NEW CROP SWEET PEAS.

ECKFORD'S NEW MAMMOTH FLOWERING.

CHOICEST MIXED. The mixture is made by us, and is made up in equal proportions of each of over 40 varieties—thus assuring customers of getting all varieties and not too many of any one surplus color. 1cc. per oz.; 15c. per $\frac{1}{4}$ lb.; 40c. per lb.; 5 lbs. for \$1.75; \$30.00 per 100 lbs.

For Separate List of Named Varieties see page 4.

SEMPLE'S BRANCHING ASTERS (Semple's True Strain) from a photograph.

Aster ..Seed

Should be sown in April and May for late crop. Good prices are usually obtained from Asters blooming in September when few other flowers are in their prime. Our stock of Aster seed is the best that is grown. Customers may rely upon deriving good results. For varieties and prices see next page.

NOVELTIES IN FLOWER SEEDS.

CANDYTUFT, LITTLE PRINCE (*Iberis Coronaria Princeps*)

(BENARY).

Candytuft, Little Prince.

It is from the beautiful Empress Candytuft that I have obtained this most charming new dwarf variety. Though only half the height of the parent—say 4 to 6 inches—it forms just as massive spikes of large pure white flowers. This new Candytuft is of an extremely robust constitution, and continues considerably longer in full bloom than the Empress. When planted in masses it produces a splendid snowlike effect; for groups and borders also, and as a pot plant this novelty will be of grand service. The numerous visitors to my grounds this summer were greatly struck with its unique beauty.

Per original pkt., 20c.; 3 pkts. for 50c.

P. S.—I CAN VERIFY THE ABOVE DESCRIPTION AS STRICTLY RELIABLE having personally admired this valuable novelty while visiting the seed farms in Erfurt this past summer.

H. F. M.

Petunia Grandiflora "Miranda".

PETUNIA, Large-Flowered Fringed "MIRANDA"

(*Petunia hybrida Grandiflora fimbriata.*)

Per original pkt., 20c., 3 pkts. for 50c.

Chrysanthemum carinatum "Chamaeleon."

Chrysanthemum

Carinatum

(tricolor)

Chamaeleon.

Large-flowered new variety of this showy annual, so valuable for its yield of cut flowers. The different colored flowers on one plant produce a beautiful contrast. Exceedingly effective when planted in groups, and of great value for cutting purposes.

Per original pkt., 20c.; 3 pkts. for 50c.

Petunia Hybrida "Adonis."

Petunia Hybrida

"Adonis"

The flowers are adapted to all purposes: bordering, groups or single pots. The color is a fiery carmine, reflecting blue which is most noticeable when opening. The throat is pure white, which gives a very attractive appearance.

Per original pkt., 15c., 4 pkts. for 50c.

Bidens Atros

... Superba.

New Scarlet Daisy.

A most desirable novelty for the florist. The plants only grow 8 to 12 inches high; very free flowering from June until October. Flowers are produced on stems (12 to 15 inches long), color of the deepest velvety blood red.

Per original pkt., 15c.; 4 pkts. for 50c.

Bidens Superba.

HOLMESBURG, PHILA.

SUPERINTENDENT'S OFFICE, FARM DEPARTMENT, HOUSE OF CORRECTION.

Dear Sir: I have the pleasure to write this letter of praise for the Wakefield Cabbage Seed, which we bought of you last August, and raised the cabbage from it this spring. We cut the first five barrels on May 27th, which, in all my experience in the business of trucking, I never knew it to be cut as good and hard heads as that was at that time of year.

Yours, &c., &c.,

JOHN SHISLER,
Farmer for Bureau of Correction.

MAC MICHAEL'S
"PEERLESS"
SULPHUR
BLOWER.
Price, \$4.75 Each.

This Sulphur Blower has no equal for applying sulphur to the foliage in rose houses. It does the work quickly and perfectly, the distribution of the sulphur being so even that every leaf receives its due proportion, and none being wasted, thus making it more economical than the bellows.

The Blower will also distribute with equal facility and thoroughness Tobacco Dust, Slug Shot, Lime, or any other powdery substance used in green-houses. It is a great labor saver, as a 200-foot rose house can be sulphured in less than five minutes.

It is easily handled, is strong and durable, and is *Guaranteed for Ten Years*.

Read the following Letters from Leading Growers who have used the Blower:

PHILADELPHIA, PA., September 13, 1898.
The MacMichael Sulphur Blower purchased of you and which we are now using, is the best apparatus for the purpose we have ever used; does the work very quickly and well.

ROBERT CRAIG & SON.
Forty-ninth and Market Sts.

SOUTHAMPTON, PA., September, 1898.
Permit me to say the MacMichael Sulphur Blower is giving me entire satisfaction. It is not only what you claimed for it when I purchased it of you, as a saver of sulphur, but it is a saver of labor as well. I consider it a great improvement on the old-fashioned bellows. The sulphur can be put on much more evenly and with much less trouble.

STEPHEN MORTENSEN.

JENKINTOWN, PA., September 14, 1898.
With MacMichael's Sulphur Blower which we purchased of you, we now only use one-half of the quantity of Sulphur and Grape Dust, and do the work in about half the time; the work is also better done. Thank you for calling my attention to it.

CHICAGO, May 18, 1898.

DEAR SIR:—We have one of your Sulphur Blowers and consider it the best thing we ever had to apply Sulphur in the greenhouses.

Respectfully,

GEO. WITTBOLD.

The "Planet Jr." No. 10 Double Wheel Hoe.

The "Planet Jr." Double Wheel Hoe will straddle plants eighteen inches high, and finish rows from six to eighteen inches apart at one passage. The wheels are only ten inches high, as a high wheel is wrong for a wheel hoe, since the wheels are simply depth regulators; not load carriers.

Price \$6.00. Plain Double Wheel Hoe (with hoes only) \$3.50.

Planet Jr. Single Wheel Hoe. With one pair of hoes, three cultivator teeth, plow, 7 tooth rake and leaf lifter, \$5.00.

„LILIES..

To the Editor of the Bermuda Colonist:

SIR:—To me it is very pleasing to hear that lilies are fifty per cent. better this year than last, and I trust they will keep so.

The above estimate is that of Mr. Henry, who bought about seventy-two per cent. of all the bulbs grown last year in Bermuda. I will quote this authority: *that Mr. W. H. Conyers' fields far surpass anything he has seen.* Mr. Henry has with him in Bermuda one of the largest growers of lilies in the United States of America. This gentleman had asked Mr. Henry to book 70,000 bulbs from another patch, of Mr. Henry, but *as soon as he saw Mr. Conyers' 500,000 bulbs all in beds one after the other, he requested Mr. Henry to change his choice to them.*

Shortly after these gentlemen's departure I received an invitation to visit the lily fields referred to; and what a feast for the eyes they were! 500,000 bulbs in the pink of perfection; *not one bulb failing in a thousand*; the tops so strong, so green, so erect and healthy; the land could not be seen—one mass of foliage covering it. To convey some impression of their strength, some four inch bulbs had tops measuring fifteen inches in diameter, and some five to seven inches gave tops fully eighteen inches in diameter. *These sizes are the rule and not the exception.* Mr. Conyers has to be congratulated upon the results he has achieved to the present time. He has tried hard to do that which suits his land and crop. Though one of the oldest lily growers he sought all the advice he could get, sending his carriage for me upon several occasions—while harvesting his bulbs, and preparing his land, and planting his stock.

G. A. BISHOP,

Superintendent Botanic Station.

P. S.—We have engaged our *whole* supply of *Bermuda Easter Lily* Bulbs, both *Harrisii* and *Longiflorum* from this most reliable plantation of *W. H. Conyers*, and we now feel safe that we will receive and send to our customers the very best and cleanest stock coming from Bermuda this year. Our prices are guaranteed to be as low as those of any reliable importers. If you wish to be sure of securing this choice stock it will pay you to order as soon as possible as a large number of orders have already been booked, and all orders will be filled strictly in rotation as received by us.

NEW ROCHESTER SPRAYERS.

Works by compressed air force.

The spray is like a fine mist or fog, and will adhere to the vines instead of rolling off in drops, as is the case when put on with a whisk-broom or sprinkling can. An automatic agitator keeps the solution thoroughly stirred.

Doesn't this man look more comfortable than the man who straps an iron knapsack sprayer on his back, the liquid slopping on his clothes and running down his backbone.
