Flower Seeds, Bulbs AND Plants.

*"There are treats of
every kind,
But in all the world
you'll find
Naught so good as what
you've grown
In a garden of your
own."*

Japanese Imperial or Giant Morning Glory.

- - From the Land of the Mikado. - -

THE seed of these new Mammoth Morning Glories we import direct from Japan. They are a new race, wonderful in size and beauty. Flowers often grow six inches across. Beside the flowers being of immense size the colors are new, beautiful, and strange. Ashy grey bordered with red, purples marbled with black streaked and marbled with all conceivable beautifully fringed.

Pkt. 8c., 4

DUTCHESS COUNTY,

HIBERNIA, NEW YORK.

CHINESE SACRED LILY.

THIS magnificent Lily can be had in full bloom 4 weeks from time of planting in water or soil, and can be kept back for late blooming until May 1. Keep bulbs dry in a cool place until you want to flower them. For Easter, or any gatherings where floral decorations are wanted, nothing is more easy to procure at the proper time than this beautiful plant.

The bulbs I supply are the *true large-flowering variety* from the Yalu River. They give from five to twelve spikes, which bear clusters of large, perfect, waxy-white blossoms, with a yellow center, and of a powerful and delightful fragrance. They grow well in pots of soil, but the most popular way of blooming them is the Chinese method. Fill a bowl with pebbles, in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of the pebbles and place in a warm, sunny window. The bulb will at once commence a rapid growth and bloom in three or five weeks. The bulbs are so large, and have so much vitality, they can be kept perfectly dry all winter and planted a month before flowers are desired.

Price for large bulbs 12 cts. each, 2 for 30 cts., 6 for 50 cts.

BERMUDA EASTER : LILY. :

THE most superb Lily known and the most satisfactory for forcing for winter bloom, Church or house decorations. Bulbs planted now will be in full bloom in early spring, or they can be started in pots to bloom early outside, or planted in the ground in early spring for summer bloom. The bulbs can be flowered in the house next winter after having bloomed outside in summer.

Those who have never grown this Lily should try it. Those who have are sure to.

Large, pure white, trumpet-formed flowers of great beauty and fragrance; as a winter bloomer nothing can surpass it. Plant in six to eight inch pots of good soil and set away in a cool, dark place to form roots like other winter-blooming bulbs. It is impossible to describe the charming beauty of this Lily as a pot plant. It requires about three months from time of potting to bloom. Large bulbs 6 cts. each, 50 cts. per dozen. Extra large bulbs 12 cts. each.

BERMUDA EASTER LILY.

Dwarf Calla Little Gem.

The great value of this over the common Calla Lily lies in its dwarf habit and freedom of bloom. It rarely exceeds 12 inches in height and blooms most abundantly. The flowers are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. It is in every way superior as a house plant to the larger growing variety.

15 cts., 2 for 25 cts.

.....

Ethiopica, Lily of the Nile.

Superb white flowers, produced for many months in succession. I have large bulbs in the best condition for winter blooming. 10 and 25c. each according to size.

Canna Star of '91.

THE EVER-BLOOMING CANNA—A very dwarf Canna, which will show bloom every day in the year, often as large as a man's hat, and of the most intense fiery scarlet color, rayed and bordered with pure gold, is a novelty of an entirely new departure. As a pot plant for blooming, both summer and winter, this Canna is a novelty. The enormous panicles of flowers which are borne continually even on plants only a foot or two in height and in small pots is, indeed, marvelous, and the intense color of the blossoms make such plants objects of the most effective beauty. The finest of all winter-blooming plants, and as a garden flower nothing can surpass it. Fine roots 15c. each, 3 for 30c.

SPOTTED LEAF CALLA—The flowers are pure white with a dark throat. Its dark, rich, green foliage is marked and dotted with light spots, making it a highly ornamental plant, even when not in bloom. A very valuable decorative plant either grown out in the garden in summer or in pots. 15c each. 2 for 25c.

LITTLE GEM CALLA.

New Black Calla.

A magnificent variety, with very large flat tubers, resembling those of the well-known tropical Caladiums. Wavy and very large leaves of a rich green color; flowers are enormous, fully a foot in length and broad; color clear coal-black, so intense that it really shows a brilliancy, and as may well be imagined, it is a flower of the most striking oddity and beauty. Large bulbs 15c. each.

BLACK CALLA.

CALADIUM—The well known Elephant's Ears. 15c. each. 3 for 40c.

FANCY LEAVED CALADIUMS—25c. each. 3 for 50c.

Amaryllis.

These and the Crinum are becoming more and more popular owing to their ease of culture and freedom of bloom. The Amaryllis likes best a mixture of a little sand with loam; *avoid stable manure*. Give warmth, light and water freely. But do not pour the water directly on the bulb, better set the pot in water and let it soak up from the bottom. After blooming and leaves turn yellow set away in the pot to dry and rest until again wanted to bloom.

FORMOSISSIMA.—This odd shaped flower is of a handsome deep velvety-red color that in the sunshine shows a golden gleam. A more beautiful color cannot be imagined. This is the easiest to grow and quickest to bloom of all Amaryllis. Said to bloom well in water like Hyacinths. 15 cts. each, 4 for 50 cts.

EQUESTRE—A beautiful combination of orange, red and green, a most charming flower. 15 cts. each, 4 for 50 cts.

JOHNSONII—The most popular, because best known. Intense crimson with white stripe, 25 to 40 cents each for large and extra large bulbs.

Crinum.

Great interest is now taken in these magnificent bulbs, as people learn their great beauty and how easily managed. Treat same as Amaryllis.

KIRKII—The most familiar and greatest favorite. Bears quantities of large flowers, shaped like a lily, purest white, flushed with pink and a deep pink stripe in center of each petal. This is also called Crinum Ornatum, but no matter what the name, it is one of the loveliest and sweetest of all flowers. 25c. to 50c. each for finest bulbs.

SCABRUM—A new variety, even finer than Kirkii. Bulbs are larger and flowers more delicate and exquisite. The six broad petals are a sparkling white, with a light red stripe down the outside, and on the inside a delicate pink blush. A most satisfactory and ideal pot-plant, being managed with large bulbs, 40c. each. Some weighing over pound each at 60 cts.

CRINUM KIRKII (OR ORNATUM.)

perfect ease, and will certainly delight all who see it. Very

... Six Best New and All Around Roses for \$1.00 ...

Champion of the World. Most valuable—the champion for hardiness, vigor, profusion of bloom, fragrance, form and color. Perfectly double flowers, rich rosy pink. 20 cents each, 3 for 50 cents.

Crimson Rambler. The greatest Rose ever introduced; received all the highest awards ever conferred upon a Rose. Strong grower, 10 to 12 ft. in a season, rich dark green foliage, remaining fresh until December; numbers of large clusters deep crimson flowers. Sure to give satisfaction. 20 cents.

Clotilde Soupert.

Extremely hardy; a grand bedding rose, the flowers of medium size, perfectly double, pure white with deep pink centre, fine foliage. 20 cts.

Jewel. The Rose of Many Colors. The plant being actually laden with buds and open flowers, embracing all the colors of the rainbow—yellow, buff, pink, rose and crimson with all intermediate shades. 25 cents.
