesh juicy sweet. Vine very hardy, vigorous and productive. At present the most popular of all our native sorts.

RED MOSS.

2-Year Stock

Roses, Shrubs, Vines, Etc.

OUR ROSES are strong two-year old plants, grown out of doors one year. Please do not confound them with hot house plants 1-year offered in many catalogues at a lower price.

We offer only the leading and well known varieties that have proven **HARDY** and **GOOD BLOOMERS**. We recommend the following: **Hybrid Perpetual**, Gen. Jacqueminot, brilliant crimson; **Pau Neyron**, deep rose.

Climbing Roses . . .

Prairie Queen, bright rose; Seven sisters, purple crimson; Baltimore Belle, pale blush.

Moss Roses . . .

Red Moss, White Moss.

Summer Roses . . .

Persian Yellow, deep yellow and double.

YUCCA FILAMENTOSA.
(ADAMS NEEDLE.)

A tropical looking plant with long narrow leaves that remain green the entire year. It throws up a strong flower stem in the summer three or four feet high, bearing a large spike of creamy-white bell-shaped flowers that retain their beauty a long time; hardy. Very fine for cemetery.

Strong roots, 25c each; five, \$1.00.

HYDRANGIA PANICULATA GRANDIFLORA. This is one of the most hardy shrubs. It attains a height of 4 to 5 feet, and is perfectly hardy in all parts of the country. The flowers are white, borne in immense pyramidal panicles. It commences flowering in July and continues until November.

Plants 2 ft. each 25 cts., five for \$1.00.

Seedling Trees.

We call your attention to the great superiority of the nursery grown seedling over the river pulled. Grown in deep, rich soil, receiving thorough cultivation the roots are twice as large, and have many more rootlets. River pulled trees are pulled up; stripping off what few rootlets there may be, while the nursery grown trees being taken up with a tree-plov the rootlets are left on. It is not claiming too much to say that nursery grown trees are worth more than double the river trees. Our seedlings are nursery grown except cottonwood.

We guarantee FULL COUNT and HEALTHY TREES.

The length of our seedlings does not include the roots, but is from the ground up.

Tea's Weeping Mulberry.

... The most graceful weeping tree in existence. Wholly unlike anything heretofore introduced. Forms a

umbrella shaped head with long, slender willowy branches drooping to the ground. It is hardy, enduring the cold of the north and heat of the south; safe and easy to transplant. Admirably adapted for ornamenting small or large grounds or for cemetery planting.

Shade Trees!

We have without doubt the finest line of shade trees in the west. We have them in large quantities, too. They are all nursery grown, have been thoroughly cultivated, carefully pruned, are straight, smooth and well branched and have large roots. They are all transplanted stock. We invite correspondence with Park, Cemetery and Street Committees and all others wanting fine shade trees.

SPIREA VAN HOUTII. We can say positively that this shrub is not only the most beautiful of the Spireas, but that it is, without question the most attractive lawn shrub for the northwest known. It has pure white flowers in large clusters. Astonishingly profuse in blooming, very vigorous and hardy. Blooms in May. **Shrubs 2 to 3 feet, 25 cts., five for \$1.00.** If you only buy one shrub buy this one.

JAPAN QUINCE. This is one of the finest shrubs for the lawn. Needs no protection. Flowers delicate white and blush. Blooms last of April. Each, 25 cts. five for \$1.00.

WISTARIA This is one of the most popular of our hardy vines, growing very rapidly; climbing to a height of fifty feet or more. When in full bloom is truly magnificent. It flowers in early spring in long drooping racemes, resembling in size and shape a bunch of grapes. **Strong roots, 25c; five for 80c.**

SYRINGA A very hardy shrub; flowers white and sweet scented. Blooms early. **Plants 2ft. each 25c; five for 75c.**

BULBS AND ROOTS

For Spring Planting.

BLEEDING HEART. (DIELYTRA SPECTABILIS)

Graceful sprays of heart shaped pink and white flowers, blooming in May or June. Foliage finely cut and very beautiful. Strong clumps, each, 20c; 3 for 50c; doz \$1.50.

BLEEDING HEART.

LILIUM—AURATUM.

The Cinnamon Vine.

It is the most beautiful and charming of all climbers and will quickly cover an arbor, window or veranda with a great profusion of vines covered with sweet scented flowers, making it a perfect bower of beauty. This vine is perfectly hardy and once planted will grow for many years, filling the air with the most delicious fragrance; a source of constant delight to every possessor. There is nothing will give a home a more homelike and cosy appearance or be a surer index to culture and refinement than beautiful vines twining about the porch and trellises.

Strong Roots, 15c each; six for 60c; doz \$1.00.

PLANET JR COMBINED DRILL, WHEEL HOE,
RAKE AND PLOW,

This does everything
a Gardner wants done.

SELLS ITSELF.

Price, \$9.00.

Aren't
You
Tired?

Trying to meet falling prices by rising earlier and working harder? You might as well stop—it's not to be done that way. Get tools that will do a week's work in a day, and raise three bushels in place of one. The PLANET JR. Farm tools will do it. One single tool combines a hand drill, plow, cultivator, rake, and a wheel hoe will beat six men. There are twenty others as good. SEND FOR THE PLANET JR BOOK (its free) AND GIVE YOUR MIND A DAY'S WORK.

We have this year secured the exclusive sale of PLANET JR. goods in territory contingent to Sioux City, and consequently have laid in LARGE STOCKS and can supply you with any tool or repair at a moments notice.

Give us a chance
We will do the rest.

SIoux CITY NURSERY AND SEED CO., Sioux City, Iowa.
