Juicy.—"This new Plum is a cross between Abundance and Robinson. The fruit is the size of the former and of perfect shape. Skin thin and transparent, light yellow, underlaid with scarlet—as beautiful as wax. In quality it seems to us that there is no other fruit which can approach it. Has a delicious sweetness, mingled with a sprightly acid, and a high melting plum flavor, surpassing anything we ever saw. When fully ripe it is so juicy that when the skin is broken its delicious pulp flows out like honey. The tree is a hardy rank, luxuriant grower. It blooms so late in Spring that frost never injures the crop. In this respect it is valuable beyond estimate."—J. H. BLACK & SON'S Co.

Note prices on 9-16 to ¾, and ½ to 9-16 grades. These medium grade trees are plump, up to height and caliper—good value.
