J. M. THORBURN & CO.'S
TRADE LIST
January, 1900.

Thorburn Maximum Lettuce.

The very handsome appearance of this new Lettuce is shown by our cut, which is accurately engraved from a photograph. It is wonderfully heat-resisting, remaining a long time, even in the hottest weather, without turning up to seed. The outside color is light green, but it becomes more and more yellow toward the heart. It is the **LARGEST** and **SOLIDEST** of all our Head Lettuces, and its table quality is simply perfect, both as to tenderness and crispness.

PER POUND, \$1.50; PER 100 POUNDS, \$125.

Tree and Shrub Seeds.

The percentage of germination of Tree Seeds varies in the different kinds, and sometimes in the same kinds in different seasons. *Acer saccharinum*, *Cupressus*, *Sequoia gigantea*, and some others rarely contain over 20 to 50 per cent of growing seed. We sell Tree Seeds just as received from the various sources, and can judge of their quality only by appearance.

ROMNEYA

Coulteri. (Half-hardy California Tree or Matilija Poppy)	1 00	
--	------	--

Thorburn's New *Salvia Splendens*, "SILVERSPOT."

The distinctive feature of this splendid novelty is its strikingly handsome spotted foliage. The leaves are rich, soft, dark green, with light sulphur or cream-colored spots of various sizes liberally sprinkled over them. The unique and elegant foliage is very abundant, and has an extremely fresh and healthy appearance. The intense, bright scarlet flowers are very large; the plants are of neat, compact habit, and as floriferous as the ordinary sorts. In three years' trials we found that 85 per cent. came true from seed.

PRICE, in packets containing 20 seeds, \$15 per 100 packets.

Thorburn's Improved Strains of *Salvia Splendens*.

NEW DARK ROSE. The beautiful dark rose color of this variety is quite distinct from that of all other *Salvias*. The plants are of dwarf and compact habit, and the flower-spikes stand erect and well above the large, dark green foliage. It is a very desirable novelty, now offered for the first time. It comes true from seed. Per $\frac{1}{2}$ oz. \$1, per oz. \$7.

DEEP SCARLET BOUQUET. A splendid plant, growing to a height of 3 feet, with very handsome dark green foliage, and large flowers of the most intense deep scarlet, standing in a mass well above the foliage, and presenting the appearance of a large bouquet. Per $\frac{1}{2}$ oz. 90c., per oz. \$6.

NANA COMPACTA ERECTA (Thorburn's Dwarf Bouquet, or "Bonfire"). This is our well-known dwarf *Salvia*—the neatest, compactest and most floriferous of all, producing dense spikes of miniature flowers of a vivid dark scarlet. Per oz., \$3.

For other *Salvias*, see page 83.
