FOUR BEAUTIFUL

ROMAN HYACINTHS.

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early Winter blooming. They are among the few flowers which can be had as early as Christmas and New Year. Each bulb throws up several spikes of flowers, which are very beautiful and fragrant, and when kept in a cool room will keep perfect for weeks. Three can be planted in a four or five inch pot, and will soon be in flower. In the garden they are first of all Hyacinths to bloom. We offer extra large bulbs. The new double ones are exceedingly fine. Do not fail to plant a good lot of them for Winter.

Single White.—Has elegant waxy-white bells of great beauty and fragrance. Price, large bulbs, 5 cents each; six for 25 cents; twelve for 50 cents.

Single Blue.—Lovely light blue, a fine contrast to the white variety. Price, 5 cents each; six for 25 cents; twelve for 50 cents.

Double Dark Pink.—A grand new sort, with enormous double, bright, deep bells, in large spikes. Price, 6 cents each; five for 25 cents; twelve for 50 cents.

Canary Yellow.—New. Few novelties will come out this year which will in importance surpass this new yellow Roman Hyacinth. There is nothing to be said of it except it is like the common Roman white, except in color, which is a lovely shade of light yellow. Price, 10 cents each; six for 50 cents.

SPECIAL OFFER. For only 20 cents we will send one bulb of each of these four fine Roman Hyacinths; three of each for 50 cents.

ROMAN HYACINTHS FOR FORCING IN POTS. If planted early and kept warm, can be had in bloom for Christmas.

The foregoing “General” Collection of twenty-six choice Hyacinths will be sent for a remittance of \$2.00. Try them. Every one a beauty.

OUR "GRAND" COLLECTION OF SINGLE HYACINTHS.

SINGLE HYACINTHS.

We advise all our friends to plant **Single Hyacinths**, as the spikes are larger than the double ones, and they are more showy. Price, 10 cents each; the set of twelve for \$1.00. In ordering, say "Grand" Collection of Hyacinths.

Baron Von Thuyll.—Rich, deep blue; very large and free. Extra fine.

Queen of Hyacinths.—Deserves its name, being the very finest, richest scarlet.

Roi des Belges.—Rich, dark red. Extra fine and very early.

Sultan's Favorite.—Waxy pink, striped bright red. A most handsome sort.

Temple of Solomon.—Large, tall spike; large and very shapely, with very drooping bells. Flowers shell pink inside and deep pink outside, touched with violet. A superb new sort.

Uncle Tom.—The very darkest, almost black. A beauty.

MIXED HYACINTHS FOR BEDDING OUT IN THE FALL.

THESE mixed Hyacinths are used almost exclusively for bedding out in the Fall on account of their cheapness. They are just as good colors and just as fragrant as the named varieties; the difference is in the cost of keeping the named sorts separate, both while planting and after they are dug. The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying. Price, 5 cents each; or the entire fifteen choice varieties for \$1.00.

Double Red, Double Rose, Double Pink, Double Pure White, Double Blush, Double Blue, Double Light Blue or Porcelain, Single Red, Single Red striped white, Single Rose, Single Light Blue, Single Pure White, Single Pink, Single Blue or Porcelain, Single Blush.

REMEMBER, the Above Choice Collection of Fifteen Hyacinths for \$1.00, all Different.

MIXED BED OF HYACINTHS.

The Grape Hyacinth.

(IMPROVED.) This charming little gem should be found in every garden in abundance. It has been termed the "Blue Lily of the Valley," and when planted in a mass with that sweet flower it does resemble it to some extent, and forms a most fascinating combination. It grows about the same height, and blooms about the same time each Spring. It increases rapidly, and when once planted a mass of beautiful blossoms, which will increase each year, is insured for a lifetime. But for Winter blooming in pots it is of the greatest value. Plant five or six bulbs in a five-inch pot, and you will have as lovely a pot of bloom as you can imagine. Words fail to do it justice. Flower stems grow a foot in height, bearing a dense spike of sky blue bells tipped with white, and oh! so lovely. Please remember that ours is an improved strain of Grape Hyacinth, much superior to the old form.

Improved Blue.—Price, three for 5 cents; twelve for 15 cents.
Snow White.—New and scarce. Price, 2 cents. each; six for 10 cents.

GRAPE HYACINTH. (*Hyacinthus Botryoides*.)

"GEM" COLLECTION OF NAMED DOUBLE HYACINTHS.

This offer has never been equaled. The varieties are the very best. The colors are unsurpassed. By far the best offer you have ever had on Double Hyacinths. In ordering, say "Gem" Collection of Hyacinths. Price, 10 cents each; the set of twelve for \$1.00. Cannot be bought elsewhere for less than \$2.00.

- Charles Dickens.**—One of the finest pinks. Extra large spike.
Grand Monarque de France.—A beautiful cream white. A new shade in Hyacinths.
Gertrude.—Large, compact spike of beautiful bright red. An extra fine variety.
Jenny Lind.—Very large spike of blush white, with violet eye. Extra fine.
La Tour de Auvergne.—A beautiful, pure snow white, with delicate rose tracings. Superb.
Lord Wellington.—Deep porcelain, with lilac stripe. The best of its color.
Monarch.—Bright crimson, with fine, large spike. A most charming, rich colored, handsome variety.
Ne Plus Ultra.—Pure, waxy white, very large bells. Extra fine for cutting, for which purpose it should be more extensively used. It is also very useful for outdoors because of its erect habit.
Princess Royal.—Deep scarlet, extra large, compact spike, very early. Is found in every collection for exhibition, which is a proof of its great value.
Pieneman.—The finest of all double light blue Hyacinths. Has a large, compact spike of splendid lilac.
Rosea Maxima.—A fine pink, very compact spike. This variety has the lead of its color. It is very fine for forcing on account of its color and size of flower, and also very fine for outdoors, as it always stands erect.
Sans Souci.—One of the finest pink Hyacinths in cultivation. Has a large, compact spike and large bells. It always gives satisfaction. Those who know its value use it largely.

Remember, the above collection of Hyacinths embraces all the shades of this beautiful flower, and these varieties cannot be excelled. Try a collection.

EARLY FLOWERING SINGLE TULIPS. Named Varieties.

Tulips

are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for Spring bedding, and for Winter flowering in the greenhouse and window-gardens they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest day of Spring, plant between the lines of Tulips, Scilla Sibirica, Chionodoxa Luciliae, Snowdrops or Crocus, and as these flower first they can be removed or cut down when the Tulip is coming into bloom. The Single Tulip has a greater variety of rich, delicate and attractive colors than any other section of Spring flowering bulbs. The Single Tulip is extensively grown for indoor decoration, three or five bulbs in a pot.

Artus.—Bright scarlet, splendid bedder. Flowers with La Reine and Golden Eagle.

***Belle Alliance.**—(Waterloo.) A clear scarlet. Flowers at same time of L'Immaculee and Chrysalora.

Chrysalora.—Golden yellow. Extra fine. It is the best single yellow Tulip for outdoors.

***Coeur de Cardinal.**—Brightest red, outside of petals shaded bronze.

Crimson King.—(Roi Cramoisi.) Good crimson bedder.

Coeur Ponceau.—Wine color, center of petal flamed white.

Duchesse de Parma.—Orange yellow, tinted brown, very large.

Price, 3 cents each; the set of thirty-four distinct varieties of Early Single Tulips for 90 cents. The varieties preceded with a star are the best for forcing indoors.

Eleonora.—Richest royal violet. Extra fine.

Golden Eagle.—Fine golden yellow, good bedder.

Jacht Van Rotterdam.—Ground color white, flamed with violet.

Joost Van Vondel.—Giant flower. Brilliant red, reverse of petals bronze color.

***Kaiserskroon.**—Red, with broad, yellow edge. Fine for pots. The largest of all Tulips.

"STAR" BED OF TULIPS. A Beautiful Design.

This beautiful bed is seven feet from point to point, and requires two hundred and fifty bulbs planted four inches apart. Price, \$4.50, or for a bed half this size, one hundred and twenty-five bulbs, \$2.25. Section one, center, ten Count of Leicester (yellow); section two, fifty Rex Rubrorum (scarlet); section three, eighty La Candeur (white); section four, outside row, one hundred and ten Ma Cousine (variegated red and yellow). The five varieties of Tulips, as shown in small beds surrounding the "Star" Bed of Tulips, fifteen bulbs in a bed, or seventy-five bulbs in all, for \$1.50, or the entire lot of Tulips to make the above effect for \$6.00. Half these bulbs, to make a display half this size, for \$3.00. Try this design and be delighted.

“POPULAR” Bed of Rex Rubrorum (Bright Scarlet) and La Candeur (Pure White) Double Tulips.

It is five feet across or fifteen feet in circumference, and requires 200 bulbs planted four inches apart. Price for the bed, 100 bulbs of each kind, \$3.50, or a bed half this size, 50 bulbs of each color, \$1.75. Don't fail to try a bed of these and see how pretty they are.

Double Tulips

HAVE massive flowers of brilliant and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties, and, in consequence, when singles and doubles are planted in conjunction the “time of the Tulips” is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts do splendidly when grown in pots for Winter blooming, but must be forced much slower than Single Early Tulips, by keeping them cooler. We keep the early and late varieties separate, so you can plant the ones that bloom early together if so desired.

Price, 3 cents each, or the set of twenty-three different choice, distinct kinds of Double Early Tulips for 60 cents. Those preceded with a star are the best varieties for forcing indoors.

Alba Maxima.—Creamy white. Very desirable.

***Couronne d'Or.**—The best golden yellow. Resembles a Rose in shape. No flower has a richer color.

Count of Leicester.—Yellow, reddish flamed. A fine bedder. Flowers at same time as La Candeur and Rex Rubrorum.

Duke of York.—Rich, clear, bright red, with white edge.

Gloria Solus.—Brownish red, bordered with pure gold.

Hellanthus.—Beautifully variegated red and yellow.

***Imperator Rubrorum.**—A very fine bright scarlet. The finest of its color.

La Candeur.—Pure white. Fine bedder. This variety is beautiful when planted among Rex Rubrorum, to form designs etc., planted four inches apart. We sell an immense quantity of them, being very cheap. Price, \$2.00 per hundred.

Le Blazon.—Fine, rosy pink, very elegant.

Ma Consine.—Beautiful, rich violet, white edged. This variety blooms at the same time as Rex Rubrorum and La Candeur, and makes an elegant border for these varieties.

***Murillo.**—White, delicately flushed with pink, large flower. Fine for forcing or bedding.

Purple Crown.—The only real dark red double Tulip. Very rich and effective.

Queen Victoria.—Rich wine color. Very distinct.

Rex Rubrorum.—Richest scarlet. Beautiful when planted among La Candeur to form designs of any description, as they grow of equal height and bloom at the same time. A rich effect is produced by planting Rex Rubrorum in center of bed, then surround this with La Candeur, and border with Count of Leicester. They all bloom at one time. Price, \$2.00 per hundred.

***Rosina.**—A beautiful, rich, clear pink. Fine forcer.

Rose Blanche.—Pure white. Splendid bedder.

DAFFODILS AND NARCISSUS.

"Daffodils

That come before the swallows dare, and take
The winds of March with beauty."

—SHAKESPEARE.

THE wonderful creations in the way of new varieties have awakened an interest and enthusiasm among the lovers of flowers that has placed this, "The Flower of the Poets," in the front rank of popularity, and they merit all the praise that can be bestowed upon them. Appearing, as they do, just after bleak Winter, they turn our gardens, lawns and woodlawn walks into gorgeous masses of gold and silver, with a fragrance that is enchanting. They are equally valuable for growing in pots for Winter flowering, and some of the varieties are forced in immense quantities by florists for cut flowers in Winter. Narcissus are of the easiest culture and all, except the Polyanthus varieties on page 11, are perfectly hardy. Our collection has been much enriched, and embraces in addition to the old favorites many new varieties, including the magnificent new hybrids. We are also importing direct from China some of the genuine and wonderful "Chinese Oriental Narcissus," called by the natives "Joss Flower," or "Flower of the Gods."

The Chinese Sacred *** OR *** Oriental Narcissus.

A Variety of Polyanthus Narcissus.

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery white, with golden yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese, according to their ancient custom, to herald the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxurious growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere and with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the Winter. We are importing direct from China immense bulbs of the true large-flowering variety. Price, 15 cents each; four for 50 cents.

GIANT GOLDEN SACRED LILY.

The flowers of this beautiful Sacred Lily are almost identical with the Chinese variety, except that they are of the most lovely shade of deep golden yellow, making a fine contrast with the white bloom of that noted kind. The bulbs are not nearly so large, but the trusses of flowers are of good size, making this a charming bulb for house culture. Grows in water like the old variety. Price, 5 cents each; six for 20 cents; 35 cents per dozen. Try a dozen and be delighted.

Price, strong home-grown bulbs, 3 cents each; twelve for 30 cents.

HYACINTHUS CANDICANS.

This is not unlike our Spring blooming Hyacinths. Its leaves are deep green, fleshy, resembling some of the Yuccas. The flowers are white, in handsome, pendulous bells, arranged on pyramidal spikes, often reaching to the height of three feet or more in strong plants. A strong bulb will give from two to three flower spikes, and these produce from thirty to fifty flowers. The plants come into bloom in July, and bloom continuously until October. It is hardy. Price, 10 cents each; three for 25 cents.

HYACINTHUS CANDICANS.

CROCUS.

The Crocus is one of the first flowers of Spring, and one of the best for blooming in the house during Winter. Half a dozen bulbs may be planted in a pot, and will make a very pretty show. For garden culture plant bulbs two inches deep and two or three inches apart. They are so cheap and pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift their bright heads up through the sod very early, and give the lawn a charming aspect. Lilies for Fall Planting

The Set of eight lovely Lilies on this page, all distinct, costing \$1.65, sent for only \$1.25. This is a great offer.

"The fairest of all things that blossom and grow,
Sweet as the Summer and pure as the snow,
Is the Lily that tells
Like the glad Easter bells,

Once more the sweet story which all hearts should know."

LILIUM HARRISII—The True Bermuda Easter Lily.

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, render them invaluable. The flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals throughout the Winter. The quantity of bloom produced is marvelous. The average production of bulbs five to seven inches in circumference, even when forced, is from five to eight flowers, and of bulbs seven to nine inches, eight to twelve flowers; and if desired, a second crop of flowers, frequently equal to the first, can be secured the same season by drying the plants off for a time after blooming and then again starting them. Blooming plants in pots form typical Easter offerings and presents for decoration of window, table, house or church. Nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every Winter for this purpose. As a garden Lily it is of great beauty, being entirely hardy except in northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. Price, 15 cents each; four for 50 cents. Larger bulbs, 20 cents each; three for fifty cents. Extra large, 50 cents each, or three for \$1.25.

LILIUM CANDIDUM.

The old-fashioned pure white garden Lily, also known as Easter Lily and Annunciation Lily. One of the hardiest. Flowers snow white, with heavy yellow stamens and sweetest fragrance. It bears from five to twenty blossoms. This is the most decided variety we have in expressing its preference for a planting time. *It must be planted in the*

early Autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for Spring sales, but never do quite so well. We have a

very large sale of this bulb to florists for forcing for Easter trade, and have imported this season eighty thousand bulbs. The prices are lower than for many years, and bulbs very fine. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. Price, 20 cents each; three bulbs for 50 cents; \$1.50 per dozen.

LILY HARRISII.

SPECIOSUM RUBRUM.

LILIUM AURATUM. The Gold-Banded Lily of Japan.

This is the highest type of flowering bulbous plants. The most beautiful and fragrant of all our list. The flowers are of immense size, being fully twice as large as those of almost any other Lily. There is wonderful beauty in the growth of this gorgeous flower; first, the dry, scaly bulb, then the sturdy stalk pushing through the earth, next the dark green leaves and flower buds, and finally the dazzling white and gold blossom. This noble Lily, which, when first introduced into this country but a score of years since, sold at five dollars each, can now be had for a trifle. The new bulbs are brought from Japan for us each year, and only such will give best results. They are shipped to us wrapped in a ball of clay and arrive plump and sound, every one ready to bloom. Price, fine bulbs, 20 cents each; three for 50 cents; \$1.75 per dozen, post paid.

Lily Harrisii is ready now; the other varieties and Lily of the Valley cannot be sent until November. Order now, and we will file your order and send as soon as we receive them from abroad.

LILY OF THE VALLEY....

The Lily of the Valley is one of the most useful and greatly admired plants grown. The modest bell-shaped flowers of the purest white are highly prized for cutting purposes, and for flowering in pots in the Winter they are exceedingly well adapted. Beautiful and most interesting ornamental designs for the parlor or conservatory may be produced by planting the Lily crowns in Crocus pots or in pyramidal pots made especially for this purpose, and pierced with holes. They will last several weeks in beauty. By taking them in at intervals a succession of different designs may be kept up all Winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy.

The Giant Snowdrops we offer are much superior to the common varieties, producing large flowers.

They attain a height of from ten to fifteen inches, and the hues and colors of their many varieties, varying from pure white and yellow to bright vermillion and crimson, are really beautiful. The Persian Ranunculus are a little smaller than the French, and also more dwarf. However, their colors are as fine, and exhibit the most beautiful shades, and are of the most graceful form. The Turban, or Turkish Ranunculus, differ very much from each other, and display lovely oriental beauty of coloring. Can be grown easily in pots, or out of doors if protected.

THE BERMUDA BUTTERCUP OXALIS.

An Unrivalled Winter Flowering Pot Plant.

This is one of the finest Winter flowering plants for pot culture that we have ever seen. It is such a strong, luxuriant grower that one bulb will be sufficient for a six or eight-inch pot. Place in a dark, cool position for a few weeks to root thoroughly, and remove to a sunny situation in the window or conservatory, in a temperature of about 60 deg. Fahrenheit, and the great profusion of bloom produced in uninterrupted abundance for weeks will astonish and delight you. Flowers of the purest bright buttercup yellow. Well grown plants have produced as high as seventy flower stems at one time, and over one thousand flowers in one season. The flowers, and frequently the leaves, fold up at night and open again the next morning, but when grown in a partially shaded situation the flowers remain open all the time. Properly treated, the plants will flower in six weeks from the time the bulbs are planted. We do not claim the Bermuda Buttercup Oxalis to be strictly a new plant, but a greatly improved selection from *Oxalis Cernua*, grown in the congenial soil and climate of Bermuda until the bulbs have attained great strength, producing bulbs, plants and flowers larger and more luxuriant in all parts than the type. Excels all bulbous plants in profusion of bloom. It is graceful, and delights all who see it. Price, 5 cents each; 50 cents per dozen.

OXALIS.

These varieties of Oxalis are all for Winter blooming. They make the most beautiful hanging pots and baskets, producing a mass of flowers all Winter, which in brilliant and beautiful colors are truly charming. Winter blooming Oxalis are always sure to please. Plant five or six bulbs in a six-inch pot. They commence growth immediately after planting. Our mixture embraces pink, white, yellow, red, etc. Price for a mixture of all colors, 3 cents each; 30 cents per dozen.

OXALIS,
BERMUDA BUTTERCUP.

THE FLORAL FIRE CRACKER

(*Brodiaea Coccinea.*)

BRODIAEA COCCINEA, OR FLORAL FIRECRACKER.

This beautiful and interesting Winter blooming bulb is a sort of *Brodiaea*, but entirely unlike any other variety in both form and color. It is a striking beauty, and one that catches every eye. Its blooms are borne in clusters at the end of long, slender stems, and droop like a *Fuchsia*. They are two or three inches in length, of a deep, bright, crimson scarlet color, tipped with green and white. It is among the easiest of all bulbs to grow, and it is sure to succeed and bloom elegantly with any one. Pot the bulbs at any time during the Fall, and treat them as recommended on leaflet accompanying each order. In this lovely flower our friends will find a most beautiful and novel thing, and unlike anything you have ever grown or seen. Price, fine bulbs, 5 cents each; six for 25 cents.

IRIS---FLOWERING FLAG.

(*Fleur-de-Lis.*)

The Iris are fast coming into favor. They are entirely hardy, and increase rapidly when planted in the flower garden. They should be planted in the Fall.

Iris, Susiana.—If every lover of flowers could see this grand plant in bloom, we really believe not one in a hundred would refuse to pay a dollar each for one or more bulbs of it. Among all flowers there is hardly one of such oddity and striking beauty. The bloom is of enormous size, and in describing it we say "it is chocolate and black mottled, beautifully veined with grayish white," yet from this no one can form a correct idea of how the plant looks. It is indescribable, and the planter will be surprised when he sees it. It is perfectly hardy, and blooms in May. In July the foliage dies down, and the bulbs lie dormant until late Fall or the next Spring. Try it, and when it blooms you will undoubtedly pronounce it the most beautiful flower in your garden. Ready in November. Price, 25 cents each; three for 60 cents.

IRIS, HISPANICA.

Iris, Hispanica.—(Spanish Iris.) The Spanish Iris are grown in England by the millions for cut flowers. Perfectly hardy. They are very recommendable. The colors and shape of the flowers resemble the most beautiful Orchids. The colors are very striking, while the substance of the flower is much more permanent than the other varieties of Iris, causing them to last in bloom much longer. Don't fail to try a bed of Spanish Iris. We offer them in three colors—sky blue, pure white, and golden yellow. Price, 3 cents each; six for 15 cents; 40 cents per dozen; \$2.00 per hundred.

Iris, Pavonia.—(Peacock Iris.) This beautiful Iris is very attractive. It is a sky blue color, with a peacock eye of dark blue on each of the petals. It certainly is a gem. Price, 5 cents each; six for 25 cents.

NOTE.—The Iris are perfectly hardy and should be planted in the Fall for Spring blooming. Every bulb will flower the first year with the exception of *Iris Susiana*, which is shy in bloom until well established.

Freesia Refracta Alba.

No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature *Gladioli*. Borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon yellow. The perfume is most delicious, being a mixture of *Mignonette*, *Violet* and *Jasmine*, and one plant is sufficient to perfume a large room, without the overbearing perfume of *Hyalanthus* or *Tuberose*. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is of the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower store in some place and repot at proper season in fresh soil for another year's growth. Price, 3 cents each; six fine bulbs for 15 cents; twelve for 25 cents.

FREESIA REFRACTA ALBA.

Yellow Calla, Hastata.—Lovely yellow flowers. This is becoming quite popular. Price, fine bulbs, 50 cents each.

SPECIAL OFFER—The Set of Four Distinct *Callas* for \$1.00.

Ornithogalum Arabicum.

We introduce this as a new Winter blooming bulb of great beauty and value. In magnificence there is nothing like it among Winter blooming bulbs or plants. Even the grand Hyacinth must be preceded by the stately beauty of this flower. It is a native of Arabia. Bulb large and solid, closely resembling that of a Hyacinth and requiring exactly the same culture. Leaves long and narrow; flower spikes eighteen to twenty-four inches high, strong and graceful, bearing an immense cluster of large, pearly white flowers, having a jet black center. The individual flowers keep perfect many weeks before fading, so that for more than a month this grand spike of bloom is in full glory. Its durability is almost without an equal among flowers. Add to this its delicate aromatic fragrance, and we have a Winter bloomer which all must admit stands without a rival. Its culture is the easiest, as it will grow in any position in any window. A bulb can be planted in a four-inch pot, or several in a larger pot or box. Pot in September, October or November. They can even be kept and planted as late as February 1st. For open ground culture they do well if protected from freezing severely. Price, 6 cents each, or three for 15 cents.

Amaryllis Johnsonii.

Lovely bulbous plants for Winter or early Spring blooming. Give plenty of water while growing. When through blooming, gradually withhold water, so that they may become dormant during the Summer. Start again in the Fall by repotting in fresh soil and increasing the supply of water gradually. This is the large crimson variety that is very popular. Immense Lily-like flowers of deep crimson, borne on strong stalks of from five to eight flowers. Very desirable. Price, fine bulbs, 50 cents each.

Allium Neapolitanum.

This plant has graceful leaves from eight inches to a foot long, of the darkest green, forming a very cheerful mass. Each plant bears from one to three scapes or trusses of flowers, which are pure white, about one-fourth of an inch in diameter. Many of the trusses bear over one hundred flowers each. Price, 3 cents each; 30 cents per dozen.

HOW TO GROW BULBS IN THE HOUSE IN THE WINTER.

The past two Winters we have found out the best and prettiest way to force all kinds of bulbs in the house. "No one is too old to learn," is a true saying. And we have found it true in the manner of forcing bulbs. Our knowing how to force bulbs comes through our mother, from whom we learned much that is true and beautiful. This is the way she beautifies her whole house during the bleak, dreary Winter months: Take common split baskets, peck size, such as are used to carry grapes to market in (they can be procured at any grocery store), fill with good, rich soil, and plant Hyacinths, Narcissus, Freesias, and in fact, all bulbs in them. It is best to plant only one kind of bulb in each basket. In one put Narcissus, in another Hyacinths, and so on. When planted, water and carry to the cellar. After letting stand for a month or six weeks so as to become rooted, bring them in a living-room (not too warm), water freely, and you will be surprised how easy and what beautiful flowers you can have. They need not be all brought up from the cellar at one time, but a few baskets at a time, and you will thus prolong their blooming several months, for as fast as the ones up are through blooming remove the baskets to the cellar and replace with other baskets that have been planted. We advise all our patrons to try this method, as the baskets are much better for the bulbs than flower pots.

All Prize-Winners. You may select any ten of these Chrysanthemums for 50 cents.

NOTE.—We can furnish any variety of Chrysanthemum in our Spring Catalogue for 5 cents each.

The following new Chrysanthemums are all prize-winners. Those wishing to compete for prizes at exhibitions should not fail to get this Prize Set. They embrace a wide range of color, and in size many of them are enormous, often measuring twelve inches in diameter. They are the very best Chrysanthemums ever offered. If you do not wish all of them yourself, get a neighbor to send with you and divide with him.

SUNDEW.

An exhibition bronze. This is an elegant grower. The flower is of immense size, crowded with petals which are stiff and of great substance.

SUNSTONE.

Petals hook up at end, showing light straw reverse. Uppersurface bright yellow, shading to red at base.

DEFENDER.

This is the richest deep crimson variety we have ever seen, and excels in its color as Golden Wedding does in yellow. The color is the richest velvety crimson, which in the flower itself is soft and velvet-like. The outer petals are broad and drooping, and have a lustrous sheen in the sunlight. The form is flat, with drooping outer petals, which gives it a very graceful appearance. This, the popular form, combined with the splendid color, stamps Defender as a Chrysanthemum of rare merit.

AUTUMN GLORY.

There is nothing like it in color, which is a reddish salmon upon opening and gradually changes to a soft shrimp pink when fully finished. The flower is of the largest size and takes on very great depth. Has attracted marked attention wherever grown.

GOOD GRACIOUS.

The first sight of it usually brings forth an exclamation of admiration. The color is also unique, being a delicate shade of peach pink throughout.

WESTERN KING.

In the entire Chrysanthemum family there is no grander white variety, no matter when it blooms. A perfect ball of snow.

BLACK HAWK.

Largest and most beautiful dark crimson scarlet yet raised. Looks like crimson velvet, and does not show a trace of reverse color.

BOUNDLESS SNOW.

A most lovely and attractive variety. The color is white, flushed pink, gradually becoming pure white.

HENRY W. LONGFELLOW.

A finely rounded, incurving white variety, with broad petals, and of large size. Sometimes the bloom is flushed with pink, and resembles a large ball of fine ribbon. Very desirable.

PENNSYLVANIA.

A soft deep yellow that appeals to the eye, and at once becomes a favorite. The flowers are of uniform size, well developed, and make an object of beauty not soon forgotten. It is probably the finest yellow for cut blooms or exhibition ever produced.

BELLE OF CASTLEWOOD.

The color is a soft lemon, suffused with pink. This is the variety that took the silver cup at Madison Square, offered for the best pink seedling.

WILLIAM H. CHADWICK.

A phenomenal variety of the year. Waxy white color, occasionally rose tinted. It cannot be praised too highly.

MISS GLADYS VANDERBILT.

Massive flower, with broad, cupping petals. Valuable for its size. Color rosy pink. A most lovely and charming variety.

HER MAJESTY.

Color white, shading to pale lemon, stiff stems and nice foliage. The flowers are often twelve inches in diameter. It is undoubtedly the most meritorious variety of the year.

GOLDEN TROPHY.

The color is a deep, rich yellow, the half-expanded flower incurving. In the fully expanded flower the petals are reflexed, showing a yellow disc. We have no hesitancy in saying that we regard this the best of all yellow Chrysanthemums.

MARQUIS MORTEMARTE.

A superb, clear Mermet rose pink, petals thick and heavy, cup-shaped, solid to the center, immense in size, having been exhibited eleven inches across.

LORNA DOONE.

Purest snow white in color, very broad, heavy, deep flower, measuring fourteen inches in diameter. When the flower is several days old the outer petals curl and interlace. Probably the largest of all whites.

Very large, flat flowers of regular rosette shape, the ground color is pure waxen white, and on this is a large, irregular blotch of wine color. No two flowers similarly marked. The flowers will sometimes come a solid wine color.

Mrs. C. H. Wheeler.—Very large and perfectly formed flowers. A perfect incurve, outside of petals a bright orange, lined on concave side with brilliant red. One of the very largest.

Invaluable for cutting.

Mrs. J. G. Whildin.—A handsome yellow variety, of pure tint, splendid in size and form, and a magnificent addition to the scarce, very early, large-flowering varieties; has attained great popularity.

Mrs. L. C. Maderia.—A perfect, compact globe of bright orange color, petals upright, like unopened, pointed quills, constitution strong, stems stiff, flowers large and of the heaviest substance.

Mrs. A. J. Drexel.—A very early, large-flowering variety, half spherical in form, petals long and arranged like rays, the color is a fine example of crimson lake, quite double and a fine grower.

Mrs. Jerome Jones.—Large, cream white, incurved Japanese, sometimes showing a tinge of pink; high, round flower. One of the best Chrysanthemum flowers up to date.

Mrs. W. K. Vanderbilt.—One of the finest in the entire Chrysanthemum family; a grand, large flower of the purest white.

Mermaid.—Very delicate pink, perfectly incurving, broad petals, extremely delicate in color and finish; extra good.

Pitcher & Manda.—Who ever heard of Chrysanthemums having two distinct colors in one flower? But that is just what Pitcher & Manda is. The outer five or six rows of petals are pure white, and of Dahlia-like form, while the center is a bright deep yellow, the two colors being sharply defined. Won gold medal.

President Wm. R. Smith.—An immense cupped flower. Outside petals salmon red, center a deep Indian red. Enormous, free and distinct.

Robert McFines.—The color is bright scarlet and gold, while it is full to the last degree, a perfect globe in form. It is quite early, being in full perfection the last week in October, and can be had earlier. Very brilliant in appearance, as well as grand in size and form. One of the very grandest of last year's introductions.

Sugar Loaf.—Everybody's Chrysanthemum, being a fine grower, and perfecting numerous extra large flowers of bright yellow or bronze yellow, inner petals incurving, outer petals reflexed.

The Queen.—A grand double white, of fine size and great substance, very rounded in form, incurving and full. Probably the most valuable novelty of 1895. By far the best of its style. This year has given us two of our grandest whites, Queen and Niveus, and nearly equal in merit and totally distinct.

W. H. Lincoln.—A rich, golden yellow, of finest form and shape. Splendid for cut flowers, and a magnificent bush plant.

Wenonah (Blushing Bride). The base of the petals is pure white, laced with deep lavender pink. This is a variety that is much admired, and we have grown a great quantity of them for this year's sales. Very beautiful.

The Wonderful New Lemon, PONDEROSA.

NOTHING that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful Lemon has. It is a true ever-bearing variety. On a plant six feet high no less than eighty-nine of these ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and at the same time had fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. It is not uncommon to make twelve lemon pies from one lemon. We have the entire stock of this ponderous Lemon, and guarantee the trees to produce the same large fruit. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. Everybody can grow their own lemons; it will fruit freely the second year. Thrifty young plants, 25 cents each. Large two-year-old plants to bloom and fruit at once, 60 cents each.

OTAHEITE ORANGE.

An Elegant Plant for Winter Decoration. None Finer.

This valuable and distinct variety of the Orange family is a dwarf, compact grower, with glossy, deep green foliage, which has a decided odor of the orange trees of Florida, and is exceedingly floriferous, producing a wonderful profusion of pure white flowers of the most delicious fragrance, identical with the much-sought-for blooms of Southern orange groves. Otaheite fruits immediately after flowering, bearing fruit about one-half the size of the ordinary orange, retaining in a marked degree their sweetness. This unique Orange cannot be equaled as a Winter blooming pot plant for house culture, and is of the easiest culture. Requires but little sunlight, and flowers and fruits when but twelve to fifteen inches high. As a pot plant this lovely dwarf orange is one of the most novel and beautiful that can be grown. Price, 10 cents each, large, strong plants to bloom and bear profusely at once, 25 to 40 cents each.

OLEANDER.

Double Yellow, Double White, and Double Pink.

Semi-double flowers of pleasing and satisfactory shades. Price, the yellow variety, 20 cents each; the white variety, 15 cents each, the pink variety, 10 cents each.

NEW LEMON, PONDEROSA. *One-fifth the Natural Size.*

NEW ASPARAGUS, SPRENGERI.

When introduced, at a high price, a little over a year ago, this plant was received with some little hesitation as to its desirability, but after only a limited trial it has come forward with such prominence that the supply will be inadequate to the demand for some time to come. Not only is it useful for cutting in sprays for cut-flower work, but grown in suspended pots it makes one of the prettiest decorative house plants we know of. It is really handsomest seen drooping gracefully from a pot or basket. Sprays from four to five feet long, of bright green feathery foliage, and as it will withstand dry atmosphere and grow well in shade or sunlight, it is decidedly the most useful and suitable parlor plant. The flowers are white and very fragrant, followed by bright red berries. Mr. H. H. Battles, the well known floral artist, says: "Grow all you possibly can of it; it's a grand thing." It is not only a plant that will be used extensively by florists for cut-flower work, but it is decidedly a useful and decorative parlor, table and window plant. It is harder than any other Asparagus, can even be grown in open ground, and under good treatment will make specimens four to five feet across in one year—plants which have sold at \$5.00. We have so much faith in it that we are growing 10,000 plants of it now. Price, strong plants, 10 cents each.

NEW ASPARAGUS, PLUMOSUS NANUS.

This graceful climbing plant has, to a great extent, taken the place of the once popular Smilax in all fine decorations. It possesses the advantage of being much more graceful—its foliage being finer than that of the most delicate Fern, and will last for weeks after being cut, the whole plant being of a bright, cheerful green. It is an excellent house plant, succeeding under almost any condition. Price, 10 cents each.

SMILAX.

For using as a green with cut flowers it has no equal, its hard texture enabling it to keep for several days without wilting after being cut. It is also fine as a parlor or window plant. Price, 5 cents each.

ASPARGUS SPRENGERI.

CAMELLIA JAPONICA.

CAMELLIA JAPONICA.

Lady Hume's Blush.—Flesh color. Extra fine.
Jenny Lind.—White, with pink stripe.
Fimbriata.—Clear white, with the petals closely fimbriated.
Caleb Cope.—Clear blush rose. One of the best.
Americana.—Blush, mottled with rose.
Camellia Alba Plena.—Double white, very fine, and the best white.

PRIMROSES.

The following three fine sorts for 20 cents.

Primrose Obconica, the Ever-blooming Variety.—White, with lavender tints. Price, 10 cents each.
Alba Magnifica.—The finest white, with greenish yellow center. Price, 10 cents each.
Kermisnus Splendens.—A deep rose, with a yellowish throat. Price, 10 cents each.

FICUS ELASTICA. India Rubber Tree.

Very large, smooth, leathery leaves, evergreen foliage. Generally esteemed one of the finest house plants grown, the plant attaining a large size and tree shape. Each new leaf is enclosed in a long coral red envelope, looking like a great red flower bud. A very fine plant for the lawn or bay window. Price, fine, strong plants, 50 cents each; large plants, \$1.00 each.

ARAUCARIA EXCELSA.

Norfolk Island Pine.

Various names have been suggested for this grand plant to properly convey to the mind the appearance of it. Some have called it the "Christmas Tree Palm," from its resemblance to a Christmas tree; others have called it the "Star Palm," because the leaves are arranged to form a perfect star, but no descriptive name can give an adequate idea of its beauty.

It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage are unequalled in the vegetable kingdom. It is easily grown in the house and is highly ornamental. It requires the same culture as the Palm. Indeed, as a decorative plant for the house this is one of the handsomest and most serviceable plants in our collection. Extra fine plants, 15 to 18 inches high, \$1.50 each; 12 to 15 inches high, \$1.25.

ARAUCARIA EXCELSA.

REX BECONIAS.

REX BEGONIAS.

We have a fine "named set" of Rex Begonias, but limited space will not admit of us giving them here. Price, 15 cents each. We will select four of our choicest sorts in fine plants for only 50 cents; two for 25 cents; ten distinct varieties for \$1.00. Order a set of these fancy Begonias and see how handsome they are. Must be seen to be admired. So many of our customers write us: "Begonias are my favorite flowers, but I have no luck with them." We will give you five principal points, and if followed, you can succeed with Begonias as easily as with Geraniums. 1. Begonias delight in perfect shade. 2. Begonias are great feeders, hence they like a good, rich, loamy soil. 3. Begonias love moisture. Do not let them thirst one day and drown the next. 4. Begonias must be kept free from dust. Cover when sweeping. 5. Begonias must have drainage. Charcoal in small lumps in the bottom of pot will serve this purpose and keep the soil from souring.

Winter Flowering Begonias.

Thurstonii.—We like this the best of all the new Begonias. It is very much like *Metallica*, but is a much better Begonia in every respect. The foliage is a glossy bronze green, with the under side a deep wine color. Flowers an elegant pink, shaded white. Price, 15 cents each.

Argentea Guttata.—Pink and bronze leaves, with silvery markings, large bunches of white flowers. Price, 10 cents each.
McBethii.—Always in bloom, beautiful cut-leaf foliage, with snow white flowers. Price, 10 cents each.

M. de Lesseps.—A very fine new Begonia, with fine, tropical foliage and elegant flowers. Price, 15 cents each.

Gloire de Lucerne.—Light green, handsome foliage, flowers borne in long, graceful, pendent chains, and of a delicate red color, very profuse bloomer. Fine. Price, 15 cents each.

Manicata Aurea.—The most beautiful of all the Begonias. Large, handsome leaves, beautifully blotched and marbled with green, white, cream and deep yellow. Price, 25 cents each.

New Begonia, Dewdrop.—In the new Begonia Dewdrop we have the best flowering Begonia ever obtained. Its graceful flowers are produced in profusion all during the Summer and Winter. It is a dwarf, compact growing variety, the foliage is a bright, glossy green, with shell-shaped leaves and stems of light crimson. The blooms are produced in clusters of from six to eight florets, which are satiny white, with golden yellow stamens. Price, 10 cents each.

Alba Perfecta Grandiflora.—Here we have a Begonia that has never been appreciated like it should be, as it is really elegant, and we doubt if there is a white-flowered variety that equals it. The foliage resembles *Rubra* in shape, but is a lighter green, while the flower panicles are much handsomer. Pure white flowering Begonia. Try it. Price, 10 cents each.

Rubra.—If you have only one Begonia, let it be a *Rubra*, for it will prove a constant delight. It is so fast growing that it will in a year or two reach the top of your window, sending up heavy, stiff canes an inch in diameter, and rising beside them will grow strong, slender branches, gracefully drooping under heavy waxen leaves and pendent panicles of coral colored flowers as large as a hand. Medium sized plants are frequently seen with more than twenty such panicles at a time. Among the individual flowers you will find three distinct forms growing side by side. Price, 15 cents each.

Alba Picta.—It is shrubby in habit and compact in form, having long, slender, lance-shaped leaves on short stems, thickly studded with silver white, the spots graduating in size from the center towards the margin. Price, 10 cents each.

Marguerite.—Leaves a bronzy green, somewhat resembling *Metallica*, but growing in more bushy form and easier to handle when grown for market. Large trusses of light, rose colored flowers freely produced. Price, 10 cents each.

Sandersoni.—Coral Begonia. One of the best flowering Begonias. The flowers are of a scarlet shade of crimson, borne in profusion for months at a time. Leaves slightly edged with scarlet. Price, 10 cents each.

Nitida Rosea.—A strong growing, profuse blooming variety, producing immense panicles of rose colored flowers. Price, 10 cents each.

Nitida Alba.—Similar in every respect to *Nitida Rosea*, but with white flowers, so profuse as to literally cover the plant with large clusters of a very waxy spray of flowers. Price, 15 cents each.

President Carnot.—A remarkably strong growing variety, of stiff, upright habit, foliage large and something in style of *Rubra*, but more than twice as large, upper side deep green, under side purplish red, flowers beautiful coral red in large pendent panicles. Grand flowering variety. Price, 15 cts. each.

PALMS.

The following is a select list of rare and handsome varieties that can be recommended for apartments, conservatories, decorations or vase plants during Summer. They are all grand plants, and of the easiest culture.

WASHINGTONIA FILIFERA.

A beautiful Palm is one of the finest additions that can be made to any collection of plants, but the high prices of the best varieties have prevented most people from possessing one. Then again, there are but few of the best sorts which succeed well with ordinary window culture. It is therefore with pleasure that we are now able to offer one of the most beautiful sorts in existence, and one that is hardy and robust enough to succeed anywhere, at a price which brings it within the reach of all. It has elegant, dark green, fan-shaped leaves from which hang thread-like filaments. The plant is a compact grower, well adapted to pot culture, succeeding in any situation and with any treatment that will keep a Geranium alive. It will flourish in any window, for anybody, making a grand ornament during Winter, and in Summer it can adorn a veranda, or be placed in the garden or yard, or used for a center in a vase, basket or flower bed—always ornamental anywhere. All Palms of the fan-leaved sort have, when young, leaves of a long, narrow shape, developing the round, fan-shaped ones as they grow older. Therefore, when you get your plant and see long leaves, instead of round ones, do not think that a wrong sort has been sent you. Price, 10 cts. each; three for 25 cts.

KENTIA FORSTERIANA.

This is one of the finest pot plants imaginable and the easiest to grow of any of the Palm family. Being almost hardy, it is not injured by slight changes in temperature, and its stiff, glossy leaves enable it to stand the dry, hot air of the living-room without injury. The leaves are a deep glossy green, fan-shaped, split deeply into segments. This is, without exception, the most hardy of its class. Very graceful for table decoration. Scarcely equaled. Price, 50 cents each; strong plants, \$1.00 to \$2.00 each.

CYCAS REVOLUTA.

Sago Palm.

The Cycas makes a magnificent specimen plant and is one of the most valuable plants grown for the decoration of the lawn or house. Their heavy, glossy, deep green fronds resist alike the gas, dust and cold to which decorative plants are frequently exposed. Fine, shapely plants. By express, first size, with 12 to 15 leaves, \$1.00; second size, with 10 to 12 leaves, \$3.00; third size, with 7 to 10 leaves, \$2.00.

LATANIA BORBONICA.

The well known Fan Palm. This is one of the most exquisitely graceful among Palms. Its wide-spreading, gracefully arching leaves are elegant and effective for apartment decoration. It is considered the handsomest and most valuable of all the Palms. Price, 25 cents each; fine plants, \$1.00 to \$2.00 each.

COCOS WEDDELIANA.

Undoubtedly the most graceful Palm yet introduced to our collection. The stem is slender, leaves long and very beautifully arched, leaflets or pinnae very fine, deep green above, white below. Price 60 cents each.

ARECA LUTESCENS.

A most elegant Palm. One of the best for general decorative purposes, easily grown, useful in every stage of growth, fine color, graceful habit, and pleases all. Price, 25 cents each; fine plants, \$1.00 to \$2.00 each.

SEAFORTHIA ELEGANS.

A most graceful Palm, eminently adapted for decorating greenhouse and garden. Makes a fine window plant. Leaves long, gracefully arched, dark green, and the whole plant is perfectly smooth. Price, 25 cents each; fine plants, \$1.00 to \$2.00 each.

PHŒNIX RECLINATA.

This favorite Palm is beautiful in all stages of growth. No plant is more easily grown and none more tenacious of life, enduring the dust, the cold and heat from open windows and gas-heated air of our dwellings. The demand for this particular kind is perhaps five times that of any other. Leaves are large, pinnated, of a cheerful green color, plant of hardy constitution, adapted to all decorative purposes, within or without doors. Price, 25 cents each; fine plants, \$1.00 to \$2.00 each.

A GREAT BARGAIN.
 Four choice Palms, our selection, for 40 cents.

KENTIA FORSTERIANA.

NOTICE. It may be well to state here that young Palms do not resemble the illustrations given, as they do not show their character leaves until the second year, so that when you get your small Palm plants and see long, narrow leaves, instead of the character leaves as shown in the illustration, do not think the wrong kind has been sent you.

NEW CARNATIONS.

MONTHLY, or
EVER-BLOOMING

CARNATION PINKS.

PRICE, 10 CENTS EACH.
ANY THREE FOR 25 CENTS.

THE ENTIRE SET OF EIGHT "PEERLESS" CARNATIONS FOR 60 CENTS.

There is no sweeter flower than the Carnation, and they are, without question, the best of all plants for Winter blooming. We have selected six of the very choicest kinds, including all colors of this delightful flower, and know you will not be disappointed in getting these varieties. They are large plants, ready to begin blooming at once. Many of them will be in bud when we send them to you.

The Divine Flower.

ABUNDANCE.—Flowers very large and perfect in form. Color a bright, rosy pink, with salmon shading when the flowers are fully expanded. A very healthy grower and remarkably free bloomer. Plant dwarf, growing about fourteen inches high. This we consider one of the best pink varieties ever offered, and an excellent variety for pot culture.

JUBILEE.—Very dwarf, and of a nice, bushy growth, forcing very long flower stems, each individual flower possessing a stem varying from three to eight inches in length. It has perfectly formed flowers. Color a rich, bright, dazzling scarlet. We unhesitatingly recommend this sort.

DELLA FOX.—Its color is almost indescribable. Of a rosy orange shade, striped and flaked with carmine, never bursts its calyx, is very free and early flowering, and can always be cut with a long stem, a most desirable feature in a colored Carnation nowadays.

FIELD OF GOLD.—This is a pure yellow Carnation, of strong growth and very profuse flowering. There is no stripe at all in it, being a straight out and out deep, rich golden yellow, without any other color whatever, under any circumstances. The florets are large and double, as in Buttercup, and, taken all in all, it is the very best yellow Carnation out.

FAIRY PRINCESS.—This is the most beautiful Carnation we know of. The flowers are very large and perfect in shape. The color is a pure snow white, delicately pencilled with bright crimson. Elegantly fringed. A charming variety.

JACK FROST.—This variety is the largest white Carnation in cultivation. Often measures four inches in diameter. The flowers are of the purest white, with petals of great substance, making it one of the very best.

BON TON.—This is by far the darkest Carnation ever seen, and at the same time the most abundant bloomer. Brilliant dark red, shaded with the richest maroon, fringed petals, nearly every flower being on a long stem. This variety surpasses in richness of color the most perfect Jacqueminot Roses.

YELLOW JACKET.—The color of the flower is orange, flaked, and is broadly striped with delicate carmine. Very bright and attractive. Very fragrant. It has proved one of the freest bloomers within our knowledge, single plants often carrying forty to sixty buds and blossoms at one time. One of the very best varieties.

"Excelsior" Collection of New Carnations.

Price, 10 cents each; any three for 25 cents.
The entire set of eight "Excelsior" Carnations for 60 cents.

TRIUMPH.—This variety has been greatly admired for its desirable color, wherever it has been seen, being a beautiful, pure, rich pink, flowers large size and very freely produced. Plant of grand habit and vigorous growth. It is a superb variety.

ROSE QUEEN.—One of the most fragrant Carnations we have seen. Color a pure soft rose, a most continuous bloomer and distinct in color from any other sort offered. Greatly admired by all who have seen it growing here.

SUNRISE.—An entirely distinct color, orange ground, striped with crimson, flowers full, double, fringed, and of rich color and fragrance, unsurpassed by any variety in its profusion of bloom, and of a strong, vigorous, healthy growth, hitherto unknown in the yellow or orange colors. A variety certain to become a standard sort, as it possesses every good quality.

HELEN KELLER.—A most superb Carnation, one that has created a sensation everywhere. The flowers are very finely shaped, and they often measure four and one-half inches in diameter. Flowers a pure white, with distinct markings of Carnation red.

ALASKA.—This beautiful white Carnation is remarkable for its extremely vigorous growth, very large flowers, perfect shape, purest white. Indeed, for size and freedom of bloom, purity of color, which is immaculate, sweetness of perfume that is delicious, and vigorous growth, this variety has no equal. The best white by far of a dozen varieties we have of that color.

PAINTED LADY.—Another grand Carnation, with enormous sized flowers, often measuring three and a half inches in diameter, and at the same time being one of the freest blooming Carnations we have ever seen. Ground color of flower the purest white, very handsomely pencilled with richest crimson.

EMPRESS.—The color is of the darkest and most intense velvety crimson maroon, very dark, at the same time very bright.

ARMANDINDY.—The "Pink of Perfection." Probably the most beautiful Carnation yet introduced, and must become very popular. Flowers are a pure satiny white, and marked and shaded with rosy pink, good size, perfect form, never bursts. It is the strongest and sweetest scented Carnation we know. A perfect beauty.

The popularity of Ferns has increased wonderfully in the past few years, and they are now indispensable in all choice floral decorations, and are especially valuable for ferneries, for room and table decorations. No collection of plants is complete without Ferns.

Lygodium Scandens.—(*The Japanese Climbing Fern.*) This makes a growth of from eight to fifteen feet, and is a very graceful, dainty and desirable variety. Price, 15 cents each.

Nephrolepis Exaltata Bostoniensis.—(*The Boston Sword Fern.*) In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepis, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. Good plants, 15 cents each; strong plants, 35 cents each.

Nephrolepis Compacta Cordata.—(*New Sword Fern.*) In our estimation this variety is the finest of all Sword Ferns. It is of a free, strong growing, compact habit, attaining, when fully grown, a height of about two feet. The fronds are of a dark green color, very rich, of upright growth, with just sufficient arch in them to make them graceful. For house culture or for window gardening we don't know of any other variety that would give the same satisfaction and which we could recommend so highly. Price, 15 cents each; large, fine plants, 35 cents each.

Nephrolepis Exaltata.—In well grown specimens the fronds attain a length of five feet, but only one to three inches wide, like plumes, arching over in every direction in a most graceful manner. Price, 15 cents each.

Pteris Tremula.—(*Shaking Fern.*)—The slightest movement of the air shakes the leaves of this Fern, which we recommend as being very desirable for house culture. It grows readily and very fast. Price, 25 cents each.

Pteris Argyræa.—(*The Silver Fern.*) A very showy Fern, with light green fronds, with a broad band of silver white down the center of each. Very distinct and beautiful. Price, 35 cents each.

CULTURE OF HARDY BULBS FOR FALL PLANTING IN THE GARDEN.

The Culture of Tulips, Narcissus, Crocus, Lilies, etc., is the same as given here for Hyacinths. No one should fail if they carry out these simple suggestions.

The Preparation of Beds and Borders for Planting Hyacinths, Tulips, Etc.

The proper season to prepare for planting Hyacinths, Tulips, Lilies, etc., is in the Fall, October being the best month, but any time before freezing will do. Don't put off sending for Dutch Bulbs until Spring, as it is then out of season to plant them. It would be as proper for a farmer to order seed corn and plant it in the Fall as for flower lovers to order Hyacinths, Tulips, etc., in the Spring and plant them then. The beautiful beds you see on your neighbor's lawns of Hyacinths, Tulips, etc., were planted in the Fall. If the soil is well drained, deep digging is all that is necessary, and apply a liberal dressing of well rotted cow manure. This should be thoroughly dug into the soil, pulverizing it and the soil as finely as possible. When your Bulbs are through blooming do not ruthlessly cut off their heads. Let them remain and by the first week in May you can plant Verbenas in between as thickly as you may without disturbing the Bulbs in any way. Instead of Verbenas you can sow seed of Portulaca, or by the twentieth of the month plant Coleus in the same manner. Cut out the flower spikes of your Bulbs as soon as they are done blooming, but do not touch a leaf until after they turn yellow, which will be towards the first of June. Then cut off with a sharp knife, an inch below the surface, rake over the bed and then leave them strictly alone. The beds can be cleaned of their summer occupants after they are injured by frost, when a layer of manure or leaves should be spread over the surface to remain until frost is over the next Spring. The same program may be carried out another year.

Various Uses for Dutch Bulbs.

Large beds devoted to bedding plants may be utilized for Hyacinths, Tulips and Crocus after frost has killed the bedding plants. The best effect in these can be had by planting Hyacinths, Crocus and Tulips in the same beds, and each sort planted as thickly as if it alone were to occupy the bed. The Crocus will bloom first, and after they are entirely done the Tulips or Hyacinths, whichever may be planted, will come into bloom. In this style of planting the Tulips or Hyacinths should be planted first, about four inches deep. Mulch the beds with three or four inches of stable manure, which should be removed in early Spring.

Making a Hardy Border.

If the soil is poorly drained, the preparation of the border would be the same, except the soil should be entirely removed to the depth of two and one-half feet and six or eight inches of broken stone placed in the bottom of the border. The size and location of the border depends upon the taste and opportunities of the individual. Along the face of a vegetable garden, or on both sides of a walk running through it, is a desirable location, and the high culture necessary to raise good vegetables will be of benefit to the plants. If back of such a border a rustic trellis is made and covered with flowering climbers, such as Clematis, Honeysuckles and Everlasting Peas, the effect will be greatly enhanced. Along the fence is another good location for a hardy border, and the fence will serve the purpose of a trellis for hardy vines. Along the fence of a shrubbery is a most effective place for hardy border, and among the shrubs may be planted the taller growing Lilies and perennials with beautiful effect, and when it is not possible or desirable to make a border on the face of a shrubbery the recesses usually there could be most charmingly filled with Narcissus and many beautiful low-growing perennials. After planting, mulch the border with three or four inches of stable manure, which should be removed in early Spring and the planting of the border completed as soon as possible. Remember always, no matter how hardy the bulb or plant may be, its bloom will be improved by the winter covering of manure or other covering.

BULBS are especially valuable for out-door planting, as they bloom at a time when the garden is utterly destitute, and make it gay and attractive. Scillas, Snowdrops and Crocus appear as soon as the snow is away, and are quickly followed by Hyacinths, Narcissus, Tulips, etc. The display which a few of the Bulbs make in the early Spring is indeed charming, and they are always appreciated more than other class of flowers, for they come when most needed. The many forms and rich and varied colors of the Tulip make this Bulb the most important of all garden flowers for a gay and dazzling display. For delicate fragrance and refined beauty and grace the Narcissus, with its great variety of form and charming colors, is always admired and is one of the most pleasing of all bulbous plants. Of Hyacinths we need not speak, for they are well known; the large, round spikes of bloom in a garden or window lend a charm which no other plant can rival. No class of flowers are so easy to grow or surer to bloom than Bulbs, and it is an established fact that they always surprise those who plant them by proving much better than one unacquainted with them can imagine.

We are headquarters for fine Roses of all kinds. As we make a specialty of them, growing, as we do each year, a million and a half, we know we can supply your wants in this line with the best plants and varieties, both old and new. Also all kinds of Chrysanthemums, Geraniums, Begonias, Fuchsias, etc.

Culture of Dutch Bulbs for Winter Blooming in Pots.

BULBS are the most important Winter bloomers for window culture. They are the easiest cared for of all flowers, and absolutely sure to bloom abundantly. Geraniums or Roses may from some cause fail, but Bulbs never. Nothing is more pleasant or cheerful during a dreary Winter than a few pots filled with Hyacinths, Tulips, Crocus, Narcissus, etc., displaying their brilliant colors and delightful fragrance for weeks. Add to these the many new Bulbs that are now being cultivated for Winter flowers, and at a very little trouble or expense a display of Winter flowers can be procured which will be the center of attraction in any neighborhood. Freesias, Ixias, Tritolea, Calochortus, Alliums, Scillas, Chionodoxa, etc., are comparatively new and beautiful beyond description. Those grand new Bulbs, Freesias and Tritoleas, which keep in bloom several weeks in mid-winter, are worth their weight in gold. Such gems should decorate every home during the dismal Winter days. Their culture is very simple. They can be potted during September, October or November, watered well and set away in a cellar or any cool, dark place to make roots, when, after remaining for six weeks, or as much longer as desired, they can be brought out for blooming. We earnestly advise potting the Bulbs as early as possible, especially if flowers are desired as early as New Year's, for the longer time they can have to make roots the better they will bloom. By bringing out a few pots at different times a succession of bloom can be kept up all Winter. If they are kept in a cool place while in bloom the flowers will keep perfect a long time. For the benefit of those who desire more explicit cultural directions we give it here in detail.

SOIL.

The variety of the soil is not a very important item in Bulb culture. Any good garden loam will answer, but if we had a variety to choose from we would take a rich, sandy soil and mix with it a small quantity of leaf mold. Do not use manure unless it is very old and well pulverized, and then only in small quantities, or it may cause the Bulbs to decay, or encourage too rank growth of foliage.

Hyacinths in Pots for Winter Flowering.

For the growth of Hyacinths in pots the most favorable planting season for early bloom is September, and for a succession at intervals up to January. The size of pots is regulated by the space or convenience for placing them; when limited, and a rich, massive effect is wished for, those of six or eight inches in diameter are recommended, in which three or four Bulbs may be placed. But where more convenience is had a succession of Bulbs in smaller pots may be admitted—two Bulbs in each are very pretty. In potting it is only necessary to fill the pot rather loosely to the brim and press the Bulb down so

Hyacinths in Pot.

that only one-fourth of it appears above the soil. The pot should then be struck smartly on the bench to give the soil proper degree of firmness, leaving it when finished an inch or so below the rim of the pot. Then water freely to still further settle the soil. The pots should then be placed where it is cool and dark, which will encourage a strong development of roots before the buds start to grow at the top. Such a situation can be made by covering up the pots with four inches of sand in a cool cellar, under the stage of a cool greenhouse, or in a sunken pit, in each covering with sand or leaves so as to exclude heat and frost; for it must not be forgotten that a strong development of root can only be had at a low temperature, say from forty to fifty degrees, and any attempt to force them to make roots quickly by placing them in a high temperature will certainly enteeble the flower. Whether potted in soil, sand or moss, there is no need to water,

except at the time of potting, provided the pots have been covered up as directed, and kept cool and dark. If potted in October they may be removed from their dark quarters in seven or eight weeks; they should then be placed in full light and watered freely.

Hyacinths in Glass for Winter Blooming.

For this purpose Single Hyacinths are to be preferred. Single Hyacinths are generally held in less estimation than Double ones; their colors, however, are more vivid, and their bells though smaller, are more numerous; some of the sorts are exquisitely beautiful; they are preferable for flowering in Winter to the Double ones, as they bloom two or three weeks earlier and are very sweet scented. Hyacinths intended for glasses should be placed in them during October and November, the glasses being previously filled with pure water, so that the bottom of the Bulb may just touch the water;

then place in a dark closet, box or cellar, at forty or fifty degrees temperature. The water should be changed as it becomes impure; draw the roots entirely out of the glasses, rinse them in clear water, and wash the inside of the glass well. Care should be taken that the water does not freeze, as it would not only burst the glass, but cause the roots to decay. Whether the water is hard or soft is not a matter of much consequence—soft is preferable—but it must be perfectly clear, to show the roots to advantage. Avoid a low water mark in the glasses by keeping it to a level with the base of the Bulb. Never place the glass upon a mantel-piece or shelf within the influence of fire heat during the process of growth. To stimulate and strengthen the growth dissolve a pinch of sulphate or ammonia occasionally in the water after the Bulbs are exposed to the light. When the glasses are well filled with roots and the flower stem well out of the Bulb, gradually expose to the light and sun at a higher temperature. If kept too light and warm at first and before there is sufficient fibre they will rarely flower well. They will bloom without any sun, but the colors of the flowers will be inferior. To insure a vigorous growth a favorable exposure to the light and occasional fresh air, when mild, is essential to their success.
