 WHOLESALE TRADE LIST

THOMAS MEEHAN & SONS

P. O. STATION G

Germantown, Philadelphia, Pa.

NOTICE TO CUSTOMERS.—In ordering stock sent by mail, add ten cents on every dollar for Deciduous Trees, and fifteen cents for Evergreens, to prepay postage. For seeds, ten cents per pound. Parties are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment; but in no case do we assume any responsibility after the goods are shipped, unless for our own mistakes.

TERMS.—In all cases cash, on or before delivery to express or railroad agents, unless by special arrangement. Two hundred and fifty, twenty-five and five, will be furnished at the thousand, hundred, and ten rates respectively. Packing charged extra.

Post-Office Orders Payable at Station G, Germantown, Pa.

Our Retail Catalogue is complete and will be sent to all applicants.

Visitors are always welcome, and should take train at Twelfth and Market Streets, Philadelphia, for Chestnut Hill, getting off at Walnut Lane Station;—or at Broad and Filbert Streets, getting out at Carpenter Street Station. Trains run every half hour, both ways. Cabs at both stations. The Eighth Street Electric Cars come to within two squares of our Nurseries; leave cars at Church Street, (Pelham), Germantown.

Deciduous Trees.

"TR" SIGNIFIES THAT THE STOCK HAS BEEN ONCE OR MORE TRANS-
PLANTED, "S" THAT IT IS STILL IN SEEDLING BEDS, "C" ROOTED
CUTTINGS THAT HAVE NOT BEEN TRANSPLANTED.

JAPANESE MAPLES.

These Maples thrive throughout the New England and Middle States, and in Ohio, Indiana and Illinois, excepting in such locations as are exposed to the severe winds from the great lakes.

The *Polymorphum atropurpureum* has been the most extensively planted up to the present time; but we have been propagating other sorts more largely of late years, and we now offer some of the most choice varieties. These will be found equally as hardy as the polymorphum atropurpureum, and should be extensively planted. An assortment of the different varieties make a very attractive group.

The *Polymorphum* and *Polymorphum atropurpureum* are on their own roots,—the others are grafted,—not imported plants. We have never been able to successfully grow imported stock.

CORNUS FLORIDA, WHITE-FLOWERED DOGWOOD.**CORNUS FLORIDA RUBRA, RED-FLOWERED DOGWOOD.**

The flowering Dogwood is recognized as one of the most useful and indispensable small sized trees, not only for planting on the lawn, but for massing and bordering in park and cemetery work.

In nearly every park it will be found in the greatest quantities, —more of it being used than of any other semi-tree.

The large flowers in the spring, succeeded by bright scarlet berries and later the brilliant crimson leaves, make its use necessary in all plantings.

The RED-FLOWERED DOGWOOD is equally as hardy as the White-Flowered variety, its only difference being in the color of the flowers.

JAPAN JUDAS, *Cercis Japonica*.—The Japan Judas is not known as well as it should be, though it is unquestionably one of the finest and most beautiful shrubs in cultivation. The flowers are pink, and they completely cover the bush the first thing in spring. It makes a bush about the size of a Lilac; and is used for planting among the larger shrubs in beds or as single specimens. The flowers are darker pink than those of the native tree growing Judas. For Prices see page 6.

JAPAN SNOWBALL—*Viburnum plicatum*.

That this is one of the most beautiful and popular shrubs there is no question. Our stock consists of many thousand plants. It is far superior to the old Snowball in every respect. It does not straggle about; the leaves are of a beautiful dark green color all summer and right up until frosty weather. The young shoots have a coppery color, which is quite conspicuous. It is a plant that every nurseryman and dealer should offer in his catalogue. This electrotype furnished to purchasers of plants free of charge, when asked for. (See page 25.)

TO THE TEACHER:

Please hand the enclosed yellow slips to some of your bright boys and girls who could take orders for our new Map of Cuba.

This new map is 34x16 inches, handsomely engraved in colors, showing in relief a bird's-eye view and giving authentic facts and figures relating to the resources and value of this important island. It will sell at sight and we need hundreds of little salesmen in every city. Sample will be mailed on receipt of ten two-cent stamps.

We also handle all kinds of school supplies and will gladly make special prices direct to teachers on any article desired.

Yours truly,

STANDARD SCHOOL FURNISHING COMPANY,
45 and 47 Jackson St., Chicago, Ill.

OUR RETAIL CATALOGUE

of Trees, Shrubs, etc.

WILL BE SENT FREE TO ALL APPLICANTS

.. RAFFIA ..

We can at all times supply our customers with this excellent tying material, for budding, grafting, etc., in large or small quantities. Raffia is now so well known by the trade, that it is unnecessary to give much description. It is almost unanimously declared to be the most economical and convenient material in use. A trial will convince any one of this. **It does not require wetting before being used, as does bass-bark.**

PRICE VARIABLE

FRUIT SEEDS

Native and French Crab, Pear, Myrobolan Plum, Mazzard Cherry, and Tennessee and Virginia Natural Peach. Prices on application.

IMPORTED AND NATIVE FRUIT STOCKS

We have for years conducted importations of Fruit Seedlings for budding and grafting, and the experience gained enables us to secure the best stock and handle it in the best manner. We invite correspondence on the subject, when we will gladly make quotations.

CORNUS FLORIDA RUBRO

(Red Flowered Dogwood)

This is a tree that should be used largely in all plantings either as a single specimen or in large masses, and Nurserymen and Dealers would find it a most satisfactory plant to grow and offer their customers.

The flowers are not red, but a bright pink, and in the Spring when the tree is covered with these flowers it is a most attractive object.

For Park and Cemetery planting it has become a universal favorite and we sell large quantities annually for this purpose.

See prices, page 6.

LIGUSTRUM OVALIFOLIUM

(California Privet)

We have an immense stock of this plant suitable for hedging purposes,—both in one, two and three year old cutting plants and in transplanted stock. Our prices on these are very reasonable. See page 19.

RHAMNUS CATHARTICA

(Carolina Buckthorn)

Note our price on this **Hedge Plant** on page 21. Our seedling plants are stocky and just suited for hedging purposes.

JAPAN SNOWBALL (*Viburnum plicatum*)

A new variety of Snowball from Japan. Growth upright and compact. Foliage, olive green through the summer, but toward fall it turns much darker and remains on the plant for some time after the first frosts. Flowers, though hardly as large as the old variety, are much more numerous. The leaves are in pairs along the stem, and from the base of each leaf a ball of flowers appears. There are often as many as ten pairs of these, or twenty balls, on a branch eighteen inches long. These balls, as they expand, all face upward, so that a full view of their great beauty is always to be had. To be a universal favorite a shrub must be hardy, easily transplanted and its growth of good shape and beautiful both in leaf and flower, and the Japan Snowball embraces all of these points to the fullest extent. See page 25.
