“MIELLEZ’S REVELATION”—In *Lily of the Valley*. It is of extraordinary size and vigor, of the most exquisite fragrance, and does well under all conditions and all sorts of soils, growing just as well in full sun as partial shade, and is extremely hardy, and while not increasing quite as fast as the common kinds is still of good increase. It is well to cover it in December with a good coat of barnyard manure—cow or horse—green is just as good as old. Leave it in the spring to serve as mulch. The Massachusetts Horticultural Society awarded it a “First Class Certificate of Merit” on May 22d, 1897. \$1.00 per dozen.
