I. W. SCOTT & CO.'S

Special Price List of Seeds.

REMARKS TO PURCHASERS.

SEEDS BY MAIL.—Sending Seeds by mail is a very important branch of our business, and we are fully prepared to fill all orders promptly and correctly. The postage is but 8 cents per pound, and our customers living at a distance from a railroad station will find this a convenient and safe way to get what seeds they want. For Peas, Beans and Corn add 15 cents per quart to prices quoted.

REMITTANCES can be made by post office order, bank draft, registered letter, express company's money order, or by express.

SHIPPING INSTRUCTIONS.—When goods are to be shipped by freight or express, give plain shipping instructions. Otherwise we use our own judgment in this matter.

ORDER EARLY.—Please send or bring in your orders as soon as possible after you receive this list, as our stock will be complete, and you will be sure to get what you want, and what is still of more importance, you will have the Seeds on hand when you need them.

TERMS.—Parties unknown to us will please send money as above stated, or satisfactory reference with order.

CARD.

We take pleasure in presenting our SPECIAL PRICE LIST FOR 1900. We do not claim to compete in prices with all other dealers, but do claim to buy and sell the very best Seeds that can possibly be produced, and that are suited to experienced private planters and critical market gardeners.

It is our constant aim to make quality a first consideration. The best is always the cheapest. Reliable Seeds cannot be afforded at half price. While we exercise the greatest care to have all Seeds pure and reliable, we do not give any warranty, expressed or implied. If the purchaser does not accept the Seeds on these terms and conditions, they must be returned at once, and the money that has been paid for the same will be refunded. Soliciting your orders, which shall always have our prompt personal attention, we are,

Very respectfully,

I. W. SCOTT & CO.

GARDEN SEEDS

For Market Gardeners.

We have made the lowest prices possible consistent with first-class quality, but we cannot in the matter of price, compete with rubbish, sure to disappoint the planter and result in losses far exceeding the total cost of good seeds.

VEGETABLE SEEDS.

Prices subject to change without notice. Quantities less than half-peck and quarter pounds, will be charged at quart and ounce rates. Seeds in papers 5 cents each, except Cauliflower; for prices on this see under heading Cauliflower.

Parsnip
Hollow Crown.

SWEET PEAS.

Every One Who Cultivates Flow-
ers Should Plant Sweet
Peas.

The Sweet Pea is one of the most popular flowers in cultivation and numbers among its enthusiastic admirers thousands of skillful cultivators. It is a free flowering climber, and considered one of the best annuals that enrich the flower garden.
Early in spring make a trench about six inches deep, in rich, mellow soil, so arranged that no water can stand in it, and plant the seed in the bottom, taking care not to cover it more than two inches. When the plants are about five inches high, fill up the trench, and furnish some support for the vines to run upon. The flowers should be picked before they form pods, or the plants will soon stop flowering.

	Ounce.	¼ Pound.	Pound.
Finest Mixed Varieties (Eckfords).....	\$0 05	\$0 15	\$0 50

PEAS.

Three quarts of seed for 100 yards of row.

SELECTED SEED POTATOES.

A SPECIALTY.

The Ontario County, New York, Seed Potatoes are universally acknowledged to be the very best. Grown in the cold North East, where nature and the elements alike decline existence to all but the very hardiest varieties, they inherit those stable qualities which make incontestable their position as **leaders** in the Seed Potato World. We make a specialty of and handle this seed solely. The prices on this class of seed may rule somewhat higher than Western and home grown stocks; but when quality and real worth are considered, they will be found by far the cheapest and most remunerative to growers. We advise those in need of first-class potatoes for seed to give us a trial.

PUMPKIN.

Two quarts to the acre. Hills 8 by 8 feet.

Cheese Pumpkin.

FARMERS, GARDENERS and GROCERS Delivery Wagon

**Made in Sizes Ranging from 700 Pounds to 2,500 Pounds
Capacity, (Guaranteed.)**

These Wagons are of a celebrated make, and many of them are in use in this section, having sold them for many years to Gardeners, Dairymen, Farmers, Grocers, etc. They are made by hand, having steel axles, seven wheels and the very best refined steel springs. Can be furnished with Elliptic springs (as shown in cut) or Elliptic spring in front and platform behind; also will be furnished, if so desired, with low wheels in front, so as to be able to turn short. Call at our Warehouse and see them.

EUREKA SECTIONAL ADJUSTABLE WEEDER.

Cut Showing Wings Detached.

The Main Head 2 feet 9 inches long
can be used as a Cultivator.

Any number of Teeth can be easily removed, as they are firmly held in pairs by a clip and one bolt. This is a very valuable feature and will be highly appreciated by the farmer.

Shafts are Adjustable to the Height of any Horse.

Handles are Adjustable to the Height of any Man.

Cut showing Wings Attached. The Wings are Hinged to Main Head. A Solid Head can be made by putting in a Single Bolt on each Wing. **Price \$10.00.**

ATOMIZERS.

For Economically Spraying Anything.

And Exterminating any Insect Pest in House, Barn, Garden, Greenhouse, Orchard or Hennerly. Used successfully on Shrubs, Small Trees, House Plants, Live Stock, Poultry and Potato Vines.

Eureka Atomizer.

Glass Atomizer.

They Kill the "Shell Backs."

They weigh about three pounds each loaded; cover 800 hills of Potatoes, and spray each with a **Poisonous Fog**. This is the secret of their success.

No Hauling Water from a Distance. No Back-Breaking Work or Fatigue. No Poison left in the field over night to Kill the stock.

Simply made, of heavy material, so that they cannot come apart.

.. INDISPENSABLE ON EVERY FARM ..

Price: Eureka Atomizer, 75c. Each. Glass Atomizer, \$1.00 Each,

SOMETHING NEW!

The Standard Automatic Brass Spray Pump

And Fire Extinguisher, with Agitator.

This Spray Pump is constructed with a **brass coil spring** between the cylinder and air chamber, which causes the plunger to move upward doing the pumping and holding the cylinder down. The forcing is done on the downward stroke of the plunger, thereby the Pump is held down firmly and steady while in operation, without the means of foot-rest or clamp to hold it in position.

The entire Pump, including Air Chamber, Piston Rod and Working Parts, are constructed of brass; has a rubber suction and lift valve, all of which is not effected by the poisonous arsenites used in the different formulas for spraying **Fruit Trees, Vines and Shrubbery**. It is equipped with combination spray nozzle; will throw a spray as fine as mist or coarse as is required. It has a large air chamber and reservoir; throws a continuous even spray all the time, with but little effort on the part of operator. It will throw a solid stream fifty feet and is of unusual value for washing windows, etc.

PRICE—Standard Bucket, Automatic Brass Spray Pump, with $\frac{1}{2}$ -inch 3-ply hose, fitted complete with combination fine spray and solid stream nozzle.....

\$3.00.

THE STANDARD DOUBLE-ACTING Barrel - Spray - Pump.

Has Double Brass Cylinders, which remain smooth, do not corrode, become rough and cut out packing, etc. It has two plungers on piston rod, makes the flow continuous. The entire top, including pipe that extends down to cylinder, is used as an air chamber and reservoir, which causes the Pump to work smoothly, and when Pump is in operation the air becomes compressed and will admit sufficient quantity of liquid to spray an ordinary size tree after motion of handle ceases, **a feature peculiar to this pump only.**

It has an Agitator which commences operation as soon as the Pump Handle is worked and keeps the fluid in commotion.

The Cylinder being located in the barrel and near the bottom of it, the Pump requires no priming, and the packing of plungers does not become hard or dry, as is the case with other designs in which the cylinder is placed outside of the barrel; neither is there need of extra suction pipe and expense of fitting same.

As indicated by the Cut, it is intended to be mounted on an ordinary Kerosene or Oil Barrel, and when thus arranged can be transferred through an orchard on a wagon or sled.

This Pump will throw a solid stream about sixty feet from nozzle, can be utilized the year round for washing buggies, cleaning windows, spraying flowers, watering gardens and as a fire extinguisher.

Price of Pump complete, without Barrel, with 5 feet $\frac{3}{4}$ -inch 3-ply Hose and Nozzle, ready for use..... **\$8.00.**

Eureka Powder Gun.

A Simple,
Practical Implement

FOR THE EXTERMINATION OF Potato Bugs,

And all kinds of Insects, Flies, &c., the
Pests of every House and Garden.

It will handle all insecticides in their dry state—Pure Paris Green, Hellebore, Persian Insect Powder, etc. It is very effective in the destruction of Potato Bugs, Currant Worms and all like pests, and for the wholesale destruction of house flies, using freshly ground Persian Insect Powder, cannot be excelled.

Eureka Powder Gun is well made, with a solid hardwood head block, hardwood handles, best leather for the bellows, (an extra elbow is furnished to tilt the funnel for getting under the leaves of plants and shrubs,) and is well finished throughout, making a neat, attractive and serviceable implement.

.. EVERY FARMER SHOULD HAVE ONE ..

PRICE, - - \$1.00 EACH.

~ ~ ~ DESCRIPTION ~ ~ ~

The machine is mounted on two wheels of large diameter, as will be seen by the Cut, which occupies a position at each side and carry the planter steady. The potato hopper has a traveling bottom, and a self-acting governor operating in connection therewith, allowing only the required amount of potatoes to be carried from it into the picker box. The pickers revolve in the small quantity of potatoes in the picker box, and each one carries a potato up over and drops it into the furrow opened by the shoe. The depth of covering is regulated by a handy lever. The discs revolving each side of the furrow in the rear of the machine covers the fertilizer and potatoes. The machine is thrown in and out of gear by a little hand check upon the left hand handle. All the mechanism is operated by the two large drive wheels through sprocket chain attachment. It is a simple machine, all changes quickly and easily made.

It is light, strong and durable.
 It weighs with fertilizer attachment, 200 pounds.
 It is light draft for one horse.
 It is 95 per cent. correct in its drop.
 It covers perfectly.
 It will sow fertilizer correctly.
 It will sow from 150 to 700 pounds fertilizer per acre.
 It plants whole or cut seed.
 It will plant any depth required.

It will drop seed in the row any distance desired apart.
 It will hold one bushel and one quarter of potatoes.
 It will hold 50 pounds of fertilizer.
 It is made with or without fertilizer attachment.
 It turns easily at the end of row.
 It is sold at a nominal price.
 It has marker for marking return row.

The furrow is opened by the shoe. The potato is dropped equi-distance apart, as regulated. The potato is partially covered by earth; the fertilizer is dropped and does not come in contact with the potato; the discs covers both potatoes and fertilizer any depth desired.

We Guarantee the Eureka Potato Planter to be as Represented.

PRICE. \$40.00 with Fertilizer Attachment.

\$37.00 without Fertilizer Attachment.

HOOSIER ONE-HORSE HOE CORN DRILL.

With or without Fertilizer Attachment.

Our One-Horse Corn Drill is the most popular tool of the kind made, and is noted for its excellence and general good qualities. It is now made entirely of steel and iron, with the exception of the handles, and the material is distributed in such a way as to give the greatest strength and the least weight possible. It is, therefore, strong and light. The material used is the best possible to obtain for the purpose. All wearing parts, such as the hoes,

R. J. H. SMITH - CO. CINC. O.

coulters, shoes and covering shares, are made from high grade steel, that insures the greatest possible amount of wear. We also sell the **Celebrated Hoosier Grain Drill**. All Sizes and Styles. **PRICES UPON APPLICATION.**

SINGLE SECTION "COLUMBIAN," 25 TEETH

Harrow,

FOR ONE HORSE.

Prices Upon Application.

R. J. H. SMITH - CO. CINC. O.

THE basis of Armour's Pure Animal Fertilizer is the fertilizer ingredients accumulated by Armour & Company in their heavy killing of live stock. This material is thoroughly cooked, finely ground, and to it are added Potash Salts, Nitrate of Soda, Sulphate of Ammonia, Acid, etc., if the special crop and soil require these chemicals.

Such compounds are not only quick in starting a crop, but lasting in effect. They not only carry the crop through to early maturity, but are soil improvers, and the good effect of their application shows on following crops for several years. Animal Fertilizers work well on all classes of soils, and are especially desirable on clayey, sandy and cold, sourish lands. This is not true of chemical fertilizers. Animal Fertilizers do not leach—chemical fertilizers do.

Use Armour's Animal Fertilizers. They are exactly as guaranteed.

Dotted Lines Showing
Action of Spring in Passing
an Obstruction.

BUFFALO PITTS ADJUSTABLE SPIKE TOOTH LEVER HARROW.
With Relieving Springs.

SEE NEXT PAGE.

BUFFALO PITTS ADJUSTABLE SPIKE TOOTH LEVER HARROW—Continued.

IT IS SOMETHING entirely new, and the only Harrow in the world having Spring Action upon Spike Teeth.

WE ACCOMPLISH this by a heavy coiled spring upon the adjusting bars in connection with a New Patent Lever. This spring allows the Teeth to yield in meeting an obstruction, thus saving strain or breakage, as well as allowing a constant vibration of the Teeth.

WE THUS COMBINE all the advantages of a Spring Tooth and the finer cutting of Spike Teeth in one Harrow, an advantage readily appreciated by users of Harrows.

IN SIMPLICITY of construction, we challenge the world! The Harrow is composed of Tubular Bars, mounted upon an I beam steel main frame, thus securing the strongest construction possible. Solid Pivot Couplings are used, dispensing with troublesome bolts.

WE HAVE the strongest and neatest looking, and the only Spike Harrow with Relief Springs now on the market, made in Two Sections of 50 or 60 Teeth, with Eveners to suit.

Adjusting Teeth.—This is accomplished by passing the diamond shaped Tooth through the top of the Tubular Bar, where it is held firmly by a Vise Like Clamp around the Tubular Bar and Tooth, and a binding Bolt below the Bar and against side of Tooth, so that by tightening the Nut the Tooth is gripped firmly as in a vise. The finest and simplest Tooth Holder yet invented, and the neatest because we pass the Tooth through the Bar.

This Harrow makes an excellent Smoothing Harrow, or in fact, a General Purpose Harrow for all kinds of work.

PRICES UPON APPLICATION.

No. 10 C, Wiard One-horse Garden and Vineyard Chilled Plows—Right Hand.

NO.	SIZE.	CAPACITY.	WEIGHT WITH CLEVIS.
10 C,	One-horse,	4 to 7 inches deep, 6 to 11 inches wide,	77 lbs.

This plow has adjustable beam, automatic wheel and Scotch clevis. It has handles that shift from left to right, so that the plow can run close to trees, hop poles, vines, etc., especially adapting it for vineyard work, as it can be run under grape trellis wire. The handles also adjust in height for a tall man or a short boy.

SURREYS.

WE SELL A FULL LINE OF

BUGGIES & SURREYS.

SPECIAL CATALOGUE AND PRICES
FURNISHED ON APPLICATION.

The Wiard Patent Swivel Plow.

With Chilled Mold-Board and Automatic Jointer or Coulter.

Patented August 3d, 1886, and July 17, 1888.

No. 140 TWO-HORSE.

This cut shows our Swivel Plow rigged with Jointer, Wheel and Patent Adjustable Clevis, by which the Plow is caused to take more or less land, at the will of the Plowman, entirely overcoming all objections to its use on level land. These Plows are also used for flat or level land plowing, and we can heartily recommend them. Price as above described, \$13.00. If Wheel is not wanted, deduct \$1.00; if Jointer is not wanted, deduct \$2.00.

The Celebrated Gale Chilled Plows.

The Gale Chilled Plows are too well-known for us to describe them here. We keep an assortment of all sizes on hand, and pronounce them the best Plow made for general purposes.
